NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport

---

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or be telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e. g. Long Beach omnirange (Voice) .-.. --- -... .... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i. e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control tower. Where there is no control tower, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

ATTENTION SIGNAL L/MF RANGES: Beginning 0001Z Nov 15, 1957, transmission of the attention signal preceding scheduled broadcasts on L/MF ranges will be discontinued. The attention signal will continue to be transmitted preceding special broadcasts and as deemed necessary to alert pilots using the L/MF range system that a voice transmission is about to be made.

ARMY EXERCISE, "ALL AMERICAN", (TAC-AIR 58-2): This military exercise will take place 3-18 December 1957 (with 5-9 December as the period of most intense activity) from 0600 EST through 1800 EST, at an altitude of 600' to 2000' during VFR conditions, days, within a 100 n mi radius of Fort Bragg, North Carolina. This activity will involve heavy concentrations of aircraft (maximum of 120 troop carrier and 8 jet type) in formations and streams entering and leaving the Fort Bragg Restricted Area (R-115) in support of airborne maneuvers.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1 WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

1957 FLIGHT INFORMATION MANUAL NOW AVAILABLE: Flight Information Manual, Vol. II, dated August 15, 1957, is now available from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., at 50 cents per copy.

OPERATING PROCEDURES FOR FLIGHT WITHIN THE CONTINENTAL CONTROL AREA: Effective December 1, 1957, all airspace at and above 24,000'MSL above the continental United States (excluding Territory of Alaska), excluding prohibited and restricted areas penetrating the 24,000' level, has been designated as control area. This airspace is to be known as the "continental control area." Certain new regulations and procedures govern flight in this area and all pilots and other personnel concerned with operation above 24,000' should be familiar with them. Following is a summary of the method by which flight operations and air traffic control are conducted in the continental control area.

I. VFR OPERATION:

A. Visibility and Cloud Proximity Minimums - For VFR opern within the continental control area, flgt visibility must be at least 5 mi and acft must not be flown less than 1000' vertically and 1 mi horizontally from any cloud formation.

B. Cruising Altitudes:

1. From 24,000' through 28,000' (excluding arwys). To assist pilots operg under VFR in maintaining separation, the following cruising alts should be adhered to as good operg practice from 24,000' through 28,000':

Magnetic Crs	Indicated Altitudes
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or above 29,000'. Use of the following cruising alt for VFR flgt is required by regulation everywhere at or above 29,000':

Magnetic Crs	Indicated Altitudes
0-89° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
90-179° inc.	4000' intervals beginning at 30,000' (30,000', 34,000', etc.)
180-269° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)
270-359° inc.	4000' intervals beginning at 32,000' (32,000', 36,000', etc.)

II. ON-TOP OPERATION: Flgts made under VFR conditions on top within the continental control area must observe the new visibility and cloud proximity minimums and cruising alt rules for VFR opern in the continental control area. Opern of these flgts is otherwise unchanged. (Pilots are reminded that when cleared "VFR conditions on top" by air tfc control, tfc separation is not provided by air tfc control.)

III. IFR OPERATION: All IFR operns at and above 24,000'MSL within the continental control area will receive air tfc control service.

A. At and above 27,000'MSL - To simplify high alt navigation, a limited number of VOR, TACAN, VORTAC and L/MF facilities have been designated for high alt use. These navigation aids are the only ones which may be used for IFR routing at and above 27,000' and are depicted on special high alt charts.

The high-altitude facilities have been used to delineate a system of high-altitude tracks called "Jet Routes". These routes are coded on the charts by the letter J, followed by the appriate route number, followed by the letter V, T, or L to indicate the type of navigation to be used. For example:

J22V . . . . . VOR or VORTAC Jet Route #22
J19T . . . . . TACAN Jet Route #19
J3L . . . . . L/MF Jet Route #3

Use of the designated high-altitude route structure will facilitate air tfc control, and all pilots are requested to use the designated route structure to the maximum extent possible. However, use of this route structure is not mandatory. Pilots may conduct direct flgt off the designated Jet Routes, provided the acft will be flown on a route defined by the high-altitude facilities, and provided further that the facilities selected to define the route are not more than 300 n mi apart.

Routes flown at 27,000' and above will not have a defined width as is the case on arwys at the lower levels. The track to be made good will be direct between the navigation aids or fixes defining the Jet Route, or direct between the high-altitude facilities defining the route for flgts made off the designated Jet Routes.

All high-altitude facilities and a small number of intsxns formed by these aids will be designated as compulsory reporting points. When needed for tfc control purposes, pilots may be requested to make additional position reports.

Other navigation aids (TACAN, VOR, VORTAC, AND L/MF) not designated as high-altitude facilities will be used for routing or navigating of acft to and from the high-altitude Jet Route structure which begins at the 27,000' level. This routing may be via the Victor or colored arwy systems, or direct between navigation aids.

Since most flgt activity at 27,000' and above will be by military acft, only those charts prepared by the U.S. Air Force Aeronautical Chart and Information Center will be avail on the inception date of control of all airspace at and above 24,000'. In recognition of the fact that there will be some civil need for these charts, arrangements have been made for civil distribution of the Air Force charts through the United States Coast and Geodetic Survey.

B. Below 27,000' - Although the continental control area extends from 24,000' upward, the Jet Route structure does not commence until the 27,000' level is reached. The colored and Victor arwys extend up to, but do not include the 27,000' level.

Acft operg below 27,000' within the continental control area (from 24,000' through 26,000') may operate on the colored or Victor arwys, or fly direct between any Federally operated navigation aids.

In the case of direct flgts (from 24,000' through 26,000') the aids selected to define the route must not be more than 200 n mi apart, and the track to be made good will be direct between aids. The aids selected will be compulsory reporting points, and other position reports may be requested by air tfc control when needed.

C. Cruising Altitudes - Acft operg in accordance with IFR within the continental control area must be flown at the alts assigned by air tfc control. To assist pilots in flgt planning for IFR operns, the following system of altitude selection may be used:

1. From 24,000' through 28,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or Above 29,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
180-359° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)

While controllers will normally use the above system, other altitudes may be used in certain cases. Pilots are cautioned to fly at the alt assigned by air traffic control.

IV. AIR/GROUND COMMUNICATIONS: The CAA is currently installing a VHF and UHF air/ground communications system which will provide direct pilot-controller rdo communications throughout the continental control area. This system will be only partially installed at the time control of all airspace above 24,000' is commenced; therefore, interim communications will be conducted as follows:

Ground Facility	VHF	UHF
A. ARTC	Discrete channel as directed	301.4 or discrete channel as directed
B. ATCS	126.7/126.7, 122.1/VOR or 122.2, 135.0/135.9	255.4 or 301.4 where avail.
C. Airline company radio stations	Company frequency	none

IFR flgts should use direct ARTC controller-pilot communications, where available.

V. SPECIAL OPERATIONS: Certain mil operns cannot be conducted in accordance with the above, for example, missions involving use of radar navigation. Such cases are to be considered exceptional in nature and will be handled by special procedures.

Flgts using celestial navigation will be required to operate VFR or "VFR conditions on top" for those portions of the flgt where celestial navigation is involved. TACAN-only equipped acft will also be required to operate VFR or "VFR conditions on top" for those portions of flgts where designated high-altitude TACAN facilities are more than 200 or 300 n mi apart, as the case may be.

Questions concerning these operns or any phase of the control of all airspace above 24,000' should be referred to the appropriate CAA air route tfc control center.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2000'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2000' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

PART 600 REVISED: The recent amendments to Part 60 of the Civil Air Regulations adopted by the Civil Aeronautics Board on October 1, 1957, (22 F.R. 7897), authorizing the Administrator to designate a continental control area, specify that the present system of Colored and Victor airways will extend up to but not include 27,000 ft MSL. At and above 27,000 ft MSL, navigation will be conducted primarily on designated high altitude L/MF or VOR facilities which will serve to define the routes to be flown. Such routes, which will be no longer known as civil airways, will be established by the Administrator as Jet Routes and prescribed in Part 602 of this Title. In addition, in order to implement the provisions for a continental control area, the definition of a civil airway is amended to provide that a civil airway extends upwards to, but not including 27,000 ft MSL, within the continental control area.

Since Part 60 was amended some time ago by substituting the term "prohibited area" for "airspace reservation", this amendment now provides for the exclusion of prohibited areas instead of an airspace reservation from the airspace designated as a civil airway.

The explanation of terms is also amended to provide that all bearings used in this part shall be true from the point of origin. This editorial provision eliminates the necessity of repeating the word "true" after each bearing in each airway description.

Inasmuch as the adoption of the amendments to Part 60 by the Board afforded interested persons an opportunity to express their views and comments respecting the redesignation of the civil airways to conform with the amendments to Part 60, further notice and public procedure in accordance with Section 4 of the Administrative Procedure Act is unnecessary and contrary to the public interest. Therefore, the amendment as proposed will become effective on December 1, 1957.

Part 600 is amended as follows:

1. Section 600.2 is amended by adding new paragraphs (d), (e), and (f) to read as follows: 600.2 Explanation of Terms.

(d) As used in this Part all bearings shall be true from the point of origin.

(e) As used in this Part the continental United States shall mean all of the several States of the United States (including the District of Columbia) and the territorial waters and the overlying airspace thereof.

(f) As used in this Part the United States shall mean the territory comprising the several States, Territories, possessions, and the District of Columbia (including the territorial waters thereof) and the overlying airspace, but shall not include the Canal Zone.

2. Section 600.3(a) is amended to read as follows: 600.3 Extent of civil airways.

(a) Unless otherwise specified in Subparts B and C, each civil airway shall include the navigable airspace of the United States above all that area on the surface of the earth lying within 5 miles of the centerline prescribed for each such airway: Provided, That a civil airway lying within the continental United States shall not include the airspace at and above 27,000 ft MSL: Provided further, That a civil airway shall not include any of the airspace of a prohibited area as defined in Part 60 of this title.

PART 601 REVISED: Pursuant to the recent amendments to Part 60 adopted by the Civil Aeronautics Board on October 1, 1957, (22 F.R. 7897), which authorizes the Administrator to designate a continental control area within the United States at and above 24,000 ft MSL, exclusive of prohibited and restricted areas, Part 601 is hereby amended to designate a continental control area. Within the area so designated, air traffic control is to be exercised and the air traffic rules of Part 60 shall apply.

Since the adoption of the amendments to Part 60 by the Board on October 1, 1957, afforded interested persons an opportunity to express their views and comments respecting the designation of this continental control area, in the interest of safety in air commerce, further notice and public procedure in accordance with the Administrative Procedure Act is unnecessary and contrary to the public interest. Therefore, the designation of the continental control area is adopted to become effective on December 1, 1957. In order to accomplish this designation, Part 601 is amended to read as follows:

1. By amending the title of Part 601 to read as follows: Part 601-Designation of the Continental Control Area, Control Areas, Control Zones, and Reporting Points.

2. By amending Sections 601.1 through 601.9 of Subpart A to read as follows:

SUBPART A—INTRODUCTION GENERAL

601.1 Basis and purpose. The basis of this part is found in sections 205 and 601 of the Civil Aeronautics Act of 1938, as amended, and Part 60 of this title. The purpose of this part is to designate the continental control area, control areas, control zones, and reporting points in order to provide for the safety of aircraft operating in interstate, overseas, and foreign air commerce.

601.2 Explanation of terms. As used in this part:

(a) "Control area" shall mean the airspace within an area designated in Subparts B and C, extending upward from an altitude of 700 ft. above the surface, but not including the airspace within that area designated as the continental control area. Within a control area air traffic control is exercised in accordance with the air traffic rules of Part 60.

(b) "Continental control area" shall mean the airspace above 24,000 ft MSL, within the continental United States as designated in Section 601.7101 of this part, within which air traffic control is exercised in accordance with the air traffic rules of Part 60.

(c) "Control zone" shall mean the airspace within an area designated in Subpart D, upward from the surface to include one or more airports and within which rules additional to those governing flight in control areas are prescribed in Part 60 of the Civil Air Regulations, for protection of air traffic.

(d) "Reporting point" shall mean a geographic location in relation to which the position of an aircraft shall be reported in accordance with the requirements of Section 60.47 of this title.

(e) "Mile" means "statute mile" unless otherwise specified in this part.

(f) All bearings shall be true from the point of origin.

CONTROL AREAS

601.9 Lateral extend of control areas. Where a point or intersection prescribed in this Part for designating a control area coincides with a point or intersection specified in designating the centerline of civil airways, the control areas shall include all of the airspace within 5 miles either side of a straight line extended through the center of the points or intersections specified in designating the civil airways and all of the airspace within a 5 mile radius of such points or intersections unless otherwise provided in Subparts B, C and F. In addition, such control areas shall include all the airspace between straight lines connecting the center of the points or intersections specified in designating the main and associated alternate VOR civil airways, unless otherwise specified.

3. A new Subpart H is added to read as follows:

SUBPART H—CONTINENTAL CONTROL AREA

601.7101 Designation of Continental Control Area. The Continental Control Area shall consist of all the airspace above the several states of the United States (including the District of Columbia), and the territorial waters thereof, at and above 24,000 ft MSL, exclusive of restricted and prohibited areas prescribed by Executive Order or in Part 608 of the Regulations of the Administrator.

NEW PART 602 ISSUED: The recent amendments to Part 60 of the Civil Air Regulations, adopted by the Civil Aeronautics Board on October 1, 1957, 22 F.R. 7897, authorized the Administrator, among other things, to designate a continental control area at and above 24,000 ft MSL. Moreover, as stated in the preamble to such amendments, the present system of Colored and Victor airways will extend up to but not include 27,000 ft MSL, within the continental control area. At and above such altitude the Administrator will establish a jet route structure and establish navigational aids for the navigation of jet aircraft within the continental control area.

In view of the above, the Administrator hereby adopts a new Part 602 establishing jet routes within the continental control area. These jet routes are established as direct courses between two or more high altitude navigational facilities or the intersections of their signals and codified for convenience of the users.

In addition to the coded jet routes, this Part also establishes navigational facilities or intersections of their signals between which aircraft may also navigate outside of the coded jet route system.

The jet routes will have no defined width. In view of the operational requirements of Section 60.45 (b), that aircraft be flown along the direct courses between navigational aids or fixes defining the route, air traffic control will be exercised on the assumption that aircraft are being flown in compliance with this requirement and lateral separation will be provided accordingly.

Since the adoption of the amendments to Part 60 by the Board afforded interested persons an opportunity to express their views and comments respecting the establishment of high altitude navigational routes, and the amendments have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, further notice and public procedure in accordance with Section 4 of the Administrative Procedure Act is unnecessary and contrary to public interest. Therefore, this Part is adopted to become effective December 1, 1957.

SUBPART A—INTRODUCTION

602.1 Basis and purpose. The basis of this part is found in Section 205 and Section 601 of the Civil Aeronautics Act of 1938, as amended, and in Part 60 of this title. The purpose of this part is to establish coded jet routes between navigational aids, or intersections of their signals, as well as other navigational aids and the intersections of their signals along

and between which aircraft may be operated within the continental control area at or above 27,000 ft MSL.

602.2 Explanation of terms. As used in this Part, terms shall be defined as follows:

(a) "Established Navigational Aid" shall mean navigational facilities or intersections of their signals, which may be used for the navigation of aircraft within the continental control area at and above 27,000 ft MSL.

(b) "Coded jet route" shall mean a direct course for the navigation of aircraft at and above 27,000 ft MSL, within the continental control area, between points of intersections specified for such route. Jet routes are codified as follows:

(1) L/MF jet routes: (i) even numbered routes, (ii) odd numbered routes.

(2) VOR/VORTAC jet routes: (i) even numbered routes, (ii) odd numbered routes.

(3) TACAN jet routes: (i) even numbered routes, (ii) odd numbered routes.

(c) "Mile" means "statute mile" unless otherwise specified in this part.

(d) "Continental control area" shall mean all the airspace above the several states of the United States (including the District of Columbia), and the territorial waters thereof, at and above 24,000 ft MSL, exclusive of restricted and prohibited areas prescribed by Executive Order or in Part 608 of the Regulations of the Administrator.

(e) "INT" shall mean intersection.
(f) "RBN" shall mean radio beacon.
(g) "VOR" shall mean omnirange station.
(h) "RR" shall mean LF or MF radio range station.
(i) "VORTAC" shall mean a collocated VOR and TACAN.
(j) "TACAN" shall mean a military tactical air navigational aid.
(k) "CONSOLAN" shall mean low frequency long range navigational aid.
(l) "FM" shall mean fan marker.
(m) "ILS" shall mean instrument landing system.
(n) "TVOR" shall mean terminal omnirange station.
(o) "OM" shall mean instrument landing system outer marker.
(p) "MM" shall mean instrument landing system middle marker.
(q) "LF" shall mean low frequency.
(r) "MF" shall mean medium frequency.
(s) "VHF" shall mean very high frequency.
(t) As used in this part all bearings shall be true from the point of origin.

602.3 Direction of coded jet routes.

(a) Even numbers are normally assigned to coded jet routes established in a westerly to easterly direction between the initial and final points of such routes, even though portions of such routes may deviate from the westerly to easterly direction between any two or more established intermediate points.

(b) Odd numbers are normally assigned to coded jet routes established in a southerly to northerly direction between the initial and final points of such routes, even though portions of such routes may deviate from the southerly to northerly direction between any two or more established intermediate points.

602.9 Establishment of navigational aids. The points and intersections described in subpart B are established as navigational aids.

(See Federal Register, November 27, 1957, for the listing in subpart B.)

602.10 Establishment of jet routes. In addition to the established navigational aids, the direct courses between the points or intersections described in subparts C, D and E are established as coded jet routes.

(See Federal Register, November 27, 1957, for the listing in subparts C, D and E.)

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200' MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

V CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective January 16, 1958, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Green civil arwy No. 3 (Oakland, Calif. to New York, N.Y.) is amended by changing the caption and by changing all before "Sacramento, Calif. rdo rng stn;" to read: "From the Oakland, Calif. rdo rng stn via the Sacramento, Calif. rdo rng stn;" (Note: Deletes portion between Golden Gate intsxn and Oakland rng stn due to decmsng of San Francisco LFR)

(2) Green civil arwy No. 6 (Alice, Tex. to Norfolk, Va.) is amended by changing the caption and by changing all before "Corpus Christi, Tex. rdo rng stn;" to read: "From the Alice Tex. rdo rng stn via the Corpus Christi, Tex. rdo rng stn;" and by changing the name of the facility "Lake Charles, La. rdo rng stn;" to read: "Lake Charles, La., nondirectional rdo bcn;" (Note: Deleted portion between Laredo, Tex. and Alice, Tex.; changed Lake Charles facility to H in lieu of rdo rng stn.)

(3) Amber civil arwy No. 8 (Los Angeles, Calif. to Ellensburg, Wash.) is amended by changing the portion which reads: "From the intsxn of the NW crs of the San Francisco, Calif. rdo rng and the SW crs of the Travis AFB, Calif. rdo rng via" to read: "From the intsxn of the SW crs of the Travis AFB, Fairfield, Calif. rdo rng and a line bearing 309°T from the San Francisco Gap, Calif. nondirectional rdo bcn via." (Note: Change due to discontinuance San Francisco LFR - to be effective concurrently)

(4) Red civil arwy No. 15 (Reno, Nev. to Phoenix, Ariz.) is amended by deleting the portion which reads: "From the Las Vegas, Nev. rdo rng to the intsxn of the SE crs of the Las Vegas, Nev. rdo rng and the W crs of the Prescott, Ariz. rdo rng." (Note: a portion of this arwy between Las Vegas and Willow Beach intsxn added to Blue 67.)

(5) Red civil arwy No. 96 (Palacios, Tex. to Baton Rouge, La.) is amended by changing the name of the facility "Lake Charles, La. rdo rng stn;" to read: "Lake Charles, La. nondirectional rdo bcn;"

(6) Blue civil arwy No. 54 (Richmond, Calif. to Hamilton AFB, San Rafael, Calif.) caption changed and is amended to read: "From the intsxn of the NW crs of the Oakland, Calif. rdo rng and the SW crs of the Travis AFB, Fairfield, Calif. rdo rng to a point at lat 38-02-45 long. 122-31-40." (Note: Deleted portion between Evergreen H and San Francisco rng stn)

(7) Blue civil arwy No, 67 (Yuma, Ariz to Las Vegas, Nev.) is amended to read: "From the Yuma, Ariz. rdo rng stn via the Blythe, Calif. rdo rng stn; Needles, Calif. rdo rng stn; the intsxn of the N crs of the Needles, Calif. rdo rng and the SE crs of the Las Vegas, Nev. rdo rng to the Las Vegas, Nev. rdo rng stn." (Note: Added portion from Willow Beach intsxn to Las Vegas rng stn)

(8) VOR civil arwy No. 3 (Key West, Fla. to Presque Isle, Maine) is amended by changing the portion which reads: "Vero Beach, Fla. omni stn, including an E alternate from the West Palm Beach omni stn to the Vero Beach omni stn;" to read: "Vero Beach, Fla. omni stn, including an E alternate via the intsxn of the West Palm Beach omnirange 358°T and the Vero Beach omnirange 143°T radials;" (Note: Redesignated V3E between West Palm Beach VOR and Vero Beach VOR.)

(9) VOR civil arwy No. 7 (Miami, Fla. to Green Bay, Wis.) is amended by changing the portion which reads: "Cross City, Fla. omni stn, including a W alternate from the Fort Myers omni stn to the Cross City omni stn via the Tampa, Fla. omni stn and the intsxn of the Tampa omnirange 012°T and the Cross City omnirange 150°T radials and also an E alternate from the Lakeland omni stn to the Cross City omni stn via the Gainesville, Fla. omni stn;" to read: "Cross City, Fla. omni stn;" and by changing the portion which reads: "Graham, Tenn omni stn, including an E alternate from the Birmingham omni stn to the Graham omni stn via the point of intsxn of the Huntsville, Ala. omnirange 264°T and the Graham omnirange 158°T radials; Nashville, Tenn. omni stn;" to read: "Graham, Tenn, omni stn, including an E alternate from the Birmingham omni stn to the Graham omni stn via the point of intsxn of the Huntsville, Ala. omnirange 264°T and the Graham omnirange 158°T radials; intsxn of the Graham omnirange 069°T and the Nashville omnirange 254°T radials; Nashville, Tenn. omni stn;" (Note: Revoked V7W between Fort Myers VOR and Cross City VOR. Revoked V7E between Lakeland VOR and Cross City VOR. Put slight dog-leg in V7 between Graham VOR and Nashville VOR.)

(10) VOR civil arwy No. 16 (Los Angeles, Calif. to Boston, Mass.) is amended by changing the portion which reads: "Tucson, Ariz. omni stn;" to read: "Tucson, Ariz. omni stn, including a S alternate from the Phoenix omni stn to the Tucson omni stn via the Casa Grande, Ariz. omni stn and the intsxn of the Casa Grande omnirange 158° and the Tucson omnirange 273° radials;" and by changing the portion which reads: "Graham, Tenn. omni stn, including a S alternate from the Memphis omni stn to the Graham omni stn via the intsxn of the Memphis omnirange 081°T and the Graham omnirange 238°T radials; Nashville, Tenn. omni stn; Crossville, Tenn. omni stn, including a S alternate from the Graham omni stn to the Crossville omni stn via the Graham omnirange 099°T and the Crossville omnirange 257°T radials;" to read: "Graham, Tenn. omni stn, including a S alternate from the Memphis omni station to the Graham omni stn via the intsxn of the Memphis omnirange 081° and the Graham omnirange 238° radials; intsxn of the Graham omnirange 069° and the Nashville omnirange 254° radials; Nashville, Tenn. omni stn; intsxn of the Nashville omnirange 133° and the Crossville omnirange 257° radials; Crossville, Tenn. omni stn, including a S alternate from the Graham omni stn to the Crossville omni stn via the intsxn of the Graham 099° and the Crossville omnirange 257° radials, and also a N alternate from the Nashville omni stn to the Crossville omnirange via the intsxn of the Nashville omnirange 059° and the Crossville omnirange 291° radials;" (Note: Added V165 between Phoenix VOR and Tucson VOR. Redesignated V16 between Graham VOR and Nashville VOR and between Nashville VOR and Crossville by putting in dog-legs. Added V16N between Nashville VOR and Crossville VOR.)

(11) VOR civil arwy No. 17 (Laredo, Tex. to Goodland, Kans.) is amended by changing the portion which reads: "Gage, Okla. omni stn;" to read: "Gage, Okla. omni stn, including a W alternate via the intsxn of the Oklahoma City omnirange 282° and the Gage omnirange 133° radials;" (Note: Added V17W between Oklahoma City VOR and Gage VOR.)

(12) VOR civil arwy No. 18 (Dallas, Tex. to Charleston, S.C.) is amended by changing the portion which reads: "intsxn of the Augusta omnirange 090°T and the Charleston omnirange 301°T radials; to the Charleston, S.C. omni stn." to read: "intsxn of the Augusta omnirange 157° and the Allendale omnirange 261° radials; Allendale, S.C. omni stn; to the Charleston, S.C. omni stn." (Note: Redesignated V18 between Augusta VOR and Charleston VOR. Added Allendale VOR to V18.)

(13) VOR civil arwy No. 20 (Laredo, Tex. to Richmond, Va.) is amended by changing the portion which reads: "intsxn of the New Orleans omnirange 066°T and the Mobile omnirange 242°T radials;" to read: "Gulfport, Miss. omni stn;" (Note: Added Gulfport VOR to V20 between New Orleans VOR and Mobile VOR.)

(14) VOR civil arwy No. 35 (Miami, Fla. to Syracuse, N.Y.) is amended by changing the portion which reads: "Fort Myers, Fla. omni stn; Tampa, Fla. omni stn; Tallahassee, Fla. omni stn;" to read: "Fort Myers, Fla. omni stn; Tampa, Fla, omni stn; Cross City, Fla. omni stn, including an E alternate from the point of intsxn of the Tampa omnirange 153°T radials and the Tampa Intnl Arpt ILS lclzr S crs to the Cross City omni stn via the Tampa Intnl Arpt ILS lclzr, the intsxn of the Tampa Intnl Arpt ILS lclzr N crs and the Gainesville omnirange 190°T radial, and the Gainesville, Fla. omni stn; Tallahassee, Fla. omni stn;" (Note: Redesignated V35 between Tampa VOR and Tallahassee VOR via Cross City VOR. Added V53E between Tampa and Cross City.).

(15) VOR civil arwy No. 66 (San Diego, Calif. to Charlotte, N.C.) is amended by changing the portion which reads: "intsxn of the Culberson omnirange 090°T and the Midland omnirange 242°T radials;" to read: "intsxn of the Culberson omnirange 090°T and the Midland omnirange 243°T radials;" (Note; Changed Midland 242°T to 243°T.)

(16) VOR civil arwy No. 76 (Lubbock, Tex. to Galveston, Tex.) is amended by changing the portion which reads: "Austin, Tex. omni stn; to read: "Austin, Tex. omni stn, including a N alternate via the Lometa, Tex. omni stn;". (Note: Added V76N from San Angelo VOR to Austin VOR via Lometa VOR. Portion of R-343 conflicting with V76N to be rescinded concurrently.)

(17) VOR civil arwy No. 97 (Miami, Fla. to Minneapolis, Minn.) is amended by changing the portion which reads: "Tallahassee, Fla. omni stn, including an E alternate from the Tampa omni stn to the Tallahassee omni stn via the Cross City, Fla. omni stn;" to read: "Tallahassee Fla omni stn;" (Note: Revoked V97E between Tampa VOR and Tallahassee VOR.)

(18) VOR civil arwy No. 114 (Amarillo, Tex. to New Orleans, La.) is amended by changing the portion which reads: "From the Amarillo, Tex. omni stn via the Childress, Tex. omni stn, including a S alternate; Wichita Falls, Tex. omni stn;" to read: "From the Amarillo, Tex omni stn via the Childress, Tex. omni stn, including a N and a S alternate; Wichita Falls, Tex. omni stn, including a S alternate via the intsxn of the Childress omnirange 120° and the Wichita Falls omnirange 262° radials;" (Note: Added V14N between Amarillo VOR and Childress VOR. Added V14S between Childress VOR and Wichita Falls VOR.)

(19) VOR civil arwy No. 140 (Amarillo, Tex. to New York, N.Y.) is amended by changing the portion which reads: "Nashville, Tenn. omni stn, including a S alternate from the Dyersburg omni stn to the Nashville omni stn via the intsxn of the Dyersburg omni 104°T and the Graham omnirange 269°T radials, and the Graham, Tenn. omni stn;" to read: "Nashville, Tenn. omni stn, including a S alternate from the Dyersburg omni stn to the Nashville omni stn via the intsxn of the Dyersburg omnirange 104° and the Graham omnirange 269° radials, the Graham, Tenn. omni stn, and the intsxn of the Graham omnirange 069° and the Nashville omnirange 254° radials;" (Note: Added slight dog-leg to V140S between Graham VOR to Nashville VOR.)

(20) VOR civil arwy No. 157 (Miami, Fla. to Richmond, Va.) is amended by changing the portion which reads: "To the Gainesville, Fla. omni stn." to read: "Gainesville, Fla. omni stn, to the point of intsxn of the Gainesville omnirange 354°T and the Jacksonville, Fla. omnirange 273°T radials." (Note: Added new portion to V157 from Gainesville VOR to relocated Taylor Int.)

(21) VOR civil arwy No. 159 (Miami, Fla. to Albany, Ga.) is amended by changing the portion which reads: "Orlando, Fla. omni stn;" to read: "Orlando, Fla. omni stn, including an E alternate from the Vero Beach omni stn to the Orlando omni stn via the intsxn of the Vero Beach omnirange 339°T and the Orlando omnirange 123°T radials and also a W alternate from the West Palm Beach omni stn to the Orlando omni stn via the intsxn of the West Palm Beach omnirange 311°T and the Orlando omnirange 164°T radials;" (Note: Added V159E between Vero Beach VOR and Orlando VOR. Added V159W between West Palm Beach VOR and Orlando VOR.)

(22) VOR civil arwy No. 163 (Brownsville, Tex. to Oklahoma City, Okla.) is amended by

changing the portion which reads: "San Antonio, Tex. omni stn;" to read: "San Antonio, Tex. omni stn, including a W alternate via the intsxn of the Alice omnirange 334° and the San Antonio omnirange 183° radials;" and by changing the portion which reads: "Ardmore, Okla. omni stn intsxn of the Ardmore omnirange 350°T and the Oklahoma City omnirange 137°T radials; to the Oklahoma City omni stn, including a W alternate from the Ardmore omni stn to the Oklahoma City omnirange stn via the intsxn of the Ardmore omnirange 331°T and the Oklahoma City omnirange 180°T radials and also an E alternate from the Ardmore omni stn to the Oklahoma City omni stn via the point of intsxn of the Oklahoma City omnirange 107°T and the Tulsa, Okla. omnirange 228°T radials." to read: "Ardmore, Okla. omni stn; intsxn of the Ardmore omnirange 342° and the Oklahoma City omnirange 154° radials; to the Oklahoma City, Okla. omni stn, including a W alternate via the intsxn of the Ardmore omnirange 327° and the Oklahoma City omnirange 180° radials and also an E alternate via the point of intsxn of the Oklahoma City omnirange 107° and the Tulsa, Okla. omnirange 228° radials." (Note: Redesignated V163 and V163W between Ardmore VOR and Oklahoma City VOR. Added V163W between Alice VOR and San Antonio VOR.)

(23) VOR civil arwy No. 216 (Lamoni, Iowa, to Saginaw, Mich.) is amended to read: "From the Lamoni, Iowa, omni stn via the Ottumwa, Iowa, omni stn; to the Iowa City, Iowa, omni stn. From the Janesville, Wis. omni stn via the Muskegon, Mich. omni stn; to the Saginaw, Mich. omni stn." (Note: Added new portion to V216 from Lamoni VOR to Iowa City VOR via Ottumwa VOR.)

(24) VOR civil arwy No. 272 (Sayre, Okla. to Oklahoma City, Okla.) is amended to read: "From the Sayre, Okla. omni stn to the Oklahoma City, Okla. omni stn, including a N alternate and also a S alternate via the intsxn of the Sayre omnirange 101° and the Oklahoma City omnirange 242° radials." (Note: Added V272S between Sayre VOR and Oklahoma City VOR.)

(25) VOR civil arwy No. 292 (unassigned)

(26) VOR civil arwy No. 293 (West Palm Beach, Fla. to Tampa, Fla.) is added to read: "From the West Palm Beach, Fla. omni stn via the intsxn of the West Palm Beach omnirange 270°T and the La Belle omnirange 107°T radials; La Belle, Fla. omni stn; to the Tampa, Fla. omni stn." (Note: New arwy)

(27) VOR civil arwy No. 294 (unassigned)

(28) VOR civil arwy No. 295 (Vero Beach, Fla. to Cross City, Fla.) is added to read: "From the Vero Beach, Fla. omni stn via the intsxn of the Vero Beach omnirange 296°T and the Orlando omnirange 164°T radials; Orlando, Fla. omni stn; intsxn of the Orlando omnirange 284°T and the Cross City omnirange 150°T radials; to the Cross City, Fla. omni stn." (Note: New airway)

(29) VOR civil arwy No. 1520 (Los Angeles, Calif. to Washington, D.C.) is amended by changing the portion which reads: "From the Little Rock, Ark. omni stn via the Memphis, Tenn. omni stn;" to read: "From the Texico, N. Mex. omni stn via the Childress, Tex. omni stn; Wichita Falls, Tex. omni stn; McAlister, Okla. omni stn; Little Rock, Ark. omni stn; Memphis, Tenn. omni stn;" (Note: Added new part to V1520 from Texico VOR to Little Rock VOR.)

CONTROL AREAS:

(1) Green civil arwy No. 3 (Oakland, Calif. to New York, N.Y.) is amended by changing the caption.

(2) Green civil arwy No. 6 (Alice, Tex. to Norfolk, Va.) is amended by changing the caption.

(3) Blue civil arwy No. 54 (Richmond, Calif. to Hamilton AFB, San Rafael, Calif.) caption changed and is amended to read: "All of Blue civil arwy No. 54."

(4) VORcivil arwy No. 35 (Miami, Fla. to Syracuse, N.Y.) is amended by adding a new last sentence to read: "The airspace between the main arwy and its E alternate between the point of intsxn of the Tampa, Fla. omnirange 153°T radial with the Tampa Intnl Arpt ILS lclzr S crs and the Cross City, Fla. omni stn is excluded."

(5) VOR civil arwy No. 76 (Lubbock, Tex. to Galveston, Tex.) is amended to read: "All of VOR civil arwy No. 76 including a N alternate, but excluding the airspace between the main arwy and its N alternate between the San Angelo, Tex. omni stn and the Austin, Tex. omni stn."

(6) VOR civil arwy No. 97 (Miami, Fla. to Minneapolis, Minn.) is amended to read: "All of VOR civil arwy No. 97 including E and W alternates, but excluding all of the airspace below 2000' above MSL which lies beyond the continental limits of the United States."

(7) VOR civil arwy No. 159 (Miami, Fla. to Albany, Ga.) is amended to read: "All of VOR civil arwy No. 159 including an E alternate and W alternate, but excluding the airspace between the main arwy and its W alternate from the West Palm Beach, Fla. omni stn to the Orlando, Fla. omni stn."

(8) VOR civil arwy No. 114 (Amarillo, Tex. to New Orleans, La.) is amended to read: "All of VOR civil arwy No. 114 including N and S alternates."

(9) VOR civil arwy No. 216 (Lamoni, Iowa, to Saginaw, Mich.) is amended to read: All of VOR civil arwy No. 216."

(10) VOR civil arwy No. 272 (Sayre, Okla. to Oklahoma City, Okla.) is amended to read: "All of VOR civil arwy No. 272 including a N and a S alternate."

(11) VOR civil arwy No. 292 (unassigned)

(12) VOR civil arwy No. 293 (West Palm Beach, Fla. to Tampa, Fla.) is added to read: "All of VOR civil arwy No. 293."

(13) VOR civil arwy No. 294 (unassigned)

(14) VOR civil arwy No. 295 (Vero Beach, Fla. to Cross City, Fla.) is added to read: "All of VOR civil arwy No. 295."

CONTROL AREA EXTENSIONS:

(1) (Lake Charles, La.) is amended by adding the following portion to present control area extension: "and within 5 mi either side of the 058°T radial of the omnirange extending from the omni stn to a point 42 mi NE."

(2) (Sumter, S.C.) is amended to read: "The airspace N of Shaw Air Force Base bounded on the W by VOR civil arwy No. 37, on the N by the Greenville, S.C., control area extension (601.1014), on the NE by a line extending through points at lat 34-48-10, long. 80-10-30 and lat 34-31-00, long. 79-42-30, on the E by Amber civil arwy No. 7 and on the S by Red civil arwy No. 16, excluding the portion below 26,000'MSL which overlaps restricted area (R-114)."

(3) (San Francisco, Calif.) is amended to read: "All of the airspace in the San Francisco area bounded on the NE by VOR civilarwy No. 107, on the S by a line 5 mi SE of and parallel to the SW and NE courses of the Moffett NAS, Calif. rdo rng, on the W by a line 3 n mi offshore extending to the southern bndry of the San Francisco control area extension 601.1173, thence E along this bndry to lat 37-14-00, long. 122-24-55, thence N to lat 38-08-30, long. 122-54-00, thence NE to the point of intsxn of the western edge of VOR civil arwy No. 107 with lat 38-15-00." (Note: Redescribed due to discontinuance of San Francisco rdo rng; also, deleted portion NE of San Francisco and added to Oakland control area extension 601.1165.)

(4)(Omaha, Nebr.) is amended to read: "All of the airspace within a 25 mi radius of the Omaha rdo rng stn including the airspace SW of Omaha bounded on the N by VOR civil arwy Nos. 8-S and 6-S, on the E by VOR civil arwy No. 15, on the S by lat 40-00-00 to a point at lat 40-00-00, long. 96-55-00, on the W by long. 96-55-00 to a point at lat 40-30-00, long. 96-55-00 thence on the S by lat 40-30-00 to a point at lat 40-30-00, long. 97-20-00 thence on the W by long. 97-20-00 to VOR civil arwy No. 8-S and 6-S; the airspace SE of Omaha within a 25 mi radius of the Omaha omni stn bounded on the N by VOR civil arwy No. 6 and 8 and on the W by VOR civil arwy No. 15."

(5) (Oakland, Calif.) is amended to read: "The airspace SE of Oakland bounded on the SW by Blue civil arwy No. 10, on the SE by Blue civil arwy No. 60 and on the N by Red civil arwy No. 60; the airspace NE of Oakland bounded on the NW by Green civil arwy No. 3, on the E by Blue civil arwy No. 7 and on the S by Red civil arwy No. 60." (Note: the last portion was a part of San Francisco Control Area 601.1113 redesignated herein.)

(6) (Columbia, S.C.) is amended to read: "All of the airspace S of the Columbia omni stn bounded on the N by VOR civil arwy No. 56 on the NE by VOR civil arwy No. 53, on the S by VOR civil arwy No. 18 and on the W by VOR civil arwy No. 185 excluding the portion which overlaps Prohibited Area (P-378); the airspace SE of Columbia bounded on the N by VOR civil arwy No. 56, on the E by VOR civil arwy No. 3 and on the SW by VOR civil arwy No. 53, excluding the portion below 26,000'MSL between sunrise and sunset which overlaps restricted area (R-384)."

(7) (Albuquerque, N. Mex.) is amended by changing the words which read: "excluding the portion which conflicts with restricted area R-313." to read: "excluding the portion below 30,000'MSL which overlaps restricted area (R-313)."

(8) (Las Vegas, Nev.) is amended by changing the words which read: "on the NE by Red civil arwy No. 15 and on the E by Blue civil arwy No. 67." to read: "on the NE and E by Blue civil arwy No. 67."

(9) (Altus, Okla.) is amended to read: "All of the airspace bounded on the N by VOR civil arwy No. 140 between the Amarillo, Tex. and the Sayre, Okla. omni stn and by VOR civil arwy No. 272 between Sayre and Oklahoma City, Okla. omni stn, thence on the E by VOR civil arwy No. 77 to Wichita Falls, Tex. omni stn, thence on the S and SE by VOR civil arwy No. 114 to Amarillo, Tex. omni stn, excluding the portion which overlaps the Ft Sill restricted area (R-208); the airspace N of Altus Air Force Base bounded on the S by long. 99-38-00, on the NE by VOR civil arwy No. 17 and on the S by VOR civil arwy No. 272."

(10) (Denver, Colo.) is amended to read: "That airspace SW of Denver lying within a 34 mi radius of the Denver omni stn bounded on the N by VOR civil arwy 8 and on the E by Amber civil arwy No. 3 including the airspace within 5 mi either side of a line bearing 174°T extending from the Aurora nondirectional rdo bcn to a point 25 mi S; that airspace NE of Denver bounded on the E and NE by VOR civil arwy No. 19, on the SE by VOR civil arwy No. 160 and on the W by VOR civil arwy No. 89; that airspace SE of Denver bounded on the NE by VOR civil arwy No. 4, on the E by VOR civil arwy No. 19, on the SW by the Colorado Springs, Colo. control area extension and on the W by Amber civil arwy No. 3. The portion of this control area below 22,000'MSL which lies within restricted area (R-195) (published in 608.15 of this chapter) shall be used only after obtaining prior approval from Civil Aeronautics Administration Air Traffic Control." (Note: R-195 being amended to be at all times to 22,000'; charts to carry notation above)

(11) (Miles City, Mont.) is amended to read: "The airspace within a 20 mi radius of the Miles City, Mont. omni stn."

(12) (Pendleton, Oreg.) is added to read: "The airspace E of Pendleton bounded on the N by Red civil arwy No. 53, on the SW by Green civil arwy No. 10, and on the SE by a line drawn 5 mi SE of and parallel to the SW crs of the Walla Walla, Wash. rdo rng extending from Red 53 to Green 10."

(13) (New Orleans, La.) is added to read: "The airspace bounded by lines beginning at a point at lat 29-15-00, long. 90-40-00, thence extending SW to lat 28-15-00, long. 91-25-00,

thence W to lat 28-15-00, long. 92-05-00; thence NE to lat 29-15-00, long. 91-05-00, thence E to point of beginning at lat 29-15-00, long. 90-40-00, excluding the portion below 2500'MSL between the United States shoreline and the New Orleans Oceanic Control Area."

(14) (Vero Beach, Fla.) is added to read: "Within 5 mi either side of the Vero Beach omnirange 023°T radial extending from the Vero Beach omni stn to its intsxn with the Orlando Fla. omnirange 071°T radial, excluding the airspace below 10,000'MSL which lies outside the continental limits of the United States and excluding the airspace below 14,000'MSL which overlaps Warning Area W-158." (Note: prior ATC approval is required before entering the portion of this control area lying within Warning Area 497A)

CONTROL ZONES:

(1) (San Francisco, Calif.) is amended to read: "Within a 5 mi radius of the San Francisco Intnl Arpt, within 2 mi on the SW side of the 309°T radial of the San Francisco terminal omnirange extending from the terminal omni stn to a point 6-1/2 mi NW, within 6-1/2 mi on the NW side and 11 mi on the SE side of the 038°T radial of the San Francisco terminal omnirange extending from the terminal omni stn to a point 8-1/2 mi NE, and within 2 mi on the SW side of the 125°T radial of the San Francisco terminal omnirange extending from the terminal omni stn to a point 8-1/4 mi SE. The portions of the control zone which overlap the Oakland, Calif. control zone are excluded." (Note: Amended to use VOR radials in lieu of San Francisco LFR courses)

(2) (Lake Charles, La.) is amended to read: "Within a 5 mi radius of the Lake Charles Air Force Base, within 2 mi either side of a 180°T bearing extending from the Lake Charles nondirectional rdo bcn (LCH) to a point 10 mi S, and within 2 mi either side of the 334° and 154°T radials of the Lake Charles omnirange extending to a point 10 mi SE of the omni stn and to a point 10 mi NW of the Lake Charles AFB nondirectional rdo bcn (LKC)."

(3) (Shreveport, La.) is amended to read: "Within a 5 mi radius of Greater Shreveport Municipal Arpt and within 2 mi either side of the Greater Shreveport ILS lclzr front and back courses extending from the lclzr to a point 15 mi SE of the lclzr and to a point 5 mi NW of the ILS outer marker compass locater."

REPORTING POINTS:

(1) Green civil arwy No. 3 (Oakland, Calif. to New York, N.Y.) is amended by changing the caption and by deleting the following reporting point: "San Francisco, Calif. rdo rng stn;"

(2) Green civil arwy No. 6 (Alice, Tex. to Norfolk, Va.) is amended by changing the caption and by deleting the following reporting point: "Laredo, Tex. rdo rng stn;", and by chainging the name of the facility "Lake Charles, La. rdo rng stn" to read: "Lake Charles, La. nondirectional rdo bcn;" (Note: added Laredo to Red 32)

(3) Amber civil arwy No. 8 (Los Angeles, Calif. to Ellensburg, Wash.) is amended by changing the reporting point which reads: "the intsxn of the NW crs of the San Francisco, Calif. rdo rng and the SW crs of the Travis AFB, Calif. rdo rng;" to read: "the intsxn of the SW crs of the Travis AFB, Calif. rdo rng and a line bearing 309°T from the San Francisco Gap, Calif. nondirectional rdo bcn;"

(4) Red civil arwy No. 15 (Reno, Nev. to Phoenix, Ariz.) is amended to read: "No reporting point designation." (Note: Willow Beach intsxn deleted and added to Blue 67)

(5) Blue civil arwy No. 54 (Richmond, Calif. to Hamilton AFB, San Rafael, Calif.) is amended to read: "No reporting point designation."

(6) Blue civil arwy No. 67 (Yuma, Ariz. to Las Vegas, Nev.) is amended to read: "The intsxn of the N crs of the Needles, Calif. rdo rng and the SE crs of the Las Vegas, Nev. rdo rng."

(7) Red civil arwy No. 32 (Laredo, Tex. to Houston, Tex.) is amended to read: "Laredo, Tex. rdo rng stn; Kelly, Tex. rdo rng stn; Smithville, Tex. nondirectional rdo bcn; Richmond, Tex. rdo rng stn." (Note: Added Laredo rng stn which was removed from Green 6 herein)

VOR REPORTING POINTS:

(1) VOR domestic reporting points is amended by adding the following reporting points:

(a) Gainesville; Fla. omni stn (for acft operg at all alts).

(2) VOR domestic reporting points is amended by revoking the following reporting points:

(a) Las Banos Int: The intsxn of the Modesto, Calif. omnirange 176°T and the Fresno, Calif. omnirange 287°T radials.

(b) Half Moon Bay Int: The intsxn of the Oakland, Calif. omnirange 217°T, the Salinas, Calif. omnirange 319°T and the San Francisco, Calif. omnirange 281°T radials.

(c) San Bruno Int: The intsxn of the San Francisco, Calif. omnirange 305°T and the Oakland, Calif. omnirange 218°T radials.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.

2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.

3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

✓ HOLDING PATTERNS: The following holding patterns have been designated, redesignated, or cancelled and shall become effective January 16, 1958:

DESIGNATED:

(1) WASHINGTON, OKLA. (VHF) INTSXN - direction of holding - SE on 144°M radial of the Oklahoma City, Okla. VOR; direction of turns - right; time - 1 min; min alt 4000'.

(2) EDMOND, OKLA. (VHF) INTSXN - direction of holding - NE on 030°M radial of the Oklahoma City, Okla. VOR; direction of turns - right; time - 1 min; min alt 3100'.

(3) BROOKSVILLE, FLA. (VHF) INTSXN - direction of holding - N on N crs of the Tampa, Fla. ILS lclzr; direction of turns - right; time - 2 mins; min alt 1500'.

(4) MONET, FLA. (VHF) INTSXN - direction of holding - NW on the 310°M radial of the West Palm Beach, Fla. VOR; direction of turns - right; time - 1 min; min alt 2000'.

(5) PLAINS, MICH. (VHF) INTSXN - direction of holding - NW on the 320°M radial of the Windsor, Ont. VOR; direction of turns - right; time - 1 min; min alt 2700'.

(6) WAYNE, MICH. (VHF) INTSXN - direction of holding - E on the 254°M radial of the Windsor, Ont. VOR; direction of turns - right; time - 1 min; min alt 2300'.

(7) SALINE, MICH. (VHF) INTSXN - direction of holding - W on the 264°M radial of the Windsor, Ont. VOR; direction of turns - left; time - 1 min; min alt 2300'.

(8) BISHOPVILLE, S.C. (VHF) INTSXN - direction of holding - NE on the 030°M radial of the Shaw, S.C. TVOR; direction of turns - left; time - 1 min; min alt 3000'.

(9) FAIRFIELD, WASH. (LF & VHF) INTSXN - direction of holding - SE on the 104°M radial of the Spokane, Wash. VOR; direction of turns - left; time - 1 min; min alt 6000'.

(10) SIOUX CITY, IOWA (VOR) - direction of holding - NW on the 290°M radial; direction of turns - right; time - 2 mins.

(11) LEXINGTON, N.C. (VHF) INTSXN - direction of holding - SW on the 221°M radial of the Greensboro, N.C. VOR; direction of turns - right; time - 1 min; min alt 1900'.

(12) WACO, N.C. (VHF) INTSXN - direction of holding - NW on the 328°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 1 min; min alt 2700'.

(13) AUSTIN, TEX. (VOR) - direction of holding - N on the 355°M radial; direction of turns - right; time - 2 mins; min alt 2000'.

REDESIGNATED:

(1) TIPP CITY, OHIO (Rbn) - direction of holding - NE on NE crs of the Dayton ILS lclzr; direction of turns - right; time - 1 min; min alt 2200'.

(2) WORCESTER, MASS. (ILS/LOM) - direction of holding - SE on SE crs; direction of turns - right; time - 1 min.

(3) MILLBURY, MASS. (VHF) INTSXN - direction of holding - E on 272°M radial of the Boston, Mass. VOR; direction of turns - right; time - 1 min.

(4) SPOKANE, WASH. (LFR) - direction of holding - E on E crs; direction of turns - right; time - 2 mins; min alt 6000'.

CANCELLED:

(1) LANGSTON, OKLA. (VHF) INTSXN - direction of holding - NE on the 030°M radial of the Oklahoma City, Okla. VOR; direction of turns - left; time - 1 min; min alt 3000'.

✓ ON REQUEST REPORTING POINTS: The following on request reporting points are designated, redesignated, renamed or cancelled and shall become effective January 16, 1958:

DESIGNATED:

(1) ALEX, OKLA. (VHF) INTSXN - intsxn of the 318°M radial of the Ardmore, Okla. VOR and the 170°M radial of the Oklahoma City, Okla. VOR.

(2) ALEXANDER, GA. (VHF) INTSXN - intsxn of the 157°M radial of the Augusta, Ga. VOR and the 261°M radial of the Allendale, S.C. VOR.

(3) ASHER, OKLA. (VHF) INTSXN - intsxn of the 357°M radial of the Ardmore, Okla. VOR and the 120°M radial of the Oklahoma City, Okla. VOR.

(4) BARTOW, FLA. (VHF) INTSXN - intsxn of the 152°M radial of the Lakeland, Fla. VOR and the 210°M radial of the Orlando, Fla. VOR.

(5) BISHOPVILLE, S.C. (VHF) INTSXN - intsxn of the 030°M radial of the Shaw, S.C. TVOR and the 270°M radial of the Florence, S.C. VOR.

(6) BLACK MESA, ARIZ. (VHF) INTSXN - intsxn of the 010°M radial of the Winslow, Ariz. VOR and the 055°M radial of the Valle, Ariz. VOR.

(7) BREWSTER, FLA. (VHF) INTSXN - intsxn of the 174°M radial of the Lakeland, Fla. VOR and the 215°M radial of the Orlando, Fla. VOR.

(8) BROOKSVILLE, FLA. (VHF) INTSXN - intsxn of the N crs of the Tampa, Fla. ILS lclzr and the 305°M radial of the Lakeland, Fla. VOR.

(9) BUSHNELL, FLA. (VHF) INTSXN - intsxn of the 347°M radial of the Lakeland, Fla. VOR and the 283°M radial of the Orlando, Fla. VOR.

(10) CALEDONIA, MICH. (VHF) INTSXN - intsxn of the 055°M radial of the Pullman, Mich. VOR and the 279°M radial of the Lansing, Mich. VOR.

(11) CLERMONT, FLA. (VHF) INTSXN - intsxn of the 283°M radial of the Orlando, Fla. VOR and the 022°M radial of the Lakeland, Fla. VOR.

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be utilized:

CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulation is effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

✓ BUFFALO, NEW YORK, VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 142: BUF VOR - Medina Int	Red airway 22	as published
Victor 2 and Victor 14: BUF VOR - ROC VOR	Green airway 2	as published
Victor 36: BUF VOR - Burns Int	Red airway 23	as published
Victor 164: BUF VOR - ELZ VOR	BUF LFR direct ELZ VOR	4500
Victor 33: BUF VOR - BFD VOR	BUF LFR direct BFD VOR	4500
Victor 142: BUF VOR - Jamestown Int	Unusable	-----
Victor 14: BUF VOR - ERI VOR	Green airway 2	as published
Victor 84: BUF VOR - Hagerstown Int	BUF LFR direct XU VOR	3000
Victor 36 South: BUF VOR - YZ VOR	Unusable	-----
Victor 36: BUF VOR - YZ VOR	Red airway 23	as published

The following VHF intsxns will be unusable during the period of shut down: Medina, Mumford, Rush, Grimsby, Avon, Warsaw, Niagara, Thorold.

WATERVILLE, OHIO VOR SHUT DOWN: During shutdown (Dec 2 through approx Dec 23) the following changes will apply to the airway structure:
V275 between VWV and CRL VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V6, V126 and 1510 between VWV and CLE VORs replaced by G3, MEA published. V30 between VWV VOR and Bellevue VHF intsxn replaced by TOL LFR 301°M brng inbnd to point of intsxn with W crs of EOW variation, MEA 2000. V92 between VWV and MFD VORs replaced by TOL LFR direct MFD VOR, MEA 2500. V45 and 1506 between VWV and APE VORs replaced by TOL LFR direct APE VOR, MEA 2500. V47 and V275 between VWV and FDY VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V96 between VWV and FWA VORs replaced by TOL LFR direct FWA VOR, MEA 3000. V92, V126 and 1510S between VWV and Edgerton VHF intsxn replaced by G3, MEA published. V6 and 1510 between VWV VOR and Pioneer VHF intsxn replaced by TOL LFR 108°M inbnd to the point of intsxn with SBN VOR 092° radial, MEA 5000. V30 and 1506 between VWV and LFD VORs replaced by R57, MEA published. V47 between VWV VOR and Milan VHF intsxn replaced by B87, MEA published.

Intsxn listed below have been revised as outlined during the period of outage: (a) Carp VHF intsxn - SVM VOR 126° radial and CLE VOR 355° radial, MRA 2500'. (b) Perch VHF intsxn - SE crs RML LFR and 231°M brng inbnd from TOL LFR, MRA 2500'. (c) Ogden VHF intsxn - CRL VOR 237° radial and 135°M brng inbnd from TOL LFR, MRA 2600'. (d) McCluge VHF intsxn - FDY VOR 320° radial and the 080°M brng inbnd from TOL LFR. Holding to be accomplished on the FDY VOR 320° radial. Right turns. One min pattern. MRA 2000'.

✓ MEMPHIS-ST LOUIS ARTC BOUNDARY: Effective immediately the Memphis-St. Louis ARTC center control and flight advisory boundary is revised as follows: from the E edge of Blue arwy 13 at a point 70 mi S of Ft Smith, Ark. VOR direct to the present boundary on V74 at a point 50 mi SE of the Ft Smith VOR.

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

DISCONTINUED CHARTS

AL 166 ADF-2 - Chicago, Illinois - Chicago Intnl (O'Hare) Arpt (procedure cancelled - CAA 11-11-57)

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

NAVIGATIONAL WARNING: USAF jet and conventional bombers will conduct daylgt VFR flights between 500 and 2000 ft above ground level along routes indicated below, climb from last point listed and fly at conventional altitudes over target listed. Flights will be within 20 n mi either side of selected route avoiding built up areas and civil airports.

Route I. 40-18N, 95-40W; 40-26N, 100-16W; 41-08N, 101-57W; 42-12N, 102-27W; 42-52N, 99-37W; 42-46N, 98-05W; target Columbus, Nebraska.
Route II. 40-18N, 95-40W; 41-56N, 94-27W; 45-04N, 95-53W; 46-08N, 93-35W; 46-26N, 89-30W; target Marquette, Mich.
Route III. 39-07N, 92-07W; 37-35N, 89-31W; 37-32N, 88-04W; 36-34N, 88-09W; 36-55N, 90-16W; 36-32N, 92-17W; target Springfield, Mo.
Route IV. 41-40N, 91-24W; 44-03N, 90-00W; 44-55N, 88-30W; 45-50N, 91-05W; 44-35N, 92-37W; 43-00N, 92-45W; target Ames, Iowa.
Route V. 43-04N, 70-48W; 42-41N, 70-47W; 43-04N, 70-41W; 43-26N, 70-26W; 44-28N, 67-35W; 45-11N, 67-41W; 45-58N, 68-09W; 44-11N, 70-54W; target Franklin, N.H.
Route VI. 40-10N, 82-00W; 40-50N, 80-06W; 41-42N, 80-00W; 42-47N, 78-35W; 43-06N, 73-45W; target Rutland, Vt.
Route VII. 39-54N, 76-35W; 38-28N, 78-00W; 37-09N, 76-43W; 36-38N, 78-24W; 36-52N, 80-07W; 37-04N, 80-07W; 37-31N, 79-20W; target Charlottesville, Va.
Route VIII. 39-18N, 97-10W, 39-58N, 99-20W; 40-08N, 101-03W; 39-38N, 102-08W, 38-20N, 102-40W; 37-47N, 100-53W; 37-29N, 98-45W; target Kanopolis Dam, Kans.
Route IX. 39-40N, 94-46W; 40-47N, 92-26W; 41-09N, 89-21W; 40-13N, 88-42W; 39-38N, 89-35W; 39-19N, 92-27W; target Chillicothe, Mo.
Route X. 38-03N, 89-57W; 38-20N, 87-50W; 38-05N, 86-26W; 36-56N, 85-00W; 36-31N, 82-45W; 38-58N, 81-02W; 39-33N, 81-51W; target Columbus, Ohio.
Route XI. 36-47N, 80-03W; 37-00N, 81-58W; 38-29N, 80-17W; 39-54N, 80-44W; 39-42N, 79-23W; 38-15-30N, 78-03-30W; target Richmond, Va.
Route XII. 41-59N, 74-19W; 41-14N, 76-18W; 41-10N, 77-28W; 41-20N, 79-24W; 42-15N, 78-15W; 42-45N, 76-16W; 42-30N, 73-16W; target Springfield, Mass.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957, as follows:

(1) Page 20, Blue Canyon, Calif. - change WB telephone number to Emigrant Gap 2525.
(2) Page 20, Goodland, Kansas - change CAA telephone number to TW 9-7154.
(3) Page 20, Sacramento, Calif. - change CAA telephone number to GArden 8-8612; change WB telephone number to GArden 8-8418.
(4) Page 22, Saginaw, Mich. - change CAA telephone number to OXbow 5-6621.
(5) Page 23, Cincinnati, Ohio - change WB telephone number to read as follows: WB - DU 1-6706*, CHerry 1-5820, ext 437* (ngt, Sun and holidays - CHerry 1-6716*)
(6) Page 23, Dayton, Ohio - change WB telephone number to VAndalia 4-4620*.
(7) Page 23, Reno, Nev. - change WB telephone number to FAirview 2-8841.
(8) Page 24, Baker, Ore. - change CAA telephone number to JAckson 3-2961.
(9) Page 24, Chattanooga, Tenn. - change WB telephone number to MA 4-9831.
(10) Page 24, Nashville, Tenn. - change WB telephone number to ALpine 5-0140*.
(11) Page 24, Pendleton, Ore. - change WB telephone number to Crestview 6-1852.
(12) Page 25, Richmond, Va. - change CAA telephone number to REpublic 7-8103.
(13) Page 25, Richmond, Va. - change WB telephone number to REpublic 7-0550*.
(14) Page 26, Region 2 - General Safety - change the following telephone numbers: Columbia, S.C. AL 4-8414, Midland, Tex. MU 2-3338; delete the following telephone numbers: Fort Worth, Tex. (Amon Carter Fld) AT 4-2523; Tampa, Fla. 8-1419; add the following telephone numbers: Memphis, Tenn. WH 8-3919; St Petersburg, Fla. HE 6-1100.
(15) Page 26, Region 4 - General Safety - change Sacramento, Calif. telephone number to GA 8-9614.
(16) Page 74, add - Cleveland, Ohio (Cleveland-Hopkins): 079°; over Cleveland LF range, distance 13.5 n mi; 1500'.
(17) Page 74, Columbia, S.C. - delete from airborne and show as ground check point.
(18) Page 76, Pocatello, Idaho - change to read: Lctn #1 -- 031°; over approach end of rnwy #3; 5450'. Lctn #2 -- 029°; over intsxn of rnwys 21 and 25; 5450'.
(19) Page 80, Louisville, Ky. (Standiford) -- change to read: 301°; taxiway between ramp and rnwy 19.

ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
BESSEMER ARPT: Caution. Auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)
BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18) Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int. via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR TO TCL VOR V115 and V18N, 5000'. (10-21)
BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down - relctn. (8-7) FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of .4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down for relctn due rnwy ext. (5-1)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Clsd. (10-16)
EVERGREEN-RADIO: VOR radials 320° thru 360°out of tolerance acct excessive roughness and bends. (9-23)
**EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inop. (2-6) Bcn changed from alternating white and green flashes to white flashing. opers sunset to sunrise. (11-21)
FAIRHOPE-KLUMPP ARPT: 999'(1201'MSL) lgtd twr being erected 9 n mi N(12°T) at lat 30-40-55, long. 87-49-41. (11-13)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-TOWER: June 19, ILS not to be used for automatic apch below 300'. (6-18) Glide slope inop - equip. and const vcnty transmitter bldg. (8-22) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' & 1/2 mi is absolute tk-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx. 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
**TUSCALOOSA-VAN DE GRAFF ARPT: 201'(371'MSL) lgtd twr erected 3 n mi SSE(163°T) at lat 33-11-17, long. 87-35-13. (11-5)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (10-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Clsd. (9-17)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
MARANA ARPT: Reported inactive. (10-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take off xcpt prior permission arpt manager. (12-7) Men & equip. along N edge rnwy 26L from apch end to a point approx 2000' W. (8-23)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000';135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx Mar 3, 1958 - conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int. -PHX; V105E PRC-PHX. (11-18)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDER BIRD #2 ARPT: Closed. (3-26)
SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000';090-170°, 40 n mi 12000'; 225°-230°, 40 n mi 7,000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'(7-17) About Feb 3, VOR will be shut down until approx Mar 4 - VORTAC conversion; following Victor arwys unusable durg IFR conditions: V-16 Toltec Int-CIE, V-66 GBN-Mescal Int, V16-S TUS-Mescal Int. (12-5)
TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)
TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at ngt. Obstn lgts apchs to rnwy 21 inop. (11-15)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB-SPECIAL NOTICE: Ngt weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)
**YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: BLYTHEVILLE - SPECIAL NOTICE: All acft operating under VFR adjacent to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
PINE BLUFF-GRIDER FLD: Rnwy 8-26 clsd. Soft from rains. (12-7)
TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800'MSL 35 n mi. (5-21)
CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)
ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000';040°-060°, 12,000';060°-090°, 13,500'. (8-9)
BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)

CALIFORNIA: BURBANK-LOCKHEED AIR TERMINAL-TOWER: About January 1, 1958, radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR SaugusInt Fillmore VOR Camarillo LFR Burbank OM. (11-29)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flight-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flight-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR flgt-checked, opern normal. Coverage 250°-090°, 30 mi; 090°-120°, 15 mi: 150°-250°, 20 mi at MEA. (12-2)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000', 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)

**FRESNO AIR TERM: Extreme caution advised in vicinity of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N & E of arpt. Centerline hi-intensity apch lgts installed rnwy 29. Neon apch lgts decmsnd. (11-29)

GLENDALE-GRAND CENTRAL ARPT: Extensive const. Fld clsd to all acft at sunset.

GOFFS-RADIO: VOR coverage 265°-310°, 25 n mi at MEA. Below 9500' this area beyond tolerance. (11-8)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13) About Dec 24, Distance Measuring Equipment will be shut down until approximately February 4, - relocation. (12-9)

LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. (10-4) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230°. November 14, ASR shut down - modernization. (11-15) FLD: Several 230' MSL portable oil derricks NW, W, and S of fld. No fuel servicing avail. for civil acft 2400-0600. Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P week-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail. lndgs and take-offs. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylight hours only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea broadcasts shut down-modernization. Manual broadcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGLESE INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL

** beyond 30 n mi. (4-19) FLD: New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd-avail 30 min req thru twr. Equip. crossing rnwy. Durg VFR wea conditions: civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 at least 10 mi out. Durg IFR wea: civil acft ctc Apch Ctl on 118.1 or 119.3 or listen 118.1 or 119.3 and trans 122.7 mc. USAF, NAVY, CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000', ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Transmissometer cmsnd. Apch lgt lane sequenced flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from

CALIFORNIA: end rnwy 25L. (7-11)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MARTINEZ ARPT: Clsd until approx June 1958. Strip mrkd with X. (11-27)

MENDOTA ARPT: New arpt reported; Lctd 1/4 mi E; elev 174'; 1 rnwy - (15-33) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flight should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flight should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable munications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (4-24)

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF operg test basis. Freq: 118.1, 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc. Coverage 40 n mi at MEA xcpt 020°-050°, 8000' MSL. (10-14)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 8000'; 040°-060°, 7000' MSL. (8-6) FLD:

** Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd. (8-22)

OCEANSIDE-RADIO: July 10, VOR shut down until approx Dec 18 - modernization. Durg this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flights departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period. (11-9)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13) Tetrahedron replaced by lgtd wind sock. (10-8)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently durg daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W-adj to Pomona Heliport. (9-20)

HAYWARD ARPT: 306'(1491'MSL) lgtd twr being erected 4.5 n mi WSW(244°T) at lat 45-59-03, long. 91-32-20. (11-22)

LA CROSSE-RADIO: VOR radials 320°-335° have course roughness beyond tolerance but flyable. (8-13) October 28, DME shut down until approx January 27, 1958 - relctn.

LODI-LAKELAND ARPT: New arpt reported: Lat 43-19-40, long 89-30-55; lctd 0.5 mi NE of Lodi; 1 strip - (E/W) 2640'; 87 octane gas; remarks - unattended. (1-14)

MADISON-TRUAX FLD: 59'(916'MSL) lgtd radar twr being erected atop terminal bldg. (10-11) Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of admin bldg perm clsd to all acft over 10,000 lbs. Sod unsafe.

MERRILL ARPT: Clsd due const. (10-3)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equipped with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and alt. (5-10) VHF/DF coverage 3500' MSL at 40 n mi all azimuths. ILS glide slope unusable from MM to touchdown. No automatic approaches. (11-8) FLD: Obstn lgts on apch end or rnwy 13 are obscured by trees. Parking facilities lmtd; itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusing rnwy 1 with parallel taxiway to left. (8-15) Rnwy 13-31 clsd to jet acft. (8-21) 4350' rnwy 7L-25R open to daylight opern only. 630' not usable, mrkd with yellow line and yellow cone. (11-20)

OSHKOSH-WINNEBAGO CO. ARPT: Caution - bldg const on fld - use rnwys only. Use only N/S and E/W rnwys during winter months. (2-21)

PHILLIPS ARPT: 100' unlgtd TV twr erected 900' W of S end of N/S rnwy. (6-26)

WATERTOWN ARPT: 103' (923'MSL) lgtd pole & pipe supporting an antenna being erected approx 0.8 n mi N at lat 43-10-57, long. 88-43-15. (10-23)

WAUSAU ARPT: 648'(2549'MSL) lgtd twr being erected 3.1 n mi WSW(263°T) at lat 44-55-10, long. 89-41-12. (11-12)

WOODRUFF-ARBOR VITAE ARPT: Attended part time until May 1, 1958. Fone Minoqua 367 for serv. (11-12)

WYOMING: ★CASPER AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. Dec 5, Apch Ctl cmsnd. Freqs: 348.6 mc and 121.9 mc for ctl gnd tfc. Class: AC(g).

GILLETTE ARPT: Rnwys open & usable as follows: 3400' of N/S, 2300' of NW/SE, 3000' E/W, 3000' NE/SW. N 2000' of N/S rnwy soft & rough. Not maintained. Emerg or overrun only. (11-5)

GREYBULL ARPT: E/W rnwy clsd. Const equip. stored E of N/S rnwy. (11-12)

KEMMERER ARPT: Clsd. Unsafe for acft. Use only in extreme emerg. All lgts turned off. (11-14)

LARAMIE-RADIO: DME coverage 155°-225°, 34 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

LUSK ARPT: E/W rnwy clsd, const. Shorter rnwy graded out in the dirt S of original rnwy for temp use. Use caution especially during wet wea. (10-8)

NEWCASTLE-MONDELL ARPT: Caution - men and equip. working on rnwy 14-32. (8-9)

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LFR. Sept. 30, VOR shut down until approx January 15, 1958 - conversion to a VORTAC. Durg this period the following arwys will be affected: V6N between FBR and CKW; V4 between MLD and RKS; V4 and V4N between RKS and CKW. V6 between FBR and CKW will be usable at 11,000'. (9-26)

WYOMING: SARATOGA-SHIVELY ARPT: Const in progress 1500' SW end NE/SW rnwy area mrkd by red flags. (8-16)

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.

TORRINGTON ARPT: Oil well storage tanks lctd on S edge E/W rnwy 300' from W end. Oil well pumping unit lctd on E side NE/SW rnwy 300' from SW end. New arpt & rnwy under const 1 mi S of town. Clsd to all tfc until completion approx March, 1958. (11-11)

PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. (4-12)

SAN JUAN-PUERTO RICO INTNL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7) Lgtd temp steel twr, 110' MSL, lctd approx 3500' off N boundary rnwy 7-25. (5-20)

HUGUENOT, NEW YORK, VOR SHUT-DOWN: During the period of shut-down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----
Victor 126: HUO VOR - ILT VOR	ILT VOR 294 M radial to the point of intsxn with DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Paterson VHF Int	None	----
Victor 249: HUO VOR - CDW VOR	CDW VOR 356 M radial to the point of intsxn with the AVP VOR 127 M radial. None beyond.	5000
Victor 126 and 146: HUO VOR - AVP VOR	AVP VOR 105 M radial to point of intsxn with the DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Herrick VHF Int	None	----
Victor 249: HUO VOR - DNY VOR	DNY VOR 171 M radial to the point of intsxn with the AVP VOR 105 M radial	5000

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Central Valley	ILT VOR 288 M radial and POU VOR 234 M radial	3000
Huguenot VOR	AVP VOR 105 M radial and STW VOR 035 M radial	5000
Greenwood	POU VOR 234 M radial and ILT VOR 280 M radial (Holding Pattern: NE of the Greenwood Int on the POU VOR 234 radial. Left turns. One minute pattern)	3000

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
From	To	Course and Distance	Minimum Altitude	Condition	Two Engine or Less: 65 Knots or Less	Two Engine or Less: More Than 65 Knots	More Than Two Engine, More Than 65 Knots

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or be telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange
(Voice) (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control tower. Where there is no control tower, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 25 cents.

TAMPA FLIGHT ADVISORY AREA: Effective 0001 EST December 31, 1957, the Tampa Flight Advisory Area is cancelled.

MIAMI-JACKSONVILLE FLIGHT ADVISORY/CONTROL AREA BOUNDARIES: Effective 0001 EST December 31, 1957, the Miami-Jacksonville Flight Advisory/Control Area Boundaries will be changed as follows: Beginning at the present Miami-Jacksonville boundary at 29-00N, 81-49-30W direct 29-23N, 82-07-45W direct 29-17N, 82-23-25W direct 29-28N, 82-41W direct 28-45N, 84-00W. Remainder of the boundaries remain unchanged.

ON REQUEST REPORTING POINTS: The following on request reporting points are designated, redesignated or cancelled and shall become effective January 16, 1958:

DESIGNATED:

(1) CENTER HILL, TENN. (VHF) INTSXN - the intsxn of the 290°M radial of the Crossville, Tenn. VOR and the 149°M radial of the Bowling Green, Ky. VOR.

(2) LEBANON, TENN. (VHF) INTSXN - the intsxn of the 056°M radial of the Nashville, Tenn. VOR and the 290°M radial of the Crossville, Tenn. VOR.

(3) LINTON, TENN. (VHF) INTSXN - the intsxn of the 065°M radial of the Graham, Tenn. VOR and the 342°M radial of the Huntsville, Ala. VOR.

(4) SILVER BELL, ARIZ. (VHF) INTSXN - the intsxn of the 144°M radial of the Casa Grande, Ariz. VOR and the 285°M radial of the Tucson, Ariz. VOR.

(5) WALLING, TENN. (VHF) INTSXN - the intsxn of the 274°M radial of the Crossville, Tenn. VOR and the 149°M radial of the Bowling Green, Ky. VOR.

(6) WOODBURY, TENN. (VHF) INTSXN - the intsxn of the 274°M radial of the Crossville, Tenn. VOR and the 160°M radial of the Bowling Green, Ky. VOR.

REDESIGNATED:

(1) EXCELSIOR, MO. (VHF) INTSXN - the intsxn of the 068°M radial of the Kansas City, Mo. VOR and the 008°M radial of the Blue Springs, Mo. VOR.

(2) FARLEY, MO. (VHF) INTSXN - the intsxn of the 267°M radial of the Kansas City, Mo. VOR and the 165°M radial of the St Joseph, Mo. VOR.

(3) LANSING, KANS. (VHF) INTSXN - the intsxn of the 170°M radial of the St Joseph, Mo. VOR and the 283°M radial of the Blue Springs, Mo. VOR.

(4) MOSBY, MO. (VHF) INTSXN - the intsxn of the 068°M radial of the Kansas City, Mo. VOR and the 343°M radial of the Blue Springs, Mo. VOR.

(5) PARKVILLE, MO. (VHF) INTSXN - the intsxn of the 223°M radial of the Kansas City, Mo. VOR and the 283°M radial of the Blue Springs, Mo. VOR.

(6) TINA, MO. (VHF) INTSXN - the intsxn of the 068°M radial of the Kansas City, Mo. VOR and the 217°M radial of the Kirksville, Mo. VOR.

(7) WINESAP, TENN. (VHF) INTSXN - the intsxn of the 274°M radial of the Crossville, Tenn. VOR and the 355°M radial of the Chattanooga, Tenn. VOR.

CANCELLED:

(1) CLARKSVILLE, TENN. (VHF) INTSXN - the intsxn of the 044°T radial of the Jacks, Creek, Tenn. VOR and the 012°T radial of the Graham, Tenn. VOR.

(2) HUDSON, N.H. (VHF) INTSXN - the intsxn of the 168°M radial of the Concord, N.H. VOR and the 074°M radial of the Gardner, Mass. VOR.

(3) SMITHVILLE, TENN. (VHF) INTSXN - the intsxn of the 331°M radial of the Chattanooga Tenn. VOR and the 282°M radial of the Crossville, Tenn. VOR.

(4) STANTON, TEX. (VHF) INTSXN - the intsxn of the NE crs of the Midland, Tex. ILS lclzr and the 055°M radial of the Midland, Tex. VOR and the 236°M radial of the Big Springs, Tex. VOR.

(5) TULLAHOMA, TENN. (VHF) INTSXN - the intsxn of the 156°T radial of the Nashville, Tenn. VOR and the 294°T radial of the Chattanooga, Tenn. VOR.

(6) UNION CITY, TENN. (VHF) INTSXN - the intsxn of the 036°T radial of the Dyersburg, Tenn. VOR and the 328°T radial of the Jacks Creek, Tenn. VOR.

HOLDING PATTERNS: The following holding patterns have been designated, redesignated, effective January 16, 1958:

DESIGNATED:

(1) LEBANON, TENN. (VHF) INTSXN - direction of holding - NE on 056°M radial of the Nashville, Tenn. VOR; direction of turns - right; time - 1 min.

(2) BARBER, N.C. (VHF) INTSXN - direction of holding - NE on 241°M radial of the Greensboro, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2400'.

(3) BEAUMONT, TEX. (VOR) - direction of holding - SW on the 236°M radial; direction of turns - right; time - 2 mins; min alt 1200'.

(4) BRADLEY, N.C. (VHF) INTSXN - direction of holding - NE on 038°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2900'.

(5) CHARLOTTE, N.C. VOR - direction of holding - S on 185°M radial; direction of turns - right; time - 2 mins; min alt 2300'.

(6) CHEROKEE, S.C. (VHF) INTSXN - direction of holding - NE on 058°M radial of the Spartanburg, S.C. VOR; direction of turns - right; time - 2 mins; min alt 2700'.

(7) HIGH ROCK, N.C. (VHF) INTSXN - direction of holding - NE on 038°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2900'.

(8) LAKE, TEX. (VHF) INTSXN - direction of holding - SE on SE crs of the Beaumont, Tex. ILS lclzr; direction of turns - right; time - 2 mins; min alt 1500'.

(9) MAIDEN, N.C. (VHF) INTSXN - direction of holding - NW on 328°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2500'.

(10) MOORESVILLE, N.C. (VHF) INTSXN - direction of holding - NE on 058°M radial of the Spartanburg, S.C. VOR; direction of turns - right; time - 1 min; min alt 2400'.

(11) MT HOLLY, N.C. (VHF) INTSXN - direction of holding - N on 006°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2500'.

(12) NORWOOD, N.C. (VHF) INTSXN - direction of holding - NE on 069°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(13) RICHBURG, S.C. (VHF) INTSXN - direction of holding - S on 185°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2000'.

(14) STATESVILLE, N.C. (VHF) INTSXN - direction of holding - N on 006°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2400'.

(15) WACO, N.C. (VHF) INTSXN - direction of holding - NW on 328°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 2700'.

(16) WEDDINGTON, N.C. (VHF) INTSXN - direction of holding - NE on 069°M radial of the Charlotte, N.C. VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(17) WOODBURY, TENN. (VHF) INTSXN - direction of holding - E on the 274°M radial of the Crossville, Tenn. VOR; direction of turns - right; time - 1 min.

(18) YORK, S.C. (VHF) INTSXN - direction of holding - SW on SW crs of the Charlotte (Douglas), N.C. ILS lclzr; direction of turns - right; time - 2 mins; min alt 2300'.

REDESIGNATED:

(1) ALBACORE, CALIF. (VHF) INTSXN - direction of holding - SE on 125°M radial of the Los Angeles, Calif. VOR; direction of turns - left; time - 1 min; min alt 3000'.

(2) CARP, CALIF. (VHF) INTSXN - direction of holding - SW on 192°M radial of the Los Angeles, Calif. VOR; direction of turns - left; time - 2 mins; min alt 3500'.

(3) CATALINA, CALIF. (VHF) INTSXN - direction of holding - SW on 205°M radial of the Long Beach, Calif. VOR; direction of turns - left; time - 2 mins; min alt 3000'.

(4) DOLPHIN, CALIF. (VHF) INTSXN - direction of holding - SW on 221°M radial of the Los Angeles, Calif. VOR; direction of turns - right; time - 2 mins; min alt 3500'.

(5) EEL, CALIF. (VHF) INTSXN - direction of holding - W on 242°M radial of the Los Angeles, Calif. VOR; direction of turns - left; time - 2 mins; min alt 5000'.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

ALM	Alamogordo, N. Mex. radiobeacon	(change from AFB listing scheduled 1700Z Jan 15)
ASN	Talladega, Ala., Talladega Arpt	(change from Anniston listing)
BIL	Billings, Mont., Logan Fld	(name change)
GTF	Great Falls, Mont., Great Falls Intnl Arpt	(name change)
HMN	Alamogordo, N. Mex., Holleman AFB	(change from ALM scheduled 1700Z Jan 15)
ISO	Kinston, N. C., Stallings Fld	(name change)
IYK	Inyokern, Calif., Inyokern-Kern County Arpt #8	(name change)

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Vol. 12, #20, dated 10 Dec 1957, as follows:

(1) Page 80, HOPKINS, FLA. (VHF) INTSXN - should be listed under "Redesignated" Instead of "Designated".

(2) Page 77, left hand column, last line should read: "275° radials; Crossville, Tenn. omni stn, including a S alternate from the Graham omni stn to"

Correct Airman's Guide Vol. 12, #18, dated 12 Nov 1957, as follows:

(1) Page 38, under Control Zones - paragraph 2 - correct by substituting the following: (La Crosse, Wis.) is amended by adding the following portion to read: "and extending 2 mi either side of the 227°T radial of the La Crosse terminal omnirange to a point 12 mi SW of the terminal omni stn."

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 214)
(January 16, 1958)

(1) Section 608.15, the Parker, Colorado, area (R-195) amended January 16, 1954 in 19 F. R. 292 is further amended by changing the "Time of Designation" column to read: "Continuous"

(2) Section 608.43, the Wilmington, Ohio, area (R-109) amended July 11, 1957 in 22 F. R. 4879 is redesignated as follows: "Beginning at lat 38-48-30, long. 83-02-00; thence west to lat 38-48-30, long. 83-15-00; thence northwest to lat 39-06-30, long. 84-00-00; thence north to lat 39-19-45, long. 84-00-00; thence northeast to lat 39-41-45, long. 83-32-00; thence east to lat 39-41-30, long. 83-15-00; thence southeast to lat 39-30-00, long. 83-01-30; thence south to the point of beginning".

(3) Section 608.61, the Kodiak Island, Alaska, area (R-350) amended December 4, 1954 in 19 F.R. 8013 is further amended by changing the "Time of Designation" column to read: "0800-2400 daily".

(4) Section 608.61, the Adak, Alaska, area (R-356) amended October 31, 1951 in 16 F.R. 11066 is further amended by changing the "Designated Altitudes" column to read: "10,000'," and the "Time of Designation" column to read: "0800-2400 daily".

TEST OF EXPANDED RADAR SERVICE - ANDREWS AFB AREA: Effective 15 Jan through 15 March 1958, a test will be conducted by Andrews Approach Control and a test area will be established to provide expanded radar traffic control for aircraft operating VFR in the Andrews Approach Control area. This area lies generally within an arc with a radius of 30 n mi (E of Andrews) between the 060° radial clockwise to the 165° radial of the Washington TVOR.

VFR TRAFFIC: During the test period all military aircraft operating VFR below 10,000' MSL are urged to contact Andrews Approach Control on 335.8 mc or 136.8 mc. All civil aircraft should call on 123.7 mc or 122.1 mc and receive on 123.7 mc. Radar will be used to provide traffic information and/or radar separation as follows:

A. Aircraft operating VFR below 2500' MSL will be provided pertinent traffic information and radar separation, as required, from all other observed traffic.

B. Insofar as possible, those aircraft operating VFR in the area above 2500' MSL and up to 10,000' MSL inclusive will be provided pertinent traffic advisory information only.

Arriving Aircraft: Pilots should advise Andrews Approach Control of their position, altitude, heading and intentions during the first radio contact. Traffic from the E and NE on V-16 or G-5 are requested to contact Andrews Approach Control in the vicinity of Kent Island or over the eastern shore of Chesapeake Bay. Traffic from the SE on Blue 56 should contact Andrews Approach Control in the vicinity of Coles Point. Acft landing at Washington National, Bolling AFB or Anacostia NAS will be advised when to change to appropriate tower frequency.

Departing Aircraft: VFR flights departing from Washington National, Bolling or Anacostia that will penetrate test area should contactAndrews Approach Control as soon as practicable after leaving respective tower frequency and prior to entering the test area.

Aircraft departing airports within the area are requested to initiate contact as soon as practicable after take-off.

IFR TRAFFIC: IFR traffic operating through the area will be handled in the normal manner by CAA traffic control and should not contact Andrews Approach Control unless instructed to do so by ATC.

The above services are designed to aid pilots in avoiding collision and should not be construed as relieving the pilot of any responsibilities and requirements governing VFR flight as established in pertinent military or Civil Air Regulations.

Comments from pilots participating in the test are solicited and will be most welcome. Please address correspondence to: Commander, 2045th AACS Grp, Attention: Flight Facilities Officer, Andrews AFB, Washington 25, D. C.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS: The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station/
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200'MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRG1 and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

---

utilized: DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be

FROM

VOR civil airways V-6, V-8, V-1510

CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulation is effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

✓ BUFFALO, NEW YORK, VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 142: BUF VOR - Medina Int	Red airway 22	as published
Victor 2 and Victor 14: BUF VOR - ROC VOR	Green airway 2	as published
Victor 36: BUF VOR Burns Int	Red airway 23	as published
Victor 164: BUF VOR - ELZ VOR	BUF LFR direct ELZ VOR	4500
Victor 33: BUF VOR - BFD VOR	BUF LFR direct BFD VOR	4500
Victor 142: BUF VOR - Jamestown Int	Unusable	---
Victor 14: BUF VOR - ERI VOR	Green airway 2	as published
Victor 84: BUF VOR - Hagersville Int	BUF LFR direct XU VOR	3000
Victor 36 South: BUF VOR - YZ VOR	Unusable	---
Victor 36: BUF VOR - YZ VOR	Red airway 23	as published

The following VHF intsxns will be unusable during the period of shut down: Medina, Mumford, Rush, Grimsby, Avon, Warsaw, Niagara, Thorold.

WATERVILLE, OHIO VOR SHUT DOWN: During shutdown (Dec 2 through approx Dec 23) the following changes will apply to the airway structure:
V275 between VWV and CRL VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V6, V126 and 1510 between VWV and CLE VORs replaced by G3, MEA published. V30 between VWV VOR and Bellevue VHF intsxn replaced by TOL LFR 301°M brng inbnd to point of intsxn with W crs of EOW variation, MEA 2000. V92 between VWV and MFD VORs replaced by TOL LFR direct MFD VOR, MEA 2500. V45 and 1506 between VWV and APE VORs replaced by TOL LFR direct APE VOR, MEA 2500. V47 and V275 between VWV and FDY VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V96 between VWV and FWA VORs replaced by TOL LFR direct FWA VOR, MEA 3000. V92, V126 and 1510S between VWV and Edgerton VHF intsxn replaced by G3, MEA published. V6 and 1510 between VWV VOR and Pioneer VHF intsxn replaced by TOL LFR 108°M inbnd to the point of intsxn with SBN VOR 092° radial, MEA 5000. V30 and 1506 between VWV and LFD VORs replaced by R57, MEA published. V47 between VWV VOR and Milan VHF intsxn replaced by B87, MEA published.

Intsxn listed below have been revised as outlined during the period of outage: (a) Carp VHF intsxn - SVM VOR 126° radial and CLE VOR 355° radial, MRA 2500'. (b) Perch VHF intsxn - SE crs RML LFR and 231°M brng inbnd from TOL LFR, MRA 2500'. (c) Ogden VHF intsxn - CRL VOR 237° radial and 135°M brng inbnd from TOL LFR, MRA 2600'. (d) McCluge VHF intsxn - FDY VOR 320° radial and the 080°M brng inbnd from TOL LFR. Holding to be accomplished on the FDY VOR 320° radial. Right turns. One min pattern. MRA 2000'

✓ INDIANAPOLIS-CLEVELAND CENTER CONTROL AREA BOUNDARY: Effective immediately, the Indianapolis-Cleveland Center Control Area Boundary is revised as follows: Beginning at a point on the present center area boundary at the intsxn of the N edge of V-210 and the E edge of V-47; proceeding thence northerly along the E edge of V-47 to a point 20 s mi from the Sidney, Ohio, VOR; thence northwesterly at right angles to V-275 to the W edge of V-275; thence southwesterly along the W edge of Victor 275 to a point on the existing boundary at the intsxn of the W edge of V-275 with the N edge of V-277.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are re-
[illegible] with provisions [illegible] Civil Air Regulations, Part 60.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Actt will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

1957 FLIGHT INFORMATION MANUAL NOW AVAILABLE: Flight Information
Manual, Vol. II, dated August 15, 1957, is now available from the Superintendent of Docu-

AREA [illegible] OPERATING PROCEDURES FOR FLI[illegible]
[illegible] Effective Dec. 1, [illegible]

[illegible] Effective December 1, 1957, all airspace at and above 24,000' MSL [illegible] CONTINENTAL CONTROL tal United States (excluding Territory of Alaska), excluding prohibited and restricted areas penetrating the 24,000' level, has been designated as control area. This airspace is to be known as the "continental control area." Certain new regulations and procedures govern flight in this area and all pilots and other personnel concerned with operation above 24,000' should be familiar with them. Following is a summary of the method by which flight operations and air traffic control are conducted in the continental control area.

I. VFR OPERATION:

A. Visibility and Cloud Proximity Minimums - For VFR opern within the continental control area, flgt visibility must be at least 5 mi and acft must not be flown less than 1000' vertically and 1 mi horizontally from any cloud formation.

B. Cruising Altitudes:

1. From 24,000 and up to, but not including 29,000'MSL, the following cruising altitudes shall be adhered to:

(a) 0° - 179° inclusive at 25,000 (MSL), or 27,000' (MSL); or
(b) 180° - 359° inclusive at 24,000 (MSL), 26,000 (MSL), or 28,000' (MSL).

2. At or above 29,000'. Use of the following cruising alt for VFR flgt is required by regulation everywhere at or above 29,000':

Magnetic Crs	Indicated Altitudes
0-89° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
90-179° inc.	4000' intervals beginning at 30,000' (30,000', 34,000', etc.)
180-269° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)
270-359° inc.	4000' intervals beginning at 32,000' (32,000', 36,000', etc.)

II. ON-TOP OPERATION: Flgts made under VFR conditions on top within the continental control area must observe the new visibility and cloud proximity minimums and cruising alt rules for VFR opern in the continental control area. Opern of these flgts is otherwise unchanged. (Pilots are reminded that when cleared "VFR conditions on top" by air tfc control, tfc separation is not provided by air tfc control.)

III. IFR OPERATION: All IFR operns at and above 24,000'MSL within the continental control area will receive air tfc control service.

A. At and above 27,000'MSL - To simplify high alt navigation, a limited number of VOR, TACAN, VORTAC and L/MF facilities have been designated for high alt use. These navigation aids are the only ones which may be used for IFR routing at and above 27,000' and are depicted on special high alt charts.

The high-altitude facilities have been used to delineate a system of high-altitude tracks called "Jet Routes". These routes are coded on the charts by the letter J, followed by the appriate route number, followed by the letter V, T, or L to indicate the type of navigation to be used. For example:

J22V . . . . . VOR or VORTAC Jet Route #22
J19T . . . . . TACAN Jet Route #19
J3L . . . . . L/MF Jet Route #3

Use of the designated high-altitude route structure will facilitate air tfc control, and all pilots are requested to use the designated route structure to the maximum extent possible. However, use of this route structure is not mandatory. Pilots may conduct direct flgt off the designated Jet Routes, provided the acft will be flown on a route defined by the high-altitude facilities, and provided further that the facilities selected to define the route are not more than 300 n mi apart.

Routes flown at 27,000' and above will not have a defined width as is the case on arwys at the lower levels. The track to be made good will be direct between the navigation aids or fixes defining the Jet Route, or direct between the high-altitude facilities defining the route for flgts made off the designated Jet Routes.

All high-altitude facilities and a small number of intsxns formed by these aids will be designated as compulsory reporting points. When needed for tfc control purposes, pilots may be requested to make additional position reports.

Other navigation aids (TACAN, VOR, VORTAC, AND L/MF) not designated as high-altitude facilities will be used for routing or navigating of acft to and from the high-altitude Jet Route structure which begins at the 27,000' level. This routing may be via the Victor or colored arwy systems, or direct between navigation aids.

Since most flgt activity at 27,000' and above will be by military acft, only those charts prepared by the U.S. Air Force Aeronautical Chart and Information Center will be avail on the inception date of control of all airspace at and above 24,000'. In recognition of the fact that there will be some civil need for these charts, arrangements have been made for civil distribution of the Air Force charts through the United States Coast and Geodetic Survey.

B. Below 27,000' - Although the continental control area extends from 24,000' upward, the Jet Route structure does not commence until the 27,000' level is reached. The colored and Victor arwys extend up to, but do not include the 27,000' level.

Acft operg below 27,000' within the continental control area (from 24,000' through 26,000') may operate on the colored or Victor arwys, or fly direct between any Federally operated navigation aids.

In the case of direct flgts (from 24,000' through 26,000') the aids selected to define the route must not be more than 200 n mi apart, and the track to be made good will be direct between aids. The aids selected will be compulsory reporting points, and other position reports may be requested by air tfc control when needed.

C. Cruising Altitudes - Acft operg in accordance with IFR within the continental control area must be flown at the alts assigned by air tfc control. To assist pilots in flgt planning for IFR operns, the following system of altitude selection may be used:

1. From 24,000' through 28,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or Above 29,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
180-359° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)

While controllers will normally use the above system, other altitudes may be used in certain cases. Pilots are cautioned to fly at the alt assigned by air traffic control.

IV. AIR/GROUND COMMUNICATIONS: The CAA is currently installing a VHF and UHF air/ground communications system which will provide direct pilot-controller rdo communications throughout the continental control area. This system will be only partially installed at the time control of all airspace above 24,000' is commenced; therefore, interim communications will be conducted as follows:

Ground Facility	VHF	UHF
A. ARTC	Discrete channel as directed	301.4 or discrete channel as directed
B. ATCS	126.7/126.7 or 120.7, 122.1/VOR or 122.2, 135.0/135.9	255.4 or 301.4 where avail.
C. Airline company radio stations	Company frequency	none

IFR flgts should use direct ARTC controller-pilot communications, where available.

V. SPECIAL OPERATIONS: Certain mil operns cannot be conducted in accordance with the above, for example, missions involving use of radar navigation. Such cases are to be considered exceptional in nature and will be handled by special procedures.

Flgts using celestial navigation will be required to operate VFR or "VFR conditions on top" for those portions of the flgt where celestial navigation is involved. TACAN-only equipped acft will also be required to operate VFR or "VFR conditions on top" for those portions of flgts where designated high-altitude TACAN facilities are more than 200 or 300 n mi apart, as the case may be.

Questions concerning these operns or any phase of the control of all airspace above 24,000' should be referred to the appropriate CAA air route tfc control center.

RUNWAY VISUAL RANGE REPORTS AT NEWARK N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2000'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2000' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Chicago	Wichita	WAC 76
Lincoln	Boston Local	WAC 306
Nashville	Honolulu Local	RC 2209
Tulsa		RC 2211

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

HERNDON, VIRGINIA, VOR SHUT-DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect: ∞

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 223: HRN VOR - Hampton VHF Int	Arcola LFR direct HAR VOR	3000
Victor 39: EMI VOR - Remington VHF Int	Red 33	as published
Victor 4: HRN VOR - FRR VOR	Red 18	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Sugar Loaf	MRB VOR 107 M radial; EMI VOR 245 M radial	3000
Keymar	MRB VOR 078 M radial; HAR VOR 201 M radial; EMI VOR 295 M radial;	3000
Lisbon	Use Lisbon LF Int	as published
Fairland	DCA TVOR 023 M radial; BAL VOR 244 M radial	3000
Springfield	Use Springfield LF Int	as published
Remington	Use Remington LF Int	as published
Plains	FRR VOR 118 M radial; MRB VOR 170 M radial; (Holding Pattern: NW of the substitute intsxn on the Front Royal 118 radial. Right turns. One minute pattern)	4000
Leesburg	FRR VOR 094 M radial; MRB VOR 147 M radial	4000
Manassas	Brooke VOR 003 M radial; DCA TVOR 256 M radial	3000
Quarry	SW crs of the ARV LFR; FRR VOR 118 M radial	4000

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957, as follows:
(1) Page 20, Palmdale, Calif.

(1) Page 20, Palmdale, Calif. - change CAA telephone number to WIndsor 7-3502.

HUGUENOT, NEW YORK, VOR SHUT-DOWN: During the period of shut-down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----
Victor 126: HUO VOR - ILT VOR	ILT VOR 294 M radial to the point of intsxn with DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Paterson VHF Int	None	----
Victor 249: HUO VOR - CDW VOR	CDW VOR 356 M radial to the point of intsxn with the AVP VOR 127 M radial. None beyond.	5000
Victor 126 and 146: HUO VOR - AVP VOR	AVP VOR 105 M radial to point of intsxn with the DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Herrick VHF Int	None	----
Victor 249: HUO VOR - DNY VOR	DNY VOR 171 M radial to the point of intsxn with the AVP VOR 105 M radial	5000

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Central Valley	ILT VOR 288 M radial and POU VOR 234 M radial	3000
Huguenot VOR	AVP VOR 105 M radial and STW VOR 035 M radial	5000
Greenwood	POU VOR 234 M radial and ILT VOR 280 M radial (Holding Pattern: NE of the Greenwood Int on the POU VOR 234 radial. Left turns. One minute pattern)	3000

VFR flights between 500 and 2000 ft above ground level along routes indicated below, climb from last point listed and fly at conventional altitudes over target listed. Flights will be within 20 n mi either side of selected route avoiding built up areas and civil airports.

Route I. 40-18N, 95-40W; 40-26N, 100-16W; 41-08N, 101-57W; 42-12N, 102-27W; 42-52N, 99-37W; 42-46N, 98-05W; target Columbus, Nebraska.
Route II. 40-18N, 95-40W; 41-56N, 94-27W; 45-04N, 95-53W; 46-08N, 93-35W; 46-26N, 89-30W; target Marquette, Mich.
Route III. 39-07N, 92-07W; 37-35N, 89-31W; 37-32N, 88-04W; 36-34N, 88-09W; 36-55N, 90-16W; 36-32N, 92-17W; target Springfield, Mo.
Route IV. 41-40N, 91-24W; 44-03N, 90-00W; 44-55N, 88-30W; 45-50N, 91-05W; 44-35N, 92-37W; 43-00N, 92-45W; target Ames, Iowa.
Route V. 43-04N, 70-48W; 42-41N, 70-47W; 43-04N, 70-41W; 43-26N, 70-26W; 44-28N, 67-35W; 45-11N, 67-41W; 45-58N, 68-09W; 44-11N, 70-54W; target Franklin, N.H.
Route VI. 40-10N, 82-00W; 40-50N, 80-06W; 41-42N, 80-00W; 42-47N, 78-35W; 43-06N, 73-45W; target Rutland, Vt.
Route VII. 39-54N, 76-35W; 38-28N, 78-00W; 37-09N, 76-43W; 36-38N, 78-24W; 36-52N, 80-07W; 37-04N, 80-07W; 37-31N, 79-20W; target Charlottesville, Va.
Route VIII. 39-18N, 97-10W, 39-58N, 99-20W; 40-08N, 101-03W; 39-38N, 102-08W, 38-20N, 102-40W; 37-47N, 100-53W; 37-29N, 98-45W; target Kanopolis Dam, Kans.
Route IX. 39-40N, 94-46W; 40-47N, 92-26W; 41-09N, 89-21W; 40-13N, 88-42W; 39-38N, 89-35W; 39-19N, 92-27W; target Chillicothe, Mo.
Route X. 38-03N, 89-57W; 38-20N, 87-50W; 38-05N, 86-26W; 36-56N, 85-00W; 36-31N, 82-45W; 38-58N, 81-02W; 39-33N, 81-51W; target Columbus, Ohio.
Route XI. 36-47N, 80-03W; 37-00N, 81-58W; 38-29N, 80-17W; 39-54N, 80-44W; 39-42N, 79-23W; 38-15-30N, 78-03-30W; target Richmond, Va.
Route XII. 41-59N, 74-19W; 41-14N, 76-18W; 41-10N, 77-28W; 41-20N, 79-24W; 42-15N, 78-15W; 42-45N, 76-16W; 42-30N, 73-16W; target Springfield, Mass.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
BESSEMER ARPT: Caution. Auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)
BIRMINGHAM-RADIO: Dec 12, VOR shut down until approx Feb 1 - conversion VORTAC. Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. Until cmsng VOR, V7 temp designated BHM LFR to Tanner Int. via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. Caution - E course LFR has severe multiples. (12-17)
BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down - relctn. (8-7) FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down for relctn due rnwy ext. (5-1)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Clsd. (10-16)

ALABAMA: EVERGREEN-RADIO: VOR radials 320°-360° out of tolerance acct excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inop. (2-6)
**FAIRHOPE-KLUMPP ARPT: 999' (1201'MSL) lgtd twr erected 9 n mi N (12°T) at lat 30-40-55, long. 87-49-41. (12-6)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-TOWER: June 18, ILS not to be used for automatic apch below 300'. Glide slope inop - equip and const vcnty transmitter bldg. (8-22) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution 200' and 1/2 mi is absolute tk-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
★SELMA-CRAIG AFB-RADIO: USAF LFR class changed to: MRLZ. (12-10)
ARIZONA: AJO ARPT: Bcn and lgts inop. (10-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail ngts upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Clsd. (9-17)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
DRAKE-RADIO: About Jan 31, VOR will be cmsnd. Ident: DRK. Freq: 113.1 mc. Lctd lat 34-54-04, long. 112-25-00. Elev: 4630'MSL. Class: VORW. (12-6)
FT° HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vcnty. 2-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000'MSL on 247° radial beyond tolerance. (10-18)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
MARANA ARPT: Reported inactive. (10-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take-off xcpt prior permission arpt manager. (12-7) Men and equip along N edge rnwy 26L from apch end to a point approx 2000' W. (8-23)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx Mar 3, 1958, conversion to VORTAC. During this period, the following arwys will be unusable during IFR conditions: V12 EED-INW; V105 White Hills Int - PHX; V105E PRC-PHX. (11-18)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)
SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°, 075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)
About Feb 3, VOR will be shut down until approx Mar 4, VORTAC conversion; following Victor arwys unusable during IFR conditions: V-16 Toltec Int - CIE, V-66 GBN- Mescal Int, V16-S TUS-Mescal Int. (12-5)
TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off aryw to Ajo, Ariz., to be conducted week-ends - caution. (2-15)
TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S per meter of fld. Clear of apchs. Lgtd at ngt. Outin lgts apchs to rnwy 21.

ARIZONA: TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 n mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB-SPECIAL NOTICE: Ngt weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to hvy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
FT SMITH-RADIO: About March 15, VOR will be shut down, modification. During shut down VOR flights are authorized to use FSM BMH fac in lieu of FSM VOR on all arwys. Bears. and MEAs used shall remain as charted except bear. from FSM BMH to Int of 295° radial Little Rock VOR on V74 shall be 97°. Paris Int redesignated as 97° from FSM BMH and FYV 160°. On V13, use 192° from FYV VOR to FSM BMH. MEA for VOR equipped acft on V74 from TUL to FSM 7500' & on V13 from FYV to FSM 5500'. (12-13)
LITTLE ROCK-ADAMS FLD: Trenches 6" wide, 30" deep being dug and back filled approx 12' either side rnwy 14-32. (12-3)
PINE BLUFF-GRIDER FLD: Rnwy 8-26 clsd. Soft fromr rains. (12-7)
TEXARKANA-RADIO: DME coverage 145°-235°, 1700'MSL 30 mi; 235°-270°, 1800'MSL 35 n mi.
CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip on fld. (4-26)
ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-080°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)
**ARCATA ARPT: Right tfc rnwys 13 and 19. (12-10)
BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)
BLUE CANYON ARPT, 13, SFO-SLC: Clsd due to snow. (12-18)
BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)
BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Jan 1, 1958, radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR Saugus Int Fillmore VOR Camarillo LFR Burbank OM. (11-29)
CAMARILLO-RADIO: All courses have multiples. Jan 6, auto ident LFR will be discontd.
**CORONA-THURSBY ARPT: To be abandoned Feb 28, 1958. (12-11)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)
DIXON ARPT; Clsd. (8-30)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
★EL TORO MCAS-RADIO: VOR cmsnd. Freq: 117.8 mc. Ident: NZJ. Lctd lat 33-40-34, long. 117-43-50, at fld. Class: VOR. Coverage restriction at and below 10,000'MSL beyond 25 mi from 360° clockwise to 070°. (12-13)
FAIRFIELD-TRAVIS AFB-RADIO: LFR has splits and multiples beyond 20 mi. (8-27)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
FT JONES-RADIO: VOR coverage 250°-090°, 30 mi; 090°-120°, 15 mi; 150°-250°, 20 n mi at MEA. (12-2)
FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRANKLIN ARPT: Rnwy 18-

area beyond tolerance. (11-8)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000';305°-340°, 7000';340°-040°, 12,000';040°-070°, 8000'; 070°-100°, 7000; 100°-280°, 4000'. (9-13) About Dec 24, DME will be shut down until approx Feb 4, relctn. (12-9)

LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230°. (12-10) FLD: Several 230' MSL portable oil derricks NW, W, and S of fld. No fuel servicing avail. for civil acft 2400-0600. Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail. lndgs and tk-offs. Rnwy 12 clsd. Until further notice straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL
** beyond 30 n mi. (4-19) FLD: New lgtd rnwy 16-34 approx 4000' W of Sepulved Blvd clsd - avail 30 min req thru twr. Equip. crossing rnwy. During VFR wea conditions: civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 at least 10 mi out. During IFR wea:civil acft ctc Apch Ctl on 118.1 or 119.3 or listen 118.1 or 119.3 and trans 122.7 mc. USAF,NAVY CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx entended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000', ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Transmissometer cmsnd. Apch lgt land sequenced flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (7-11)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MARTINEZ ARPT: Clsd until approx June 1958. Strip mrkd with X. (11-27)

MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E;elev 174'; 1 rnwy -(15-23) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling & visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000';60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000';340°-[illegible] at 4000'.

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF operg test basis. Freqs: 118.1, 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc. Coverage 40 n mi at MEA xcpt 020°-050°, 8000' MSL. (10-14)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 8000'; 040°-060°, 7000' MSL. About Jan 1, freq
** 120.7 mc will be discontd and 123.9 mc will be cmsnd. (12-9) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd. (8-22)

OCEANSIDE-RADIO: July 10, VOR shut down until approx Dec 30, modernization. During this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flgts departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period. (12-12)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000';330°-350°, 26 n mi at 13,000';350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs pronibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13) Tetrahedron replaced by lgtd wind sock. (10-8)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W. of Pomona Heliport. (9-20)

POMONA-BRACKETT FLD: Operative during reconstruction. Caution - men and equip.

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30) About Jan 6, VOR will be shut down until approx Feb 6, 1958 - conversion to VORTAC. During shutdown following V arwys will be unusable IFR conditions: V23 FJS-Sutter Buttes Int., V25 Geyserville Int. - LMT, V195 ILA-FOT. V107 UKI-RBL usable substituting RBL LF rng for VOR. (11-27)

REDDING ARPT: 330' lgtd twr being erected 3.2 n mi WNW(309°T) at lat 40-32-25, long. 122-21-11. (11-21)

RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)

RIVERSIDE-MARCH AFB-RADAR APPROACH CONTROL: Radar ctl will be exercised over mil acft only until approx Nov. 30. (10-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000';44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153° 180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300° - 20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°. (9-17)

SAN DIEGO-MONTGOMERY FLD: Caution ngt lndg. Keep rnwy lgts in sight during apch. Fld unattended sunset to sunrise. Ditch 100' short of threshold lgts rnwy 28. (10-24)

SAN FRANCISCO: See Oakland Control Zone Notam

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

SAN FRANCISCO-RADIO: About Jan 16, LFR will be perm discontd. (11-19)

SAN FRANCISCO INTNL ARPT: Const in progress continuously on various sections of fld. Caution advised. (11-4)

SAN FRANCISCO BAY-SPECIAL NOTICE: A Moored balloon (silver with black stripes) 8' x 25' is flown 500' MSL on an irregular schedule from U.S. Naval Net Depot lctd on Tiburon Peninsula, daylgt hrs under VFR conditions. (10-14)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
➔ New or revised data
• = Automatic voice identification
■ Information deleted.
✓ New facility has been added to tabulation and listed on page 31 until placed in proper sequence.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR . . . . Air Route Surveillance Radar
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, CAA
CI . . . . . Control Tower, (City, County, Private, etc.)
CM . . . . . Control Tower, (Military, listing only civil frequencies available)
D . . . . . Distantly controlled

DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MA. . . . . Range (adcock, vertical radiators), power less than 50 watts
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . . VHF middle marker
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype

TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary, this issue 30 cents.

RADAR AVAILABLE: How and Where

(7 January 1958)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach (Military Equivalent of Combined ASR and PAR Equipment). ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control (RAPCON), page 4. For ATCRBS see note page 4.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: See page 17, Flight Information Manual, Vol. II, dated August 15, 1957.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded. Other transmitting frequencies listed are guarded plus 3023.5kc;122.5 mc, unless 122.7 mc is shown under Remarks. Transmit and guard 121.5 mc all locations.

RADAR BEACONS - (continued from page 3)

ATCRBS - Air traffic control radar beacon transponders (ATC transponders) are being installed in some civil aircraft to participate in the forth-coming in-service evaluation of this beacon system. Since the ATC transponder can be used with Mode 3 of the IFF Mark X system, the following will govern the operation of the ATC transponder in order to reduce interference and clutter on IFF Mark X radar displays.

1. Within the environment test area designated within a 200-mile radius of the following locations, the ATC transponder will be operated in accordance with the request of air traffic control. Ground equipment installations will start approximately October 1, 1957, at the following locations: New York center; Idlewild, La Guardia and Newark towers. Installation at the Washington center and tower, the Chicago center and O'Hare tower and the Norfolk center will follow as soon as equipment becomes available. Notification of the start of the actual evaluation will be made at a later date.

2. Air traffic control transponders will be adjusted to Code 00 and turned on only in aircraft operating on an IFR flight plan unless otherwise requested by any ground station.

3. When filing a domestic IFR flight plan for an aircraft equipped with a functioning ATC transponder, this shall be made known by adding the word "transponder" immediately following the aircraft identification. Example: "Braniff six transponder".

4. Aircraft using the "Stargazer" service offered by the Air Defense Command will advise the radar operator of the status of the ATC transponder and will operate it in accordance with the operator's request regardless of the type of flight being conducted.

5. Aircraft operating from the domestic area will comply with (3) above. Aircraft entering the domestic control area will only advise oceanic air traffic control of the status of the Air Traffic Control transponder when making the first radio report to the United States oceanic air traffic control center.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120, CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notice to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airman: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries

---

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..--.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel. See also page 58.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

✓ MIAMI-JACKSONVILLE FLIGHT ADVISORY/CONTROL AREA BOUNDARIES: The changes which were to become effective December 31, 1957, carried in Airguide Vol. 12, #21, page 3, dated December 23, 1957, postponed until further notice.

DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be utilized:

FROM	TO	MEA

CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulation is effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

BUFFALO, NEW YORK, VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 142: BUF VOR - Medina Int	Red airway 22	as published
Victor 2 and Victor 14: BUF VOR - ROC VOR	Green airway 2	as published
Victor 36: BUF VOR - Burns Int	Red airway 23	as published
Victor 164: BUF VOR - ELZ VOR	BUF LFR direct ELZ VOR	4500
Victor 33: BUF VOR - BFD VOR	BUF LFR direct BFD VOR	4500
Victor 142: BUF VOR - Jamestown Int	Unusable	-----
Victor 14: BUF VOR - ERI VOR	Green airway 2	as published
Victor 84: BUF VOR - Hagerstown Int	BUF LFR direct XU VOR	3000
Victor 36 South: BUF VOR - YZ VOR	Unusable	-----
Victor 36: BUF VOR - YZ VOR	Red airway 23	as published

The following VHF intsxns will be unusable during the period of shut down: Medina, Mumford, Rush, Grimsby, Avon, Warsaw, Niagara, Thorold.

WATERVILLE, OHIO VOR SHUT DOWN: During shutdown (Dec 2 through approx Dec 23) the following changes will apply to the airway structure:
V275 between VWV and CRL VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V6, V126 and 1510 between VWV and CLE VORs replaced by G3, MEA published. V30 between VWV VOR and Bellevue VHF intsxn replaced by TOL LFR 301°M brng inbnd to point of intsxn with W crs of EOW variation, MEA 2000. V92 between VWV and MFD VORs replaced by TOL LFR direct MFD VOR, MEA 2500. V45 and 1506 between VWV and APE VORs replaced by TOL LFR direct APE VOR, MEA 2500. V47 and V275 between VWV and FDY VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V96 between VWV and FWA VORs replaced by TOL LFR direct FWA VOR, MEA 3000. V92, V126 and 1510S between VWV and Edgerton VHF intsxn replaced by G3, MEA published. V6 and 1510 between VWV VOR and Pioneer VHF intsxn replaced by TOL LFR 108°M inbnd to the point of intsxn with SBN VOR 092° radial, MEA 5000. V30 and 1506 between VWV and LFD VORs replaced by R57, MEA published. V47 between VWV VOR and Milan VHF intsxn replaced by B87, MEA published.

Intsxn listed below have been revised as outlined during the period of outage: (a) Carp VHF intsxn - SVM VOR 126° radial and CLE VOR 355° radial, MRA 2500'. (b) Perch VHF intsxn - SE crs RML LFR and 231°M brng inbnd from TOL LFR, MRA 2500'. (c) Ogden VHF intsxn - CRL VOR 237° radial and 135°M brng inbnd from TOL LFR, MRA 2600'. (d) McCluge VHF intsxn - FDY VOR 320° radial and the 080°M brng inbnd from TOL LFR. Holding to be accomplished on the FDY VOR 320° radial. Right turns. One min pattern. MRA 2000'

✓ **LOCATION IDENTIFIERS:** The following changes affect the use of the location identifiers:

AYZ	Amityville, N.Y., Zahns	(assignment)
IAN	Kiana, Alaska	(assignment)
MKN	Mackenzie Point, Alaska,	Radiobeacon
UMY	Umiat, Alaska	Radiobeacon

[illegible] effective February 13, 1958, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Red civil arwy No. 20 (Lansing, Mich to Washington, D. C.) is amended by adding the following to airway: "excluding the portion below 6000'MSL which lies over Patuxent restricted area (R-71)." (Note: no change to arwy; phrase added to clarify depiction of Red 20 terminus on charts - same as Red 77)

(2) VOR civil arwy No. 2 (Seattle, Wash. to Boston, Mass.) is amended by changing the portion which reads: "La Crosse, Wis. omni stn, including a N alternate;" to read: "Nodine, Minn. omni stn, including a N alternate;" (Note: Redesignated V2 and V2N between Minneapolis VOR and Lone Rock VOR via Nodine VOR in place of La Crosse VOR.)

(3) VOR civil arwy No. 5 (Jacksonville, Fla. to London, Ont.) is amended by changing the portion which reads: "Chattanooga, Tenn. omni stn, including a W alternate from the Alma, Ga. omni stn to the Chattanooga, Tenn. omni stn via the intsxn of the Alma omnirange 305°T and the Atlanta omnirange 151°T radials, the Atlanta, Ga. omni stn and the intsxn of the Atlanta omnirange 352°T and the Chattanooga omnirange 152°T radials;" to read: "Chattanooga, Tenn. omni stn, including a W alternate from the Alma omni stn to the Chattanooga omni stn via the intsxn of the Alma omnirange 305° and the Vienna omnirange 135° radials, the Vienna, Ga. omni stn, the Atlanta, Ga. omni stn and the intsxn of the Atlanta omnirange 355° and the Chattanooga omnirange 152° radials;" (Note: Redesignated V5W between Alma VOR and Chattanooga VOR to include Vienna VOR.)

(4) VOR civil arwy No. 8 (Long Beach, Calif, to Washington, D. C.) is amended by changing the portion which reads: "Mormon Mesa, Nev. omni stn;" to read: "Mormon Mesa, Nev. omni stn, including a S alternate via the intsxn of the Las Vegas omnirange 081° and the Mormon Mesa omnirange 201° radials;" (Note: Added V8S between Las Vegas VOR and Mormon Mesa VOR.)

(5) VOR civil arwy No. 9 (New Orleans, La. to Green Bay, Wis.) is amended by changing the caption and by changing all after the Naperville, Ill. omni stn to read: "Naperville, Ill. omni stn; point of intsxn of the Janesville, Wis. omnirange 098°T and the Milwaukee omnirange 192°T radials; Milwaukee, Wis. omni stn, including a W alternate via the intsxn of the Naperville omnirange 317°T and the Milwaukee omnirange 207°T radials; Oshkosh, Wis. omni stn; to the Green Bay, Wis. omni stn." (Note: Added new portion to V9 from Milwaukee VOR to Green Bay VOR via Oshkosh VOR.)

(6) VOR civil arwy No. 12 (Santa Barbara, Calif. to Philadelphia, Pa.) is amended by changing the portion which reads: "Tucumcari, N. Mex. omni stn, including a N alternate via the intsxn of the Anton Chico omnirange 067°T and the Tucumcari omnirange 289°T radials;" to read: "Tucumcari, N. Mex. omni stn, including a N alternate via the intsxn of the Anton Chico omnirange 067° and the Tucumcari omnirange 291° radials;" (Note: Changed Tucumcari VOR 289°T radial to 291°T which is correct bearing of Tucumcari VOR direct radial to Las Vegas VOR on V60.)

(7) VOR civil arwy No. 21 (Long Beach, Calif. to United States-Canadian Border) is amended by changing the portion which reads: "Mormon Mesa, Nev. omni stn, including an E alternate from the Las Vegas omni stn to the Mormon Mesa omni stn via the intsxn of the Las Vegas omnirange 086°T and the Needles, Calif. omnirange direct radial to the Mormon Mesa omni stn;" to read: "Mormon Mesa, Nev. omni stn, including an E alternate via the intsxn of the Las Vegas omnirange 081° radial with the Needles, Calif. omnirange direct radial to the Mormon Mesa omni stn;" (Note: Slight redesignation of V21E between Las Vegas VOR and Mormon Mesa VOR.)

(8) VOR civil arwy No. 24 (Aberdeen, S. Dak. to Lone Rock, Wis.) is amended to read: "From the Aberdeen, S. Dak. omni stn via the Watertown, S. Dak. omni stn, including a N alternate; Redwood Falls, Minn. omni stn, including a N alternate via the intsxn of the Watertown omnirange 085° and the Redwood Falls omnirange 305° radials; Rochester, Minn. omni stn; intersection of the Rochester omnirange 113° and the Lone Rock omnirange 287° radials; to the Lone Rock, Wis. omni stn." (Note: Added new portion to V24 from Redwood Falls VOR to Lone Rock VOR via Rochester VOR.)

(9) VOR civil arwy No. 35 (Miami, Fla. to Syracuse, N. Y.) is amended by changing the portion which reads: "Macon, Ga. omni stn;" to read: "Macon, Ga. omni stn, including a W alternate via the intsxn of the Albany omnirange 010° and the Macon omnirange 228° radials;" (Note: Added V35W between Albany VOR and Macon VOR.)

(10) VOR civil arwy No. 37 (Savannah, Ga. to Erie, Pa.) is amended by changing the portion which reads: "Charlotte, N. C. omni stn;" to read: "Charlotte, N. C. omni stn, including a W alternate via the intsxn of the Columbia omnirange 329° and the Charlotte omnirange 209° radials;" (Note: Added V37W between Columbia VOR and Charlotte VOR.)

(11) VOR civil arwy No. 51 (Miami, Fla. to Chicago, Ill.) is amended by changing the portion which reads: "Chattanooga, Tenn. omni stn, including a W alternate from the Alma, Ga. omni stn to the Chattanooga, Tenn. omni stn via the intsxn of the Alma omnirange 305°T and the Atlanta omnirange 151°T radials, the Atlanta, Ga. omni stn and the intsxn of the Atlanta omnirange 352°T and the Chattanooga omnirange 152°T radials;" to read: "Chattanooga, Tenn. omni stn, including a W alternate from the Alma omni stn to the Chattanooga omni stn via the intsxn of the Alma omnirange 305° and the Vienna omnirange 135° radials, the Vienna, Ga. omni stn, [illegible] Redesignated V82W between Alma VOR and Chattanooga VOR to include Vienna VOR. Changed Atlanta 352°T to 355°T.)

(12) VOR civil arwy No. 82 (Minneapolis, Minn. to Nodine, Minn.) is amended to read: "From the Minneapolis, Minn. omni stn via the Rochester, Minn. omni stn, including a S alternate via the intsxn of the Minneapolis omnirange 179° and the Rochester 318° radials; to the Nodine, Minn. omni stn, including a S alternate via the intsxn of the Rochester omnirange 113° and the Nodine omnirange 257° radials." (Note: Redesignated V82 and V82S from Rochester to Nodine VOR due to relocation and renaming of La Crosse VOR to Nodine VOR.)

(13) VOR civil arwy No. 97 (Miami, Fla. to Minneapolis, Minn.) is amended by changing the portion which reads: "La Crosse, Wis. omni stn, intsxn of the La Crosse omnirange 311°T radial and the Minneapolis-St Paul Intnl Arpt ILS 121°T lclzr crs; to the Minneapolis-St Paul, Minn. Intnl Arpt ILS lclzr." to read: "Nodine, Minn. omni stn; point of intsxn of the Nodine omnirange direct radial to the Minneapolis omni stn with the Minneapolis-St Paul Intnl Arpt ILS 121° lclzr crs; to the Minneapolis-St Paul, Minn. Intnl Arpt ILS lclzr." (Note: Redesignated V97 between Lone Rock VOR and Minneapolis-St Paul ILS lclzr via the Nodine VOR. Removed La Crosse VOR from V97.)

(14) VOR civil arwy No. 111 (Salinas, Calif. to Los Banos, Calif.) is amended to read: "From the Salinas, Calif. omni stn to the point of intsxn of the Salinas omnirange 049° radial with the Coalinga, Calif. omnirange direct radial to the Oakland, Calif. omni stn." (Note: Redesignated V111 from Salinas VOR to the point of intsxn of the Salinas 049° radial with V107.)

(15) VOR civil arwy No. 129 (Rockford, Ill. to Eau Claire, Wis.) is amended by changing the portion which reads: "La Crosse, Wis. omni stn;" to read: "Nodine, Minn. omni stn;" (Note: Replaced La Crosse VOR with Nodine VOR on V129.)

(16) VOR civil arwy No. 133 (Charlotte, N. C. to Traverse City, Mich.) is amended by changing the caption and by changing all before Zanesville, Ohio omni stn to read: "From the Charlotte, N. C. omni stn via the Hickory, N. C. omni stn; to the Charleston, W. Va. omni stn. From the point of intsxn of the Parkersburg omnirange 172° radial with the Charleston, W. Va. omnirange direct radial to the Morgantown, W. Va. omni stn via the Parkersburg, W. Va. omni stn; Zanesville, Ohio, omni stn;" (Note: Added new portion to V133 from Charlotte VOR to Charleston VOR via Hickory VOR.)

(17) VOR civil arwy No. 197 (Las Vegas, N. Mex. to Pueblo, Colo.) is added to read: "From the Las Vegas, N. Mex. omni stn to the Pueblo, Colo. omni stn." (Note: New arwy.)

(18) VOR civil arwy No. 228 (Wheeling, Ill. to South Bend, Ind.) is amended to read: "From the Northbrook, Ill. omni stn to the South Bend, Ind. omni stn, including a N alternate via the intsxn of the Northbrook omnirange 093° and the South Bend omnirange 308° radials." (Note: Added V228N between Northbrook VOR and South Bend VOR.)

(19) VOR civil arwy No. 259 (Charlotte, N. C. to Tri-City, Tenn.) is amended to read: "From the Charlotte, N. C. omni stn to the Tri-City, Tenn. omni stn, including an E alternate from the Charlotte omnirange to the Tri-City omni stn via the Hickory, N. C. omni stn and the intsxn of the Hickory omnirange 302° and the Tri-City omnirange 146° radials." (Note: Added V259E between Charlotte VOR and Tri-City VOR via Hickory VOR.)

(20) VOR civil arwy No. 297 (unassigned)

(21) VOR civil arwy No. 298 (unassigned)

(22) VOR civil arwy No. 299 (Los Angeles, Calif. to Bakersfield, Calif.) is added to read: "From the Los Angeles, Calif. omni stn via the Gorman, Calif. omni stn; to the Bakersfield, Calif. omni stn." (Note: New arwy.)

(23) VOR civil arwy No. 1502 (San Francisco, Calif. to New York, N. Y.) is amended by changing the portion which reads: "to the Redwood Falls, Minn. omni stn. From the Lone Rock Wis. omni stn via the intsxn of the Lone Rock omnirange 103°T and the Milwaukee omnirange 273°T radials;" to read: "Redwood Falls, Minn. omni stn; Rochester, Minn. omni stn; intsxn of the Rochester omnirange 113° and the Lone Rock omnirange 287° radials; Lone Rock, Wis. omni stn; intsxn of the Lone Rock omnirange 103° and the Milwaukee omnirange 273° radials;" (Note: Added new portion to V1502 from Redwood Falls VOR to Lone Rock VOR via Rochester VOR.)

(24) VOR civil arwy No. 1508 (Los Angeles, Calif. to New York, N. Y.) is amended by changing the portion which reads: "to the Milford, Utah, omni stn." to read: "Milford, Utah omni stn; Myton, Utah omni stn; to the Laramie, Wyo. omni stn." (Note: Added new portion to V1508 from Milford VOR to Laramie VOR via Myton VOR.)

CONTROL AREAS:

(1) VOR civil arwy No. 9 (New Orleans, La. to Green Bay, Wis.) is amended to read: "All of VOR civil arwy No. 9 including E and W alternates."

(2) VOR civil arwy No. 24 (Aberdeen, S. Dak. to Lone Rock, Wis.) is amended to read: "All of VOR civil arwy No. 24 including N alternates."

(3) VOR civil arwy No. 35 (Miami, Fla. to Syracuse, N. Y.) is amended to read: "All of VOR civil arwy No. 35 including a W alternate and also including an E alternate from the Elmira, N. Y. omni stn to the Syracuse, N. Y. omni stn, but excluding the airspace between the main arwy and its E alternate. The airspace below 2000'MSL, which lies beyond the continental limits of the United States is excluded."

(4) VOR civil arwy No. 37 (Savannah, Ga. to Erie, Pa.) is amended to read: "All of VOR civil arwy No. 37 including a W alternate."

(5) VOR civil arwy No. 82 (Minneapolis, Minn. to Nodine, Minn.) is amended to read: "All

of VOR civil arwy No. 82 including S alternates."

(6) VOR civil arwy No. 115 (Crestview, Fla. to Buffalo, N.Y.) is amended to read: "All of VOR civil arwy No. 115."

(7) VOR civil arwy No. 133 (Charlotte, N.C. to Traverse City, Mich.) is amended to read: "All of VOR civil arwy No. 133."

(8) VOR civil arwy No. 197 (Las Vegas, N. Mex. to Pueblo, Colo.) is added to read: "All of VOR civil arwy No. 197."

(9) VOR civil arwy No. 228 (Wheeling, Ill. to South Bend, Ind.) is amended to read: "All of VOR civil arwy No. 228 including a N alternate."

(10) VOR civil arwy No. 259 (Charlotte, N.C. to Tri-City, Tenn.) is amended to read: "All of VOR civil arwy No. 259 including an E alternate, but excluding the airspace between the main arwy and its E alternate."

(11) VOR civil arwy No. 297 (unassigned)

(12) VOR civil arwy No. 298 (unassigned)

(13) VOR civil arwy No. 299 (Los Angeles, Calif. to Bakersfield, Calif.) is added to read: "All of VOR civil arwy No. 299."

CONTROL AREA EXTENSIONS:

(1) (Tyler, Tex.) is amended by adding the following portion to present control area: "and including the airspace within 5 mi either side of the 248° radial of the Gregg County omnirange extending southwestward from the omnirange station to the Tyler 25 mi radius control area."

(2)(La Crosse, Wis.) is amended by changing the name "La Crosse omni stn" to read: "La Crosse terminal omni stn."

(3) (Altus, Okla.) is amended by adding the following portion to present control area extension: "All of the airspace SW of Altus AFB bounded on the NE by VOR civil arwy No. 114, on the S by VOR civil arwy No. 102 and on the NW by VOR civil arwy No. 14."

(4) (Abilene, Tex.) is amended by adding the following portion to present control area: "including the airspace SW of Abilene bounded on the NW by VOR civil arwy No. 66, on the E by VOR civil arwy No. 77E, on the S by the San Angelo, Tex. control area extension (601.1196), and on the SW by VOR civil arwy No. 76N."

(5) (Mineral Wells, Tex.) is added to read: "The airspace SW of Mineral Wells bounded on the S by VOR civil arwy No. 94, on the E by VOR civil arwy No. 163 and on the NW by VOR civil arwy No. 16S."

(6) (New Philadelphia, Ohio) is added to read: "The airspace bounded on the W by Blue civil arwy No. 81, on the N and NE by VOR civil arwy No. 92 and on the S by VOR civil arwy No. 210."

CONTROL ZONES:

(1) (Wichita, Kans.) is amended to read: "Within a 5 mi radius of the Wichita Municipal Arpt, within 2 mi either side of the Wichita ILS lclzr crs extending from the lclzr to a point 10 mi S of the ILS outer compass locator, within 2 mi either side of the 360°/180° radials of the Wichita omnirange extending from the 5 mi radius zone to a point 10 mi N of the omni stn, within a 7 mi radius of the McConnell AFB, Wichita, Kans. and within 2 mi either side of the McConnell AFB ILS lclzr crs extending from the lclzr to a point 10 mi S of the McConnell AFB ILS outer marker."

(2) (La Crosse, Wis.) is amended to read: "Within a 5 mi radius of the La Crosse Municipal Arpt, within 2 mi either side of the NW crs of the La Crosse rdo rng extending from the rdo rng stn to a point 10 mi NW, within 2 mi either side of the 227° radial of the La Crosse TVOR extending from the TVOR to a point 12 mi SW, and within 2 mi either side of the 146° radial of the La Crosse TVOR extending from the TVOR to a point 10 mi SE."

(3) (Clovis, N. Mex.) is amended by changing the name "Clovis AFB" to read: "Cannon AFB."

(4) (Wausau, Wis.) is amended by changing the name "Alexander Arpt" to read: "Wausau Municipal Arpt."

(5) (Chicago, Ill.) is added to read: "Within a 3 mi radius of Meigs Arpt, Chicago, Ill. excluding the area lying W of long. 87-38-00."

(6) (Wilkes Barre, Pa.) is added to read: "Within a 5 mi radius of the Wilkes Barre-Scranton Arpt and within 2 mi either side of the extended centerline of rnwy 4 extending to the Crystal Lake, Pa. nondirectional rdo bcn."

(7) (Five mile radius zones) is amended by deleting the following airport: "Wilkes-Barre, Pa.: Wilkes-Barre-Scranton Arpt" (Note: Redesignated with an extension - in this amendment.)

REPORTING POINTS:

(1) Red civil arwy No. 13 (Wheeling, W. Va. to Boston, Mass.) is amended by adding the following reporting point: "the intsxn of the N crs of the Providence, R.I., rdo rng and the SW crs of the Boston, Mass. rdo rng."

VOR REPORTING POINTS:

(1) VOR domestic reporting points is amended by adding the following reporting points:

(a) Nantucket, Mass. omni stn (for acft operg at all alts)

(b) Presque Isle, Maine omni stn (for acft operg at all alts)

(c) Westminster, Md. omni stn (for acft operg at all alts)

(d) Woodstown, N.J. omni stn (for acft operg at all alts)

(e) Oshkosh, Wis. omni stn (for acft operg at 15,200'MSL and below)

(f) Nodine, Minn. omni stn (for acft operg at all alts)

(g) San Simon, Ariz. omni stn (for acft operg at all alts)

(h) Redwood Falls, Minn. omni stn (presently depicted on aeronautical charts as a compulsory reporting point for acft operg at 15,200'MSL, and below, should be depicted as a compulsory reporting point for acft operg at all alts.)

(i) Fairport Int: The intsxn of the Cleveland, Ohio, omnirange 049°T (052°M) and the Jefferson, Ohio, omnirange 279°T (284°M) radials.

(j) Titusville Int: The intsxn of the Fitzgerald, Pa. omnirange 304°T (310°M) and the Bradford, Pa. omnirange 260°T (267°M) radials.

(k) Franklin Int: The intsxn of the Gardner, Mass. omnirange 132°T (146°M) and the Boston, Mass. omnirange 223°T (238°M) radials.

(2) VOR domestic reporting points is amended by revoking the following reporting points:

(a) North Perry Int: The intsxn of the Jefferson, Ohio, omnirange 279°T and the Youngstown, Ohio, omnirange 320°T radials.

(b) Dayton Int: The intsxn of the Westminister, Md. omnirange 179°T and the Baltimore Md. omnirange 281°T radials.

(c) La Crosse, Wis. omni stn.

✓ TEST OF EXPANDED RADAR SERVICE - ANDREWS AFB AREA: Effective 0001 EST 15 Jan 1958 and continuing until 2359 EST 15 Mar 1958 a test will be conducted to gather operational experience and information concerning the practicability of providing expanded radar traffic control service (separation and/or traffic information) to aircraft operating VFR in the vicinity of Andrews AFB. Test activity will be conducted by Andrews approach control within the Andrews approach control area which generally lies between the 060° radial clockwise to the 165° radial of the Washington TVOR within a 30 mile radius E of Andrews AFB. During the test period all aircraft operating VFR in or through this area at and below 10,000 MSL are urged to contact Andrews approach control. Radar will be utilized insofar as possible to provide traffic information and/or radar separation to participating aircraft in the following manner:

1. Military aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic information and radar separation, as required, from all other observed traffic.

2. Civil aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic advisory information.

3. All aircraft operating VFR in the area above 2500 MSL and up to 10,000 MSL inclusive will be provided pertinent traffic advisory information only.

4. Military aircraft should initiate contact on 355.8 mc or 136.8 mc. Civil aircraft may call on 123.7 mc or 122.1 mc and receive on 123.7 mc. Pilots should advise approach control of their position, altitude, heading and intentions during first radio contact so that controllers may plan proper route through the area. Traffic from the east and northeast on Victor 16 or Green 5 is requested to initiate call at Kent Island or over eastern shore of Chesapeake Bay. Traffic from the southeast on Blue 56 should initiate contact in vicinity of Coles Point. Traffic landing at Washington National, Bolling or Anacostia will be advised when to change to appropriate tower frequency.

5. VFR flights departing from Washington National, Bolling or Anacostia that will penetrate test area should contact Andrews approach control as soon as practicable after leaving respective tower frequency and prior to entering area. Aircraft departing airports within the area are requested to initiate contact as soon as practicable after takeoff.

6. IFR traffic operating through the area will be handled in the normal manner by CAA traffic control facilities and should not contact Andrews approach control unless instructed to do so by ATC. There will be no change in established local traffic patterns during the test period.

The above services are designed to aid pilots in avoiding collision and should not be construed as relieving the pilot of any responsibilities and requirements governing VFR flight as established in pertinent military or Civil Air Regulations. Radar traffic information will be provided in accordance with the U.S. Standard Manual of Radar Air Traffic Control Procedures.

Comments from pilots participating in the test are solicited and will be most welcome. Please address correspondence to: Commander, 2045th AACS Group, Attention: Flight Facilities Officer, Andrews Air Force Base, Washington 25, D.C.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.

2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.

3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----
Victor 126: HUO VOR - ILT VOR	ILT VOR 294 M radial to the point of intsxn with DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Paterson VHF Int	None	----
Victor 249: HUO VOR - CDW VOR	CDW VOR 356 M radial to the point of intsxn with the AVP VOR 127 M radial. None beyond.	5000
Victor 126 and 146: HUO VOR - AVP VOR	AVP VOR 105 M radial to point of intsxn with the DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Herrick VHF Int	None	----
Victor 249: HUO VOR - DNY VOR	DNY VOR 171 M radial to the point of intsxn with the AVP VOR 105 M radial	5000

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Central Valley	ILT VOR 288 M radial and POU VOR 234 M radial	3000
Huguenot VOR	AVP VOR 105 M radial and STW VOR 035 M radial	5000
Greenwood	POU VOR 234 M radial and ILT VOR 280 M radial (Holding Pattern: NE of the Greenwood Int on the POU VOR 234 radial. Left turns. One minute pattern)	3000

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957, as follows:

(1) Page 22, Miles City, Montana - change - CAA telephone number to CEdar 2-1503.

(2) Page 26, General Safety - Region 1 - Lindenhurst, N.Y. - change telephone number to TUrner 8-1440.

(3) Page 73, VOR Receiver Check Points - under Introduction, paragraph 3: delete last line, substituting therefor: "Information concerning an individual test signal can be obtained from the local communications station."

(4) Page 77, Sault Ste Marie, Mich: 319°; over intsxn E/W and NW/SE rnwys.

(5) Page 77, add - Texarkana, Ark. (Municipal): 120°; over LFR; 1000'.

(6) page 82, delete - Texarkana, Ark. (Municipal): (both ground check points).

ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 3: BOS VOR - Hampton VHF Int	Amber 7	as published
Victor 141: BOS VOR - ACK VOR	Blue 58	as published
Victor 16: BOS VOR Woonsocket VHF Int	Green 2	as published
Victor 3: BOS VOR - Millbury VHF Int	BOS LFR direct Worcester LOM	3000
Victor 141: BOS VOR - CON VOR	Blue 4	as published

Lowell	SE crs of the CON LFR GDM VOR 094 M radial	2000
Franklin	Franklin LF intsxn	as published

✓ NAVIGATIONAL WARNING: USAF jet and conventional bombers will conduct daylight VFR flights between 500 and 2000 ft above ground level along routes indicated below, climb from last point listed and fly at conventional altitudes over target listed. Flights will be within 20 n mi either side of selected route avoiding built up areas and civil airports.

Route 8-F-I: 39-28N, 95-03W; 40-43N, 92-25W; 41-14N, 89-22W; 43-14N, 90-51W; 44-48N, 91-03W; 44-42N, 91-49W; 43-38N, 93-47W; 41-04N, 98-28W; 40-59N, 94-40W; 40-29N, 95-54W, target Peru, Nebraska.

Route 8-A-III: 43-18N, 99-02W; 43-18N, 103-25W; 44-28N, 104-44W; 44-58N, 102-55W; 44-30N, 102-01W; 44-02N, 99-28W; 43-53N, 96-04W; 43-33N, 94-58W; 42-36N, 95-11W; 42-08N, 95-25W; target Omaha, Nebraska.

Route 8-E-II: 38-55N, 94-16W; 40-17N, 91-29W; 40-26N, 87-16W; 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-45N, 92-40W; 38-21N, 93-46W; target Clinton, Missouri.

Route 8-D-I: 37-52N, 95-44W; 39-12N, 96-13W; 39-53N, 96-53W; 41-27N, 97-32W; 42-51N, 97-55W; 42-38N, 100-12W; 40-02N, 99-20W; 38-27N, 100-20W; 38-00N, 99-21W; 38-00N, 99-12W, 38-54N, 98-51W; target Russell, Kansas.

Route 8-H-II: 43-34N, 70-11W; 43-45N, 69-50W; 44-28N, 67-35W; 45-11N, 67-41W; 45-58N, 68-09W; 44-40N, 69-44W; 43-38N, 71-47W; 44-16N, 73-12W; 43-25N, 73-41W; 43-01N, 74-46W; 44-00N, 75-25W; 44-34N, 75-00W; 44-56N, 73-24W; 44-50N, 72-47W; target Groveton, New Hampshire.

Route 8-B-III: 38-14N, 94-50W; 38-12N, 92-38W; 38-43N, 91-26W; 37-22N, 89-25W; 37-24N, 86-02W; 37-50N, 84-42W; 37-22N, 80-47W; 38-33N, 80-15W; 39-05N, 81-55W; 39-16N, 82-08W; target Columbus, Ohio.

Route 8-G-I: 43-10N, 76-30W; 42-41N, 78-02W; 42-14N, 80-09W; 41-27N, 82-58W; 41-27N, 83-39W, 41-12N, 84-45W; 40-53N, 84-36W; 40-29N, 83-53W; 40-35N, 81-13W; 40-50N, 80-22W, 41-47N, 78-50W; 42-26N, 76-54W; 42-34N, 76-33W; target Waterville, New York.

Route 8-C-III: 41-39N, 73-56W; 41-24N, 75-15W; 40-02N, 78-21W; 37-42N, 78-38W; 37-35N, 79-38W; 40-40N, 79-26W; 41-53N, 76-30W; 42-28N, 73-55W; 42-27N, 73-51W; target Springfield, Massachusetts.

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200' MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

HERNDON, VIRGINIA, VOR SHUT-DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 223: HRN VOR - Hampton VHF Int	Arcola LFR direct HAR VOR	3000
Victor 39: EMI VOR - Remington VHF Int	Red 33	as published
Victor 4: HRN VOR - FRR VOR	Red 18	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Sugar Loaf	MRB VOR 107 M radial; EMI VOR 245 M radial	3000
Keymar	MRB VOR 078 M radial; HAR VOR 201 M radial; EMI VOR 295 M radial;	3000
Lisbon	Use Lisbon LF Int	as published
Fairland	DCA TVOR 023 M radial; BAL VOR 244 M radial	3000
Springfield	Use Springfield LF Int	as published
Remington	Use Remington LF Int	as published
Plains	FRR VOR 118 M radial; MRB VOR 170 M radial; (Holding Pattern: NW of the substitute intsxn on the Front Royal 118 radial. Right turns. One minute pattern)	4000
Leesburg	FRR VOR 094 M radial; MRB VOR 147 M radial	4000
Manassas	Brooke VOR 003 M radial; DCA TVOR 256 M radial	3000
Quarry	SW crs of the ARV LFR; FRR VOR 118 M radial	4000

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

(6 February 1958)

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
* - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°- 07° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
BESSEMER ARPT: Caution. Auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)
BIRMINGHAM-RADIO: Dec 12, VOR shut down until approx Feb 1 - conversion VORTAC. Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int. via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. Caution - E course LFR has severe multiples. (12-17)
BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down - relctn. (8-7) FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft required after-burners prohibited use of arpt. Extn const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down for relctn due rnwy ext. (5-1)
CLANTON-WARE ISLAND ARPT: New arpt reported. Lctd 10 mi NE on an island in Coosa River. Lat 33-57, Long 86-31; elev 360'; 1 sod strip 2500'; no serv. (12-19)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Clsd. (10-16)
EVERGREEN-RADIO: VOR radials 320° thru 360° out of tolerance - excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20 MSY-ALT: Rnwy and threshold lgts inop. (2-6)
**FAIRHOPE-KLUMPP ARPT: 999' (120' MSL) lgtd twr erected 9 n mi N (12°T) at lat 30-40-55, long. 87-49-41. (12-6)
HUNTSVILLE-RADIO: VOR radials 005°- 030° have roughness and bends out of tolerance.
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°- 028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-TOWER: ILS not to be used for automatic apch below 300'. Glide slope inop - equip. and const vcnty transmitter bldg. (8-22)FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' and ½ mi is absolute tk-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MOBILE-BROOKLEY AFB-RADAR APPROACH CONTROL: About Jan 8, RAPCON will be cmsnd at Brookley AFB. Concurrently Mobile approach control will be decmsnd at Mobile Bates Fld arpt. Freq: 113.3, 236.6, 137.88, 243.0, 363.8, 270.6, 335.8, 289.4, 118.5, 123.7, 121.5, 126.18, 134.1, 136.8, 142.02, 143.64. Rcvs only 122.7, 3023.5. (12-20)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly FLD ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (10-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)

ARIZONA: CLIFTON-GREENLEE COUNTY ARPT: Clsd. (9-17)
COCHISE-RADIO: VOR/DME coverage 015°- 045°, 30 n mi; 090°- 110°, 40 n mi; 190°- 215°, 35 n mi; 215°- 235°, 30 n mi; 235°- 255°, 35 n mi at MEA. (5-8)
DRAKE-RADIO: About Jan 31, VOR will be cmsnd. Ident: DRK. Freq: 113.1 mc. Lctd lat 34-54-04, long. 112-25-00. Elev: 4630' MSL. Class: VORW. (12-6)
FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181.. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 Kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)
GLEN CANYON DAM SITE -SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
MARANA ARPT: Reported inactive. (10-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take off xcpt prior permission arpt manager, (12-7) Men & equip. along N edge rnwy 26L from apch end to a point approx 2000' W. (8-23)
PRESCOTT-RADIO: VOR coverage 185°- 225°, 35 n mi at 10,000', 135°- 145°, and 165° - 185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx Mar 3, conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int.-PHX; V105E PRC-PHX. (11-18)
SAN SIMON-RADIO: VOR coverage 030°- 070°, 30 n mi; 160°- 260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)
TUCSON-RADIO: VOR/DME coverage: 360°- 050°, 35 n mi 11,000'; 050°- 060°, 22 n mi 11,000'; 060°- 075°, 35 n mi 11,000'; 075°- 085°, 21 n mi 11,000'; 090°- 170°, 40 n mi 12,000'; 225°- 230°, 40 n mi 7,000'; 330°- 345°, 35 n mi 11,000'; 345°- 360°, 25 n mi 11,000'. (7-17) About Feb 3, VOR will be shut down until approx Mar 4 - VORTAC conversion; following Victor arwys unusable durg IFR conditions: V-16 Toltec Int-CIE, V-66 GBN- Mescal Int, V16- S TUS-Mescal Int. (12-5)
TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)
TUCSON ARPT: Perm structures in excess of 75' hign being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at ngt. Obstn lgts apchs to rnwy 21 inop. (11-15)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°- 300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB-SPECIAL NOTICE: Ngt weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: BLYTHEVILLE - SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
FT. SMITH-RADIO: About March 15, VOR will be shut down, modification. During shut down VOR flgts are authorized to use FSM BMH fac in lieu of FSM VOR on all arwys. Bears. and MEAs used shall remain as charted except bear. from FSM BMH to Int of 295° radial Little Rock VOR on V-74 shall be 97°. Paris Int. redesignated as 97° from FSM BMH and FYV 160°. On V-13, use 192° from FYV VOR to FSM BMH. MEA for VOR equipped acft on V-74 from TUL to FSM 7500' and on V-13 from FYV to FSM 5500'. (12-13)

[redacted]: LITTLE ROCK-ADAMS FLD: Trenches 6" wide, 30" deep being dug and back filled approx 12' either side rnwy 14-32. (12-3)
PINE BLUFF-GRIDER FLD: Rnwy 8-26 clsd. Soft from rains. (12-7)
SEARCY ARPT: Clsd until approx Mar 30. Const. (12-30)
TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800'MSL 35 n mi. (5-21)
[redacted]: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)
ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030° - 040°, 11,000; 040°-060°, 12,000';060°-090°, 13,5000'. (8-9)
**ARCATA ARPT: Right tfc rnwys 13 & 19. (12-10)
BAKERSFIELD-KERN CO. ARPT-TOWER: About Feb 1, 119.9 mc will be decmsnd and 119.8 mc cmsnd. (12-26)
BRASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)
BLUE CANYON ARPT, 13, SFO-SLC: Closed due to snow. (12-18)
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300° 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)
BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Feb 1, radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR Saugus Int Fillmore VOR Camarillo LFR Burbank OM. (12-27)
CAMARILLO-RADIO: All courses have multiples. (6-17) About Jan 6, auto ident LFR will be perm discontd. (12-20)
**CORONA-THURSBY ARPT: To be abandoned Feb 28, 1958. (12-11)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)
DIXON ARPT: Closed. (8-30)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
EL TORO MCAS-RADIO: VOR coverage restriction at and below 10,000' MSL beyond 25mi from 360° clockwise to 070°. (12-13)
FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: : VOR coverage 250°-090°, 30 mi; 090°-120°, 15 mi. 150°-250°, 20 mi at MEA. (12-2)
FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)
**FRESNO AIR TERM: Extreme caution advised in vicinity of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N & E of arpt. Jet barriers operd by ctl twr, avail. to mil acft on request only. Barriers installed 150' from both ends rnwy 11-29. First 1000' pavement rnwy 29 is overrun area behind barrier not to be used as rnwy. Longest rnwy avail 7168'. (1-3)
GLENDALE-GRAND CENTRAL ARPT: Extnsive const. Fld clsd to all acft at sunset.(11-29)
GOFFS-RADIO: VOR coverage 265°-310°, 25 n mi at MEA. Below 9500' this area beyond tolerance. (11-8)
LONG BEACH-RADIO: Distance Measuring Equipment shut down until approximately February 4, relocation. (12-31) VOR omnirange automatic identification inoperative. (12-26)
LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230°. (12-10) FLD: Several 230'MSL portable oil derricks NW, W, & S of lfd. Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of & roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd, const; 6200' avail. Rnwy 12 clsd. Straight in ILS lndg min rnwy 30 daylgt hrs only-500'/1 mi. (6-25)
LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to [redacted]: moderate scalloping below 3000' MSL. (10-23)
LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL. beyond 30 n mi. (4-19)
**LOS ANGELES INTNL ARPT: New lgtd rnwy 16-34 approx 4000' W of Sepulved Blvd clsd - avail 30 min req thru twr. Equip. crossing rnwy. During VFR wea conditions: civil acft ctc twr on 118.9 mc or listen 118.9 mc; trans 122.7 at least 10 mi out. During IFR wea: civil acft ctc Apch Ctl on 118.1 or 119.3 or listen 118.1 or 119.3 and trans 122.7 mc. USAF, NAVY, CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corricor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E bound from Malibu or Pt. Dume Intsxns om VFR conditions making a track which approx entended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000', ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Transmissometer cmsnd. Apch lgt lane sequenced flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (7-11)
LUCERENE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.
MARTINEZ ARPT: Clsd until approx June. (11-27)
MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E; elev 174'; 1 rnwy - (15-33) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)
MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)
MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.
OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)
OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.
OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF operg test basis. Freqs: 118.1, 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc, Coverage 40 n mi at MEA xcpt 020°-050°, 8000' MSL. (10-14)
OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 8000';040°-060°, 7000' MSL. Soon, freq 120.7
** mc will be discontd and 123.9 mc will be cmsnd. (12-9) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd. (8-22)
OCEANSIDE-RADIO: July 10, VOR shut down until approx Jan 10. - modernization. Durg this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable Flgts departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period. (12-27)

CALIFORNIA: ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INT'L ARPT-TOWER: Soon, freq 120.7 mc will be decmsnd and 118.6 mc will be cmsnd. (12-23) FLD: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W-adj to Pomona Heliport. (9-20)

POMONA-BRACKETT FLD: Operative during reconstruction. Caution - men and equip.(8-14)

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30) About Jan 6, VOR will be shut down until approx Feb 6-conversion to VORTAC. Durg shutdown following V arwys will be unusable IFF conditions: V23 FJS-Sutter Buttes Int., V25 Geyserville Int. - LMT, V195 ILA-FOT. V107 UKI-RBL usable substituting FBL LF rng for VOR. (11-27)

REDDING ARPT: 330' lgtd twr being erected 3.2 n mi WNW (309°T) at lat 40-32-25, long. 122-21-11. (11-21)

RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)

RIVERSIDE-MARCH AFB-RADAR APPROACH CONTROL: Radar ctl exercised over mil acft only. (10-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000';44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°.

SAN DIEGO-MONTGOMERY FLD: Caution ngt lndg. Keep rnwy lgts in sight during apch. Fld unattended sunset to sunrise. Ditch 100' short of threshold lgts rnwy 28. (10-24)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO BAY-SPECIAL NOTICE: A moored balloon (silver with black stripes) 8' x 25' is flown 500' MSL on an irregular schedule from U.S. Naval Net Depot lctd on Tiburon Peninsula, daylgt hrs under VFR conditions. (10-14)

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

SAN FRANCISCO-RADIO: About Jan 16, LFR will be perm discontd. (11-19)

SAN FRANCISCO INTNL ARPT: Const in progress continuously on various sections of fld. Caution advised. (11-4)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN JOSE-RADIO: TVOR has scalloping beyond tolerance, 230° thru 240°. (11-12)

SAN RAFAEL-SAN FRANCISCO BAY ARPT: Caution-60' crane and trucks operg daylgt hrs W end rnwy. Road embankments both ends rnwy. Fld soft when wet. (11-29)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110'-260°, not checked. (10-23) LF rng has numerous multiples NW and E courses. (9-17)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210° 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

SANTA PAULA ARPT: Grading & paving opern in progress all areas. Use extreme caution.

SHOSHONE ARPT: Strip clsd for paving. (8-9)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, CALIFORNIA: 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250° , 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)

THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.(10-11)

VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'.

WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.

WOODLAND-WATTS ARPT: 200' at N end N/S rnwy under const.(9-5) Clsd to ngt opern. Use hard surfaced rnwy only days. (12-4)

YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200'; lgts; BL4; fuel, F2.(1-3)

COLORADO: CHEYENNE WELLS ARPT: Sand drifts over 3' high - dangerous. (7-5)

COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21.

CRAIG ARPT: Rnwy clsd for const. Use 2500' strip immediately S rnwy. (8-27)

DENVER-STAPLETON FLD-TOWER: VHF/DF commun unreliable at 40 mi below 14,000' MSL 154° to 180° and below 16,000' MSL 181° thru 243°. VHF/DF bearings reliable in

** these areas. (5-8) FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segmented circle denotes rgt hand tfc. (9-12) Transmissometer cmsnd. (11-21)

GRAND JUNCTION-WALKER ARPT: Rnwy 11-29 and neon apch lgts inop for reconst of rnwy and installing rnwy lgts. (8-20)

HANOVER-RADIO: H fac bearings unreliable beyond 25 n mi in shadow area of Pikes Peak.

NUCLA ARPT: Clsd. Const. (10-23)

PARSHALL-SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)

PUEBLO-SPECIAL NOTICE: Controlled Firing (demolition) Area for use of the Pueblo Ordnance Depot established within the following described area: bounded on N by lat 38-22-00; E, long. 104-21-22; S, lat 38-18-00; W, long. 104-22-50. (4-30)

PUEBLO-RADIO: VOR out of tolerance from 010° to 070°- hvy scalloping. (12-16)

PUEBLO MEMORIAL ARPT: 2600' N end rnwy 17-35 clsd to hvy acft. Men & equip. on fld daylgt hrs. Ctc ctl twr for current fld conditions. (9-4)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

Notices to Airmen - page 2

VOL. 12, NO. 23 **JANUARY 21, 1958**

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

STATE UNIVERSITY LIBRARY

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120, CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notice to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airman: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..--.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

****

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 25 cents.

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200'MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

HERNDON, VIRGINIA, VOR SHUT-DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 223: HRN VOR - Hampton VHF Int	Arcola LFR direct HAR VOR	3000
Victor 39: EMI VOR - Remington VHF Int	Red 33	as published
Victor 4: HRN VOR - FRR VOR	Red 18	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Sugar Loaf	MRB VOR 107 M radial; EMI VOR 245 M radial	3000
Keymar	MRB VOR 078 M radial; HAR VOR 201 M radial; EMI VOR 295 M radial;	3000
Lisbon	Use Lisbon LF Int	as published
Fairland	DCA TVOR 023 M radial; BAL VOR 244 M radial	3000
Springfield	Use Springfield LF Int	as published
Remington	Use Remington LF Int	as published
Plains	FRR VOR 118 M radial; MRB VOR 170 M radial; (Holding Pattern: NW of the substitute intsxn on the Front Royal 118 radial. Right turns. One minute pattern)	4000
Leesburg	FRR VOR 094 M radial; MRB VOR 147 M radial	4000
Manassas	Brooke VOR 003 M radial; DCA TVOR 256 M radial	3000
Quarry	SW crs of the ARV LFR; FRR VOR 118 M radial	4000

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel. See also page 58.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded that [illegible] with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.3(b) and 60.4(c), [illegible]

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be utilized:

FROM	TO	MEA
VOR civil arwy V-6, V-8, V-1510		
Omaha, Nebr. VOR	*Lyman, Iowa Int	5500
*Descent to 2600 authorized westbound after passing Lyman Int.

*MRA 4000		2200
Des Moines, Iowa LFR	Cedar Rapids, Iowa Rbn	2200

CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulation is effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

BUFFALO, NEW YORK, VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 142: BUF VOR - Medina Int	Red airway 22	as published
Victor 2 and Victor 14: BUF VOR - ROC VOR	Green airway 2	as published
Victor 36: BUF VOR - Burns Int	Red airway 23	as published
Victor 164: BUF VOR - ELZ VOR	BUF LFR direct ELZ VOR	4500
Victor 33: BUF VOR - BFD VOR	BUF LFR direct BFD VOR	4500
Victor 142: BUF VOR - Jamestown Int	Unusable	-----
Victor 14: BUF VOR - ERI VOR	Green airway 2	as published
Victor 84: BUF VOR - Hagerstown Int	BUF LFR direct XU VOR	3000
Victor 36 South: BUF VOR - YZ VOR	Unusable	-----
Victor 36: BUF VOR - YZ VOR	Red airway 23	as published

The following VHF intsxns will be unusable during the period of shut down: Medina, Mumford, Rush, Grimsby, Avon, Warsaw, Niagara, Thorold.

WATERVILLE, OHIO VOR SHUT DOWN: During shutdown (Dec 2 through approx Dec 23) the following changes will apply to the airway structure:
V275 between VWV and CRL VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V6, V126 and 1510 between VWV and CLE VORs replaced by G3, MEA published. V30 between VWV VOR and Bellevue VHF intsxn replaced by TOL LFR 301°M brng inbnd to point of intsxn with W crs of EOW variation, MEA 2000. V92 between VWV and MFD VORs replaced by TOL LFR direct MFD VOR, MEA 2500. V45 and 1506 between VWV and APE VORs replaced by TOL LFR direct APE VOR, MEA 2500. V47 and V275 between VWV and FDY VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V96 between VWV and FWA VORs replaced by TOL LFR direct FWA VOR, MEA 3000. V92, V126 and 1510S between VWV and Edgerton VHF intsxn replaced by G3, MEA published. V6 and 1510 between VWV VOR and Pioneer VHF intsxn replaced by TOL LFR 108°M inbnd to the point of intsxn with SBN VOR 092° radial, MEA 5000. V30 and 1506 between VWV and LFD VORs replaced by R57, MEA published. V47 between VWV VOR and Milan VHF intsxn replaced by B87, MEA published.

Intsxn listed below have been revised as outlined during the period of outage: (a) Carp VHF intsxn - SVM VOR 126° radial and CLE VOR 355° radial, MRA 2500'. (b) Perch VHF intsxn - SE crs RML LFR and 231°M brng inbnd from TOL LFR, MRA 2500'. (c) Ogden VHF intsxn - CRL VOR 237° radial and 135°M brng inbnd from TOL LFR, MRA 2600'. (d) McCluge VHF intsxn - FDY VOR 320° radial and the 080°M brng inbnd from TOL LFR. Holding to be accomplished on the FDY VOR 320° radial. Right turns. One min pattern. MRA 2000'.

ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

HUGUENOT, NEW YORK, VOR SHUT-DOWN: During the period of shut-down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2000'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2000' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to enable [illegible]

Route 8-C-III: 41-39N, 73-56W; 41-24N, 75-15W; 40-02N, 78-21W; 37-42N, 78-38W; 37-35N, 79-35W; 40-40N, 79-26W; 41-53N, 76-30W; 42-28N, 73-55W; 42-27N, 73-51W; target Springfield, Massachusetts.

(21 January 1956)

NAVIGATIONAL WARNING - NON-STANDARD ANTI-COLLISION LIGHTS: Effective January 14, and continuing for a period of 6 months, 15 aircraft displaying non-standard anti-collision lights will operate within the continental limits of the U.S. These lights consist of 2 light units, one each mounted on the vertical fin or top of the fuselage and the other on the bottom of the fuselage. They give off a brilliant white flash, simultaneously, at approximately 55-65 flashes per minute. These lights, which are condensor discharge type anti-collision lights, will be operated in conjunction with steady burning high-intensity navigation lights on all aircraft.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 215)

(1) Section 608.31, the Grand Marais, Minnesota, temporary area (R-187T) is added to read: Name and Location (chart): Grand Marais, Minn. temporary restricted area (R-187T) (Duluth, Lake Superior); Description by Geographical Coordinates: beginning at lat 47-04-00, long. 90-35-00; E to lat 47-06-00, long. 89-01-00; N to lat 47-47-15, long. 89-10-00; W to lat 47-50-00, long. 89-46-00; SE to lat 47-28-00, long. 89-30-00; SW to point of beginning. Designated Altitudes: surface to 70,000'. Time of Designation: continuous. Controlling Agency: Commander 343rd Fighter Group Defense Duluth, Minnesota. This amendment shall become effective January 14, 1958 through April 30, 1958.

(2) Section 608.61, the Big Delta, Alaska, temporary area (R-346T) is added to read: Name and Location (chart): Big Delta, Alaska temporary restricted area (R-346T) (WAC 77 and 117). Description by Geographical Coordinates: beginning at lat 64-03, long. 147-50; lat 64-10, long. 147-38; lat 64-06, long. 146-51; lat 63-47, long. 147-04.5; lat 63-51.5, long. 147-56. Designated Altitudes: surface to unlimited. Time of Designation: daylight hrs only. Controlling Agency: Commander 11th Air Division (Defense Ladd AFB, Alaska. This amendment shall become effective January 14, 1958 through March 15, 1958.

(Part 608 - Restricted Area - Amendment 216)
(February 21, 1958)

(1) Section 608.32, the Pearl River, Mississippi, area (R-138) amended October 31, 1955 in 16 F.R. 11066 is further amended by changing the "Designated Altitudes" column to read: "to 20,000', the "Time of Designation" column to read: "0800-1630".

(2) Section 608.39, the Melrose, New Mexico, area (R-185) amended May 25, 1956 in 21 F.R. 3497 is further amended by changing the "Controlling Agency" column to read: "Cannon AFB, New Mexico".

(3) Section 608.51, the Camp Bowie, Texas, area (R-480) amended November 10, 1954 in 19F.R.7285 is further amended bychanging the "Designated Altitudes" column to read: "Surface to 20,000'."

(4) Section 608.51, the Corpus Christi, Texas, area (R-227) amended October 31, 1951 in 16 F.R. 11066 is further amended by changing the "Designated Altitudes" column to read: "to 45,000'."

(21 January 1958)

OKLAHOMA CITY, OKLAHOMA FLIGHT ADVISORY AREA BOUNDARY CHANGES:

Oklahoma City-Fort Worth ARTC Boundary: effective 0001 EST January 16, 1958, the Oklahoma City-Ft Worth ARTC Center control and flight advisory boundary is revised as follows: from the St Louis-Ft Worth-Oklahoma City boundary at lat 35-00-50 long. 96-49-20 SW to a point 25 s mi from the Ardmore, Okla. VOR on the 360°M radial of the ArdmoreVOR, thence direct to the present boundary on the E edge of Blue arwy 6 at a point 50 s mi. NE of the Wichita Falls, Texas, low frequency rng stn.

Oklahoma City-Albuquerque ARTC Boundary: effective 0001 EST January 16, 1958, the Oklahoma City-Albuquerque ARTC Center control and flight advisory boundary is revised as follows: from the present boundary on the N edge of Victor 140N direct to a point on the 175°M radial of the Gage, Okla., VOR 30 s mi from the Gage VOR, thence counter-clockwise along an arc 30 s mi from the Gage VOR to the N edge of Red arwy 59, thence NE to the Albuquerque-Kansas City-Oklahoma City ARTC boundary at lat 36-16-40, long. 99-15-00.

TAMPA FLIGHT ADVISORY AREA: Effective 0001 EST January 21, 1958, the Tampa Flight Advisory Area is cancelled.

MIAMI-JACKSONVILLE FLIGHT ADVISORY/CONTROL AREA BOUNDARIES: Effective 0001 EST January 21, 1958, the Miami-Jacksonville Flight Advisory/Control Area Boundaries will be changed as follows: beginning at the present Miami-Jacksonville boundary at 29-00N, 81-49-30W direct 29-23N, 82-07-45W direct 29-17N, 82-23-25W direct 29-28N, 82-41W direct 28-45N, 84-00W. Remainder of the boundaries remain unchanged.

HOLDING PATTERNS: The following holding patterns have been designated, redesign ated, renamed or cancelled and shall become effective February 13, 1958:

DESIGNATED:

(1) BLACK RIVER, MISS. (LF) INTSXN - intsxn of the W crs of the Jackson, Miss. LFR and the 190°M radial of the Greenwood, Miss. VOR.

(2) BRANDON, FLA. (VHF) INTSXN - intsxn of the 320°M radial of the La Belle, Fla. VOR and the 235°M radial of the Lakeland, Fla. VOR. (MRA 4500' - depict flag)

(3) BRIGHTON, FLA. (VHF) INTSXN - intsxn of the 041°M radial of the La Belle, Fla. VOR and the 137°M radial of the Lakeland, Fla. VOR.

(4) CALHOUN, LA. (LF) INTSXN - intsxn of the W crs. of the Monroe, La. LFR and the 145°M radial of the El Dorado, Ark. VOR.

(5) CASTIAC, CALIF. (VHF) INTSXN - intsxn of the 323°M radial of the Los Angeles, Calif. VOR and the 020°M radial of the Fillmore, Calif. VOR.

(6) CATFISH, FLA. (LF) INTSXN - intsxn of the 278°M brng from the Tampa, Fla. LFR and a 320°M brng from Egmont, Fla. Rbn.

(7) CATFISH, FLA. (VHF) INTSXN - intsxn of the 275°M radial of the Tampa, Fla. VOR and a 320°M brng from Egmont, Fla. Rbn.

(8) CHATSWORTH, CALIF. (VHF) INTSXN - intsxn of the 323°M radial of the Los Angeles Calif. VOR and the 095°M radial of the Fillmore, Calif. VOR.

(9) CRABTREE, OREGON (VHF) INTSXN - intsxn of the 010°M radial of the Eugene, Ore. VOR and the SE crs of the Salem, Ore. ILS lclzr.

(10) DAYTON, MD. (VHF) INTSXN - intsxn of the 186°M radial of the West Minster, Md. VOR and the 288°M radial of the Baltimore, Md. VOR. (formerly compulsory)

(11) DODGE, WISC. (VHF) INTSXN - intsxn of the 065°M radial of the Rochester, Minn. VOR and the 188°M radial of the Eau Claire, Wisc. VOR and the 323°M radial Nodine, Minn. VOR.

(12) EEL, FLA. (LF) INTSXN - intsxn of the 283°M brng from the Egmont, Fla. Rbn and a 240°M brng from Tampa, Fla. LFR.

(13) EEL, FLA. (VHF) INTSXN - intsxn of the 222°M radial of the Tampa, Fla. VOR and a 283°M brng from Egmont, Fla. Rbn.

(14) EGMONT, FLA. Rbn

(15) EVA, FLA. (VHF) INTSXN - intsxn of the 242°M radial of the Orlando, Fla. VOR and the 022°M radial of the Lakeland, Fla. VOR.

(16) FANNIN, MISS. (LF) INTSXN - intsxn of theE crs of the Jackson, Miss. LFR and the 160°M radial of the Greenwood, Miss. VOR.

(17) FENNER, CALIF. (LF) INTSXN - intsxn of the 165°M radial of the Goffs, Calif. VOR and the W crs of the Needles, Calif. LFR.

Fla. VOR and the 053°M radial of the La Belle, Fla. VOR.

(21) FREEBURG, MINN. (VHF) INTSXN - intsxn of the 161°M radial of the Nodine, Minn. VOR and the 108°M radial of the Rochester, Minn. VOR and the 283°M radial of the Lone Rock Wisc. VOR.

(22) FULTON, KANS. (VHF) INTSXN - intsxn of the 092°M radial of the Emporia, Kans. VOR and the 199°M radial of the Butler, Mo. VOR.

(23) GORDONSBURG, TENN. (VHF) INTSXN - intsxn of the 090°M radial of the Jacks Creek, Tenn. VOR and the 178°M radial of the Graham, Tenn. VOR.

(24) GORUM, LA. (LF) INTSXN - intsxn of the SW crs of the Monroe, La. LFR and the NW crs of the Alexandria, La. LFR.

(25) GRAND LAKE, LA. (VHF) INTSXN - intsxn of the 111°M radial of the Lake Charles, La. VOR and the 248°M radial of the LaFayette, La. VOR.

(26) GRAPEVINE, CALIF. (VHF) INTSXN - intsxn of the 149°M radial of the Bakersfield, Calif. VOR and the 276°M radial of the Palmdale, Calif. VOR.

(27) HAMPSHIRE, TENN. (VHF) INTSXN - intsxn of the 090°M radial of the Jacks Creek Tenn. VOR and the 154°M radial of the Graham, Tenn. VOR.

(28) HILLSBORO, FLA. (VHF) INTSXN - intsxn of the 218°M radial of the W. Palm Beach, Fla. VOR and the 355°M radial of the Miami, Fla. VOR.

(29) HOLLYWOOD, FLA. (LF) INTSXN - intsxn of the S crs of the W Palm Beach, Fla. LFR and a 053°M brng from Miami, Fla. LFR.

(30) JACK COMB, FLA. (VHF) INTSXN - intsxn of the 290°M radial of the Tampa, Fla. VOR and the 330°M brng from Egmont, Fla. Rbn.

(31) JEROME, ARK. (VHF) INTSXN - intsxn of the 140°M radial of the Pine Bluff, Ark. VOR and the 266°M radial of the Greenwood, Miss. VOR.

(32) LAKE CITY, MINN. (VHF) INTSXN - intsxn of the front crs of the Minneapolis, Minn. ILS lclzr and the 308°M radial of the Nodine, Minn. VOR and the 006°M radial of the Rochester, Minn. VOR.

(33) LAKEVIEW, NEV. (VHF) INTSXN - intsxn of the 065°M radial of the Las Vegas, Nev. VOR and the 185°M radial of the Mormon Mesa, Nev. VOR.

(34) LEON, FLA. (VHF) INTSXN - intsxn of the 210°M brng from the Tamiami, Fla. Rbn and the 267°M brng from Perrine, Fla. LFR.

(35) LOUISA, FLA. (VHF) INTSXN - intsxn of the 257°M radial of the Orlando, Fla. VOR and the 022°M radial of the Lakeland, Fla. VOR.

(36) LUKA, MISS. (VHF) INTSXN - intsxn of the 276°M radial of the Muscle Shoals, Ala. VOR and the 165°M radial of the Jacks Creek, Tenn. VOR.

(37) LYONS, ILL. (VHF) INTSXN - intsxn of the 073°M radial of the Naperville, Ill. VOR and the NW crs of the Chicago (Midway) Ill. VOR lclzr.

(38) MAUD, ALA. (VHF) INTSXN - intsxn of the 261°M radial of the Muscle Shoals, Ala. VOR and the 165°M radial of the Jacks Creek, Tenn. VOR.

(39) McDONALD, FLA. (VHF) INTSXN - intsxn of the 305°M radial of the Orlando, Fla. VOR and the 022°M radial of the Lakeland, Fla. VOR.

(40) MONTICELLO, S. C. (VHF) INTSXN- intsxn of the 330°M radial of the Columbia, S.C. VOR and the 210°M radial of the Charlotte, N.C. VOR.

(41) MUSKY, MICH. (VHF) INTSXN - intsxn of the 091°M radial of the Northbrook, Ill. VOR and the 308°M radial of the South Bend, Ind. VOR.

(42) NORTH PERRY, OHIO (VHF) INTSXN - intsxn of the 284°M radial of the Jefferson, Ohio VOR and the 324°M radial of the Youngstown, Ohio VOR. (formerly compulsory)

(43) OAK RIDGE, MISS. (VHF) INTSXN - intsxn of the 266°M radial of the Jackson, Miss. VOR and the 190°M radial of the Greenwood, Miss. VOR.

(44) PALMTREE, T.H. (VHF) INTSXN - intsxn of the 107°M radial of the Honolulu, T.H. VOR and the 257°M radial of the Molokai, T.H. VOR.

(45) PINEAPPLE, FLA. (VHF) INTSXN - intsxn of the E crs of the Miami, Fla. ILS lclzr and the 150°M radial of the W. Palm Beach, Fla. VOR. (MRA 3000 - depict flag)

(46) PINE LOG, GA. (VHF) INTSXN - intsxn of the 150°M radial of the Chattanooga, Tenn. VOR and the 270°M radial of the Royston, Ga. VOR.

(47) PRESTON, FLA. (VHF) INTSXN - intsxn of the 138°M radial of the Orlando, Fla. VOR and the 067°M radial of the Lakeland, Fla. VOR.

(48) PUYALLUP, WASH. (LF) INTSXN - intsxn of the 200°M brng to McChord, Wash. LFR and the S crs of the Seattle-Tacoma, Wash. ILS lclzr.

(49) PUYALLUP, WASH. (VHF) INTSXN - intsxn of the 043°M radial of the Olympia, Wash. VOR and the S crs of the Seattle-Tacoma, Wash. ILS lclzr.

(50) RAYVILLE, LA. (LF) INTSXN - intsxn of the E crs of the Monroe, La. LFR and the 131°M radial of the El Dorado, Ark. VOR.

(51) REN, FLA. (VHF) INTSXN - intsxn of the 037°M radial of the Tampa, Fla. VOR and the 305°M radial of the Lakeland, Fla. VOR.

(52) ST CLOUD, FLA. (VHF) INTSXN - intsxn of the 163°M radial of the Orlando, Fla.

and the 320°M radial of the Cape Charles, Va. VOR.

(56) SHERIDAN, ORE. (VHF) INTSXN - intsxn of the 230°M radial of the Newberg, Ore VOR and the 002°M radial of the Newport, Ore. VOR.

(57) SHOP SPRING, TENN. (LF) INTSXN - intsxn of the NE crs of the Nashville, Tenn. LFR and the 294°M brng from the Smithville, Tenn. Rbn.

(58) SNAIL, FLA. (LF) INTSXN - intsxn of the SW crs of the Tampa, Fla. LFR and a 310°M brng from Ft Myers, Fla. Rbn.

(59) SOOCO, FLA. (LF) INTSXN - intsxn of the NW crs of the Miami, Fla. LFR and the 007°M brng from Tamiami, Fla. Rbn.

(60) STEPHENS, TEX. (LF) INTSXN - intsxn of the 070°M brng from Abilene, Tex. LFR and a 170°M brng from Wichita Falls, Tex. LFR. (for acft operg at 27,000'MSL or above)

(61) STEPHENS, TEX. (VHF) INTSXN - intsxn of the 069°M radial of the Abilene, Tex. VOR and the 169°M radial of the Wichita Falls, Tex. VOR. (for acft operg at 27,000'MSL or above)

(62) STONYFORK, PA. (VHF) INTSXN - intsxn of the 221°M radial of the Elmira, N.Y. VOR and the 315°M radial of the Williamsport, Pa. VOR. (formerly compulsory)

(63) SUGARLOAF, FLA. (LF) INTSXN - intsxn of the 045°M brng from Key West, Fla. LFR and a 283°M brng from Marathon, Fla. Rbn.

(64) SUNSET, S.C. (VHF) INTSXN - intsxn of the 270°M radial of the Spartanburg, S.C. VOR and the 235°M radial of the Asheville, N.C. VOR.

(65) TITUSVILLE, FLA. (VHF) INTSXN - intsxn of the 070°M radial of the Orlando, Fla. VOR and the 352°M radial of the Vero Beach, Fla. VOR.

(66) TORCH, FLA. (LF) INTSXN - intsxn of the 030°M brng from the Key West, Fla. LFR and the 283°M brng from the Marathon, Fla. Rbn.

(67) TORRINGTON, CONN. (VHF) INTSXN - intsxn of the 206°M radial of the Chester, Mass. VOR and the 092°M radial of the Poughkeepsie, N.Y. VOR.

(68) VERNON, LA. (LF) INTSXN - intsxn of the W crs of the Monroe, La. LFR and the 158°M radial of the El Dorado, Ark. VOR.

(69) WHALAN, MINN. (VHF) INTSXN - intsxn of the 108°M radial of the Rochester, Minn. VOR and the 252°M radial of the Nodine, Minn. VOR.

(70) WHITMAN, CALIF. (VHF) INTSXN - intsxn of the 133°M radial of the Bakersfield, Calif. VOR and the 011°M radial of the Gorman, Calif. VOR.

(71) WINONA, MINN. (VHF) INTSXN - intsxn of the 308°M radial of the Nodine, Minn. VOR and the 188°M radial of the Eau Claire, Wisc. VOR and the 072°M radial of the Rochester, Minn. VOR.

(72) WOODRUFF, FLA. (VHF) INTSXN - intsxn of the 353°M radial of the Orlando, Fla. VOR and the 122°M radial of the Gainesville, Fla. VOR.

RENAMED:

(1) TUXEDO, N.Y. (VHF) INTSXN - intsxn of the 234°M radial of the Poughkeepsie, N.Y. VOR and the 140°M radial of the Huguenot, N.Y. VOR. (formerly Greenwood Int)

REDESIGNATED:

(1) ARCADIA, WISC. (VHF) INTSXN - intsxn of the 065°M radial of the Rochester, Minn. VOR and the 355°M radial of the Nodine, Minn. VOR.

(2) BRADLEY, N.C. (VHF) INTSXN - intsxn of the 038°M radial of the Charlotte, N.C. VOR and the 148°M radial of the Hickory, N.C. VOR.

(3) CHICKASHA, OKLA. (VHF) INTSXN - intsxn of the 066°M radial of the Hobart, Okla VOR and the 192°M radial of the Oklahoma City, Okla. VOR.

(4) CONCORD, MD. (LF) INTSXN - intsxn of the 332°M radial of the Salisbury, Md. VOR and the 053°M brng to Dover, Del. Rbn.

(5) CYPRESS, FLA. (VHF) INTSXN - intsxn of the 317°M radial of the Miami, Fla. VOR and the 231°M radial of the W. Palm Beach, Fla. VOR.

(6) ELMO, MINN. (VHF) INTSXN - intsxn of the 186°M radial of the Grantsburg, Wisc. VOR and the 110°M radial of the Minneapolis, Minn. VOR.

(7) FULTON, GA. (VHF) INTSXN - intsxn of the 347°M radial of the Norcross, Ga. VOR and the 353°M radial of the Atlanta, Ga. VOR.

(8) GRIFFIN, GA. (VHF) INTSXN - intsxn of the 145°M radial of the Atlanta, Ga. VOR and the 075°M radial of the LaGrange, Ga. VOR

(9) HIGHROCK, N.C. (VHF) INTSXN - intsxn of the 221°M radial of the Greensboro, N.C. VOR and the 110°M radial of the Hickory, N.C. VOR.

(10) JAMESTOWN, N.Y. (VHF) INTSXN - intsxn of the 315°M radial of the Bradford, Pa. VOR and the 218°M radial of the Buffalo, N.Y. VOR.

(11) KENNESAW, GA. (VHF) INTSXN - intsxn of the 275°M radial of the Norcross, Ga. VOR and the 150°M radial of the Chattanooga, Tenn. VOR and the 353°M radial of the Atlanta, Ga. VOR.

(12) KIDS, NEV. (VHF) INTSXN - intsxn of the 065°M radial of the Las Vegas, Nev. VOR and the SE crs of the Las Vegas, Nev. LFR.

(13) LEBANON, TENN. (VHF) INTSXN - intsxn of the 056°M radial of the Nashville, Tenn. VOR and the 171°M radial of the Bowling Green, Ky. VOR.

(14) MARTELL, WISC. (VHF) INTSXN - intsxn of the 261°M radial of the Eau Claire, Wisc. VOR and the 110°M radial of the Minneapolis, Minn. VOR.

(15) MAYSVILLE, OKLA. (VHF) INTSXN - intsxn of the 144°M radial of the Oklahoma City, Okla. VOR and the 058°M radial of the Lawton, Okla, VOR.

(16) MEAD, NEV. (VHF) INTSXN - intsxn of the 065°M radial of the Las Vegas, Nev VOR and the 169°M radial of the Mormon Mesa, Nev. VOR.

(17) MOORESVILLE, N.C. (VHF) INTSXN - intsxn of the 006°M radial of the Charlotte N.C. VOR and the 241°M radial of the Greensboro, N.C. VOR.

(18) NEW BRUNSWICK, N.J. (VHF) INTSXN - intsxn of the 066°M radial of the Yardley, Pa. VOR and the 304°M radial of the Colts Neck, N.J. VOR

(19) PERRY, GA. (VHF) INTSXN - intsxn of the 204°M radial of the Macon, Ga. VOR and the 303°M radial of the Vienna, Ga. VOR.

(20) POWERSVILLE, GA. (VHF) INTSXN - intsxn of the 327°M radial of the Vienna, Ga VOR and the SW crs of the Macon, Ga. ILS lclzr

(21) RIVER FALLS, WISC. (VHF) INTSXN - intsxn of the 175°M radial of the Grantsburg, Wisc. VOR and the 110°M radial of the Minneapolis, Minn. VOR.

(22) ROBERTA, GA. (VHF) INTSXN - intsxn of the 327°M radial of the Vienna, Ga. VOR and the 266°M radial of the Macon, Ga. VOR.

(23) WALLING, TENN. (VHF) INTSXN - intsxn of the 274°M radial of the Crossville Tenn. VOR and the 149°M radial of the Bowling Green, Ky. VOR.

(24) WESLEY, PA. (VHF) INTSXN - intsxn of the 033°M radial of the Ellwood City, Pa VOR and the 105°M radial of the Youngstown, Ohio VOR.

(25) WOODBURY, TENN. (VHF) INTSXN - intsxn of the 274°M radial of the Crossville Tenn. VOR and the 160°M radial of the Bowling Green, Ky. VOR.

CANCELLED:

(1) BRIGHTON, OHIO (LF) INTSXN - intsxn of the W crs of the Wellington, Ohio VAR and the NE crs of the Columbus, Ohio LFR.

(2) CELESTE, TEX. (VHF) INTSXN - intsxn of the 040°M radial of the Dallas, Tex VOR and the 270°M radial of the Sulphur Springs, Tex. VOR.

(3) CYPRESS, FLA. (LF) INTSXN - intsxn of the NW crs of the Miami, Fla. LFR and a 218 T brng to Tamiami, Fla. Rbn.

(4) FAIRMOUNT, LA. (VHF) INTSXN - intsxn of the 176°T radial of the Shreveport, La VOR and the 089°T radial of the Lufkin, Tex. VOR.

(5) FAIRPORT, OHIO (VHF) INTSXN - intsxn of the 049°T radial of the Cleveland, Ohio VOR and the 279°T radial of the Jefferson, Ohio VOR. (changed to compulsory)

(6) FOUNTAIN CITY, WISC. (VHF) INTSXN - intsxn of the 307°M radial of the La Crosse Wisc. VOR and the 186°M radial of the Eau Claire, Wisc. VOR and the 069°M radial of the Rochester, Minn. VOR.

(7) FRANKLIN, MASS. (LF) INTSXN - intsxn of the SW crs of the Boston, Mass. LFR and the N crs of the Providence, R.I. LFR. (changed to compulsory)

(8) FRANKLIN, MASS. (VHF) INTSXN - intsxn of the 146°M radial of the Gardner, Mass. VOR and the 238°M radial of the Boston, Mass. VOR. (changed to compulsory)

(9) GATOR, FLA. (LF) INTSXN - intsxn of the N crs of the Perrine, Fla. LFR and the 126°T brng to Marine Miami, Fla. Rbn.

(10) LEBANON, TENN. (LF) INTSXN - intsxn of the NE crs of the Nashville, Tenn LFR and the 114°M brng to Smithville, Tenn. Rbn.

(11) OGDEN, ILL. (VHF) INTSXN - intsxn of the 075°T radial of the Naperville, Ill VOR and the 334°T radial of the Chicago Heights, Ill. VOR.

(12) OUACHITA, ARK. (VHF) INTSXN - intsxn of the 033°T radial of the Texarkana, Ark VOR and the 250°T radial of the Cabot, Ark. TVOR.

(13) PERRY, OHIO (VHF) INTSXN - intsxn of the 324° M radial of the Youngstown, Ohio VOR and the 067°M radial of the Cleveland, Ohio VOR.

(14) SAGINAW, TEX. (VHF) INTSXN - intsxn of the 067°M radial of the Mineral Wells, Tex. VOR and the N crs of the Ft Worth (Meacham), Tex. ILS lclzr.

(15) TITUSVILLE, PA. (VHF) INTSXN - intsxn of the 304°T radial of the Fitzgerald, Pa. VOR and the 260°T radial of the Bradford, Pa. VOR. (changed to compulsory)

(16) WABASHA, MINN. (VHF) INTSXN - intsxn of the 124°M radial of the Minneapolis, Minn. VOR and the 025°M radial of the Rochester, Minn. VOR.

✓ HOLDING PATTERNS: The following holding patterns have been designated, redesignated, or cancelled and shall become effective February 13, 1958:

DESIGNATED:

(1) SHARPS, VA. (VHF) INTSXN - direction of holding - SE on 320°M radial of the Cape Charles, Va. VOR; direction of turns - left; time - 1 min; min alt 1500'.

(2) TORRINGTON, CONN. (VHF) INTSXN - direction of holding - W on 092°M radial of the Poughkeepsie, N.Y. VOR; direction of turns - right; time - 1 min; min alt 3500'.

(3) BRANDON, FLA. (VHF) INTSXN - direction of holding - SE on 320°M radial of the LaBelle, Fla. VOR; direction of turns - right; time - 2 mins; min alt 4500'.

(4) LAKELAND, FLA. (VOR) - direction of holding - E on 090°M radial; direction of turns - right; time - 2 min; min alt 1500'.

(5) CALHOUN, LA. (LF) INTSXN - direction of holding - W on W crs of the Monroe, La LFR; direction of turns - right, time - 1 min, min alt 3500'.

(6) SALT LAKE CITY, UTAH (LFR) - direction of holding - W on W crs; direction of turns - right; time - 2 mins; min alt 12, 000'.

(7) OGDEN, UTAH (LFR) - direction of holding - W on W crs; direction of turns - right time - 1 min.

(8) OGDEN, UTAH (LFR) - direction of holding - N on N crs; direction of turns - right; time - 2 mins; min alt 11, 000'.

(9) PROMONTORY PT, UTAH (Rbn) - direction of holding - W on W crs Ogden, Utah LFR; direction of turns - left; time - 2 mins; min alt 9000'.

(10) CORINNE, UTAH (Rbn) - direction of holding - N on N crs of the Ogden, Utah LFR; direction of turns right; time - 2 mins; min alt 11, 000'.

(11) SPRING BAY, UTAH (LF) INTSXN - direction of holding - NW on 307°M outbound brng (127 inbnd); direction of turns - right; time - 2 mins; min alt 11, 000'.

(12) UTAH LAKE, UTAH (VOR) - direction of holding - SW on 187°M radial; direction of turns - right; time - 2 mins.

(13) TOOLE, UTAH (VHF) INTSXN - direction of holding - NW on 298°M radial of the Utah Lake, Utah VOR; direction of turns - right; time - 2 mins.

(14) SALT LAKE CITY, UTAH (VOR) - direction of holding - W on 248°M radial; direction of turns - right; time - w mins; min alt 12, 000'.

(15) STANSBURY, UTAH (VHF) INTSXN - direction of holding - W on 248°M radial of the Salt Lake City, Utah VOR; direction of turns - right; time - 2 mins; min alt 11, 000'.

(16) CEDAR MT, UTAH (VHF) INTSXN - direction of holding - W on 067°M radial of the Booneville, Utah VOR; direction of turns - right; time - 2 mins; min alt 11, 000'.

(17) OGDEN, UTAH (VOR) - direction of holding - W on 259°M radial; direction of turns - right; time - 1 min.

(18) OGDEN, UTAH (VOR) - direction of holding - N on 328°M radial; direction of turns - right; time - 2 mins; min alt 11, 000'.

(19) HANSEL, UTAH (VHF) INTSXN - direction of holding - NW on 299°M radial of the Ogden, Utah VOR; direction of turns - right; time - 2 mins; min alt 11, 000'.

(20) GATOR, FLA. (Rbn) - direction of holding - W on 278°M outbnd brng (098°M inbnd) direction of turns - left; time - 2 mins; min alt 1300'.

(21) PINEAPPLE, FLA. (VHF) INTSXN - direction of holding - E on E crs Miami, Fla. ILS lclzr; direction of turns - right; time - 2 mins; min alt 3000'.

(22) CRABTREE, ORE. (VHF) INTSXN - direction of holding - SE on SE crs of the Salem, Ore. ILS lclzr; direction of turns - right; time - 1 min; min alt 6000'.

(23) SOOCO, FLA. (LF) INTSXN - direction of holding - NW on NW crs of the Miami, Fla Fla. LFR; direction of turns - left; time - 2 mins; min alt 1200'.

(24) WOODRUFF, FLA. (VHF) INTSXN - direction of holding - N on 353°M radial of the Orlando, Fla. VOR; direction of turns - right; time - 1 min; min alt 4500'.

(25) LOUISA, FLA. (VHF) INTSXN - direction of holding - W on 257°M radial of the Orlando, Fla. VOR; direction of turns - left; time - 2 mins; min alt 2000'.

AL 238 RNG - Louisville, Ky - Bowman Field (procedure cancelled - effective December 5, 1957)

TEST OF EXPANDED RADAR SERVICE - ANDREWS AFB AREA: Effective 0001 EST 15 Jan 1958 and continuing until 2359 EST 15 Mar 1958 a test will be conducted to gather operational experience and information concerning the practicability of providing expanded radar traffic control service (separation and/or traffic information) to aircraft operating VFR in the vicinity of Andrews AFB. Test activity will be conducted by Andrews approach control within the Andrews approach control area which generally lies between the 060° radial clockwise to the 165° radial of the Washington TVOR within a 30 mile radius E of Andrews AFB. During the test period all aircraft operating VFR in or through this area at and below 10,000 MSL are urged to contact Andrews approach control. Radar will be utilized insofar as possible to provide traffic information and/or radar separation to participating aircraft in the following manner:

1. Military aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic information and radar separation, as required, from all other observed traffic.
2. Civil aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic advisory information.
3. All aircraft operating VFR in the area above 2500 MSL and up to 10,000 MSL inclusive will be provided pertinent traffic advisory information only.
4. Military aircraft should initiate contact on 355.8 mc or 136.8 mc. Civil aircraft may call on 123.7 mc or 122.1 mc and receive on 123.7 mc. Pilots should advise approach control of their position, altitude, heading and intentions during first radio contact so that controllers may plan proper route through the area. Traffic from the east and northeast on Victor 16 or Green 5 is requested to initiate call at Kent Island or over eastern shore of Chesapeake Bay. Traffic from the southeast on Blue 56 should initiate contact in vicinity of Coles Point. Traffic landing at Washington National, Bolling or Anacostia will be advised when to change to appropriate tower frequency.
5. VFR flights departing from Washington National, Bolling or Anacostia that will penetrate test area should contact Andrews approach control as soon as practicable after leaving respective tower frequency and prior to entering area. Aircraft departing airports within the area are requested to initiate contact as soon as practicable after takeoff.
6. IFR traffic operating through the area will be handled in the normal manner by CAA traffic control facilities and should not contact Andrews approach control unless instructed to do so by ATC. There will be no change in established local traffic patterns during the test period.

The above services are designed to aid pilots in avoiding collision and should not be construed as relieving the pilot of any responsibilities and requirements governing VFR flight as established in pertinent military or Civil Air Regulations. Radar traffic information will be provided in accordance with the U.S. Standard Manual of Radar Air Traffic Control Procedures.

Comments from pilots participating in the test are solicited and will be most welcome. Please address correspondence to: Commander, 2045th AACS Group, Attention: Flight Facilities Officer, Andrews Air Force Base, Washington 25, D.C.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:
The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective February 13, 1958:

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

★ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-70° have bends & roughness out of tolerance.
AUBURN-OPELIKA ARPT: Rnwys lgts inop. Flare pots avail on request. (1-10)
BESSEMER ARPT: Caution. Auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)
BIRMINGHAM-RADIO: Dec 12, VOR shut down until approx Feb 1 - conversion to VORTAC. Caution - all arwys and Ints based on VOR are not usable for navigational purposes until stn is recmsnd at new lctn. Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int via ADF track of 350.M from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. Caution - E crs LFR has severe multiples.
BIRMINGHAM ARPT-TOWER: ILS MM and LMM shut down - relctn. (8-7) FLD: Effect Feb 15, inbnd VFR flgts contact Birmingham Apch Ctl on 119.9 or 385.6 mc approx 25 mi out for lndg info. Birmingham Apch Ctl will specify the reporting point where flgt will change to Birmingham twr freq. (1-13) Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single eng conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt land shut down for relctn due rnwy ext. (5-1)
CLANTON-WARE ISLAND ARPT: New arpt reported. Lctd 10 mi NE on an island in Coosa River. Lat 33-57, long. 86-31; elev 360'; 1 sod strip 2500' x 150'; no service. (12-19)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Clsd. (10-16)
EVERGREEN-RADIO: VOR radials 320°-360° out of tolerance acct excessive roughness & bends.
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy & threshold lgts inop. (1-7)
**FAIRHOPE-KLUMPP ARPT: 999' (1201'MSL) lgtd twr erected 9 n mi N (12°T) at lat 30-40-55, long. 87-49-41. (12-6)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
**HUNTSVILLE ARPT: 208' (848'MSL) lgtd twr erected 5 n mi N (5°T) at lat 34-45-02, long. 86-35-38. (1-14)
MOBILE-RADIO: June 19, VOR radial 018° thru 028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-TOWER: ILS glide slope inoperative - equipment and construction in vicinity of transmitter building. (8-22) FLD: Unlighted trees penetrate approach zone all rnwys. Use caution; 200' and 1/2 mi is absolute take-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
✱MOBILE-BROOKLEY AFB-RADAR APPROACH CONTROL: RAPCON cmsnd at Brookely AFB. Concurrently Mobile apch ctl decmsnd at Mobile Bates Fld arpt. Freq: 113.3, 243.0, 118.5, 123.7, 121.5, 126.18, 125.7 mcs. Rcvs only 122.7. (12-20)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Danelly Fld ctl zones z are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
ARIZONA: AJO ARPT: Bcn and lgts inop. (10-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail ngts upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Open daylgt opern only. (1-10)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
DRAKE-RADIO: About Jan 31, VOR will be cmsnd. Ident: DRK. Freq: 113.1 mc. Lctd lat 34-54-04, long. 112-25-00. Elev: 4630'MSL. Class: VORW. (12-6)
FT HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vcnty. 2-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVOR (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances Army Electronic Proving Ground reports that

ARIZONA: GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
MARANA ARPT: Reported inactive. (10-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of afterburners for take off xcpt prior permission arpt manager. (12-7)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx March 3 - conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int.-PHX; V105E PRC-PHX. (11-18)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)
TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted week-ends - caution. (2-15)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17) About Feb 3, VOR will be shut down until approx March 4 - VORTAC conversion; following Victor arwys unusable durg IFR conditions: V-16 Toltec Int-CIE, V-66 GBN-Mescal Int, V16-S TUS-Mescal Int. (12-5)
TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at night. Obstn lgts apchs to rnwy 21 inop. (11-15)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB-SPECIAL NOTICE: Night weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
FT SMITH-RADIO: About March 15, VOR will be shut down, modification. During shut down VOR flights are authorized to use FSM BMH fac in lieu of FSM VOR on all arwys. Bears. and MEAs used shall remain as charted except bear. from FSM BMH to Int of 295° radial Little Rock VOR on V-74 shall be 97°. Paris Int. redesignated as 97° from FSM BMH and FYV 160°. On V13, use 192° from FYV VOR to FSM BMH. MEA for VOR-equipped acft on V-74 from TUL to FSM 7500' and on V-13 from FYV to FSM 5500'. (12-13)
LITTLE ROCK-ADAMS FLD: Trenches 6" wide, 30" deep, being dug and back filled approx 12' either side rnwy 14-32. (12-3)
PINE BLUFF-GRIDER FLD: Rnwy 8-26 clsd. Soft from rains. (12-7)
SEARCY ARPT: Clsd until approx March 30. Const. (12-30)
TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)
California: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)
ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)
**ARCATA ARPT: Right tfc rnwys 13 & 19. (12-10)
BAKERSFIELD-KERN CO. ARPT-TOWER: About Feb 1, 119.9 mc will be decmsnd and 119.8 mc cmsnd. (12-26)
BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)
BLUE CANYON ARPT, 13, SFO-SLC: Closed due to snow. (12-18)

CALIFORNIA: BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Feb 20, radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR Saugus Int Fillmore VOR Camarillo LFR Burbank OM. About January 27, ASR will be shut down until approx Feb 10 - equip. modification. (1-8)

★CAMARILLO-RADIO: All courses have multiples. (6-17) January 7, auto ident LFR perm discontd. (1-7)

**CORONA-THURSBY ARPT: To be abandoned Feb 28. (12-11)

CRESCENT CITY-RADIO: VOR arwy radials flight-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flight-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week-ends. Squirrel holes S edge of lndg area.

EL TORO MCAS-RADIO: VOR coverage restriction at and below 10,000' MSL beyond 25 mi from 360° clockwise to 070°. (12-13)

FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT JONES-RADIO: VOR coverage 250°-090°, 30 mi; 090°-120°, 15 mi; 150°-250°, 20 mi at min en route alt. (12-2)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)

**FRESNO AIR TERM: Extreme caution advised in vicinity of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N & E of arpt. Jet barriers operd by ctl twr, avail. to mil acft on request only. Barriers installed 150' from both ends rnwy 11-29. First 1000' pavement rnwy 29 is overrun area behind barrier not to be used as rnwy. Longest rnwy avail 7168'. (1-3)

GLENDALE-GRAND CENTRAL ARPT: Extensive const. Fld clsd to all acft at sunset.

GOFFS-RADIO: VOR coverage 265°-310°, 25 n mi MEA. Below 9500' this area beyond tolerance.

**HALF MOON BAY ARPT: Unicom cmsnd 122.8 mc. (1-20)

LONG BEACH-RADIO: DME shut down until approx Feb 4 - relctn. VOR auto ident inop.

LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. VHF/DF bearings unreliable below 12,000' MSL SW quad between 200°and 230°. About Jan 20, ASR will be shut down until approx Feb 3. (1-4) FLD:

Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of & roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P week-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd, const; 6200' avail. Rnwy 12 clsd. Straight in ILS lndg min rnwy 30 daylgt hours only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19) FLD: New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30 min req thru twr. Equip. crossing rnwy. During VFR wea conditions: civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 at least 10 mi out. During IFR wea: civil acft ctc Apch Ctl on 118.1 or 119.3 or listen 118.1 or 119.3 and trans 122.7 mc. USAF, NAVY, CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless otherwise cleared by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt & E of arpt btwn Downey

CALIFORNIA: rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' 3000', ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Transmissometer cmsnd. Apch lgt lane sequence flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' end rnwy 25L (7-11)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MARTINEZ ARPT: Clsd until approx June. (11-27)

MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E; elev 174'; 1 rnwy - (15-33) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy . (10-21)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18) . .

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30° - 60°, 26 n mi at 5000'; 60° - 80°, 35 n mi at 5000': 280° - 290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350° -030°, 17 n mi at 4000'.

★OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF commissioned Freqs: 118.1, 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc. Coverage 40 n mi at MEA xcpt 020° - 050°, 8000' MSL. (10-14)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340° - 030°, 6500'; 030° - 040°, 8000'; 040° - 060°, 7000' MSL. Jan 13, freq 120.7 mc discontd and 123.9 mc cmsnd.

**OAKLAND-METROPOLITAN OAKLAND INTNL ARPT: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd. (8-22)

★OCEANSIDE-RADIO: Jan 16, VOR flgt-checked and recmsnd. Elev: 49' MSL. Monitoring category (3). Coverage 310° - 020°, 35 n mi at MEA. (1-16)

ONTARIO-RADIO: VOR/DME coverage 135° - 150°, 26 n mi at 7000'; 150° - 200°, 17 n mi at 7000'; 200° - 280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350° - 360°, 35 n mi at 13,000'. (7-30)

★ONTARIO INT'L ARPT-TOWER: Jan 1, freq 120.7 mc decmsnd and 118.6 mc cmsnd. (1-16) FLD: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13)

PALMDALE-RADIO: VOR coverage 120° - 150°, 35 n mi at 10,000'; 150° - 180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220° - 235°, 35 n mi at 6000'; 235° - 245°, 26 n mi at 6000'; 245° - 270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W-adj to Pomona Heliport. (9-20)

CALIFORNIA: POMONA-BRACKETT FLD: Operative durg reconst. Caution - men and equip.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30) Jan 13, VOR shut down until approx Feb 13 - conversion to VORTAC. Durg this period, the following V arwys will be unusable IFR conditions: V23 FJS-Sutter Buttes Int., V25 Geyserville Int. LMT, V195 ILA-FOT. V107 UKI-RBL usable substituting RBL LF rng for VOR. (11-27)
REDDING ARPT: 330' lgtd twr being erected 3.2 n mi WNW (309° T) at lat 40-32-25, long. 122-21-11. (11-21)
RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)
RIVERSIDE-MARCH AFB-RADAR APPROACH CONTROL: Radar ctl exercised over mil acft only. (10-30)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simultated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95°, and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310°-330°.
★SAN DIEGO-LINDBERGH ARPT-TOWER: Jan 10, trans & rcvr 119.0 mc cmsnd. (1-11)
SAN DIEGO-MONTGOMERY FLD: Caution ngt lndg. Keep rnwy lgts in sight durg apch. Fld unattended sunset-sunrise. Ditch 100' short of threshold lgts rnwy 28. (10-24)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)
★SAN FRANCISCO-RADIO: LF rng perm discontd. (1-16)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

LAKE CHARLES, LA., -LAKE CHARLES AFB, ADF Proced. No. 2, Amdt. 3, Effect. 1 Feb. 58: In the transition from "Radar vectoring position", the course should read "003" in lieu of "352".

OAKLAND, CALIF., - INTERNATIONAL ARPT, Proced. No. ILS-27R, Amdt. 12, Effect. 1 Feb. 58: On Panel 2 insert the following between 1st and 2nd line: "#Procedure turn on OAK LFR, VOR, Bay Point FM, and Altamount Int. transitions only. Upon completion".

SAN FRANCISCO, CALIF., -INTERNATIONAL ARPT, Proced. No. ILS-28R,L Amdt. 11, Comb. ILS-ADF, Effect. 1 Feb. 58: Change first transition to read "AGW VOR" in lieu of "VSF VOR". In the missed approach delete the words "on NW crs of SFO LFR or", so that it will read "within 5.5 miles after passing LOM(ADF), climb to 3000' on 285° crs from LOM within 20 mi".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
➔ New or revised data
* = Automatic voice identification

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR . . . . Air Route Surveillance Radar
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, CAA
CI . . . . . Control Tower, (City, County, Private, etc.)
CM . . . . . Control Tower, (Military, listing only civil frequencies available)
D . . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MA. . . . . Range (adcock, vertical radiators), power less than 50 watts
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . . VHF middle marker
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control
RL. . . . . Range (loop radiators), power 150 watts or more
➔ S. . . . . Simultaneous range, homing signals and/or voice
T. . . . . Teletype

TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 35 cents.

RADAR AVAILABLE: How and Where

(4 February 1958)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach (Military Equivalent of Combined ASR and PAR Equipment) ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control (RAPCON) page 4. For ATCRBS see note page 4.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C. O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2, 000 to 18, 000 kc and receive any frequency from 1, 500 to 9, 050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: See page 17, Flight Information Manual, Vol. II, dated August 15, 1957.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded. Other transmitting frequencies listed are guarded plus 3023.5kc; 122.5 mc, unless 122.7 mc is shown under Remarks. Transmit and guard 121.5 mc all locations.

RADAR BEACONS - (continued from page 3)

ATCRBS - Air traffic control radar beacon transponders (ATC transponders) are being installed in some civil aircraft to participate in the forth-coming in-service evaluation of this beacon system. Since the ATC transponder can be used with Mode 3 of the IFF Mark X system, the following will govern the operation of the ATC transponder in order to reduce interference and clutter on IFF Mark X radar displays.

1. Within the environment test area designated within a 200-mile radius of the following locations, the ATC transponder will be operated in accordance with the request of air traffic control. Ground equipment installations will start approximately October 1, 1957, at the following locations: New York center; Idlewild, La Guardia and Newark towers. Installation at the Washington center and tower, the Chicago center and O'Hare tower and the Norfolk center will follow as soon as equipment becomes available. Notification of the start of the actual evaluation will be made at a later date.

2. Air traffic control transponders will be adjusted to Code 00 and turned on only in aircraft operating on an IFR flight plan unless otherwise requested by any ground station.

3. When filing a domestic IFR flight plan for an aircraft equipped with a functioning ATC transponder, this shall be made known by adding the word "transponder" immediately following the aircraft identification. Example: "Braniff six transponder".

4. Aircraft using the "Stargazer" service offered by the Air Defense Command will advise the radar operator of the status of the ATC transponder and will operate it in accordance with the operator's request regardless of the type of flight being conducted.

5. Aircraft operating from the domestic areas will comply with (3) above. Aircraft entering the domestic control areas will only advise oceanic air traffic control of the status of the Air Traffic Control transponder when making the first radio report to the United States oceanic air traffic control center.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.

(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

V = 122.2, 126.7, 135.0, 135.9 mc transmitted. # = Guards same VHF and UHF freqs facility transmits except 122.2, 135.0, 120.7 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g. (3)-135.9 guards every frequency in group (3) except 135.9 mc. (g) = Tower equipped with 121.9 mc or (g.7) = Tower equipped with 121.7 mc for control of ground traffic. EMERGENCY FREQUENCY (121.5 mc) transmits and guards at all ATCS, Towers (CAA and Military), Centers and DF Stations; this frequency is not tabulated in the list above. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120, CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notice to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airman: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..--.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200'MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

HERNDON, VIRGINIA, VOR SHUT-DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 223: HRN VOR - Hampton VHF Int	Arcola LFR direct HAR VOR	3000
Victor 39: EMI VOR - Remington VHF Int	Red 33	as published
Victor 4: HRN VOR - FRR VOR	Red 18	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Sugar Loaf	MRB VOR 107 M radial; EMI VOR 245 M radial	3000
Keymar	MRB VOR 078 M radial; HAR VOR 201 M radial; EMI VOR 295 M radial;	3000
Lisbon	Use Lisbon LF Int	as published
Fairland	DCA TVOR 023 M radial; BAL VOR 244 M radial	3000
Springfield	Use Springfield LF Int	as published
Remington	Use Remington LF Int	as published
Plains	FRR VOR 118 M radial; MRB VOR 170 M radial; (Holding Pattern: NW of the substitute intsxn on the Front Royal 118 radial. Right turns. One minute pattern)	4000
Leesburg	FRR VOR 094 M radial; MRB VOR 147 M radial	4000
Manassas	Brooke VOR 003 M radial; DCA TVOR 256 M radial	3000
Quarry	SW crs of the ARV LFR; FRR VOR 118 M radial	4000

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel. See also page 58.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

HUGUENOT, NEW YORK, VOR SHUT-DOWN: During the period of shut-down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----
Victor 126: HUO VOR - ILT VOR	ILT VOR 294 M radial to the point of intsxn with DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Paterson VHF Int	None	----
Victor 249: HUO VOR - CDW VOR	CDW VOR 356 M radial to the point of intsxn with the AVP VOR 127 M radial. None beyond.	5000
Victor 126 and 146: HUO VOR - AVP VOR	AVP VOR 105 M radial to point of intsxn with the DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Herrick VHF Int	None	----
Victor 249: HUO VOR - DNY VOR	DNY VOR 171 M radial to the point of intsxn with the AVP VOR 105 M radial	5000

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Central Valley	ILT VOR 288 M radial and POU VOR 234 M radial	3000
Huguenot VOR	AVP VOR 105 M radial and STW VOR 035 M radial	5000
Greenwood	POU VOR 234 M radial and ILT VOR 280 M radial (Holding Pattern: NE of the Greenwood Int on the POU VOR 234 radial. Left turns. One minute pattern)	3000

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2000'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2000' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

BOSTON, MASS. VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 3: BOS VOR - Hampton VHF Int	Amber 7	as published
Victor 141: BOS VOR - ACK VOR	Blue 58	as published
Victor 16: BOS VOR - Woonsocket VHF Int	Green 2	as published
Victor 3: BOS VOR - Millbury VHF Int	BOS LFR direct Worcester LOM	3000
Victor 141: BOS VOR - CON VOR	Blue 4	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Peabody	Peabody LF intsxn	as published
Revere	Revere LF intsxn	as published
Dedham	SW crs of the BOS LFR, GDM VOR 128 M radial	2000
Natick	BOS LFR 090° M bearing inbound GDM VOR 128 M radial	3000
Westboro	BOS LFR 090° M bearing inbound GDM VOR 146 M radial	3000
Lowell	SE crs of the CON LFR GDM VOR 094 M radial	2000
Franklin	Franklin LF intsxn	as published

NAVIGATIONAL WARNING: USAF jet and conventional bombers will conduct daylight VFR flights between 500 and 2000 ft above ground level along routes indicated below, climb from last point listed and fly at conventional altitudes over target listed. Flights will be within 20 n mi either side of selected route avoiding built up areas and civil airports.

Route 8-F-I: 39-28N, 95-03W; 40-43N, 92-25W; 41-14N, 89-22W; 43-14N, 90-51W; 44-48N, 91-03W; 44-42N, 91-49W; 43-38N, 93-47W; 41-04N, 98-28W; 40-59N, 94-40W; 40-29N, 95-54W, target Peru, Nebraska.

Route 8-A-III: 43-18N, 99-02W; 43-18N, 103-25W; 44-28N, 104-44W; 44-58N, 102-55W; 44-30N, 102-01W; 44-02N, 99-28W; 43-53N, 96-04W; 43-33N, 94-58W; 42-36N, 95-11W; 42-08N, 95-25W; target Omaha, Nebraska.

Route 8-E-II: 38-55N, 94-16W; 40-17N, 91-29W; 40-26N, 87-16W; 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-45N, 92-40W; 38-21N, 93-46W; target Clinton, Missouri.

Route 8-D-I: 37-52N, 95-44W; 39-12N, 96-13W; 39-53N, 96-53W; 41-27N, 97-32W; 42-51N, 97-55W; 42-38N, 100-12W; 40-02N, 99-20W; 38-27N, 100-20W; 38-00N, 99-21W; 38-00N, 99-12W, 38-54N, 98-51W; target Russell, Kansas.

Route 8-H-II: 43-34N, 70-11W; 43-45N, 69-50W; 44-28N, 67-35W; 45-11N, 67-41W; 45-58N, 68-09W; 44-40N, 69-44W; 43-38N, 71-47W; 44-16N, 73-12W; 43-25N, 73-41W; 43-01N, 74-46W; 44-00N, 75-25W; 44-34N, 75-00W; 44-56N, 73-24W; 44-50N, 72-47W; target Groveton, New Hampshire.

Route 8-B-III: 38-14N, 94-50W; 38-12N, 92-38W; 38-43N, 91-26W; 37-22N, 89-25W; 37-24N, 86-02W; 37-50N, 84-42W; 37-22N, 80-47W; 38-33N, 80-15W; 39-05N, 81-55W; 39-16N, 82-08W; target Columbus, Ohio.

Route 8-G-I: 43-10N, 76-30W; 42-41N, 78-02W; 42-14N, 80-09W; 41-27N, 82-58W; 41-27N, 83-39W, 41-12N, 84-45W; 40-33N, 84-36W; 40-29N, 83-53W; 40-35N, 81-13W; 40-50N, 80-22W, 41-47N, 78-50W; 42-26N, 76-54W; 42-34N, 76-33W; target Waterville, New York.

Route 8-C-III: 41-39N, 73-56W; 41-24N, 75-15W; 40-02N, 78-21W; 37-42N, 78-38W; 37-35N, 79-35W; 40-40N, 79-26W; 41-53N, 76-30W; 42-28N, 73-55W; 42-27N, 73-51W; target Springfield, Massachusetts.

QUINCY, ILLINOIS VOR SHUT DOWN: During shutdown the following MEAs can be utilized:

BUFFALO, NEW YORK, VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 142: BUF VOR - Medina Int	Red airway 22	as published
Victor 2 and Victor 14: BUF VOR - ROC VOR	Green airway 2	as published
Victor 36: BUF VOR - Burns Int	Red airway 23	as published
Victor 164: BUF VOR - ELZ VOR	BUF LFR direct ELZ VOR	4500
Victor 33: BUF VOR - BFD VOR	BUF LFR direct BFD VOR	4500
Victor 142: BUF VOR - Jamestown Int	Unusable	-----
Victor 14: BUF VOR - ERI VOR	Green airway 2	as published
Victor 84: BUF VOR - Hagerstown Int	BUF LFR direct XU VOR	3000
Victor 36 South: BUF VOR - YZ VOR	Unusable	-----
Victor 36: BUF VOR - YZ VOR	Red airway 23	as published

The following VHF intsxns will be unusable during the period of shut down: Medina, Mumford, Rush, Grimsby, Avon, Warsaw, Niagara, Thorold.

TEST OF EXPANDED RADAR SERVICE - ANDREWS AFB AREA: Effective 0001 EST 15 Jan 1958 and continuing until 2359 EST 15 Mar 1958 a test will be conducted to gather operational experience and information concerning the practicability of providing expanded radar traffic control service (separation and/or traffic information) to aircraft operating VFR in the vicinity of Andrews AFB. Test activity will be conducted by Andrews approach control within the Andrews approach control area which generally lies between the 060° radial clockwise to the 165° radial of the Washington TVOR within a 30 mile radius E of Andrews AFB. During the test period all aircraft operating VFR in or through this area at and below 10,000 MSL are urged to contact Andrews approach control. Radar will be utilized insofar as possible to provide traffic information and/or radar separation to participating aircraft in the following manner:

1. Military aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic information and radar separation, as required, from all other observed traffic.
2. Civil aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic advisory information.
3. All aircraft operating VFR in the area above 2500 MSL and up to 10,000 MSL inclusive will be provided pertinent traffic advisory information only.
4. Military aircraft should initiate contact on 355.8 mc or 136.8 mc. Civil aircraft may call on 123.7 mc or 122.1 mc and receive on 123.7 mc. Pilots should advise approach control of their position, altitude, heading and intentions during first radio contact so that controllers may plan proper route through the area. Traffic from the east and northeast on Victor 16 or Green 5 is requested to initiate call at Kent Island or over eastern shore of Chesapeake Bay. Traffic from the southeast on Blue 56 should initiate contact in vicinity of Coles Point. Traffic landing at Washington National, Bolling or Anacostia will be advised when to change to appropriate tower frequency.
5. VFR flights departing from Washington National, Bolling or Anacostia that will penetrate test area should contact Andrews approach control as soon as practicable after leaving respective tower frequency and prior to entering area. Aircraft departing airports within the area are requested to initiate contact as soon as practicable after takeoff.
6. IFR traffic operating through the area will be handled in the normal manner by CAA traffic control facilities and should not contact Andrews approach control unless instructed to do so by ATC. There will be no change in established local traffic patterns during the test period.

The above services are designed to aid pilots in avoiding collision and should not be construed as relieving the pilot of any responsibilities and requirements governing VFR flight as established in pertinent military or Civil Air Regulations. Radar traffic information will be provided in accordance with the U.S. Standard Manual of Radar Air Traffic Control Procedures.

Comments from pilots participating in the test are solicited and will be most welcome. Please address correspondence to: Commander, 2045th AACS Group, Attention: Flight Facilities Officer, Andrews Air Force Base, Washington 25, D.C.

DAYTON, OHIO VOR SHUT DOWN: The Dayton, Ohio VOR will be shut down on or about Feb 3, 1958, for approximately 21 days. During outage the following substitute route structure in effect:

(1) V275 CVG VOR to FDY VOR replaced by CVG VOR direct RID VOR direct FDY VOR, MEA 3000.
(2) V246 DAY VOR to MFD VOR replaced by SIE VOR 226 M radial from the point of Int with the W crs of the CMH LFR direct SIE VOR direct MFD VOR, MEA 3000.
(3) V12 1512 and 1514 DAY VOR to APE VOR replaced by Green arwy 4 to the APE VOR 246 M radial direct to the APE VOR, MEA as published.
(4) V12 south DAY VOR to London VHF Int, MEA - none.
(5) V12 1512 and 1514 DAY VOR to IND VOR replaced by Green arwy 4, MEA as published.
(6) V12 north DAY VOR to Cowan VHF Int, MEA - none.
(7) V55 west DAY VOR to Portland VHF Int, MEA - none.
(8) V55 DAY VOR to Coldwater VHF Int replaced by RID VOR direct radial to the Coldwater VHF Int, MEA 3000.

Following temporary non compulsory reporting points established:

Springhills, unusable; Plain City, unusable; Mason CVG VOR 045 M radial RID VOR 128 M radial, MEA 2500; Troy LF Int, MEA as published; Mechanicsburg LF Int, MEA as published; Englewood. Dayton LMM, MEA 3000; Arba LF Int, MEA as published; Union City SIE VOR 263 M radial RID VOR 015 M radial, MEA 2500; Dawn SIE VOR 263 M radial RID VOR 015 M radial, MEA 2500; Anna FDY VOR 213 M radial SIE VOR 310 M radial, MEA 2500; Coladwater FDY VOR 251 M radial FWA VOR 147 M radial, MEA 3000; Dayton SIE VOR 226 M radial W crs of the CMH LFR, MEA 2500.

ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

V CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective March 13, 1958, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Red civil arwy No. 15 (Reno, Nev. to Phoenix, Ariz.) is amended to read: "From the intsxn of the NE crs of the Reno, Nev. rdo rng and the NW crs of the Fallon, Nev. rdo rng via the Fallon, Nev. rdo rng stn; the intsxn of the SE crs of the Fallon rdo rng with a point at lat 38-39-50, long. 117-51-00 to the Tonopah, Nev. rdo rng stn. From the Prescott, Ariz. rdo rng stn via the intsxn of the SE crs of the Prescott rdo rng and the NW crs of the Phoenix rdo rng to the Phoenix, Ariz. rdo rng stn." (Note: deleted the uncontrolled portion of Red 15 between Tonopah rng and Good Springs, Nev. H. Added control to Red 15 between Fallon and Tonopah.)

(2) Blue civil arwy No. 7 (Altamont, Calif. to Williams, Calif.) caption changed and is amended to read: 'From the intsxn of the S crs of the Travis AFB, rdo rng and the W crs of the Stockton, Calif. rdo rng via the Travis AFB, Fairfield, Calif. rdo rng stn to the Williams Calif. rdo rng stn." (Note: deleted portion Blue 7 between Gilroy and Altamont intsxns).

(3) Blue civil arwy No. 10 (Oakland, Calif. to Williams, Calif.) caption changed and is amended to read: "From the Oakland, Calif. rdo rng stn via the intsxn of the NW crs of the Oakland rdo rng and the SW crs of the Williams rdo rng to the Williams, Calif. rdo rng stn." (Note: deleted portion Blue 10 between Fresno rng stn and Oakland rng stn.)

(4) Blue civil arwy No. 14 (El Centro, Calif. to Sacramento, Calif.) is amended by changing the entire last portion to read: 'From the Fresno, Calif. rdo rng stn via the intsxn of the W crs of the Fresno rdo rng and the S crs of the Stockton rdo rng; Stockton, Calif. rdo rng stn to the intsxn of the N crs of the Stockton rdo rng and the SE crs of the Sacramento, Calif. rdo rng." (Note: added a portion on Blue 14 from between Fresno rng and Stockton via the realigned W crs of Fresno. Note courses of Fresno being realigned: W crs 092°T toward the stn; E crs 272°T toward the stn; NW crs 152°T toward the stn; SE crs 332°T toward the stn. Control zone extensions at Fresno follow rng realignment.)

(5) VOR civil arwy No.12 (Santa Barbara, Calif. to Philadelphia, Pa.) is amended by changing the portion which reads: "Tucumcari, N. Mex. omni stn, including a N alternate via the intsxn of the Anton Chico omnirange 067°T and the Tucumcari omnirange 289°T radials;" to read: "Tucumcari, N. Mex. omni stn, including a N alternate via the intsxn of the Anton Chico omnirange 067° and the Tucumcari omnirange 291° radials;" and by changing the portion which reads: "Appleton, Ohio, omni stn, including a S alternate via the point of intsxn of the Dayton omnirange 099°T and the Appleton omnirange 244°T radials; Wheeling, W. Va. omni stn;" to read: "Appleton, Ohio, omni stn, including a S alternate via the point of intsxn of the Dayton omnirange 099° and the Appleton omnirange 244° radials; Newcomerstown, Ohio omni stn; Wheeling, W. Va. omni stn;" (Note: changed Tucumcari VOR 289°T radial to 291°T which is correct bearing of Tucumcari VOR direct radial to Las Vegas VOR on V60. Added Newcomerstown VOR to V12.)

(6) VOR civil arwy No. 13 (Houston, Tex. to Duluth, Minn.) is amended by changing the portion which reads: "Shreveport, La. omni stn, including an E alternate;" to read: "Shreveport, La. omni stn, including an E and a W alternate;" (Note: added V13W between Shreveport VOR and Lufkin VOR.)

(7) VOR civil arwy No. 16 (Los Angeles, Calif. to Boston, Mass.) is amended by changing the portion which reads: "Texarkana, Ark. omni stn, including a N alternate;" to read: "Texarkana, Ark. omni stn including a N alternate, and also a S alternate via the point of intersection of the Sulphur Springs omni stn 090° with the Quitman, Tex. omnirange direct radial to the Texarkana omni stn;" (Note: added V16S between Sulphur Springs VOR and Texarkana VOR.)

(8) VOR civil arwy No. 18 (Dallas, Tex. to Charleston, S.C.) is amended by changing the portion which reads: "Monroe, La. omni stn, including a N alternate;" to read: "Monroe, La. omni stn, including a N and a S alternate;" (Note: added V18S between Shreveport VOR and Monroe VOR.)

(9) VOR civil arwy No. 27 (Los Angeles, Calif. to Seattle, Wash.) is amended by changing the portion which reads: "excluding the portion which conflicts with the Ft Ord restricted area (R-284) and also excluding the portion which conflicts with the Camp Roberts restricted area (R-415) during the hrs of daylgt;" to read: "excluding the portion which lies within Ft Ord Restricted Area (R-284) and also excluding the portion which lies within Camp Roberts Restricted Area (R-415);"

(10) VOR civil arwy No. 37 (Savannah, Ga. to Erie, Pa.) is amended by changing the portion which reads: "Pulaski, Va. omni stn;" to read: "Pulaski, Va. omni stn, including a W alternate from the Charlotte omni stn to the Pulaski omni stn via the Hickory, N. C. omni stn;" (Note: added V37W between Charlotte VOR and Pulaski VOR via Hickory VOR.)

(11) VOR civil arwy No. 59 (Parkersburg, W. Va. to Cleveland, Ohio) is added to read: "From the Parkersburg, W. Va. omni stn via the Newcomerstown, Ohio omni stn; point of intersection of the Tiverton, Ohio omnirange direct radial to the Youngstown, Ohio omni stn with the Mnasfield, Ohio omnirange 100° radial; to the Cleveland, Ohio omni stn." (Note: new arwy)

(12) VOR civil arwy No. 69 (Shreveport, La. to Chicago, Ill.) is amended by changing the portion which reads: "El Dorado, Ark. omni stn;" to read: "El Dorado, Ark. omni stn, including a W alternate from the Shreveport omni stn to the El Dorado omni stn via the intsxn of the Shreveport omnirange 087° and the El Dorado omnirange 234° radials;" (Note: added V69W between Shreveport VOR and El Dorado VOR.)

(13) VOR civil arwy No. 71 (Flippin, Ark. to Kansas City, Mo.) is amended to read: "From the Flippin, Ark. omni stn via the Springfield, Mo. omni stn; Butler, Mo. omni stn, including a W alternate via the intsxn of the Springfield omnirange 301° and the Butler omnirange 178° radials; to the Kansas City, Mo. omni stn." (Note: revoked the portion of V71 between Pine Bluff VOR and Little Rock VOR and redesignated this portion as a part of V74.)

(14) VOR civil arwy No. 74 (Hugo, Colo. to Pine Bluff, Ark.) is amended by changing the caption and by changing the portion which reads: "to the Little Rock, Ark. omni stn." to read: "Little Rock, Ark. omni stn; intsxn of the Little Rock omnirange 141° and the Pine Bluff omnirange 007° radials; to the Pine Bluff, Ark. omni stn." (Note: added new portion to V74. This new portion was formerly a part of V71.)

(15) VOR civil arwy No. 103 (Greensboro, N. C. to Cleveland, Ohio) is amended to read: "From the Greensboro, N. C. omni stn via the Roanoke, Va. terminal omni stn; Elkins, W. Va. omni stn; Wheeling, W. Va. omni stn; point of intsxn of the Wheeling omnirange 313° and the Mansfield, Ohio, omnirange 100° radials; point of intsxn of the Mansfield omnirange 100° radial with the Tiverton, Ohio omnirange direct radial to the Youngstown, Ohio omni stn; to the Cleveland, Ohio omni stn." (Note: redesignated V103 from Wheeling VOR to Cleveland VOR via the Bergholz and Mt. Hope Ints.)

(16) VOR civil arwy No. 115 (Crestview, Fla. to Buffalo, N. Y.) is amended by changing the caption and by adding a new last portion to read: "From the Ellwood City, Pa. omni stn to the Buffalo, N. Y. omni stn." (Note: added new portion to V115 from Ellwood City VOR to Buffalo VOR.)

(17) VOR civil arwy No. 142 (Erie, Pa. to Rochester, N. Y.) is amended by changing the portion which reads: "From the Erie, Pa. omni stn via the point of intsxn of the Erie omnirange 080°T and the Bradford, Pa. omnirange 308°T radials;" to read: "From the Erie, Pa. omni stn via the point of intsxn of the Bradford, Pa. omnirange 308° radial with the Ellwood City, Pa. omnirange direct radial to the Buffalo, N. Y. omni stn;" (Note: slight redesignation of V142 to place it on relocated Jamestown Int.)

(18) VOR civil arwy No. 170 (Milwaukee, Wis. to Philadelphis, Pa.) is amended by changing the portion which reads: "From the Erie, Pa. omni stn via the Bradford, Pa. omni stn, including a N alternate via the intsxn of the Erie omnirange 080°T and the Bradford omnirange 308°T radials;" to read: "From the Erie, Pa. omni stn via the Bradford, Pa. omni stn, including a N alternate via the point of intsxn of the Bradford omnirange 308° radial with the Ellwood City, Pa. omnirange direct radial to the Buffalo, N. Y. omni stn;" (Note: slight redesignation to V170N to place apex over relocated Jamestown Int.)

(19) VOR civil arwy No. 210 (Los Angeles, Calif. to Wheeling, W. Va.) is amended by changing the portion which reads: "Farmington, N. Mex. omni stn; to the Pueblo, Colo. omni stn." to read: "Farmington, N. Mex. omni stn; Alamosa, Colo. omni stn; to the Pueblo, Colo. omni stn,. including a S alternate via the point of intsxn of the Alamosa omnirange direct radial to the Lamar, Colo. omni stn with the Las Vegas, N. Mex. omnirange direct radial to the Pueblo omni stn." (Note: redesignated V210 from Farmington VOR to Pueblo VOR via Alamosa VOR. Added V210S between Alamosa VOR and Pueblo VOR.)

(20) VOR civil arwy No. 289 (Beaumont, Tex. to Texarkana, Ark.) is amended to read: "From the Beaumont, Tex. omni stn via the intsxn of the Beaumont omnirange 334° and the Lufkin, omnirange 160° radials; Lufkin, Tex. omni stn, including an E alternate via the intsxn of the Beaumont omnirange 349° and the Lufkin omnirange 145° radials; intsxn of the Lufkin omnirange 355° and the Gregg County omnirange 181° radials; Gregg County, Tex. omni stn, to the Texarkana, Ark. omni stn." (Note: added new portion to V289 from Lufkin VOR to Texarkana VOR via Gregg County VOR.)

(21) VOR civil arwy No. 1512 (Los Angeles, Calif. to New York, N. Y.) is amended by changing the portion which reads: "to the Farmington, N. Mex. omni stn. From the Russell, Kans. omni stn via the Salina, Kans. omni stn;" to read: "Farmington, N. Mex. omni stn; Alamosa, Colo. omni stn; Lamar, Colo. omni stn; Russell, Kans. omni stn; Salina, Kans. omni stn;" and by changing the portion which reads: "Appleton, Ohio omni stn; Wheeling, W. Va. omni stn;" to read: "Appleton, Ohio omni stn; Newcomerstown, Ohio omni stn; Wheeling, W. Va. omni stn:" (Note: added new portion to V1512 from Farmington VOR to Russell VOR. Added Newcomerstown VOR to V1512 between Appleton VOR and Wheeling VOR.)

(22) VOR civil arwy No. 1514 (San Francisco, Calif. to New York, N. Y.) is amended by changing the portion which reads: "From the Pueblo, Colo. omni stn to the Lamar, Colo. omni stn. From the Russell, Kans. omni stn via the Salina, Kans. omni stn;" to read: "From the Pueblo, Colo. omni stn via the Lamar, Colo. omni stn; Russell, Kans. omni stn; Salina, Kans. omni stn;" and by changing the portion which reads: "Appleton, Ohio omni stn; Wheeling, W. Va. omni stn;" to read: "Appleton, Ohio omni stn; Newcomerstown, Ohio omni stn; Wheeling, W. Va. omni rng stn;" (Note: added new portion to V1514 from Lamar VOR to Russell VOR. Added Newcomerstown VOR to V1514 between Appleton VOR and Wheeling VOR.)

(23) VOR civil arwy No. 1516 (San Francisco, Calif. to Washington, D. C.) is amended by changing the portion which reads: "From the Valle, Aris. omni stn to the Farmington, N. Mex. omni stn." to read: "From the Valle, Aris. omni stn via the Farmington, N. Mex. omni stn to the Raton, N. Mex. omni stn." (Note: added new portion to V1516 from Farmington VOR to Raton VOR.)

(24) VOR civil arwy No. 1522 (Los Angeles, Calif. to Washington, D. C.) is amended by

changing the portion which reads: "to the Sulphur Springs, Tex. omni stn." to read: "Sulphur Springs, Tex. omni stn; Texarkana, Ark. omni stn; to the Greenwood, Miss. omni stn." (Note: added new portion to V1522 from Sulphur Springs, VOR to Greenwood VOR via Texarkana VOR.)

CONTROL AREAS:

(1) Red civil arwy No. 15 (Reno, Nev. to Phoenix, Ariz.) caption changed - control extended and is amended to read: "All of Red civil arwy No. 15."

(2) Blue civil arwy No. 7 (Altamont, Calif. to Williams, Calif.) caption changed and is amended to read: "All of Blue civil arwy No. 17."

(3) Blue civil arwy No. 10 (Oakland, Calif. to Williams, Calif.) caption changed and is amended to read: "All of Blue civil arwy No. 10."

(4) VOR civil arwy No. 37 (Savannah, Ga. to Erie, Pa.) is amended to read: "All of VOR civil arwy No. 37 including W alternates."

(5) VOR civil arwy No. 59 (Parkersburg, W. Va to Cleveland, Ohio) is added to read: "All of VOR civil arwy No. 59."

(6) VOR civil arwy No. 69 (Shreveport, La. to Chicago, Ill.) is amended to read: "All of VOR civil arwy No. 69 including a W alternate."

(7) VOR civil arwy No. 71 (Flippin, Ark. to Kansas City, Mo.) is amended to read: "All of VOR civil arwy No. 71 including a W alternate."

(8) VOR civil arwy No. 74 (Hugo, Colo. to Pine Bluff, Ark.) is amended to read: "All of VOR civil arwy No. 74 including a N and a S alternate."

(9) VOR civil arwy No. 115 (Crestview, Fla. to Buffalo, N. Y.) is amended to read: "All of VOR civil arwy No. 115."

(10) VOR civil arwy No. 210 (Los Angeles, Calif. to Wheeling, W. Va.) is amended to read: "All of VOR civil arwy No. 210 including a S alternate."

(11) VOR civil arwy No. 289 (Beaumont, Tex. to Texarkana, Ark.) is amended to read: "All of VOR civil arwy No. 289 including a E alternate."

CONTROL AREA EXTENSIONS:

(1) (Austin, Tex.) is amended by deleting the words which read: "excluding the portion which overlaps restricted area (R-343)." (Note: R-343 being rescinded to be effective prior to or concurrently.)

(2) (Oakland, Calif.) is amended in first portion by changing the words which read: "bounded on the SW by Blue civil arwy No. 10", to read: "bounded on the SW by VOR civil arwy No. 107,"

(3) (Merced, Calif.) is amended to read: "The airspace in the vcnty of Castle Air Force Base, Merced, Calif. bounded on the E by VOR civil arwy No. 23, on the S by VOR civil arwy No. 230, on the W by Blue civil arwy No. 14 and on the N by the Stockton, Calif. control area (601.1242)."

(4) (Waco, Tex.) is amended to read: "The airspace W of Waco bounded on the W by VOR civil arwy No. 163, on the NE by VOR civil arwy No. 17W, on the E by VOR civil arwy No. 17, and on the S by VOR civil arwy No. 76, excluding the portion lying within Ft Hood restricted area (R-219)." (Note: R-343 rescinded concurrently)

(5) (Stockton, Calif.) is amended to read: "The airspace within a 15 mi radius of the Modesto, Calif. omni stn including the airspace W of Modesto bounded on the S by VOR civil arwy No. 28 and on the NW and NE by VOR civil arwy No. 244 and including the airspace NW and NE of Stockton bounded on the NW by VOR civil arwy No. 6S, on the NE by VOR civil arwy No. 23 and on the S by VOR civil arwy No. 244."

(6) (Tonopah, Nev.) is added to read: "Within 5 mi either side of the S crs of the Tonopah rdo rng extending from the rdo rng stn to a point 15 mi S."

(7) (Myrtle Beach, S.C.) is amended to read: "The airspace lying within a 25 mi radius of Myrtle Beach AFB, excluding the portion which overlaps warning area (W-177); the airspace NW of Myrtle Beach bounded on the N by a line extending through points at lat 34-15-45, long. 79-26-00 and lat 34-13-50, long. 78-44-00, on the E by a line 5 mi W of and parallel to a line extending from the Myrtle Beach omni stn to the Rocky Mount, N.C. omni stn, on the SE by VOR civil arwy No. 1 and on the SW and NW by VOR civil arwy No. 3E and VOR civil arwy No. 3, excluding the portion which overlaps restricted area (R-515)."

(8) (Roanoke, Va.) is amended by adding the following to present control area: "and the airspace SE of Roanoke bounded on the N by Red civil arwy No. 37, on the SE by VOR civil arwy No. 143, and on the SW by VOR civil arwy No. 258."

(9) (San Diego, Calif.) is amended by adding the following to present control area: "the airspace SE of San Diego bounded on the N by Red civil arwy No. 9, on the W by Amber civil arwy No. 1, and on the SE by a line 5 mi SE of and parallel to a line extending from the Coronado nondirectional rdo bcn to the Jamul nondirectional rdo bcn."

(10) (Danville, Va.) is amended to read: "The airspace bounded on the NE by VOR civil arwy No. 136, on the SE by VOR civil arwy No. 20, and on the NW by VOR civil arwy No. 143."

(11) (Shreveport, La.) is amended to read: "The airspace within a 40 n mi radius of the Barksdale AFB, Shreveport, La. including the airspace NE of Shreveport bounded on the W by VOR civil arwy No. 13, on the N by VOR civil arwy No. 16S, on the NE by a line extending through points at lat 33-01-00, long. 93-05-00 and lat 33-30-00, long. 93-33-00, and on the S and E by VOR civil arwy No. 69; the airspace NW of Shreveport bounded on the E by Blue civil arwy No. 13, on the NW by Green civil arwy No. 5 and on the S by ~ Red civil arwy No. 10."

(12) (South Boston, Va.) is added to read: "The airspace NW of South Boston, Va. bounded on the E by Blue civil arwy No. 29, on the SW by VOR civil arwy No. 136 and on the NW by VOR civil arwy No. 143."

CONTROL ZONES:

(1) (Three-mile radius zones) is amended by deleting the following airport: Santa Monica, Calif.: Santa Monica Municipal Airport.

(2) (Grandview, Mo.) is amended to read: "Within a 5 mi radius of the Richards-Gebaur AFB excluding the portion lying N of lat 38-52-30 and W of long. 94-35-50, and including the airspace within 2 mi either side of a line bearing 190°T extending from the AFB to a point 10 mi S of the Richards-Gebaur nondirectional rdo bcn." (Note: name changed of AFB and H facility; 190° instead of 188°T bearing used due to fact C&GS photogrammetry plot relocates H facility.)

(3) (Los Angeles, Calif.) is amended to read: "Within the circumference of a 5 mi radius circle centered on Los Angeles Intnl Arpt excluding the portion subtended by a chord drawn between the points of intsxn of this circumference with the circumference of the Santa Monica, Calif. control zone (601.2420); within 2 mi either side of the Los Angeles ILS lclzr E crs extending from the lclzr to a point 6 mi E of the arpt, and within 2 mi either side of a line bearing 338°T from the Los Angeles nondirectional rdo bcn extending to the Burbank, Calif. control zone."

(4) (LaCrosse, Wis.) is amended to read: "Within a 5 mi radius of LaCrosse Municipal Arpt, within 2 mi either side of the NW crs of the LaCrosse rdo rng extending from the rdo rng stn to a point 10 mi NW, and within 2 mi either side of the 227°T radial of the LaCrosse TVOR extending from the TVOR to a point 10 mi SW of the arpt."

(5) (Gulfport, Miss.) is revoked. (Note: Gulfport CZ as presently designated will be reinstated prior to June 1 to be effective "from June 1 thru Sept 15th and annually thereafter." See ASP Mtg 531.)

(6) (Santa Monica, Calif.) is added to read: "Within the circumference of a 3-mi radius circle centered on the Santa Monica Municipal Arpt excluding the portion subtended by a chord drawn between the points of intsxn of this circumference with the circumference of the Los Angeles, Calif. control zone (601.2179)."

(7) (Myrtle Beach, S.C.) is amended by changing the portion which reads: "and within 2 mi either side of a line bearing 331°T extending from the Myrtle Beach AFB to a point 9 mi NW." to read: "and within 2 mi either side of a line extending from the Myrtle Beach AFB to the Myrtle Beach nondirectional rdo bcn (MTL)." (Note: H located at lat 33-50-50; long. 78-59-00. Ident: MTL. Freq: 353.)

(8) (Killeen, Tex.) is added to read: "Within a 5 mi radius of Gray AFB, Killeen, Tex. and within 2 mi either side of the extended centerline of rnwy 15/33 extending to points 8 mi SE and NW of the arpt."

(9) (Bradford, Pa.) is added to read: "Within a 5 mi radius of the Bradford-McKean Co. Arpt and within 2 mi either side of a 134°T bearing extending from the arpt to a point 10 mi SE of the Bradford nondirectional bcn."

(10) (Farmington, N. Mex.) is added to read: "Within a 5 mi radius of the Farmington Arpt and within 2 mi either side of the 266°T radial of the Farmington omnirange extending from the omni stn to the 5 mi radius zone."

REPORTING POINTS:

(1) Blue civil arwy No. 7 (Altamont, Calif. to Williams, Calif.) is amended by changing the caption.

(2) Blue civil arwy No. 10 (Oakland, Calif. to Williams, Calif.) is amended to read: "No reporting point designation."

(3) Other Reporting Points is amended by deleting the following reporting point: Bon Secour Int: The intsxn of the SE crs of the Mobile, Ala. rdo rng and the W crs of the Pensacola, Fla. rdo rng. (Note: Bon Secour intsxn is an on-request reporting point "West Pensacola and a 146°M bearing from Brookley AFB H facility." Above deletion is to correct the records in view of fact Mobile LFR has been decmsnd.)

VOR REPORTING POINTS:

(1) VOR domestic reporting points is amended by adding the following reporting points: Hickory, N. C. omni stn (for acft operating below 15, 200'MSL).

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.

2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.

3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

✓ JACKSONVILLE-NEW ORLEANS-ATLANTA ARTC BOUNDARY CHANGE: Effective February 25, 1958, the Jacksonville-New Orleans-Atlanta ARTC Boundary will be changed as follows: beginning on existing boundary at 31-01N, 86-12W on the N boundary of V241 airway southwesterly along the northern edge of V241 airway to the eastern edge of Blue 55 airway thence northerly along the eastern edge of Blue 55 V115 airways to the southern edge of V134 airway thence easterly along the southern edge of V134 airway to the present Jacksonville-Atlanta ARTC Boundary.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 217)

(1) Section 608.14, the Camp Roberts, California area (R-415) amended Sept 11, 1957, in 22 F.R. 7225 is further amended by changing the "Time of Designation" column to read: "continuous". (This amendment shall become effective on March 15, 1958)

(2) Section 608.24, the Brookville, Kansas area (R-196) amended Oct 31, 1951 in 16 F.R. 11066 is further amended by changing the "Controlling Agency" column to read: "Commander, Schilling AFB, Kansas". (This amendment shall become effective on March 1, 1958)

(3) Section 608.37, the Isle of Shoals, New Hampshire area (R-96) amended March 21,1957 in 22 F.R. 1887 is further amended by changing the "Controlling Agency" column to read: "COMFAIRDET NAS Brunswick, Maine". (This amendment shall become effective on March 1, 1958)

(4) Section 608.38, the New Gretna, New Jersey area (R-27) amended May 5, 1956, in 21 F.R. 2977 is rescinded. (This amendment shall become effective on March 1, 1958)

(5) Section 608.51, the Gray AFB, Killeen, Texas area (R-343) amended Dec 20, 1957, in 22 F.R. 10304 is rescinded. (This amendment shall become effective on March 13, 1958)

(6) Section 608.54, the Quantico, Virginia area (R-37) amended Aug 11, 1954, in 19 F.R. 5041 is further amended by changing the "Designated Altitudes" column to read: "Surface to 15,000'MSL." (This amendment shall become effective on March 1, 1958)

(7) Section 608.62, the West Molokai, Hawaii area (R-325) amended Nov 19, 1955, in 20 F.R. 8559 is further amended by changing the "Time of Designation" column to read: "Tuesday and Thursday sunrise to sunset Mon, Wednesday, Friday 0800-1600" and the "Controlling Agency" column to read: "ComFairHawaii". (This amendment shall become effective on March 1, 1958).

✓ PART 618 (HIGH DENSITY AIR TRAFFIC ZONES AND AIRPORTS) AMENDED: Effective 0001 EST, March 13, 1958, Amendment #1 to Part 618 becomes effective. The amendment is as follows:

(1) Subpart B is amended by adding the following designated high density air traffic zones:

Chicago, Ill. High Density Air Traffic Zone. All of the airspace extending upwards from the surface to and including an altitude of 3000' above the surface within the following boundaries: Beginning at lat 42-09-00, long. 88-07-30; thence to lat 41-48-00, long. 88-01-30; thence to lat 41-40-00, long. 88-00-00; thence to lat 41-40-00, long. 87-27-00; thence N along the W shore of Lake Michigan to lat 42-13-15, long. 87-48-30; thence to the point of beginning.

Dallas-Ft Worth, Texas, High Density Air Traffic Zone. All of the airspace extending upwards from the surface to and including an altitude of 3000' above the surface within the following boundaries: Beginning at lat 32-59-50, long. 97-31-25; thence E to lat 32-59-50, long. 96-56-30; thence clockwise around the arc of an 11-1/2 mi radius circle centered at lat 32-50-58, long. 96-50-52 on Love Field to lat 32-41-00, long. 96-50-00; thence south to lat 32-39-00, long. 96-50-00; thence W to lat 32-39-00, long. 97-05-00; thence WSW to lat 32-35-20, long. 97-24-40; thence W to lat 32-35-25, long. 97-28-50; thence N along the current western boundaries of Carswell AFB control zone and control zone extensions, (published in Section 601.2029 of Part 601 of this chapter), to lat 32-59-50, long. 97-31-25, the point of beginning.

(2) Subpart C is amended by adding the following designated high density airports:

Chicago-Midway Arpt, Chicago, Ill.; Chicago-O'Hare Intnl Arpt, Chicago, Ill.; Glenview Naval Air Station, Glenview, Ill.; Love Field, Dallas, Texas; Hensley Naval Air Station, Dallas, Texas; Greater Ft Worth Intnl (Amon Carter) Arpt, Ft Worth, Texas; Carswell Air Force Base, Ft Worth, Texas.

✓ LEXINGTON, KENTUCKY VOR SHUT DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 45: LEX VOR - YRK VOR	LEX HW direct YRK VOR	3000

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

CTW	Newcomerstown, Ohio, VOR	(change from CMS)
HCN	Hurricane, Utah	(assignment)
4WM	Williams, Ariz.	(assignment effective Feb 15)
BB	Beale, Pacific Ocean	(assignment)
HK	Hague, Sask.	(assignment)

All AFB names and identifiers in CAA Location Identifiers manual should be preceded by asterisk to indicate identifier may be preceded by letter "K" in international usage.

✓ HOLDING PATTERNS: The following holding patterns have been designated, redesignated, or cancelled and shall become effective as indicated:

DESIGNATED: Mar 13, 1958

(1) KENTON, OHIO (VHF) INTSXN - direction of holding - SE on 144° M radial of the Findlay, Ohio VOR; direction of turns - right; time - 2 mins; min alt - 2500'.

(2) ASHTABULA, OHIO (VHF) INTSXN - direction of holding - W on 264° M radial of the Erie, Pa. VOR; direction of turns - left; time - 1 min; min alt - 2500'.

(3) STURGEON, OHIO (VHF) INTSXN - direction of holding - NW on 300° M radial of the Erie, Pa. VOR; direction of turns - left; time - 1 min; min alt - 2500'.

(4) SANFORD, N.Y. (VHF) INTSXN - direction of holding - E on 099° M radial of the Binghampton, N.Y. VOR; direction of turns - right; time - 1 min; min alt - 4500'.

(5) SALAMANCA, N.Y. (VHF) INTSXN - direction of holding - N on 006° M radial of the Bradford, Pa. VOR; direction of turns - right; time - 2 mins; min alt - 4500'.

(6) ANGELICA, N.Y. (VHF) INTSXN - direction of holding - NW on 339° M radial of the Wellsville, N.Y. VOR; direction of turns - right; time - 2 mins; min alt - 5000'.

(7) CHERRY SPRINGS, PA. (VHF) INTSXN - direction of holding - W on 104° M radial of the Bradford, Pa. VOR; direction of turns - right; time - 1 min; min alt - 4500'.

(8) WARREN, PA. (VHF) INTSXN - direction of holding - W on 288° M radial of the Bradford, Pa. VOR; direction of turns - right; time - 1 min; min alt - 4000'.

(9) QUAKERTOWN, PA. (VHF) INTSXN - direction of holding - N on 183° M radial of the Allentown, Pa. VOR; direction of turns - right; time - 1 min; min alt - 2500'.

(10) CALHOUN, LA. (VHF) INTSXN - direction of holding - W on 276° M radial of the Monroe, La. VOR; direction of turns - right; time - 1 min; min alt - 1600'.

(11) STADIUM, TEXAS (VHF) INTSXN - direction of holding - S on S crs Meacham, Texas ILS lclzr; direction of turns - right; time - 1 min; min alt - 2000'.

(12) FABENS, TEXAS (VHF) INTSXN - direction of holding - E on 260° M radial of the Hudspeth, Texas VOR; direction of turns - left; time - 2 mins; min alt - 6000'.

(13) FORNEY, TEXAS (VHF) INTSXN - direction of holding - SE on 124° M radial of the Dallas, Texas VOR; direction of turns - right time - 1 min; min alt - 1600'.

(14) CHEYENNE, WYO. (ILS/LOM) - direction of holding - E on E crs ILS lclzr; direction of turns - left; time - 1 min; min alt - 7300'.

REDESIGNATED: Mar 13, 1958

(1) LIDO, N.Y. (Rbn) - direction of holding - SW on SW crs of the Hempstead, N.Y. LFR; direction of turns - left; time - 1 min; min alt - 1500'.

(2) FREEDOM, PA. (VHF) INTSXN - direction of holding - NE on 034° M radial of the Wheeling, W.Va. VOR; direction of turns - left; time - 1 min; min alt - 3000'.

(3) BIRMINGHAM, ALA. (ILS/LOM) - direction of holding - SW on SW crs of the ILS; direction of turns - left; time - 2 mins; min alt - 2600'.

(4) COWART, TEX. (VHF) INTSXN - direction of holding - E on 079° M radial of the Newman, Tex. VOR; direction of turns - left; time - 1 min; min alt - 7700'.

(5) TRINITY FORK, TEX. (VHF) INTSXN - direction of holding - SE on SE crs of the Dallas, Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt - 2000'.

(6) WESLEY, PA. (VHF) INTSXN - direction of holding - NE on 034° M radial of the Ellwood City, Pa. VOR; direction of turns - right; time - 1 min; min alt - 4000'.

CANCELLED: Mar 13, 1958

(1) MESQUITE, TEX. (VHF) INTSXN - direction of holding - SE on 124° M radial of the Dallas, Tex. VOR; direction of turns - right; time - 1 min; min alt - 2000'.

(2) RUSSELL, TEX. (VHF) INTSXN - direction of holding - S on S crs of the Meacham, Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt - 2000'.

DESIGNATED: Jan 16, 1958

(1) CAYUGA, ONT, CAN. (VHF) INTSXN - direction of holding - E on the 282° M radial of the Buffalo, N.Y. VOR; direction of turns - right; time - 2 mins; min alt - 5000'.

(2) CLAIR, CAN. (VHF) INTSXN - direction of holding - NE on 063° M radial of the Windsor, Can. VOR; direction of turns - right; time - 1 min; min alt - 2000'.

(3) POINTE, CAN. (VHF) INTSXN - direction of holding - E on 085° M radial of the Windsor, Can. VOR; direction of turns - right; time - 1 min; min alt - 2000'.

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Charlotte	Norfolk Local	Washington Local	WAC 309
Jacksonville	Philadelphia Local	WAC 63	WAC 358
Cleveland Local	Pittsburgh Local	WAC 135	AP 9

✓ ON REQUEST REPORTING POINTS: The following on request reporting points are designated, redesignated, renamed and redesignated, or cancelled and shall become effective as indicated:

DESIGNATED: Mar 13, 1958

(1) ANGELICA, N. Y. (VHF) INTSXN - intsxn of the 339°M radial of the Wellsville, N. Y. VOR and the 036°M radial of the Bradford, Pa. VOR.

(2) ASHTABULA, OHIO (VHF) INTSXN - intsxn of the 264°M radial of the Erie, Pa. VOR and the 348°M radial of the Jefferson, Ohio VOR.

(3) BUTCHER, TEX. (VHF) INTSXN - intsxn of the 315°M radial of the Dallas, Tex. VOR and the 198°M radial of the Ardmore, Okla. VOR.

(4) BY PASS, TEX. (VHF) INTSXN - intsxn of the 073°M radial of the Midland, Tex. VOR and the 201°M radial of the Big Spring, Tex. VOR.

(5) CALHOUN, LA. (VHF) INTSXN - intsxn of the 145°M radial of the El Dorado, Ark. VOR and the 276°M radial of the Monroe, La. VOR.

(6) CHERRY SPRINGS, PA. (VHF) INTSXN - intsxn of the 167°M radial of the Wellsville, N. Y. VOR and the 104°M radial of the Bradford, Pa. VOR.

(7) COLTON, ORE. (VHF) INTSXN - intsxn of the 096°M radial of the Newberg, Ore. VOR and the 145°M radial of the Portland, Ore. VOR.

(8) COTTON, LA. (VHF) INTSXN - intsxn of the 079°M radial of the Shreveport, La. VOR and the 227°M radial of the El Dorado, Ark. VOR.

(9) EUREKA, MO. (VHF) INTSXN - intsxn of the 241°M radial of the Troy, Ill. VOR and the 190°M radial of the St. Louis, Mo. VOR.

(10) FORNEY, TEX. (VHF) INTSXN - intsxn of the 124°M radial of the Dallas, Tex. VOR and the 053°M radial of the Britton, Tex. VOR.

(11) FRANCISCO, N. C. (VHF) INTSXN - intsxn of the 051°M radial of the Hickory, N. C. VOR and the 334°M radial of the Greensboro, N. C. VOR.

(12) HAMEL, ILL. (LF) INTSXN - intsxn of the E crs of the St Louis, Mo. LFR and the 360°M brng from Scott AFB, Ill. LFR.

(13) HOLLOW ROCK, TENN. (VHF) INTSXN - intsxn of the 360°M radial of the Jacks Creek, Tenn. VOR and the 083°M radial of the Dyersburg, Tenn. VOR.

(14) HUNTINGDON, PA. (VHF) INTSXN - intsxn of the 073°M radial of the Johnstown, Pa. VOR and the 135°M radial of the Tyrone, Pa. VOR.

(15) IMPERIAL, MO. (VHF) INTSXN - intsxn of the 163°M radial of the St Louis, Mo. VOR and the 220°M radial of the Troy, Ill. VOR.

(16) KENTON, OHIO (VHF) INTSXN - intsxn of the 144°M radial of the Findlay, Ohio VOR and the 043°M radial of the Sidney, Ohio VOR.

(17) LAKEWOOD, N. MEX. (VHF) INTSXN - intsxn of the 331°M radial of the Carlsbad, N. Mex. VOR and the 070°M radial of the Pinon, N. Mex. VOR.

(18) LEONA, TEX. (VOR)

(19) MALJAMAR, N. MEX. (VHF) INTSXN - intsxn of the 013°M radial of the Carlsbad, N. Mex. VOR and the 103°M radial of the Roswell, N. Mex. VOR.

(20) MONUMENT, GA. (VHF) INTSXN - intsxn of the 009°M radial of the Atlanta, Ga. VOR and the 115°M radial of the Chattanooga, Tenn. VOR.

(21) MYRA, TEX. (VHF) INTSXN - intsxn of the 315°M radial of the Dallas, Tex. VOR and the 183°M radial of the Ardmore, Okla. VOR.

(22) NAPLES, TEX. (VHF) INTSXN - intsxn of the 082°M radial of the Sulphur Springs, Tex. VOR and the 232°M radial of the Texarkana, Ark. VOR.

(23) NAVARRO, TEX. (VHF) INTSXN - intsxn of the 329°M radial of the Leona, Tex. VOR and the 058°M radial of the Waco, Tex. VOR.

(24) NEW HANOVER, ILL. (LF) INTSXN - intsxn of the S crs of the St Louis, Mo. LFR and the 245°M brng from Scott AFB, Ill. LFR.

(25) OKMULGEE, OKLA. (VOR)

(26) PANOCHE, CALIF. (LF) INTSXN - intsxn of the S crs of the Stockton, Calif. LFR and the W crs of the Fresno, Calif. LFR.

(27) QUAKERTOWN, PA. (VHF) INTSXN - intsxn of the 053°M radial of the Pottstown, Pa. VOR and the 183°M radial of the Allentown, Pa. VOR.

(28) RAYVILLE, LA. (VHF) INTSXN - intsxn of the 131°M radial of the El Dorado, Ark. VOR and the 084°M radial of the Monroe, La. VOR.

(29) SALAMANCA, N. Y. (VHF) INTSXN - intsxn of the 006°M radial of the Bradford, Pa. VOR and the 284°M radial of the Wellsville, N. Y. VOR.

(30) SANFORD, N. Y. (VHF) INTSXN - intsxn of the 099°M radial of the Binghamton, N. Y. VOR and the 231°M radial of the Rockdale, N. Y. VOR.

(31) STADIUM, TEX. (VHF) INTSXN - intsxn of the 344°M radial of the Leona, Tex. VOR and the 082°M radial of the Mineral Wells, Tex. VOR.

(32) STURGEON, OHIO (VHF) INTSXN - intsxn of the 300°M radial of the Erie, Pa. VOR and the 024°M radial of the Jefferson, Ohio VOR.

(33) TRINIDAD, TEX. (VHF) INTSXN - intsxn of the 344°M radial of the Leona, Tex. VOR and the 058°M radial of the Waco, Tex. VOR.

(34) WALSENBURG, COLO. (VHF) INTSXN - intsxn of the 056°M radial of the Alamosa, Colo. VOR and the 179°M radial of the Pueblo, Colo. VOR.

(35) WARREN, PA. (VHF) INTSXN - intsxn of the 288°M radial of the Bradford, Pa. VOR and the 003°M radial of the Fitzgerald, Pa. VOR.

(36) WOODSIDE, LA. (VHF) INTSXN - intsxn of the 050°M radial of the Lake Charles, La. VOR and the 300°M radial of the Baton Rouge, La. VOR.

DESIGNATED: Jan 16, 1958

(1) CAYUGA, ONT. CAN. (VHF) INTSXN - intsxn of the 198°M radial of the Toronto, Ont. VOR and the 282°M radial of the Buffalo, N. Y. VOR.

(2) CLAIR, CAN. (VHF) INTSXN - intsxn of the 063°M radial of the Windsor, Ont. VOR and the 171°M radial of the Selfridge, Mich. VOR.

(3) POINTE, CAN. (VHF) INTSXN - intsxn of the 085°M radial of the Windsor, Can. VOR and the 171°M radial of the Selfridge, Mich. VOR.

REDESIGNATED: Mar 13, 1958

(1) AURORA, W. VA. (VHF) INTSXN - intsxn of the 139°M radial of the Morgantown, W. Va. VOR and the 230°M radial of the Grantsville, Md. VOR.

(2) BLACK MESA, ARIZ. (VHF) INTSXN - intsxn of the 010°M radial of the Winslow, Ariz VOR and the 238°M radial of the Farmington, Ariz. VOR.

(3) COLE, OKLA. (VHF) INTSXN - intsxn of the 351°M radial of the Ft. Worth, Tex. VOR and the 249°M radial of the Ardmore, Okla. VOR.

(4) COWART, TEX. (VHF) INTSXN - intsxn of the 079°M radial of the Newman, Tex. VOR and the NE crs of the El Paso, Tex. ILS lclzr.

(5) FREEDOM, PA. (VHF) INTSXN - intsxn of the 034°M radial of the Wheeling, W. Va. VOR and the 345°M radial of the Pittsburg, Pa. VOR.

(6) GUMBO, FLA. (VHF) INTSXN - intsxn of the 290°M radial of the Tampa, Fla. VOR and the 205°M radial of the Cross City, Fla. VOR. (MRA 6000' - depict flag)

(7) HAMMOND, LA. (VHF) INTSXN - intsxn of the 261°M radial of the Picayune, Miss. VOR and the 355°M radial of the New Orleans, La. VOR.

(8) KITS, MD. (VHF) INTSXN - intsxn of the 114°M radial of the Morgantown, W. Va. VOR and the 230°M radial of the Grantsville, Md. VOR.

(9) LAKE CITY, MINN. (VHF) INTSXN - intsxn front crs of the Minneapolis, Minn. ILS lclzr and the 308°M radial of the Nodine, Minn. VOR and the 003°M radial of the Rochester, Minn. VOR.

(10) ROLAND, ARK. (VHF) INTSXN - intsxn of the 175°M radial of the Flippin, Ark. VOR and the 295°M radial of the Little Rock, Ark. VOR.

(11) SNOOK, FLA. (VHF) INTSXN - intsxn of the 275°M radial of the Tampa, Fla. VOR and the 205°M radial of the Cross City, Fla. VOR. (MRA 8000' - depict flag)

(12) SWANTON, MD. (VHF) INTSXN - intsxn of the 101°M radial of the Morgantown, W. Va VOR and the 230°M radial of the Grantsville, Md. VOR.

(13) WESLEY, PA. (VHF) INTSXN - intsxn of the 034°M radial of the Ellwood City, Pa. VOR and the 105°M radial of the Youngstown, Ohio VOR.

RENAMED AND REDESIGNATED: Mar 13, 1958

(1) BYERS, COLO. (VHF) INTSXN - intsxn of the 087°M radial of the Denver, Colo. VOR and the 026°M radial of the Kiowa, Colo. VOR. (formerly Bennett Int)

CANCELLED: Mar 13, 1958

(1) GILROY, CALIF. (LF) INTSXN - intsxn of the NW crs of the Fresno, Calif. LFR and the S crs of the Oakland, Calif. LFR.

(2) MESQUITE, TEX. (VHF) INTSXN - intsxn of the 135°T radial of the Dallas, Tex. VOR and the 056°T radial of the Britton, Tex. VOR.

(3) MORGAN HILL, CALIF. (LF) INTSXN - intsxn of the SE crs of the Oakland, Calif. LFR and the NW crs of the Fresno, Calif. LFR.

(4) PARON, ARK. (VHF) INTSXN - intsxn of the 277°T radial of the Little Rock, Ark. VOR and the 250°T radial of the Cabot, Ark. TVOR.

(5) RUSSELL, TEX. (VHF) INTSXN - intsxn of the 086°M radial of the Mineral Wells, Tex. VOR and the S crs of the Meacham, Tex. ILS lclzr.

(6) WILMOT, OHIO (VHF) INTSXN - intsxn of the Cleveland, Ohio VOR direct radial to currently designated Wilmot Int, LF with Mansfield, Ohio VOR 103°M radial on V8.

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective March 13, 1958:

Section 610.14 Green Civil Airway 4
is amended to read in part:

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Vol. 12, #21, page 3, "Holding Patterns": item 10, correct - Mooresville Pattern to read: hold NE on 241°M radial Greensboro. Item 15, correct Waco Pattern to read: time one minute.

Correct Airmans Guide Vol. 12, #23 as follows:

(1) Page 7, Location Identifiers: Lake Ste. Anne, Quebec: change ZIS to read: "ZLS".
(2) Page 10, Holding Patterns; this tittle should be changed to: ON REQUEST REPORTING POINTS:
(3) Page 10, item 34, should read: LEON, FLA (LF) INTSXN - intsxn of the 210°M brng from Tamiami, Fla Rbn and the 267°M brng from Perrine, Fla. LFR.
(4) Page 10, item 36, should read: IUKA, MISS (VHF) INTSXN - intsxn of the 276°M radial of the Muscle Shoals, Ala. VOR and the 165°M radial of the Jacks Creek, Tenn. VOR.
(5) Page 11, Redesignated Reporting Points, item 7, Fulton, Ga. - correct Norcross, Ga. radial to read: "237°M".
(6) Page 12, item 6, SALT LAKE CITY, UTAH (LFR) - min alt should be 11,000'.
(7) Page 12, item 13, correct spelling to read "TOOELE, UTAH'(VHF) INTSXN".
(8) Page 12, item 14, SALT LAKE CITY, UTAH (VOR) - should read "time - 2 mins; min alt 11,000'."
(9) Page 12, item 16, CEDAR MT., UTAH (VHF) INTSXN - change "Booneville, Utah" to read "Booneville, Utah, VOR."
(10) Page 13, MEA's, under Arwy V-2S; delete last 2 lines and insert instead: "Muskegon Mich. VOR to Caledonia Int Mich. MEA - 2200'; Caledonai Int Mich. to Lansing, Mich. VOR MEA - 2000'."

V-72 AIRWAY CHANGE: Effective immediately the MRA at Middleburg, Int N.Y. on V-72 is raised to 5500'.

NAVIGATIONAL WARNING - EXPERIMENTAL LIGHTS: Effective immediately during the next three months United Air Lines will operate over their approved route system a Douglas DC6B with experimental oscillating high intensity position lights. The navigational light distribution and coloring are identical with conventional light system. The three position lights flash and emit lights of greatly increased intensity. These lights are dimmed to one half normal intensity when airplane is on the ground.

AERONAUTICAL CHART CORRECTION: Correct Coast and Geodetic Survey's RF Chart 29, dated 12/18/57 by changing Chanute, Kansas. LFR frequency from 114.6 mc to 248 kc.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-70° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Rnwy lgts inop. Flare pots avail. on request. (1-10)
BESSEMER ARPT: Caution - auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)
BIRMINGHAM-RADIO: Dec 12, VOR shut down - conversion to VORTAC. Caution - all arwys and ints based on VOR are not usable for navigational purposes until stn is recmsnd at new lctn. Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. Caution - E course LFR has severe multiples.
BIRMINGHAM ARPT-TOWER: ILS MM and LMM shut down - relctn. (8-7) FLD: Effect Feb 15, inbound VFR flgts, in rdo equipped acft, contact Birmingham Apch Ctl on 119.9 or 385.6 mc approx 25 mi out for lndg info. Birmingham Apch Ctl will specify the reporting point where flgt will change to Birmingham twr freq. (1-13) Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down for relctn due rnwy ext. (5-1)
CLANTON-WARE ISLAND ARPT: New arpt reported. Lctd 10 mi NE on an island in Coosa River. lat 33-57, long 86-31; elev 360'; 1 sod strip 2500' x 150'; no serv. (12-19)
DOTHAN-NAPIER FLD: Caution-- helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Clsd.
EVERGREEN-RADIO: VOR radials 320° thru 360° out of tolerance acct excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy & threshold lgts inop. (1-7)
FAIRHOPE-KLUMPP ARPT: 999' (1201 MSL) lgtd twr erected 9 n mi N (12° T) at lat 30-40-55, long. 87-49-41. (12-6)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-RADIO: VOR radials 018°-028° out of tolerance due to severe scalloping. (1-17)
MOBILE-BATES FLD-TOWER: ILS glide slope inop - equip. and const vcnty transmitter bldg. (1-17) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' & 1/2 mi is absolute take-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones, are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
ARIZONA: AJO ARPT: Beacon and lights inop. (10-24)
**BISBEE ARPT: No servicing. Caution - horses on field. (1-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Open daylgt opern only. (1-10)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255° 35 n mi at MEA. (5-8)
**DOUGLAS-BISBEE DOUGLAS INTNL ARPT: Rnwy 12-30 open to acft 30,000 lbs & above. 213' (4202'MSL) lgtd twr erected 7 n mi SE (143° T) at lat 31-22-08, long 109-31-45.

ARIZONA: DRAKE-RADIO: Soon, VOR will be cmsnd. Ident: DRK. Freq: 113.1 mc. Lctd lat 34-54-04, long. 112-25-00. Elev: 4630' MSL. Class: VORW. (12-6)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

MARANA ARPT: Reported inactive. (10-2)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take off xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx Mar 3 - conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int.-PHX; V105E PRC-PHX. (11-18)

SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)

SCOTTSDALE-THUNDERBIRD#2 ARPT: Closed. (3-26)

SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-75°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000' (7-17) About Feb 3, VOR will be shut down until approx Mar 4 - VORTAC conversion; following Victor arwys unusable durg IFR conditions: V-16 Toltec Int-CIE, V-66 GVN-Mescal Int, V16-S TUS-Mescal Int. (12-5)

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at ngt. Obstn lgts apchs to tnwy 21 inop. (11-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'. (6-20)

TUCSON-DAVIS MONTHAN AFB-RADAR APPROACH CONTROL: About Feb 6, RAPCON will be cmsnd. Trans & rcvg freqs: 118.5, 121.5, 125.9, 125.1, 134.1, 136.8, 137.88, 142.02, 225.4, 126.18, 236.6, 243.0, 252.6, 270.6, 289.4, 305.4, 335.8, 363.8, 379.4 mc. Rcvg only: 3023.5 kc; 122.5 mc. About Apr. 6, radar tfc ctl departure procedures will be implemeted. (1-22)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB-SPECIAL NOTICE: Ngt weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)

FT. SMITH-RADIO: About March 15, VOR will be shut down, modification. During shut down VOR flgts are authorized to use FSM BMH fac in lieu of FSM VOR on all arwys. Bears and MEAs used shall remain as charted except bear. from FSM BMH to Int of 295° radial Little Rock VOR on V-74 shall be 97°. Paris Int. redesignated as 97° from FSM BMH and FYV 160°. On V-13, use 192° from FYV VOR to FSM BMH. MEA for VOR-equipped acft on V-74 from TUL to FSM 7500' and on V-13 from FYV to FSM 5500'. (12-13)

ARKANSAS: ROGERS ARPT: 349'(1749' MSL) lgtd twr being erected 3 n mi S(200°T) at lat 36-19-54, long. 94-08-10. (1-22)

SEARCY ARPT: Clsd until approx Mar 30. Const. (12-30)

TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)

ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)

**ARCATA ARPT: Right tfc rnwys 13 & 19. (12-10)

BAKERSFIELD-KERN CO. ARPT-TOWER: Soon, 119.9 mc will be decmsnd and 119.8 mc cmsnd. (12-26)

BRASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)

BLUE CANYON ARPT, 13, SFO-SLC: Closed due to snow. (12-18)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BLYTHE-HERON FLD: Caution - 90' TV antenna adj W. (1-24)

BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Feb 20, radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR Saugus Int Fillmore VOR Camarillo LFR Burbank OM. About Feb 10, ASR will be shut down until approx Feb 10- equip. modification. (1-29)

CAMARILLO-RADIO: All LF rng courses have multiples. (6-17)

**CORONA-THURSBY ARPT: To be abandoned Feb 28. (12-11)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

EL TORO MCAS-RADIO: VOR coverage restriction at and below 10,000' MSL beyond 25 mi from 360° clockwise to 070°. (12-13)

FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR coverage 250°-090°, 30 mi; 090°-120°, 15 mi; 150°-250°, 20 mi at min en route alt. (12-2)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)

FRESNO AIR TERM: Extreme caution advised in vicinity of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N & E of arpt.

GLENDALE-GRAND CENTRAL ARPT: Extensive const. Fld clsd to all acft at sunset. (11-29)

GOFFS-RADIO: VOR coverage 265°-310°, 25 n mi at MEA. Below 9500' this area beyond tolerance. (11-8)

GORMAN-RADIO: About Mar 1, VOR will be cmsnd. Freq: 109.0 mc. Ident: GMN. Lctd lat 34-48-18, long. 118-51-42. Monitoring category (3). Class: VORW. (1-20)

**HALF MOON BAY ARPT: Unicom cmsnd 122.8 mc. (1-20)

LONG BEACH-RADIO: DME shut down until approx Feb 4 - relctn. VOR auto ident inop. (12-26)

LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230°. FLD: Several 230' MSL protable oil derricks NW, W, & S of fld. Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of & roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd, const; 6200' avail. Rnwy 12 clsd. Straight in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

CALIFORNIA: LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19) Jan 21, until approx Feb 3, radar arrival & departure control serv unavail - acct ASR shut down for modernization. (1-20) FLD: Rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd, avail. 30 min request thru twr. Equip. crossing rnwy north of E/W taxiway. Rnwy 25R clsd when 16-34 in use. Ditches across N end 16-34, overrun area eliminated. Durg VFR wea conditions: Civil acft ctc twr on 118.9 mc or listen 118.9 mc trans 122.7 at least 10 mi out. Durg IFR wea: civil acft ctc apch ctl on 118.1 or 119.3 or listen 118.1 or 119.3 & trans 122.7. USAF, NAVY, CG: VHF equipped acft ctc apch ctl on 118.1 or 119.3 mc. UHF equipped acft ctc approach control on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding eastbound from Malibu or Pt Dume intsxn in VFR conditions making a track which approximates extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt & E of arpt between Downey rbn & arpt below 3000' in VFR wea. If desiring to cross apch area below 3000', ctc Los Angeles Apch Ctl before crossing. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt or between Los Angeles rbn and arpt. Avoid shoreline W due hi-performance jet acft. Apch lgt lane sequence flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (1-27)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MARTINEZ ARPT: Clsd until approx June. (11-27)

**MENDOTA ARPT: New arpt. Lctd 1/4 mi E; elev 174'; 1 rnwy - N/S - 2300' x 90' (dirt & sand compact); remarks - 3' fence at each end. (7-23)

MOFFETT FLD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' durg stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable btwn LMM and apch end rnwy. (10-21)

NEEDLES-RADIO: About March 15, VOR will be shut down until approx April 15 - conversion to VORTAC. (1-24) Durg shutdown the following MEA's will be unusable: V12, 1518 Daggett-Drake; V-12N Dawes Station Intsxn-Daggett; V-12S Needles-Prescott; V135 Blythe-Las Vegas, Ariz.; V-208 Cones Intsxn. -Needles; V-237 White Hills Intsxn. -Needles; V-1520 Daggett-Prescott. In addition the Hackberry, Peacock, Dawes Station, Clark, and Silver Lake reporting points will be unusable. The White Hills Intsxn. is temporarily redesignated as the Mormon Mesa 169° M radial and the Las Vegas 105° M radial. The Union Pass Intsxn. is temporarily redesignated as the Goffs 064° radial and the 181° M bearing to the Needles, LFR. The MEA on V-210 Daggett-Goffs will be 8500'. (1-24)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flight should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling & visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flight should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF coverage 40 n mi at MEA xcpt 020°-050°, 8000' MSL. (1-17)

** OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 7000' MSL. FLD: Dredging and clam shell equip. working S of lndg area. All berms and equip lgtd and mrkd. Use extreme caution when

CALIFORNIA: flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd. (8-22)

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at MEA. (1-16)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp & taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently durg daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W-adj to Pomona Heliport. (9-20)

POMONA-BRACKETT FLD: Operative durg reconstruction. Caution - men and equip.

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30) January 13, VOR shut down until approx February 13 - conversion to VORTAC. Durg this period, the following V arwys will be unusable IFR conditions: V23 FJS-Sutter-Buttes Int., V25 Geyserville Int. -LMT, V195 ILA-FOT. V107 UKI-RBL usable substituting RBL LF rng for VOR. (11-27)

REDDING ARPT: 330' lgtd twr being erected 3.2 n mi WNW(309°T) at lat 40-32-25, long. 122-21-11. (11-21)

RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)

RIVERSIDE-MARCH AFB-RADAR APPROACH CONTROL: Radar ctl exercised over mil acft only. (10-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°.

SAN DIEGO-MONTGOMERY FLD: Caution night lndg. Keep rnwy lgts in sight durg apch. Fld unattended sunset to sunrise. Ditch 100' short of threshold lgts rnwy 28. (10-24)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

** SAN FRANCISCO INTNL ARPT-TOWER: About Feb 17, ILS LMM and twr freq will be chgd from 201 kc to 379 kc. (1-15) FLD: Const in progress continuously on various sections of fld. Caution advised. (11-4) New taxi sign system now in opern. (1-23)

SAN FRANCISCO BAY-SPECIAL NOTICE: A Moored Balloon (silver with black stripes) 8' x 25' is flown 500' MSL on an irregular schedule from U.S. Naval Net Depot lctd on Tiburon Peninsula, daylgt hrs under VFR conditions. (10-14)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN JOSE-RADIO: TVOR has scalloping, beyond tolerance, 230° thru 240°. (11-12)

**SAN RAFAEL-SAN FRANCISCO BAY ARPT: All apchs should be made S of fld to avoid residential area. (1-23)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23) LF rng has numerous multiples NW and E courses. (9-17)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Extreme caution advised durg night use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All rnwys unlgtd. (1-20)

**SANTA PAULA ARPT: Caution - grading & paving opern in progress all areas. (11-3)

CALIFORNIA: **SANTA SUSANA ARPT: Right tfc to W rnwy. (1-24)
SHOSHONE ARPT: Strip clsd for paving. (8-9)
**SOLEMENT 6-S RANCH ARPT: Dangerous wires W end. High hills E end. Use caution in NE wind condition. (1-24)
THERMAL-RADIO: VOR and DME coverage 330°-360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175°-180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)
THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500'MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.
VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000'MSL when lndg on rnwy 34; 2300'MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25) Depressions along edges of east N/S taxiway. Taxi with caution. (1-14)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'.
WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity & grading.
WOODLAND-WATTS ARPT: 200' at N end N/S rnwy under const. (9-5) Clsd to ngt opern. Use hard surfaced rnwy only days. (12-4)
YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200'; lgts, BL4; fuel, F2.
COLORADO: CHEYENNE WELLS ARPT: Sand drifts over 3' high - dangerous. (7-5)
COLORADO SPRINGS-PETERSON FLD: Caution - lndg acft - due to rise in terrain at apch end rnwy 21.
CRAIG ARPT: Rnwy clsd for const. Use 2500' strip immediately S rnwy. (8-27)
DENVER-STAPLETON FLD-TOWER: VHF/DF commun unreliable at 40 mi below 14,000'. MSL 154°-180° and below 16,000'MSL 181°-243°. VHF/DF bearings reliable in these areas.
** FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segmented circle denotes rgt hand tfc. (9-12) Transmissometer cmsnd. (11-21)
**DURANGO-LA PLATA ARPT: 208' lgtd twr erected 10.5 n mi NW (329°T) at lat 37-18-07, long. 107-51-10. (1-24)
GRAND JUNCTION-WALKER ARPT: Rnwy 11-29 and neon apch lgts inop for reconst of rnwy and installing rnwy lgts. (8-20)
HANOVER-RADIO: H fac bearings unreliable beyond 25 n mi in shadow area of Pikes Peak.
**HUGO ARPT: Abandoned. (1-8)
NUCLA ARPT: Clsd. Const. (10-23)
PARSHALL-SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)
PUEBLO-SPECIAL NOTICE: Controlled Firing (demolition) Area for use of the Pueblo Ordnance Depot established within the following described area: bounded on N by lat 38-22-00; E, long. 104-21-22; S, lat 38-18-00; W, long. 104-22-50. (4-30)
PUEBLO-RADIO: VOR out of tolerance from 010°-070° - hvy scalloping. (12-16)
PUEBLO MEMORIAL ARPT: Hvy acft normally use rnwy 12-30. Rnwys 8-26 and 17-35 clsd to DC-3 and heavier acft daylgt hrs xcpt under hi-wind and instr apch conditions. Middle 1/3 rnwy 12-30 not visible from twr. Pilots will assume full responsibility for avoiding surface tfc in blind areas. (1-15)
**TRINIDAD-NEWCOMBS RANCH ARPT: Soft when wet. Cattle on fld. (1-8)
CONNECTICUT: NEW HAVEN ARPT: Arpt bcn not rotating. (8-24)
**SALEM ARPT: Reactivated, lat 41-30, long. 72-14; lctd 2.4 mi E; elev: 420'; 2 rnwys - E/W 2200', NW/SE 1950'; Fl fuel; S5 serv; Unicom; rnwy lfts. (8-7)
SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea days, Mon-Fri. Fld occasionally clsd by standard mrkr.
WILTON-RADIO: DME coverage 270°-285°, 35 n mi at 3000'; 230°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'. (6-15)
WINDSOR LOCKS-BRADLEY FLD: Approx Mar 3, neon apch lgts rnwy 6 will be perm decmsnd. Simultaneously standard 3000' hi-intensity centerline configuration A apch lgt system will be cmsnd. (1-28)
DELAWARE: GEORGETOWN-SUSSEX CO. ARPT: Caution - NNE/SSW and NNW/SSE rnwys rough. Men and equip on fld. Rnwy 16-34 W of intsxn rnwy 22 and N taxiway clsd. Center taxiway rnwy 4 to ramp clsd. (9-11)
KENTON-RADIO: About Mar 17, VOR/DME will be shut down until approx Apr 18 - conversion to VORTAC. During shutdown following substitute route structure and MEAs will be

DELAWARE: in effect: V16 Shadyside and Vineland VHF intsxn - Green at fly-by, white at fly-over lished. V29 OOD VOR, ENO VOR, SBY VOR - OOD VOR 205M radial to point of intsxn with SBY VOR 008M radial direct SBY VOR - MEA OOD VOR 2000, DOV RBN 053 M inbound bearing 3000 SBY VOR. Ingleside LF Int can be used in place of Ingleside VHF Int.
**NEW CASTLE-PIASECKI ARPT: Sod strips clsd-rough. Use rnwy and taxi strip only. Tfc pat alt 500'AGL. Tfc pats as follows: take-off and lndg NE - right turn. Lndg SW - left turn. Take-off SW - left turn while still within bndry of arpt to avoid ILS tfc and rnwy 1 and 19 tfc at New Castle Co. Arpt. Climb straight out SW only with approval of New Castle Ctl Twr. Apch and depart arpt from and to SE respectively. (1-28)
**WILMINGTON-DUPONT ARPT: Rotating bcn perm discontd Jan 1. (12-23)
WILMINGTON-NEW CASTLE CO. ARPT: Due to lmtd visibility, twr unable to ctl surface tfc on parking ramps. (6-9)
DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) See page 83, in Flight Information Manual Vol. II, dated Aug 15, 1957, for Washington, D.C. High Density Air Traffic Zone. (2) Caution - dynamiting daily, hvy charges, dam const along E bank of Potomac River, 3/4 mi N of Chain Bridge at Dalecaria, Md. (3) See also Quantico, Va., MCAS Special Notice. (4) Fixed white 60 inch searchlight of high intensity operg near S bank of Potomac river near Chain Bridge lat 38-55-45, long. 77-07-02. Lgt operd only during hrs of darkness and when rnwy 36 departure procedures are in use at Washington National Arpt. Lgt is intended to serve as a guide to assist recognition of Potomac river departure crs. Beam will be directed SE toward Key Bridge and elevated 65° above horizon. (11-14)
WASHINGTON-RADIO: LFR SE crs bends 4-9 n mi from stn; 17-22 n mi from stn; multiples 3°-3.5° S.
WASHINGTON AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip acft on 353.9, 318.2, 362.3, 378.8, 385.4 mc only in Washington Metropolitan Area.
WASHINGTON NATIONAL ARPT-TOWER: VHF/DF coverage 55° clockwise to 250°, 1500'; 250°-345°, 3000'; 345°-55°, 2000' at 40 mi. (10-28)
WASHINGTON NATIONAL ARPT: USAF, NAVY, DG: Clsd to all acft xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Navy and CG logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., CG and will be flown VFR conditions only.) NO acft over 120,000 lbs without prior approval arpt director. CG and Navy acft taxi to MATS term N of admin bldg. Lmtd parking and taxiing W of taxiway #6. Taxiing E of taxiway #6 will be at discretion of ctl twr only. Hvy const equip operg 0730-1800, Mon-Sat adj to a rnwy and/or taxiway. Open ditches 1-1/2' wide, 3' deep will be adj to pavement. Ditching will be of varying length and location, and will be properly flagged and obstn lgtd. At twr discretion rnwys and taxiways may be clsd as rqrd to accomplish work adj to paved area. (6-10) Soon sequenced flashing lgt system serving rnwy 36 will be cmsnd to oper in conjunction with the existing configuration A apch lgt system. System consists of twenty flashing lgts spaced at 100' intervals along extended rnwy centerline, starting at 3000' and ending 1100' from end of rnwy. (12-6)
FLORIDA: ATLANTIC BEACH-BULL ARPT: 315' (325'MSL) lgtd twr being erected 1 n mi WSW (244°T) at lat 30-19-30, long. 81-25-42. (11-29)
**BANANA RIVER-SPECIAL NOTICE: Frequent violations have been reported of Restricted Area R-162. The nature of testing in this area constitutes an extreme hazard to intruder acft. All civil acft are warned to keep clear of this area. (6-27)
BARTOW AIR BASE: AF primary Contract School clsd Sat, Sun, holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Prior approval 1730-0700 must be obtained before 1500 on arrival day.
BUNNELL ARPT: Caution - small bushes and trees about 10' high at each end of each rnwy. Arpt will be partially clsd Feb 10-13 daylgt hrs and Feb 15-22 ngt hrs for drag racing.
**COCOA-CENTRAL BREVARD ARPT: Name change. Formerly carried as Cocoa Arpt (Merritt Island). (1-31) N/S rnwy clsd. E/W rnwy under const. Use caution E end.
CRESTVIEW-RADIO: VOR radials 080°-110° out of tolerance acct excessive roughness and scalloping. (9-25) Due to VOR radial 087° being unusable, LFR shall be substituted on V22 CEW-MAI. MEA for acft equipped with VOR only 5600'. (10-18)
**CRESTVIEW ARPT: 120' (278'MSL) lgtd twr erected 1 n mi SSE (171°T) at lat 30-46-22, long. 86-34-02. (1-29)
CROSS CITY-RADIO: VOR courses 307° and 299° usable. All other courses out of tolerance account of roughness and scalloping. (1-3) LFR may be used as substitute for VOR by ADF - equipped acft while VOR unusable. (9-12)

GLEN FALLS-WARREN CO. ARPT: 91 oct not avail. (6-11)
**GOUVERNEUR ARPT: Perm closed. (9-25)
**HAMMONDSPORT-B & H ARPT: No services. Land at own risk. (11-4)
HUGUENOT-RADIO: VOR coverage restricted to 18 n mi. 210° clockwise to 230° at MOCA. (6-14) May 10, VOR monitor. category temp changed to (3). (5-10) Jan 20 VOR shut down until approx Feb 21 - conversion to VORTAC. See page 35 for temp MEAs durg shutdown.
IDLEWILD-RADIO: VOR coverage 50°-75°, 17 n mi; 75°-50°, 26 n mi at MOCA. (6-14) Nov 26, DME shut down until approx Jan 30 stn modification preparatory future VORTAC installation. Soon, VOR freq will be changed from 117.2 mc to 115.9 mc. (1-17)
ITHACA-TOMPKINS CO ARPT: Rnwy 1-19 clsd to all tfc. Acft may contact MOH on 129.7, 130.0; ELM twr; or ELM rdo for lndg info. (12-5)
LAKE PLACID: Not a seaplane base - no facilities avail. Facilities for landplane avail. at Lake Placid Arpt. (7-22)
MASSENA-RADIO: J fac temp converted to BMH, indef Freq: 242. Kc. Ident: MSS. Lctd lat 44-56-00, long. 74-50-30. (1-30)
MASSENA-RICHARDS ARPT: Caution - men & equip. working apch end rnwy 23. (1-22)
MIDDLETOWN-RANDALL ARPT-SPECIAL NOTICE: Extensive gliding and soaring operations conducted during daylgt hrs within 15 mi radius of arpt - all alts from surface to 12,000'. (8-29)
**MIDDLETOWN-RANDALL ARPT: Unicom 122.8 mc cmsnd. (1-21)
NEWBURGH-STEWART AFB-RADIO: USAF VHF/DF bearings unreliable below 7000' in all quads. (9-23)
NEW YORK CITY AREA - SPECIAL NOTICE: Acft operating VFR be alert for all types of tfc from Newark, Teterboro, LaGuardia, Idlewild, NAS Floyd Bennett, Westchester Co. Arpt, Mitchel AFB and Rockaway Arpt. VFR acft apchg Idlewild from S or W remain well off shore until reaching a point abeam SE of Floyd Bennett. VFR departures from R31L at Idlewild, unless cleared otherwise by Idlewild twr, shall climb straight ahead to an alt of 1200' before turning left. Floyd Bennett tfc can normally be avoided by not exceeding a heading of less than 270° mag until abeam Floyd Bennett prior to proceeding on desired course. VFR acft not intending lndg at any of New York metropolitan arpts should avoid apch areas thereto below 2500'. Recommended crossing traffic plan crossing area at 2500' or above, ceiling permitting, avoid shorelines S of Flatbush, Floyd Bennett and Idlewild due hi-density tfc in that area. Acft arriving or departing Idlewild or LaGuardia requested to remain well clear of Mitchel AFB.
NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat. within 4.3 n mi radius of arpt; in lndg join tfc pat. at or above 1200' MSL, weather permitting. This applies to New York International (Idlewild) Arpt; La Guardia Fld, N. Y., and Newark Arpt, N. J.
NEW YORK AIR ROUTE TRAFFIC CONTROL CENTER: ATC radar beacon operating intermittently on test basis only. Pilots of commercial acft equipped with transponders are requested to cooperate with the New York ARTC Center during these tests. (2-3)
NEW YORK INTNL (IDLEWILD) ARPT-SPECIAL NOTICE: Nov 1, acft enroute to Idlewild Arpt will be cleared to Brentwood Int, 076° radial of IDL VOR and 185° radial of ILT VOR-holding E one min left turn pattern, Lido rdo bcn holding SW on SW course of HEM rng 1 min left turn pattern when ILS apchs are being conducted to rnwy 22. (12-23)
NEW YORK INTNL (IDLEWILD) ARPT-TOWER: VHF/DF coverage 055°-230°, 1500'; 230° 055°, 2000' at 40 n mi. (9-9)

NEW YORK: **NEW YORK INTNL (IDLEWILD) ARPT: Clsd to fighter type, motorless, and jet propelled acft. Clsd to mil acft xcpt on offl bus or flag rank or higher. Caution - use paved surface only. Rnwy 1R-19L perm clsd for lndg and take-off, avail for taxiing. Rolling surface S end rnwy 7R-25L. NATCC preferential rnwy system in effect. 165' MSL ctl twr is highest arpt structure. Caution - taxi A - acft running up on clsd rnwys 7L-25R, S of intsxn with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Const in progress adj all paved surfaces. 150' cranes and hvy truck operns within arpt bndry - mrkd. Follow centerline all taxiways. New taxiways temp mrkd by delineators and or taxiway lgts irregularly spaced. Unstable shoulders. (8-2) Const equip 35' high active 2000' from apch end rnwy 31R. New rnwy const. (10-24)

NEW YORK-LA GUARDIA FLD-SPECIAL NOTICE: Acft en route to LaGuardia Fld will be cleared to Sparkhill Int, 360° radial of IDL VOR and 349° radial of ILT VOR - holding S one mm left turn pattern in lieu of the Oradell Holding Pattern. (9-27) VOR rcvr check point signal 108.6 mc shut down. (1-8)

NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia apch ctl on 119.9 mc re-
** gardless of wea. About Feb 18, trans and rcvr 275.8 mc will be cmsnd. (1-29) FLD: Clsd to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. Lndg and take-off prohibited unless acft equipped with 2-way rdo capable of direct commun with ctl twr on gnd ctl 121.7 or appropriate UHF freq. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. Obstns and equip, mrkd - flags days, lgtd ngts. Equip parked 250' from centerline of rnwys when not in use. Caution - use paved surface only. Sod areas unsuitable for acft operns. (12-3)

NEW YORK-STATEN ISLAND ARPT: No ngt flying permitted. Stay clear of mrkd-off area in vcnty of windsock. Use grass for taxiing. (5-22)

NEW YORK HELIPORT: Lctd W 30th St & Hudson River. Two concrete landing pads, 80 x 80. Elev: 7'. 91-115 oct fuel. 2-way rdo (unicom) required with 30 min advance notice. Caution - ship tfc. (12-31)

NIAGARA FALLS ARPT-TOWER: ILS lclzr and glide slope shut down. VHF/DF unreliable
** below 3000' in NE quad, 4000' SE and SW quad and 4500' in NW quad. (1-31) FLD: Due to non-visibility twr unable to control tfc first 400' apch end rnwy 10L; that portion of the N perimeter taxiway from rnwy 10L to 100' N; the NW portion of the navy taxiway and the NE portion of E perimeter taxiway. Lcl flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with lake Erie and the Niagara River as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. Rnwy 10L-28R lengthened 1500' to W. Avail length of rnwy now 9100'. (11-31)

NIAGARA FALLS-COLONIAL VILLAGE ARPT: E/W rnwy clsd due obstn. (1-17)

PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at MOCA. (6-14) DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)

PLATTSBURGH MUN ARPT: VFR tfc pat for all civil acft in vcnty of arpt is 800' to insure adequate separation from mil jet acft and jet turbulence. Non-rdo equipped acft will maintain 2000'MSL until W of arpt. Over that position acft shall let down to pat alt. (10-31)

POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'. LFR S quad out of tolerance beyond 35 n mi due interference. Blue arwy 18 from Ridgewood Int to Poughkeepsie unsuitable IFR tfc. (11-1)

ROCHESTER-RADIO: VOR out of tolerance beyond 5 mi from 35°-80°, MOCA. (9-13)

ROCHESTER-MONROE CO. ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T-type hangars. Caution taxiing in these areas No signal between sunset-sunrise to indicate gnd visibility of less than 3 mi and/or a ceiling of less than 1000'. (3-3) Caution - rnwy 5-23 clsd for lndg and take-off acct broken pavement. Avail for taxiing only. (1-28)

ROMULUS-SPECIAL NOTICE: Heavy ammunition demolition approx 3 n mi NW at lat 42-46-57, long. 76-53-17, 0730-1615, Mon-Fri. Blasts cause shock and flying missiles up to 1000'.

SCHENECTADY CO. ARPT: Due to non-visibility twr unable to ctl tfc on apch end rnwy 10, NG ramp, and portions of taxiway serving rnwys 22 and 33. Caution - lndg jet acft using left hand pat at 1879'NSL. (5-17)

SPITFIRE LAKE: No seaplane facilities avail. (7-30)

SYRACUSE-RADIO: VOR coverage 180°-220°, 35 n mi at MOCA. (6-14)

NEW YORK: UPPER ST REGIS LAKE: No seaplane facilities avail. (7-30)

UTICA-RADIO: ILS LMM freq 254 kc usable dist 10 n mi from 270° clockwise to 360°.

UTICA MUN ARPT: Mil acft will not fly over arpt below 2000'MSL. Lgt acft operg in vcnty of Marcy during daylgt hrs. (10-22)

WATERTOWN ARPT: Contact lgts all rnwys and taxi strips mrkd with 4' flag stakes.

WESTHAMPTON BEACH-SUFFOLK CO. AFB-RADIO: USAF rdo bcn unreliable W quad beyond 20 mi. (3-22) USAF TVOR 20 and 40 mi courses not flgt-checked. (6-10)

WHITE PLAINS-WESTCHESTER CO. ARPT: First 400' rnwy 23 not visible from ctl twr. Taxiway "D" clsd. (10-21) Rnwys 5 clsd ngt opern. (1-15)

WURTSBORO-MAMAKTING ARPT: Glider and soaring operns beind conducted during daylgt hrs within a 10 mi radius of arpt, 33 mi 300° heading from Newburgh.

CHARLESTON AFB/MUN ARPT-TOWER: About Feb 12, ILS glide slope, MM and LMM will be shut down until approx May 12-relctn. ILS lclzr back course unusable. (12-23) FLD: Men & equip. installing taxiway lgtg in close proximity to all taxiways. Open ditches mrkd days, lgtd ngts. Sections of taxiways clsd for short periods during const. (9-21) Apch lgts rnwy 15 inop. (12-23) Rnwy 3-21 clsd. Rnwy 15-33 open xcpt first 1000' rnwy 15 which is clsd. Rnwy lgts and green threshold lgts indicate usable portion of rnwy ngts. (1-13) Rnwy 15-33 will be clsd from approx Feb 1 to Mar 15. 5400' NW end rnwy 15 and 5300' SW end rnwy 3 will be open approx Mar 15 to Mar 30 while main intersection is paved. Men & equip. will be in close proximity to open rnwys during entire const period.

CHESTER ARPT: Drag races in progress every Saturday 1000-1800E. At least one rnwy will be open for acft operns. (5-8)

FLORENCE-RADIO: VOR radials 225° thru 265° out of tolerance-roughness and bends.

GREENVILLE-SPECIAL NOTICE: Intensive activity by C-124 type acft within 25 mi of GRL rng. All pilots exercise extreme caution and if possible avoid flgt in proximity of Donaldson AFB. (6-6)

SOUTH CAROLINA: MYRTLE BEACH-SPECIAL NOTICE: Air-to-air gunnery in Warning Area W-177 being conducted days at all altitudes.

MYRTLE BEACH-RADIO: VOR courses in Ocean sectors not fully flgt-checked. (10-9)

SOUTH DAKOTA: EDGEMONT-SPECIAL NOTICE: Demolition opern approx 10.8 n mi SSW at Blackhills Ordnance Depot lctd at lat 43-08-11, long. 103-55-36. Pilots are cautioned against flying over or near area at any alt due to possibility of encountering toxic gases.

HURON-HOWES ARPT: Rnwys 17-35 and 8-26 clsd to acft over 12,500 lbs gross weight xcpt portion of rnwy 8-26 from intsxn E to taxi strip. Sod areas clsd xcpt 150' adj to rnwys inside of bndry lgts, usable for lgt acft at pilots" discretion. (4-25)

MOBRIDGE ARPT: Hi-way const center of arpt N to S. NE/SW rnwy clsd. NW/SE usable length 2000'; N/S 2600'. Usable strips mrkd. Taxi strips across hi-way const. Caution.(9-13)

PHILIP ARPT, 31, CYS-HON: 24' unlgtd p-line N from bcn to transmission line.

RAPID CITY ARPT: 393'(4173'MSL) twr being erected 8.8 n mi W(280°T) at lat 44-04-17, long. 103-15-07. (8-8)

SIOUX FALLS-RADIO: Nov 18, DME shut down. (1-22)

WATERTOWN-RADIO: About Feb 3, VOR will be shut down until approx Mar 18 - conversion to VORTAC. Simultaneously temp VORW will be cmsnd. Freq: 117.4 mc. Lctd at lat 44-58-51, long. 97-08-33; 500' from regular VOR at azimuth 336°T. Monitor. category (I). (1-16)

WATERTOWN ARPT: 310'(2209'MSL) lgtd twr being erected 27.8 n mi WSW(265°T) at lat 44-52-39, long. 97-48-57. (10-7)

TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 via Knoxville is invited to the proximity of the W course of Knoxville radio rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.

**BRISTOL-TRI-CITY ARPT: Hangar const completed 350' W of N end rnwy 2-20. Height 45' unlgtd. (1-21)

**CHATTANOOGA-LOVELL FLD: All acft operg from Lovell Fld between hrs of sunset and sunrise shall be equipped with a transmitter and rdo receiver capable of receiving instructions from ctl twr. All acft operg into and out of this fld during daylgt hrs shall be equipped with a receiver capable of receiving instructions from ctl twr at all times while operg within the limits of the arpt tfc ctl zone. (8-23) Transmissometer cmsnd rnwy 19. (1-24)

DYERSBURG-RADIO: Jan 14, VOR shut down until approx March 1, conversion to VORTAC. Durg this period H fac may be substituted and the following MEAs will apply: V140 DYR MH to ARG VOR as charted, DYR MH to Milan Int. as charted, Milan Int. to McEwen Int.7000'; V11 DYR MH to PUK VOR as charted; DYR MH to MEM VOR via DYR MH 225° mag MEM VOR 355° as charted; V140S DYR MH to GHM VOR as charted. The following arwys and intsxns are unusable: V11E La Grange, Williston, Fisherville, Union City, Randolph and Joiner Ints. (1-14)

KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution - VOR has occasional momentary course disturbance in mountainous areas.

KNOXVILLE-McGHEE TYSON ARPT-TOWER: ILS glide slope operg test basis only.(10-22)

** FLD: Rnwy lgts rnwy 18-36 inop. (6-19) Rgt tfc rnwy 4R.

MEMPHIS-RADIO-SPECIAL NOTICE: Effect. Feb 1, inbound VFR flgts contact MEM apch ctl on 119.1 or 291.6 mc approx 25 mi out for lndg instructions. MEM apch ctl will specify the reporting point where flgt will change to MEM twr freq. (12-27)

MEMPHIS ARPT-TOWER: About Mar 10, radar departure control will be inaugurated in conjunction with long range clearance procedures. (2-3) FLD: Caution. Const. Resurfacing rnwy 9-27. Portions of rnwy and occasionally entire rnwy will be clsd. (11-25) Effect Feb 1, inbound VFR flgts, in rdo equipped acft, contact MEM apch ctl on 119.1 or 291.6 mc approx 25 mi out for lndg instructions. MEM apch ctl will specify the reporting point where flgt will change to MEM twr freq. (12-27). 200'(474'MSL) lgtd twr being erected 5.3 n mi ENE

** (78°T) at lat 35-04-31, long. 89-52-37. (11-16) 210' twr erected 3.5 n mi W(274°T) at lat 35-03-55, long. 90-03-17 dismantled. (12-2)

MORRISTOWN-MURRELL ARPT: 263'(1552'MSL) lgtd twr being erected 4 n mi NE(63°T) at lat 36-12-54, long. 83-17-24. (10-30)

NASHVILLE-RADIO: VOR courses 60°-120° beyond 15 n mi and 210°-250° have bends and roughness out of tolerance. VOR/DME signal coverage 180°-270° 35 n mi at MEA. (1-20)

NASHVILLE-BERRY FLD-TOWER: Effect. Feb 1, apch ctl will utilize radar procedures to effect ctl and separation of departing tfc from Berry Fld. Departure routes specified individually. (12-27) FLD: Inbound VFR flgts to Berry Fld in rdo equipped acft, contact Nashville apch ctl on 118.1 mc civilian, 383.8 mc military, approx 25 mi out for lndg instructions. Nashville apch ctl will specify the reporting point where flgt will change to

TENNESSEE: Berry Twr freq. (12-27) Taxiway between clsd of rnwy 9 and to clsd. (12-13)

**PARIS-HENRY CO ARPT: Unicom, 122.8 mc, avail. (12-12)

TRI-CITY ARPT-TOWER: ILS glide slope usable for apchs to MM only. (7-29)

**UNION CITY-TOM STEWART ARPT: Unicom, 122.8 mc avail. (12-12)

TEXAS: **ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16) Unicom 123.0 mc cmsnd. (1-24)

ALICE ARPT: Rnwy lgts inop. (10-22) 165' AGL drilling derrick being erected 1.5 n mi SE (152°T) at lat 27-43-00, long. 98-01-00. (1-13)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant or R. I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27) Jan 13, ILS glide path and MM shut down until approx Jan 1959. (12-5) ILS lclzr course structure may be affected beyond systems monitor area due proximity

** Hvy const equip. ILS apchs rnwy 3 and 21 cancelled, xcpt ADF portion. (1-21) FLD: Rnwy 17-35 & E/W sod strip perm discontinued. (12-23) Due to proximity of hvy construction equipment, the ILS course structure may be affected beyond the systems monitor area. ILS apchs to rnwy 3 & 21 are cancelled. (1-16) 465'(4044'MSL) lgtd twr erected 9.5 n mi WNW(296°T) at lat 35-17-33, long. 101-50-48, height being increased to 722' AGL(4295' MSL). (11-14) 834'(4295'MSL) lighted tower being erected 8.8 n mi WNW(308°T) at lat 35-18-55, long. 101-50-03. (10-31)

ANAHUAC-CHAMBERS COUNTY ARPT: 313'(334'MSL) lgtd twr being erected 1.1 n mi SW (240°T) at lat 29-45-30, long. 94-41-00. (1-20)

AUSTIN MUELLER ARPT-TOWER: Dec 10, ILS glide slope shut down until approx Feb 15 - relctn to lat 30-17-37, long. 97-41-35. (1-23) FLD: Acft landing and taking-off are cautioned to avoid Bergstrom AFB tfc pattern - extensive jet opern all alt. Neon apch light sys inoperative. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green range lgts on rnwy 30 designate touchdown point ngts. (10-4) Const in progress 1100' SE of advertised touchdown point on rnwy 30L. (5-7)

BEAUMONT-JEFFERSON CO. ARPT: Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13)

BIG SPRING -SPECIAL NOTICE: Acft operg in vicinity of Big Spring range and Webb AFB in VFR wea exercise extreme caution due to intensive jet traffic. Alt below 5,000' saturated on Arwy Green 5 and V-16. (4-22)

BIG SPRING -HAMILTON ARPT: Caution all alts - intensive jet trng. 250'(3049'MSL) lgtd tower being erected 4.2 n mi SSE(165°T) at lat 32-12-17, long. 101-26-46. (12-10)

BROWNSVILLE-RADIO: Nov 14, VOR shutdown. - modernization. (1-23)

BROWNSVILLE-RIO GRANDE VALLEY INTNL ARPT: Approximately Feb 15 construction will begin on weather radar tower 92' (114'MSL). Lctd on arpt Lat 25-54-00 Long 97-26-00. Will not be obstn lgtd or painted. (1-23)

**BROWNWOOD ARPT: 549'(2049'MSL) lgtd twr erected 4.8 n mi SSW(214°T) at lat 31-43-33, long. 90-00-45. (5-3)

COLLEGE STATION-RADIO: DME coverage 60° to 90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000' ; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

CORPUS CHRISTI-RADIO: About Feb 1, VOR will be shut down - modification. During shutdown, following temp MEAs established: V20 ALI - PSX 4000'; V-68 Kingsville Int to CRP and CRP to Int of V-68 and V-163 unusable. (1-21)

DALLAS-RADIO: VOR radial 253° out of tolerance beyond 20 mi; radials 325°-345° out of tolerance - severe scalloping. (11-19)

DALLAS-ADDISON ARPT: New arpt reported. 32-58N, 96-49W; Elev 644'; rnwys, 2, longest 4500' asphalt surface; Fuel F4; Facs S-5; Lighting BL4; Attended 24 hours. (9-8) Use rnwy 15-33 only. NE/SW runway unsafe acct const. (12-13)

DALLAS-LOVE FLD: Inbound VFR flights in radio equipped aircraft, contact approach control on 121.1 or 307.2 mc approximately 25 miles out for landing instructions. Dallas approach Control will specify the reporting point where flight will change to Love Tower frequency. Aircraft not equipped for 2-way communication on 121.1 or 307.2 mc will use other available frequencies and contact Love Tower. (12-30) Formation take-offs not permitted. Caution - aircraft often hidden from control tower view by bldg 250' NNE of twr when at alts of 2000' or less. Extensive ditching, grading, and paving operations in progress entire arpt area including taxiways and ramp adj to runways and new terminal building. Hazard marked and lighted. (11-14)

TEXAS: DALLAS-LOVE FLD: 255' (635'MSL) lgtd twr being erected 3.4 n mi SSE (168° T) at lat 32-47-58, long. 96-50-19. (12-20)

**ELDORADO-BURTON ARPT: 310' (2828' MSL) lgtd twr erected 4 n mi NNW (338° T) at lat 30-57-50, long. 100-48-45. (12-16)

EL PASO-BIGGS AFB-RADAR APPROACH CONTROL: About Feb 15, radar arrival and departure ctl will be implemented for El Paso Intnl Arpt and Biggs AFB. Radar separation as specified in MANOP Radar Procedures for Arpt Tfc Ctl Twrs will be applied. Arriving acft will normally be cleared to El Paso LOM, LFR, VOR, Waterhole VHF intsxn, Hueco H fac, Newman VOR, Harrington Ranch LF and VHF intsxns, Clint H fac. Normal arrival ctl freqs 118.1, 363.8 mc. Departing non-jet acft will normally be cleared to following short range clearance limit: Hudspeth VOR, Fabens VHF intsxn, Salt Flat VOR, LFR; Pinon VOR, Hueco H fac, Columbus VOR and LFR, Harrington Ranch LF and VHF intsxn. Normal depart ctl freqs 119.1, 270.6 mc. PPI apchs approved for rnwys 22 and 26 El Paso Intnl Arpt and rnwy 21 Biggs AFB. (1-15)

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. TFC make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness.

FALFURRIAS-BROOKS CO. ARPT: . 268' (298'MSL) lgtd twr being erected 17.8 n mi ENE (73° T) at lat 27-17-15, long. 97-48-30. (10-18)

★FT WORTH AIR ROUTE TRAFFIC CONTROL CENTER: Feb 3, freq 120.8 mc cmsnd at Waco, Texas peripheral site.

FT WORTH-CARTER FLD-TOWER: About Apr. 1, freqs 123.9, 119.6 will be cmsnd. (1-29) FLD: Paving equip. operg in rnwy extension area SE of rnwy 13-31. Rnwy will be clsd to NW lndgs periodically when equip. is adj to rnwy end. (12-2)

FT WORTH-MEACHAM FLD-TOWER: ILS lclzr and glide slope shut down until approx Apr. 4. (1-29)

FT WORTH-SAGINAW ARPT: First 300' rnwy 36 not usable acct p-line not yet removed.

**GALVESTON ARPT: Unicom unavail. (12-17)

GREENVILLE-MAJORS ARPT: All rnwys clsd xcpt 17R-35L due men & equip. working during daylgt hrs. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Ngt lndgs not advisable. (8-13)

**HARLIGEN-HARVEY RICHARDS ARPT: 994' (1049' MSL) lgtd twr erected 5 n mi SW (225° T) at lat 26-08-56, long. 97-49-18. (7-20)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: VOR radials 120° thru 140° and 306° radial unreliable. (1-16)

**HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80' (AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (12-26) Rotating bcn optg sunset to sunrise. (1-14)

HOUSTON INTN'L ARPT - SPECIAL NOTICE: Effective Feb. 10, inbound VFR flgts contact Houston apch ctl on 118.1 or 284.6 or 257.8 mc approx. 25 mi out for lndg instructions. Houston apch ctl will specify when flgt will change to Houston twr freq. (1-9)

HOUSTON INTNL ARPT-TOWER: About Mar 1, trans & rcvr 120.7 mc will be changed to 123.7 mc. (1-30) FLD: Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26 opened for tk-offs to E only, no lndgs. (3-11)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LA GRANGE-GUENTHER FLD: N/S rnwy clsd. Use rnwy 15-33 only. Use taxi strip to hangar. (11-20)

LAMESA-ADCOCK ARPT: New arpt reported. Lat 32-48, long 101-36; lctd 5 mi NNE; elev 3050'; 1 strip N/S 2000'; Fl fuel. (8-27)

LAMESA-JAMISON ARPT: New arpt reported. Lctd 1 mi N; 2 strips, N/S 2940', E/W 1620'; 91 oct fuel. (10-7)

**LAPORTE ARPT: NW/SE rnwy clsd. Const. (10-30) Bcn operd sunset-0100. (12-19)

LAREDO-SPECIAL NOTICE: Acft operg around Laredo LFR and/or VOR or Laredo AFB should exercise extreme caution due to intensive jet tfc. Recommended arrivals and departures to Laredo Mun Arpt are NW or SE along Rio Grande for at least 15 mi prior to arriving over arpt or prior to departing on course. (8-3)

LEONA-RADIO: Caution when using VOR radials 35 mi N, due to severe scalloping. (11-19)

LEVELLAND ARPT: 338' (3958'MSL) lgtd twr being erected 3.5 n mi NNW (337° T) at lat 33-36-11, long. 102-24-05. (10-16)

LOMETA-RADIO: About Feb 17, VOR will be shut down - conversion to VORTAC. During shut down: V-163 Spring Branch Int to Mill Int, V-163W Lometa to Fredericksburg Int. unusable. Kingsland Int and Marble Falls Int unusable. Llano Int redesignated as AUS VOR 284 and JCT VOR 072, MRA 5000'. MRA Llano Int to Lake Travis Int 3800' Eastbound, 5000' Westbound. (12-9) V76N between SJT VOR and AUS VOR unusable. (1-27)

LONGVIEW-GREGG CO ARPT: Due non-visibility twr unable to ctl tfc on taxiway from N hangar to rnwy 13. (9-13)

LUBBOCK ARPT: E ramp clsd until approx Apr 1. W 300' open as taxiway. (12-11) Only S 6300' rnwy 17-35 lgtd. (12-27)

LUFKIN-RADIO: DME coverage: 017°, 2400' 34 n mi; 032°, 2400' 35 n mi; 090°, 2000' 20 n mi; 170°, 1600' 40 n mi; 190°, 1600' 40 n mi; 310°, 2500' 25 n mi. (5-8)

LUFKIN-ANGELIA CO. ARPT: Sod strip clsd. Use hard surface rnwy only. (8-22) Men & equip working near N end of rnwy. (1-28)

McALLEN-MILLER INTNL ARPT: Rnwy 18 clsd for take-offs and lndgs. (11-26) 150' (276'MSL) lgtd stack being erected 9.2 n mi W (282° T) at lat 26-13-00, long. 98-24-30.

**MARATHON ARPT: Abandoned. (1-2)

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

MIAMI-CLARK ARPT: New arpt reported lat 35-45, long 100-45; lctd 10 mi NW; elev 3100'; 2 strips, N/S 4500', E/W 1700', grass turf. (10-8)

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: Dec 4, VOR/DME shut down until approx Mar 4 - conversion to VORTAC. Durg shutdown, flgts authorized to use MWL "H" in lieu of VOR. Alts as charted, routes as follows: V163 Mill Int. - MWL H fac by MWL rad 180°. To FTW VOR by FTW 199. V16N ABI VOR to Breckenridge Int. by ABI 055; to MWL H fac by MWL 262; to HTT H fac by MWL 062; to McKinney Int. by HTT H fac 247; to DAL VOR by DAL 257. V16S ABI VOR to Cisco Int. by ABI 085; to MWL H fac by MWL 231; to Russell Int. by MWL 091. Intsxns as follows: For Breckenridge Int. use radials ABI VOR 055, MWL H 262; Russell Int. use MWL H 091, FTW ILS; Mill Int. use ACT VOR 306, BRT VOR 255; Cisco Int. use ABI VOR 085, MWL H 231; Newark Int. use FTW VOR 128, MWL H 059; Lake Worth Int. Use FTW VOR 149, DAL VOR 257; Saginaw Int. use DAL VOR 257, FTW ILS; Chapel Int. use MWL H 332, FTW VOR 239; Haslet Int. use MWL H 064, FTW ILS. For Roanoke, Lewisville, and Little Elm Ints use HTT 056 in lieu of MWL VOR 256. (10-1)

MUNDAY-LEFLAR ARPT: 433' (1939'MSL) lgtd twr being erected 9.8 n mi WSW (258° T) at lat 33-25-00, long. 99-48-16. (10-21)

**SAN JUAN-ISLA GRANDE ARPT: All fld lgtg oper sunset-sunrise Longest usable rnwy 9 27, 4800'. (12-30)
VIRGIN ISEANDS: ST THOMAS-HARRY S. TRUMAN ARPT: Men surveying and test boring 500' E of rnwy. (1-14)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods:(a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of 4° be indicated through use of the ground check or +6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
*Los Angeles(International 111.0 mc)
*Pittsburgh(Greater Pittsburgh 108.6mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

TUCUMCARI, NEW MEX., -TUCUMCARI MUN. ARPT, Procedures No. TerVOR-21 and TerVOR-26, Amdt. 1, Effect. 8 Mar. 58: Change minimum altitude over facility on final approach crs to read "4500" in lieu of "4463".

Disregard amendments to LaCrosse, Wisc. TerVOR-13, TerVOR-17, and TerVOR-35 procedures, dated 13 February 58, forwarded with Transmittal Letter No. 58-2, dated 16 January 58. Procedures replacing these will be furnished at a later date.

TUSCALOOSA, ALA., -VAN DE GRAAFF ARPT, ADF Proced. No. 1, Amdt. 5, Effect. 1 Mar. 58: Change missed approach to read, "within 00 miles, climb to 1700' on crs of 015° within 10 miles" in lieu of "within 00 miles, climb to 1700' within 10 miles".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

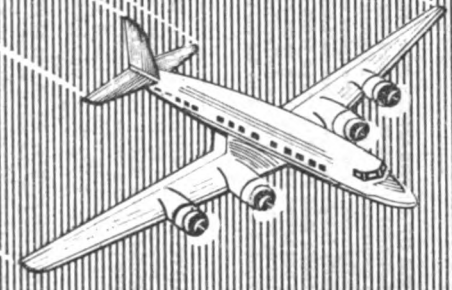
AIRMAN'S GUIDE



SPECIAL NOTICE
Flight Information Manual
Additions & Changes. p 11

How to use this Guide - page 2

Notices to Airmen - page 2

VOL. 12, NO. 25 FEBRUARY 18, 1958

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120, CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notice to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airman: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..--.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are 'paired' in accordance with a national plan to simplify airborne operation.

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, 'at least 1000 on top' is changed to 'VFR conditions on top.' Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top' in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200'MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

HERNDON, VIRGINIA, VOR SHUT-DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 223: HRN VOR - Hampton VHF Int	Arcola LFR direct HAR VOR	3000
Victor 39: EMI VOR - Remington VHF Int	Red 33	as published
Victor 4: HRN VOR - FRR VOR	Red 18	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Sugar Loaf	MRB VOR 107 M radial; EMI VOR 245 M radial	3000
Keymar	MRB VOR 078 M radial; HAR VOR 201 M radial; EMI VOR 295 M radial;	3000
Lisbon	Use Lisbon LF Int	as published
Fairland	DCA TVOR 023 M radial; BAL VOR 244 M radial	3000
Springfield	Use Springfield LF Int	as published
Remington	Use Remington LF Int	as published
Plains	FRR VOR 118 M radial; MRB VOR 170 M radial; (Holding Pattern: NW of the substitute intsxn on the Front Royal 118 radial. Right turns. One minute pattern)	4000
Leesburg	FRR VOR 094 M radial; MRB VOR 147 M radial	4000
Manassas	Brooke VOR 003 M radial; DCA TVOR 256 M radial	3000
Quarry	SW crs of the ARV LFR; FRR VOR 118 M radial	4000

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

HUNTINGTON, NEW YORK, VOR SHUT-DOWN: During the period of shut-down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----
Victor 126: HUO VOR - ILT VOR	ILT VOR 294 M radial to the point of intsxn with DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Paterson VHF Int	None	----
Victor 249: HUO VOR - CDW VOR	CDW VOR 356 M radial to the point of intsxn with the AVP VOR 127 M radial. None beyond.	5000
Victor 126 and 146: HUO VOR - AVP VOR	AVP VOR 105 M radial to point of intsxn with the DNY VOR 171 M radial (Victor 249)	5000
Victor 252: HUO VOR - Herrick VHF Int	None	----
Victor 249: HUO VOR - DNY VOR	DNY VOR 171 M radial to the point of intsxn with the AVP VOR 105 M radial	5000

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Central Valley	ILT VOR 288 M radial and POU VOR 234 M radial	3000
Huguenot VOR	AVP VOR 105 M radial and STW VOR 035 M radial	5000
Greenwood	POU VOR 234 M radial and ILT VOR 280 M radial (Holding Pattern: NE of the Greenwood Int on the POU VOR 234 radial. Left turns. One minute pattern)	3000

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2000'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2000' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

BOSTON, MASS. VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 3: BOS VOR - Hampton VHF Int	Amber 7	as published
Victor 141: BOS VOR - ACK VOR	Blue 58	as published
Victor 16: BOS VOR - Woonsocket VHF Int	Green 2	as published
Victor 3: BOS VOR - Millbury VHF Int	BOS LFR direct Worcester LOM	3000
Victor 141: BOS VOR - CON VOR	Blue 4	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA

Lowell	SE crs of the CON LFR GDM VOR 094 M radial	2000
Franklin	Franklin LF intsxn	as published

NAVIGATIONAL WARNING: USAF jet and conventional bombers will conduct daylight VFR flights between 500 and 2000 ft above ground level along routes indicated below, climb from last point listed and fly at conventional altitudes over target listed. Flights will be within 20 n mi either side of selected route avoiding built up areas and civil airports.

Route 8-F-I: 39-28N, 95-03W; 40-43N, 92-25W; 41-14N, 89-22W; 43-14N, 90-51W; 44-48N, 91-03W; 44-42N, 91-49W; 43-38N, 93-47W; 41-04N, 98-28W; 40-59N, 94-40W; 40-29N, 95-54W, target Peru, Nebraska.

Route 8-A-III: 43-18N, 99-02W; 43-18N, 103-25W; 44-28N, 104-44W; 44-58N, 102-55W; 44-30N, 102-01W; 44-02N, 99-28W; 43-53N, 96-04W; 43-33N, 94-58W; 42-36N, 95-11W, 42-08N, 95-25W; target Omaha, Nebraska.

Route 8-E-II: 38-55N, 94-16W; 40-17N, 91-29W; 40-26N, 87-16W; 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-45N, 92-40W; 38-21N, 93-46W; target Clinton, Missouri.

Route 8-D-I: 37-52N, 95-44W; 39-12N, 96-13W; 39-53N, 96-53W; 41-27N, 97-32W; 42-51N, 97-55W; 42-38N, 100-12W; 40-02N, 99-20W; 38-27N, 100-20W; 38-00N, 99-21W; 38-00N, 99-12W, 38-54N, 98-51W; target Russell, Kansas.

Route 8-H-II: 43-34N, 70-11W; 43-45N, 69-50W; 44-28N, 67-35W; 45-11N, 67-41W; 45-58N, 68-09W; 44-40N, 69-44W; 43-38N, 71-47W; 44-16N, 73-12W; 43-25N, 73-41W; 43-01N, 74-46W; 44-00N, 75-25W; 44-34N, 75-00W; 44-56N, 73-24W; 44-50N, 72-47W; target Groveton, New Hampshire.

Route 8-B-III: 38-14N, 94-50W; 38-12N, 92-38W; 38-43N, 91-26W; 37-22N, 89-25W; 37-24N, 86-02W; 37-50N, 84-42W; 37-22N, 80-47W; 38-33N, 80-15W; 39-05N, 81-55W; 39-16N, 82-08W; target Columbus, Ohio.

Route 8-G-I: 43-10N, 76-30W; 42-41N, 78-02W; 42-14N, 80-09W; 41-27N, 82-58W; 41-27N, 83-39W, 41-12N, 84-45W; 40-33N, 84-36W; 40-29N, 83-53W; 40-35N, 81-13W; 40-50N, 80-22W, 41-47N, 78-50W; 42-26N, 76-54W; 42-34N, 76-33W; target Waterville, New York.

Route 8-C-III: 41-39N, 73-56W; 41-24N, 75-15W; 40-02N, 78-21W; 37-42N, 78-38W; 37-35N, 79-35W; 40-40N, 79-26W; 41-53N, 76-30W; 42-28N, 73-55W; 42-27N, 73-51W; target Springfield, Massachusetts.

QUINCY, ILLINOIS VOR SHUT DOWN: During shutdown the following MEAs can be utilized:

The following VHF intexns will be unusable during the period of shut down: Medina, Mumford, Rush, Grimsby, Avon, Warsaw, Niagara, Hornell.

TEST OF EXPANDED RADAR SERVICE - ANDREWS AFB AREA: Effective 0001 EST 15 Jan 1958 and continuing until 2359 EST 15 Mar 1958 a test will be conducted to gather operational experience and information concerning the practicability of providing expanded radar traffic control service (separation and/or traffic information) to aircraft operating VFR in the vicinity of Andrews AFB. Test activity will be conducted by Andrews approach control within the Andrews approach control area which generally lies between the 060° radial clockwise to the 165° radial of the Washington TVOR within a 30 mile radius E of Andrews AFB. During the test period all aircraft operating VFR in or through this area at and below 10,000 MSL are urged to contact Andrews approach control. Radar will be utilized insofar as possible to provide traffic information and/or radar separation to participating aircraft in the following manner:

1. Military aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic information and radar separation, as required, from all other observed traffic.
2. Civil aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic advisory information.
3. All aircraft operating VFR in the area above 2500 MSL and up to 10,000 MSL inclusive will be provided pertinent traffic advisory information only.
4. Military aircraft should initiate contact on 355.8 mc or 136.8 mc. Civil aircraft may call on 123.7 mc or 122.1 mc and receive on 123.7 mc. Pilots should advise approach control of their position, altitude, heading and intentions during first radio contact so that controllers may plan proper route through the area. Traffic from the east and northeast on Victor 16 or Green 5 is requested to initiate call at Kent Island or over eastern shore of Chesapeake Bay. Traffic from the southeast on Blue 56 should initiate contact in vicinity of Coles Point. Traffic landing at Washington National, Bolling or Anacostia will be advised when to change to appropriate tower frequency.
5. VFR flights departing from Washington National, Bolling or Anacostia that will penetrate test area should contact Andrews approach control as soon as practicable after leaving respective tower frequency and prior to entering area. Aircraft departing airports within the area are requested to initiate contact as soon as practicable after takeoff.
6. IFR traffic operating through the area will be handled in the normal manner by CAA traffic control facilities and should not contact Andrews approach control unless instructed to do so by ATC. There will be no change in established local traffic patterns during the test period.

The above services are designed to aid pilots in avoiding collision and should not be construed as relieving the pilot of any responsibilities and requirements governing VFR flight as established in pertinent military or Civil Air Regulations. Radar traffic information will be provided in accordance with the U.S. Standard Manual of Radar Air Traffic Control Procedures.

Comments from pilots participating in the test are solicited and will be most welcome. Please address correspondence to: Commander, 2045th AACS Group, Attention: Flight Facilities Officer, Andrews Air Force Base, Washington 25, D.C.

DAYTON, OHIO VOR SHUT DOWN: The Dayton, Ohio VOR will be shut down on or about Feb 3, 1958, for approximately 21 days. During outage the following substitute route structure in effect:

(1) V275 CVG VOR to FDY VOR replaced by CVG VOR direct RID VOR direct FDY VOR, MEA 3000.

(2) V246 DAY VOR to MFD VOR replaced by SIE VOR 226 M radial from the point of Int with the W crs of the CMH LFR direct SIE VOR direct MFD VOR, MEA 3000.

(3) V12 1512 and 1514 DAY VOR to APE VOR replaced by Green arwy 4 to the APE VOR 246 M radial direct to the APE VOR, MEA as published.

(4) V12 south DAY VOR to London VHF Int, MEA - none.

(5) V12 1512 and 1514 DAY VOR to IND VOR replaced by Green arwy 4, MEA as published.

(6) V12 north DAY VOR to Cowan VHF Int, MEA - none.

(7) V55 west DAY VOR to Portland VHF Int, MEA - none.

(8) V55 DAY VOR to Coldwater VHF Int replaced by RID VOR direct radial to the Coldwater VHF Int, MEA 3000.

Gratz	LOU VOR 053 M radial, ABB VOR 096 M radial	2400

In addition to the establishment of the temporary non-compulsory reporting points, the following temporary holding patterns have been approved:

INTERSECTION	HOLDING PATTERN
Georgetown	Hold on CVG omnirange on 179 radial between LOU omnirange 074 radial and point one minute N. Right turn. MEA 3000
Winchester	Hold on LEX RBN on 256 M bearing between CVG omnirange 150 radial and point 2 min E. Right turn MRA 4000.
Mt. Eden	Hold on LOU omnirange on 097 radial between CVG omnirange 196 radial and point 2 min E. Right turn MRA 4000.
Campbellsville	Hold on LOU omnirange on 167 radial between BWG omnirange 050 radial and point 2 min S. Right turn MEA 3000.

✓ AIG PROCEDURES - EN ROUTE PROCEDURES and INSTRUMENT LETDOWN: On pages 61 and 62 of the Pilot's Information Manual Vol. II (dated August 15, 1957) delete the material under "EN ROUTE PROCEDURES" and "INSTRUMENT LETDOWN" and substitute the following instead:

EN ROUTE PROCEDURES - when the aircraft is proceeding in accordance with the latest traffic clearance but the pilot has not received and acknowledged a clearance for an instrument approach, the following procedures apply:

1. If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that airport, he will continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is higher, to the radio facility serving the destination airport.

2. If the pilot has received and acknowledged a clearance to an en route point other than the destination airport or the radio facility serving that airport and

(a) Holding instructions for the en route point have not been received, he will continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude whichever is higher, to the radio facility serving the destination airport; or

(b) Holding instructions for the en route point and expected clearance time for the airport of destination have been received, the pilot will comply with such instructions and continue flight to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is higher, or

(c) Holding instructions for the en route point have been received but no expected approach time for the airport of destination has been received, the pilot will comply with such instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue flight to the radio facility serving the destination airport maintaining the last assigned altitude or the minimum instrument altitude whichever is higher.

NOTE: The minimum instrument altitude referred to is the minimum en route IFR altitude established in Part 610 of the Regulations of the Administrator for that portion of the route over which the operation is conducted, regardless of the direction of flight. If deviation from the altitude assigned by Air Traffic Control is necessary in order to comply with a higher minimum instrument altitude, any subsequent descent required by a lower minimum instrument altitude shall not be made below the altitude last assigned by Air Traffic Control.

Example: A flight is cruising at 8000' (last assigned altitude) on an IFR flight plan when radio failure occurs. After passing the next fix, the minimum en route altitude is 10,000' and climb is made to that altitude. On the last leg of the flight the minimum en route altitude is 3500'. The flight descends back to 8000 after passing the fix defining the termination of the 10,000' minimum en route altitude segment since the last assigned altitude (8000') is higher than the MEA (3500').

3. If holding is necessary at the radio facility serving the destination airport and no holding clearance has been received and acknowledged:

(a) Holding will be accomplished on the side of the final approach course on which the procedure turn is prescribed; or

(b) Where approved military jet penetration procedures have been issued for the airport of destination, holding by military jet aircraft will be accomplished at the last assigned altitude and along the left side of the initial penetration course (tear-drop), or in the case of a single penetration course on the side on which the procedure turn is prescribed.

INSTRUMENT LETDOWN - 1. If a clearance for an approach has not been received and acknowledged, descent from the altitude maintained to the radio facility serving the destination airport will start at the expected approach time last received and acknowledged, or if no expected approach time was received and acknowledged, descent will be started at the estimated time of arrival indicated by the elapsed time specified in the flight time or as soon as possible thereafter. A full approved instrument approach procedure will be executed unless VFR conditions are encountered and the pilot elects to continue descent and approach in accordance with VFR.

2. If a clearance for an approach at the airport of intended landing has been received and acknowledged, comply with the clearance or other instructions and make normal descent for landing.

3. Seattle - (a) Descent to the appropriate altitude for the execution of the instrument approach from the radio facility serving the destination airport will be accomplished by a holding pattern on the side of the final approach course on which the procedure turn is prescribed; or

(b) Where approved military jet penetration procedures have been issued for the airport of destination, military jet aircraft will descend to the initial penetration altitude on the radio facility serving the destination airport by a holding pattern on the left side of the initial penetration course (tear-drop), or in the case of a single penetration course on the side on which the procedure turn is prescribed.

NOTE: Air Traffic Control may issue appropriate instructions by means of "blind" transmissions on radio frequencies directly available or may authorize "blind" transmissions of appropriate instructions over air carrier radio facilities (for air carrier aircraft), and/or over suitable radio range facilities. Instructions should not be broadcast unless authorized by Air Traffic Control.

✓ ST. LOUIS-KANSAS CITY CENTERS' CONTROL AREA FLIGHT ADVISORY BOUNDARIES REVISED - Effective immediately, the St. Louis-Kansas City Centers' Control Area Flight Advisory Boundaries revised as follows:

NOTE: Where the paragraph number is followed by an asterisk (*), the ARTC Flight Advisory Area boundaries within control areas are to be depicted as arcs of a circle with a radius equal to the miles specified from the radio fix, the radio fix being the center of the circle. All other ARTC Flight Advisory Area boundaries within control areas are to be depicted by a straight line drawn at right angles to the centerline of the airway, unless otherwise specified.

1. * Starting at the present Kansas City/St. Louis Control Boundary, 60 s mi NW of the Tulsa, Okla., omnirange stn on civil arwy V74S, V74, and V190.

2. * Thence direct to and along the Kansas City/St. Louis Control Boundary 25 s mi S of the Chanute, Kans., omnirange stn on civil arwys V15 and Amber 4.

3. Thence direct to a point 37-27N, 95-09-40W (the intsxn of civil arwys V132S and V161).

4. Thence along the W edge of civil arwy V161 to a point 37 s mi SW of the Butler, Mo., omnirange stn, forming the Kansas City/St. Louis Control Boundary, on civil arwys V132S, V132 and Red 105.

5. * Thence along the Kansas City/St. Louis Control Boundary 37 s mi SW of the Butler, Mo., omnirange stn, to a point 38-02N, 93-53W on civil arwys V161, V13W, V13, V71W, V71 and 205W.

6. Thence direct to and along the Kansas City/St. Louis Control Boundary, eastward on 38-02N, to the E edge of civil arwy V205.

7. Thence along the E edge of civil arwy V205 to a point 37-53N and 93-30-30W, forming the Kansas City/St. Louis Control Boundary.

8. Thence direct to and along the Kansas City/St. Louis Control Boundary, eastward on 37-53N to the W edge of civil arwy Blue 9.

9. Thence to and along the Kansas City/St. Louis Control Boundary via the W edge of civil arwy Blue 9 to a point 57 s mi SW of the Columbia, Mo., omnirange stn.

10. * Thence to and along the Kansas City/St. Louis Control Boundary, 57 s mi SW of the Columbia, Mo., omnirange stn on civil arwys Blue 9 and V63.

11. * Thence to and along the Kansas City/St. Louis Control Boundary to a point 28 s mi NW of the Vichy, Mo., omnirange stn on civil arwy V175.

12. Thence along the Kansas City/St. Louis Control Boundary on the E edge of civil arwys V175 and V63 to a point on the N edge of V-4N/V-12N, such line crossing and forming the control boundary on Green 4, V4S, V12S, V4, V12, V12N and V4N.

13. * Thence direct to and along the Kansas City/St. Louis Control Boundary to the present boundary 30 s mi SE of the Quincy, Ill., omnirange stn on civil arwys V52, V52N and V50.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

XLX Lookout Int, Alaska (assignment)
SP St. Paul Island, N. S. (deletion)

WASHINGTON-NORFOLK CENTER CONTROL AREA/FLIGHT ADVISORY AREA BOUNDARIES CHANGED: Effective immediately the Washington-Norfolk Center Control Area/Flight Advisory Area Boundaries are changed as follows: beginning at a point S of the Hopewell, Va., VOR where the present Washington-Norfolk boundary intersects the westerly edge of V213; proceeding thence S along the westerly edge of V213 to a point 15 n mi N of the Rocky Mount, N.C., VOR, thence clockwise along an arc with a radius of 15 n mi, centered on the Rocky Mount, VOR, to its intersection with the northwesterly edge of V1; thence southerly along the northwesterly edge of V1 to a point 25 n mi from the LaGrange, N.C., VHF Int; thence at right angles to V1, to the northerly edge of Restricted Area R-125; thence easterly along the northerly edge of R-125 to its intsxn with the westerly edge of V229 at a point on the existing boundary.

CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulations was effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957, as follows:

(1) Page 23, Dayton, Ohio - change CAA telephone number to: TW 8-4653.

(2) Page 23, Dayton, Ohio - change WB telephone number to: TW 8-4620.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS: The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.

2. Requests for altimeter settings at weather reporting stations not within the Center's control area will be referred to the appropriate Air Traffic Communications Station.

3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting). Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

PROHIBITED AREA AMENDMENT: Effective February 11, 1958, the Hanford, Wash. Prohibited Area (P-246) was amended by Executive Order as follows: "Beginning at lat 46-48-00, long. 119-13-13 thence to lat 46-20-00, long. 119-13-13 thence to lat 46-18-06, long. 119-30-00 thence to lat 46-30-00, long. 119-55-30 thence to lat 46-39-00, long. 119-55-30 thence to lat 46-48-00, long. 119-47-00 thence to point of beginning." (This is on U.S. C&GS Chart RF-21 Spokane, Washington)

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	-	Month and day item was reported.
**	-	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	-	New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-70° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Rnwy lgts inop. Flare pots avail. on request. (1-10)
BESSEMER ARPT: Caution. Auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)
BIRMINGHAM-RADIO: Dec 12, VOR shut down-conversion to VORTAC. Caution-all arwys and Ints based on VOR are not usable for navigational purposes until stn is recmsnd at new lctn. Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int. via ADF track of 350 mag from BHM LFR, MEA 4500'. (2-6) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. Caution - E course LFR has severe multiples.
BIRMINGHAM ARPT-TOWER: ILS MM and LMM shut down - relctn. (8-7) About March 15, radar departure will be implemented, utilizing Anniston & Tuscaloosa VORs; Lehigh, Chelsea, Helena, Flat Creek, and Nathan Ints as clearance limits. (2-14) FLD: Inbound VFR flights in rdo equipped acft, ctc Birmingham Apch Ctl on 119.9 or 385.6 mc approx 25 mi out for lndg info. Birmingham Apch Ctl will specify the reporting point where flight will change to Birmingham twr freq. (1-13) Caution-tfc operg in area from 165 clockwise thru 235 not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd btwn 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down for relctn due rnwy ext. (5-1)
CLANTON-WARE ISLAND ARPT: New arpt reported. Lctd 10 mi NE on an island in Coosa River. Lat 33-57, long 86-31; elev 360'; 1 sod strip 2500' x 150'; no serv. (12-19)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Clsd. (10-16)
EVERGREEN-RADIO: VOR radials 320° thru 360° out of tolerance acct excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy & threshold lgts inop. (1-7)
**FAIRHOPE-KLUMPP ARPT: 999'(1201'MSL) lgtd twr erected 9 n mi N(12°T) at lat 30-40-55, long. 87-49-41. (12-6)
**GADSDEN-GOODYEAR FLD: ABANDONED. (11-11)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-RADIO: VOR radials 019°-028° out of tolerance due to severe scalloping. (1-17)
MOBILE-BATES FLD-TOWER: ILS glide slope inop-equip. and const vcnty transmitter bldg. (1-17) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' & 1/2 mi is absolute take-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-MAXWELL AFB-RADAR APPROACH CONTROL: About March 4, RAPCON will be cmsnd. Civil freqs: 121.5, 121.1, 125.5, 125.9; rcvr only 122.7; 3023.5 kc; trans only 112.1. Mil freqs: 137.88, 134.1, 136.8, 142.02, 363.8, 243.0, 225.4, 379.4, 335.8, 279.6, 289.4. (2-5)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
**SELMA-DALLAS FLD: ABANDONED. (11-57)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (10-24)
**BISBEE ARPT: No servicing. Caution - horses on field. (1-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. nights upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Open daylight opern only. (1-10)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
**DOUGLAS-BISBEE DOUGLAS INTNL ARPT: Rnwy 12-30 open to acft 30,000 lbs & above.
DRAKE-RADIO: Soon VOR will be cmsnd. Ident: DRK. Freq: 113.1 mc. Lctd lat 34-54-04, long. 112-25-00. Elev: 4630' MSL. Class: VORW. (2-14)
FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flight within R-101. Libby twr rdo 121.5, 122.5, 126.3, 126.1, 243.0 mc. Rdo beacon (1 flash per 30 sec) and 1,000W (1 flash per 2 sec) obstruction light available for nocturnal use

ARIZONA: Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
MARANA ARPT: Reported inactive. (10-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of afterburners for take off xcpt prior permission arpt manager. (12-7)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx March 3 - conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 ÆD-INW; V105 White Hills Int.-PHX; V105E PRC-PHX. (11-18)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi at 11,000'; 050°-060°, 22 n mi at 11,000'; 060°-175°, 35 n mi at 11,000'; 075°-085°, 21 n mi at 11,000'; 090°-170°, 40 n mi at 12,000'; 225°-230°, 40 n mi at 7000'; 330°-345°, 35 n mi at 11,000'; 345°-360°, 25 n mi at 11,000'. (7-17) Feb 3, VOR/DME shut down until approx March 4 - conversion to VORTAC. Following V arwys unusable durg IFR conditions: V16 Toltex Int. - CIE, V66 GBN-Vail FM, usable Vail FM to DUG MEA; Vail to Mescal Int 12000'; Mescal - DUG 10,000'. V16S TUS-Mescal Int. (2-4)
TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted week-ends - caution. (2-15)
TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at night. Obstn lgts apchs to rnwy 21 inop. (11-15)
✱TUCSON-DAVIS MONTHAN AFB-RADAR APPROACH CONTROL: Feb 6, RAPCON cmsnd. Trans & rcvg freqs: 118.5, 121.5, 125.1, 125.9, 134.1, 136.8, 137.88, 142.02, 225.4, 126.18, 236.6, 243.0, 252.6, 270.6, 289.4, 305.4, 335.8, 363.8, 379.4 mc. Rcvg only: 3023.5 kc; 122.5 mc. About Apr 8, radar tfc ctl departure procedures will be implemented. (2-13) About May 8, radar tfc ctl arrival procedures will be implemented. (2-13)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB-SPECIAL NOTICE: Night weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small mrker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)
ARKANSAS: **ALMA ARPT: ABANDONED. (11-57)
BLYTHEVILLE - SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
FT. SMITH-RADIO: About March 15, VOR will be shut down, modification. During shut down VOR flights are authorized to use FSM BMH fac in lieu of FSM VOR on all arwys. Bears. and MEAs used shall remain as charted xcpt bear. from FSM BMH to Int of 295° radial Little Rock VOR on V74 shall be 97°. Paris Int. redesignated as 97° from FSM BMH and FYV 160°. On V13, use 192° from FYV VOR to FSM BMH. MEA for VOR-equipped acft on V74 from TUL to FSM 7500' and on V13 from FYV to FSM 5500'. (12-13)
**HORATIO ARPT: ABANDONED. (12-57)
ROGERS ARPT: 349'(1749'MSL) lgtd twr being erected 3 n mi S(200°T) at lat 36-19-54, long. 94-08-10. (1-22)
**ROUND POND ARPT: ABANDONED. (11-15)
SEARCY ARPT: Clsd until approx March 30. Const. (12-30)
TEXARKANA-RADIO: DME coverage 145°-235°, 30 n mi at 1700'; 235°-270°, 35 n mi at 1800'. (5-21)

12,000'; 060°-090°, 13,500'. (8-9)

**ARCATA ARPT: Right tfc rnwys 13 & 19. (12-10)

*BAKERSFIELD-KERN CO. ARPT-TOWER: Feb 10, 119.9 mc decmsnd and 119.8 mc cmsnd.

**BASS LAKE-WISHON ARPT: Perm clsd to all operns. (11-1)

BLUE CANYON ARPT, 13, SFO-SLC: Closed due to snow. (12-18)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BLYTHE-HERON FLD: Caution - 90' TV antenna adj W. (1-24)

BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Feb 20 radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR Saugus Int Fillmore VOR Camarillo LFR Burgank OM. About Feb 17 ASR will be shut down until approx Mar 10 - equip. modification. (2-15)

CAMARILLO-RADIO: All LF rng courses have multiples. (6-17)

**CORCORAN-BALDWIN FLD: Abandoned. (12-27)

**CORONA-THURSBY ARPT: To be abandoned Feb 28. (12-11)

CRESCENT CITY-RADIO: VOR arwy radials flgt checked. Courses 90°-330°usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt checked on arwy radials only.

**DESERT CENTER-COXCOMB ARPT: Abandoned. (12-1)

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (6-30)

EL TORO MCAS-RADIO: VOR coverage restriction at and below 10,000' MSL beyond 25 mi from 360° clockwise to 070°. (12-13)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

** FAIR OAKS-SKY NOOK: Abandoned. (12-27)

FAIRFIELD-TRAVIS AFB-RADIO: LFrng has splits and multiples beyond 20 n mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000;

FT. JONES-RADIO: VOR coverage 250°-090°, 30 n mi; 090-120°, 15 mi, 150°-250°, 20 mi at min en route alt. (12-2)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 closed. (7-12)

FRESNO AIR TERM: Extreme caution advised in vicinity of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N & E of arpt.

GLENDALE-GRAND CENTRAL ARPT: Extensive const. Fld closed to all acft at sunset.

GOFFS-RADIO: VOR coverage 265°-310°, 25 n mi at MEA. Below 9500' this area beyond tolerance. (11-8)

GORMAN-RADIO: Soon VOR will be cmsnd. Freq 109.0 mc. Ident: GMN. Lctd lat 34-48-18, long. 118-51-42. Monitoring category (3). Class: VORW. (1-20)

**HALF MOON BAY ARPT: Unicom cmsnd 122.8 mc. (1-20)

**HUNTINGTON BEACH ARPT: Abandoned; (12-1)

**INDIO-SHAVER'S SUMMITT FLD: Abandoned. (12-1)

**LANCASTER-STERNS RANCH ARPT: Abandoned. (12-1)

LONG BEACH-RADIO: DME shut down until approx Feb 21 - relctn. VOR auto ident inop.

LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. VHF/DF bearings unreliable below 12,000' SW quad between 200° and 230°. About March 3, ASR-3 will be shut down until approx March 8 - modernization of equipment. (2-6) FLD: 149' oil derrick lctd 1/2 mi S & 1300' SW apch end rnwy 30. Mrkd & lgtd. (2-7) Several 230' MSL portable oil derricks NW, W, & S of fld. Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P week days only, due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd, const, 6200' avail. Rnwy 12 clsd. Straight in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcasts continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping beyond 30 n mi. (4-19)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19) FLD: Rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd, avail 30 min request thru twr. Equip. crossing rnwy north of E/W taxiway. Rnwy 25R clsd when 16-34 in use. Ditches across N end 16-34, overrun area eliminated. During VFR wea conditions civil acft ctc twr on 118.9 mc or listen 118.9 mc trans 122.7 at least 10 mi out During IFR wea civil acft ctc apch ctl on 118.1 or 119.3 or listen 118.1 or 119.3 & trans 122.7. USAF, NAVY, CG: VHF equipped acft ctc apch ctl on 118.1 or 119.3 mc. UHF equipped acft ctc apch ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding east bound from Malibu or Pt Dume intsxn in VFR conditions making a track which approximates extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni unless cleared otherise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt & E of arpt between Downey rbn & arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt or between Los Angeles rbn and arpt. Avoid shoreline W due hi-performance jet acft. Apch lgt lane sequence flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (1-27)

**LOS GATOS-AMES ARPT: Abandoned. (12-1)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MARTINEZ ARPT: Clsd until approx June. (11-21)

**MENDOTA ARPT: New arpt: Lctd 1/4 mi E; elev 174'; 1 rnwy, N/S, 2300' x 90' (dirt & sand compact) remarks - 3' fence at each end. (7-23)

MOFFETT FIELD-SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)

NEEDLES-RADIO: About Mar 15, VOR will be shut down until approx Apr 15 - conversion to VORTAC. (1-24) Durg shutdown, the following MEA's will be unusable: V12, 1518 Daggett-Drake; V12N Dawes Station Int-Daggett; V12S Needles-Prescott; V138 Blythe-Las Vegas, Ariz; V208 Cones Int-Needles; V237 White Hills Int-Needles; V1520 Daggett - Prescott. In addition the Hackberry, Peacock, Dawes Station, Clark and Silver Lake reporting points will be unusable. The White Hills Int. is temporarily redesignated as the Mormon Mesa 169° mag radial and the Las Vegas 105° mag radial. The Union Pass Int. is temp redesignated as the Goffs 064° mag radial and the 181° mag bearing to Needles LF rng. The MEA on V210 Daggett-Godds will be 8500'. (1-24)

**NORTH SACRAMENTO-CITY ARPT: Abandoned. (12-1)

OAKLAND-SPECIAL NOTICE: Pilots pproposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF coverage 40 n mi at MEA xcpt 020°-050°, 8000'. (1-17)

OAKLAND-METROPOLITAN OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 7000'. About Mar 3, rcvr 122.5 mc will be chgd 122.6 mc. (2-14)

CALIFORNIA: **OAKLAND-METROPOLITAN OAKLAND INTNL ARPT: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd.
OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at MEA. (1-16)
OJAI-HENDERSON ARPT: Caution - construction, hazardous. (1-31)
ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)
ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000' 150°-180°, 35 n mi at 9000'.
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)
POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W - adj to Pomona Heliport. (9-20)
POMONA-BRACKETT FLD: Operative during reconstruction. Caution - men and equip.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30) Jan 13, VOR shut down - conversion to VORTAC. Durg this period, the following V arwys will be unusable IFR conditions: V23 FJS-Sutter Buttes Int., V25 Geyserville Int-LMT, V195 ILA-FOT. V107 UKI-RBL usable substituting RBL LF rng for VOR. (11-27)
RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.
**SAN ARDO FLD #2: ABANDONED. (6-3)
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

EL PASO, TEX., -INTERNATIONAL ARPT, RADAR Proced. No. 1, Original Effective 15 March 58: Under "Ceiling and Visibility Minimums", add "Surveillance Approach".

DALLAS, TEX., -LOVE FIELD, ADF Proced. No. 2, Amdt. 1, Effective 15 March 58: Change the line "Crs and distance, DAL FM to airport, 006-4.1" to read "Crs and distance, DAL FM to RBn, 356-3.3".

Change the line, "Crs and distance, DAL RBn to airport, 006-1.2" to read "Crs and distance, DAL RBn to airport, 358-1.4".

The distance in the missed approach should read "within 1.4 mi." in lieu of "within 1.2 mi."

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots
Detroit LFR	FRD RBn	direct	2000	T-dn	300-1	300-1	200-½
Salem VOR	FRD RBn	direct	2000	C-dn	400-1	500-1	500-1½

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
■ Information deleted.
✓ New facility has been added to tabulation and listed on page 31 until placed in proper sequence.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR . . . . Air Route Surveillance Radar
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, CAA
CI . . . . . Control Tower, (City, County, Private, etc.)
CM . . . . . Control Tower, (Military, listing only civil frequencies available)
→ CONSOLAN LF/MF long range navigation aid; aircraft must have BFO oscillator.
D. . . . . Distantly controlled
DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA . . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR . . . Low power VOR (with standby equipment)
MA. . . . . Range (adcock, vertical radiators), power less than 50 watts
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . . VHF middle marker
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control
→ RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and/or voice
T. . . . . Teletype

TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach (Military Equivalent of Combined ASR and PAR Equipment). ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control (RAPCON), page 4. For ATCRBS see note page 4.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on IFF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,650 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: See page 17, Flight Information Manual, Vol II, dated August 15, 1957

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded. Other transmitting frequencies listed are guarded plus 3023.5kc, 122.5 mc, unless 122.7 mc is shown under Remarks. Transmit and guard 121.5 mc all locations.

** RADAR BEACONS - (continued from page 3)

ATCRBS - Air traffic control radar beacon transponders (ATC transponders) are being installed in some civil aircraft to participate in the forth-coming in-service evaluation of this beacon system. Since the ATC transponder can be used with Mode 3 of the IFF Mark X system, the following will govern the operation of the ATC transponder in order to reduce interference and clutter on IFF Mark X radar displays.

1. Within the environment test area designated within a 200-mile radius of the following locations, the ATC transponder will be operated in accordance with the request of air traffic control. Ground equipment installations will start approximately October 1, 1957, at the following locations: New York center; Idlewild, La Guardia and Newark towers. Installation at the Washington center and tower, the Chicago center and O'Hare tower and the Norfolk center will follow as soon as equipment becomes available. Notification of the start of the actual evaluation will be made at a later date.

2. Air traffic control transponders will be adjusted to Code 00 and turned on only in aircraft operating on an IFR flight plan unless otherwise requested by any ground station.

3. When filing a domestic IFR flight plan for an aircraft equipped with a functioning ATC transponder, this shall be made known by adding the word "transponder" immediately following the aircraft identification. Examples: "Braniff six transponder".

4. Aircraft using the "Stargazer" service offered by the Air Defense Command will advise the radar operator of the status of the ATC transponder and will operate it in accordance with the operator's request regardless of the type of flight being conducted.

5. Aircraft operating from the domestic area will comply with (3) above. Aircraft entering the domestic control area will only advise oceanic air traffic control of the status of the Air Traffic Control transponder when making the first radio report to the United States oceanic air traffic control centers.

DIRECTORY OF AIRPORTS – LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.
2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.
3. When city and airport names are identical, the airport name is omitted to conserve space.
4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport),
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.
(5) All airports with CAA facilities.
(6) All airports on which Federal funds have been expended under the FAAP and the Development of Landing Areas - National Defense.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not included as "Public Use" (see definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of [illegible] to the airport and is stated to [illegible]

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon) (Green and white, split-beam and other types) Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach
7a, 7b, 7c - High intensity instrument approach, U. S. National Standard configuration A, B, or C. See page 71 for diagrams.

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are [illegible] obstruction lights have not

SERVICING

S1: Storage
S2: Storage, minor airframe repairs
S3: Storage, minor airframe & minor powerplant repairs
S4: Storage, major airframe & minor powerplant repairs
S5: Storage, major airframe & major powerplant repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

Unicom (Aeronautical Advisory Station transmitting and receiving, during the airport hours only, as follows):
U - 122.8 mc (for airports without a control tower); and
X - 123.0 mc (for airports with a control tower).

FUEL OCTANE

F1: 80 oct., at least
F2: 80/87 oct., and lower
F3: 91/96 oct., and lower
F4: 100/130 oct., and lower
F5: 115/145 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that [illegible]

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120, CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notice to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airman: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, heedless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..--.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel.

USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200'MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

HERNDON, VIRGINIA, VOR SHUT-DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 223: HRN VOR - Hampton VHF Int	Arcola LFR direct HAR VOR	3000
Victor 39: EMI VOR - Remington VHF Int	Red 33	as published
Victor 4: HRN VOR - FRR VOR	Red 18	as published

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING VHF REPORTING POINTS	SUBSTITUTE VHF REPORTING POINTS	MEA
Sugar Loaf	MRB VOR 107 M radial; EMI VOR 245 M radial	3000
Keymar	MRB VOR 078 M radial; HAR VOR 201 M radial; EMI VOR 295 M radial;	3000
Lisbon	Use Lisbon LF Int	as published
Fairland	DCA TVOR 023 M radial; BAL VOR 244 M radial	3000
Springfield	Use Springfield LF Int	as published
Remington	Use Remington LF Int	as published
Plains	FRR VOR 118 M radial; MRB VOR 170 M radial; (Holding Pattern: NW of the substitute intsxn on the Front Royal 118 radial. Right turns. One minute pattern)	4000
Leesburg	FRR VOR 094 M radial; MRB VOR 147 M radial	4000
Manassas	Brooke VOR 003 M radial; DCA TVOR 256 M radial	3000
Quarry	SW crs of the ARV LFR; FRR VOR 118 M radial	4000

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

HUGUENOT, NEW YORK, VOR SHUT-DOWN: During the period of shut-down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 146: HUO VOR - Newburgh VHF Int	None	----
Victor 126: HUO VOR - ILT VOR	ILT VOR 294 M radial to the point of intsxn with DNY VOR 171 M radial (Victor 249)	5000

Victor 249: HUO VOR - DNY VOR	DNY VOR 171 M radial to the point of intsxn with the AVP VOR 105 M radial	5000

During the period of shut down, the following non-compulsory reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Central Valley	ILT VOR 288 M radial and POU VOR 234 M radial	3000
Huguenot VOR	AVP VOR 105 M radial and STW VOR 035 M radial	5000
Greenwood	POU VOR 234 M radial and ILT VOR 280 M radial (Holding Pattern: NE of the Greenwood Int on the POU VOR 234 radial. Left turns. One minute pattern)	3000

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2000'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2000' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

BOSTON, MASS. VOR SHUT DOWN: During the period of shut down, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA

CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulations was effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

TEST OF EXPANDED RADAR SERVICE - ANDREWS AFB AREA: Effective 0001 EST 15 Jan 1958 and continuing until 2359 EST 15 Mar 1958 a test will be conducted to gather operational experience and information concerning the practicability of providing expanded radar traffic control service (separation and/or traffic information) to aircraft operating VFR in the vicinity of Andrews AFB. Test activity will be conducted by Andrews approach control within the Andrews approach control area which generally lies between the 060° radial clockwise to the 165° radial of the Washington TVOR within a 30 mile radius E of Andrews AFB. During the test period all aircraft operating VFR in or through this area at and below 10,000 MSL are urged to contact Andrews approach control. Radar will be utilized insofar as possible to provide traffic information and/or radar separation to participating aircraft in the following manner:

1. Military aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic information and radar separation, as required, from all other observed traffic.
2. Civil aircraft operating VFR in the area at or below 2500 MSL will be provided pertinent traffic advisory information.
3. All aircraft operating VFR in the area above 2500 MSL and up to 10,000 MSL inclusive will be provided pertinent traffic advisory information only.
4. Military aircraft should initiate contact on 355.8 mc or 136.8 mc. Civil aircraft may call on 123.7 mc or 122.1 mc and receive on 123.7 mc. Pilots should advise approach control of their position, altitude, heading and intentions during first radio contact so that controllers may plan proper route through the area. Traffic from the east and northeast on Victor 16 or Green 5 is requested to initiate call at Kent Island or over eastern shore of Chesapeake Bay. Traffic from the southeast on Blue 56 should initiate contact in vicinity of Coles Point. Traffic landing at Washington National, Bolling or Anacostia will be advised when to change to appropriate tower frequency.
5. VFR flights departing from Washington National, Bolling or Anacostia that will penetrate test area should contact Andrews approach control as soon as practicable after leaving respective tower frequency and prior to entering area. Aircraft departing airports within the area are requested to initiate contact as soon as practicable after takeoff.
6. IFR traffic operating through the area will be handled in the normal manner by CAA traffic control facilities and should not contact Andrews approach control unless instructed to do so by ATC. There will be no change in established local traffic patterns during the test period.

The above services are designed to aid pilots in avoiding collision and should not be construed as relieving the pilot of any responsibilities and requirements governing VFR flight as established in pertinent military or Civil Air Regulations. Radar traffic information will be provided in accordance with the U.S. Standard Manual of Radar Air Traffic Control Procedures.

Comments from pilots participating in the test are solicited and will be most welcome. Please address correspondence to: Commander, 2045th AACS Group, Attention: Flight Facilities Officer, Andrews Air Force Base, Washington 25, D.C.

DAYTON, OHIO VOR SHUT DOWN: The Dayton, Ohio VOR will be shut down on or about Feb 3, 1958, for approximately 21 days. During outage the following substitute route structure in effect:

(1) V275 CVG VOR to FDY VOR replaced by CVG VOR direct RID VOR direct FDY VOR, MEA 3000.

(2) V246 DAY VOR to MFD VOR replaced by SIE VOR 226 M radial from the point of Int with the W crs of the CMH LFR direct SIE VOR direct MFD VOR, MEA 3000.

(3) V12 1512 and 1514 DAY VOR to APE VOR replaced by Green arwy 4 to the APE VOR 246 M radial direct to the APE VOR, MEA as published.

(4) V12 south DAY VOR to London VHF Int, MEA - none.

(5) V12 1512 and 1514 DAY VOR to IND VOR replaced by Green arwy 4, MEA as published.

(6) V12 north DAY VOR to Cowan VHF Int, MEA - none.

(7) V55 west DAY VOR to Portland VHF Int, MEA - none.

(8) V55 DAY VOR to Coldwater VHF Int replaced by RID VOR direct radial to the Coldwater VHF Int, MEA 3000.

Following temporary non compulsory reporting points established:

Springhills, unusable; Plain City, unusable; Mason CVG VOR 045 M radial RID VOR 128 M radial, MEA 2500; Troy LF Int, MEA as published; Mechanicsburg LF Int, MEA as published; Englewood. ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

(4 March 1958)

APPLETON, OHIO VOR SHUT DOWN During the period of shutdown, the following substitute route structure and MEA's will be in effect

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA

In addition to the establishment of the temporary non-compulsory reporting points, the following temporary holding patterns have been approved:

INTERSECTION	HOLDING PATTERN
Georgetown	Hold on CVG omnirange on 179 radial between LOU omnirange 074 radial and point one minute N. Right turn. MEA 3000
Winchester	Hold on LEX RBN on 256 M bearing between CVG omnirange 150 radial and point 2 min E. Right turn. MRA 4000.
Mt. Eden	Hold on LOU omnirange on 097 radial between CVG omnirange 196 radial and point 2 min E. Right turn. MRA 4000.
Campbellsville	Hold on LOU omnirange on 167 radial between BWG omnirange 050 radial and point 2 min S. Right turn. MEA 3000.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective April 10, 1958, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Blue civil arwy No. 2 (Montgomery, Ala. to Erie, Pa.) is revoked.

(2) Blue civil arwy No. 3 (Miami, Fla. to Sault Ste Marie, Mich.) is amended by changing the portion which reads: "the Maxwell AFB, Montgomery, Ala. rdo rng stn to the instxn of the N crs of the Maxwell AFB, Montgomery, Ala. rdo rng and the E crs of the Birmingham, Ala. rdo rng." to read: "to the Maxwell AFB, Montgomery, Ala. rdo rng stn." (Note: Deleted the portion of Blue 3 between Maxwell AFB rdo rng stn and the Eden fan marker).

(3) VOR civil arwy No. 6 (Oakland, Calif. to New York, N.Y.) is amended by changing the portion which reads: "Battle Mountain, Nev. omni stn; Elko, Nev. omni stn; Wells, Nev. omni stn;" to read: "Battle Mountain, Nev. omni stn, including a N alternate via the intsxn of the Lovelock omnirange 053° and the Battle Mountain omnirange 264° radials; Elko, Nev. omni stn; Wells, Nev. omni stn, including a N alternate from the Battle Mountain omni stn to the Wells omni stn via the intsxn of the Battle Mountain omnirange 062° and the Wells omnirange 252° radials;" (Note: Added V6N between relocated Lovelock VOR and Battle Mountain VOR. Added V6N between Battle Mountain VOR and Wells VOR.)

(4) VOR civil arwy No. 15 (Galveston, Tex. to Minot, N. Dak.) is amended by changing the portion which reads: "From the Kansas City, Mo. omni stn via the St Joseph, Mo. omni stn, including an E alternate via the intsxn of the Kansas City omnirange 020°T and the St Joseph omnirange 132°T radials; Omaha, Nebr. omni stn, including an E alternate; Sioux City, Iowa, omni stn, including an E alternate and also a W alternate via the intsxn of the Omaha omnirange 320°T and the Sioux City omnirange 175°T radials;" to read: "From the Kansas City, Mo. omni stn via the St Joseph, Mo. omni stn including an E alternate via the intsxn of the Kansas City omnirange 020° and the St Joseph omnirange 132° radials; intsxn of the St Joseph omnirange 343° and the Neola omnirange 157° radials; Neola, Iowa, omni stn; intsxn of the Neola omnirange 341° and the Sioux City omnirange 145° radials; Sioux City, Iowa, omni stn;" (Note: Redesignated V15 between St Joseph VOR and Sioux City VOR via Neola VOR. Deleted Omaha VOR from V15. Revoked V15E between St Joseph VOR and Omaha VOR and between Omaha VOR and Sioux City VOR. Revoked V15W between Omaha VOR and Sioux City VOR).

(5) VOR civil arwy No. 205 (Springfield, Mo. to Sioux City, Iowa) is amended to read: "From the Springfield, Mo. omni stn via the Blue Springs, Mo. omni stn, including a W alternate via the intsxn of the Springfield omnirange 316° and the Blue Springs omnirange 178° radials; Kansas City, Mo. omni stn; St Joseph, Mo. omni stn; intsxn of the St Joseph omnirange 343° and the Neola omnirange 157°radials; intsxn of the Neola omnirange 157° and the Omaha omnirange 124°;Omaha, Nebr. omni stn; to the Sioux City, Iowa, omni stn, including a W alternate via the intsxn of the Omaha omnirange 320° and the Sioux City omnirange 175° radials. The portion of this arwy which lies within the geographic limits of, and between the designated altitudes of, the Lake City Restricted Area (R-307) is excluded during its time of designation." (Note: Added new portion to V205 from Kansas City VOR to Sioux City VOR. The portion of V205 from Kansas City VOR to St. Joseph VOR is a part of existing V15).

(6) VOR civil arwy No. 296 (Asheville, N.C. to Charlotte, N.C.) is added to read: "From the Asheville, N.C. omni stn to the Charlotte, N.C. omni stn." (Note: new arwy)

(7) VOR civil arwy No. 3 (Key West, Fla. to Presque Isle, Maine) is amended by changing the portion which reads: "intsxn of the Hartford omnirange 044°T and the Boston omnirange 257°T radials;" to read: "point of intsxn of the Hartford omnirange 044° radial with the Gardner, Mass. omnirange direct radial to the Providence, R.I. omni stn;" (Note: Minor redesignation of V3 to retain Milbury Int on V3 and V151.)

(8) VOR civil arwy No. 22 (New Orleans, La. to Jacksonville, Fla.) is amended by changing the portion which reads: "to the Jacksonville, Fla. omni stn, including a N alternate from the Marianna omni stn to the Jacksonville omni stn via the point of intsxn of the Marianna omni range 094°T with the Albany, Ga. omnirange 152°T radials and the point of intsxn of the Tallahassee omnirange 091°T with the Valdosta, Ga. omnirange 234°T radials." to read: "to the Jacksonville, Fla. omni stn, including a N alternate from the Marianna omni stn to the Jacksonville omni stn via the point of intsxn of the Marianna omnirange 092° and the Albany, Ga., omnirange 152° radials and the point of intsxn of the Tallahassee omnirange 091° and the Valdosta, Ga. omnirange 236° radials." (Note: Changed Marianna 094°T radial of V22N to 092° T.)

(9) VOR civil arwy No. 146 (Wilkes-Barre, Pa. to Providence, R.I.) is amended by changing the caption and by changing the portion which reads: "to the point of intsxn of the Poughkeepsie omnirange 079°T and the Norwich, Conn., omnirange 347°T radials." to read: "point of intsxn of Poughkeepsie omnirange 079° and the Norwich, Conn. omnirange 348° radials; to the Providence, R.I. omni stn." (Note: Extended V146 from Woodstock Int to Providence VOR

(10) VOR civil arwy No. 151 (Providence, R.I. to Keene, N.H.) is amended to read: "From the Providence, R.I. omni stn via the Gardner, Mass. omni stn; to the Keene, N.H. nondirectional rdo bcn." (Note: Redesignated V151 to start at Providence VOR rather than Woonsocket Int.)

(11) VOR civil arwy No. 167 (New York, N.Y. to Providence, R.I.) is amended to read: "From the point of intsxn of the Colts Neck, N.J. omnirange 151° and the Idlewild omnirange 195° radials via the Idlewild, N.Y. omni stn; Hartford, Conn. omni stn; intsxn of the Hartford omnirange 076° and the Providence omnirange 270° radials; to the Providence, R.I. omni stn." (Note: Extended V167 from Hartford VOR to the Providence VOR.)

(12) VOR civil arwy No. 222 (El Paso, Tex. to Hickory, N.C.) is amended to read: "From the El Paso, Tex. omni stn via the Salt Flat, Tex. omni stn; Culberson, Tex. omni stn; Ft Stockton, Tex. omni stn; Junction, Tex omni stn; point of intsxn of the San Antonio omnirange 334° and the Lometa, Tex. omnirange 192° radials; San Antonio, Tex. omni stn; point of intsxn of the Austin, Tex. omnirange 109,° and the College Station, Tex. omnirange 202° radials; Houston, Tex. omni stn; Beaumont, Tex. omni stn; Lake Charles, La. omni stn; intsxn of the Lake Charles omnirange 058° and the McComb omnirange 251° radials; to the McComb, Miss. omni stn. From the Norcross, Ga. omni stn via the intsxn of the Norcross omnirange 014° and the Royston, Ga., omnirange 270° radials; Asheville, N.C. omni stn; Hickory, N.C. omnirange stn; to the point of intsxn of the Hickory omnirange 049° radial with the Charlotte, N.C. omnirange direct radial to the Pulaski, Va. omni stn." (Note: Added new portion to V222 from Houston VOR to McComb VOR. The portion from Houston VOR to Lake Charles VOR is also V20. Added new portion to V222 from Norcross VOR to Elkin Int via Silver City Int, Asheville VOR and Hickory VOR.)

(13) VOR civil arwy No. 266 (Hickory, N.C. to Lawrenceville, Va.) is amended to read: "From the Hickory, N.C. omni stn via the South Boston, Va. omni stn; to the Lawrenceville, Va. omni stn." (Note: Added new portion to V266 from Hickory VOR to South Boston VOR. Revoked V266 from Waverly Int to Elizabeth City VOR.)

(14) VOR civil arwy No. 282 (Cofield, N.C. to Elizabeth City, N.C.) is revoked.

CONTROL AREAS:

(1) Blue civil arwy No. 2 (Montgomery, Ala. to Erie, Pa.) is revoked.

(2) VOR civil arwy No. 205 (Springfield, Mo. to Sioux City, Iowa) is amended to read: "All of VOR civil arwy No. 205 including a W alternate."

(3) VOR civil arwy No. 222 (El Paso, Tex. to McComb, Miss.) is amended to read: "All of VOR civil arwy No. 222."

(4) VOR civil arwy No. 296 (Asheville, N.C. to Charlotte, N.C.) is added to read: "All of VOR civil arwy No. 296."

(5) VOR civil arwy No. 146 (Wilkes-Barre, Pa. to Providence, R.I.) is amended to read: "All of VOR civil arwy No. 146."

(6) VOR civil arwy No. 151 (Providence, R.I. to Keene, N.H.) is amended to read: "All of VOR civil arwy No. 151."

(7) VOR civil arwy No. 167 (New York, N.Y. to Providence, R.I.) is amended to read: "All of VOR civil arwy No. 167."

(8) VOR civil arwy No. 266 (Hickory, N.C. to Lawrenceville, Va.) is amended to read: "All of VOR civil arwy No. 266."

(9) VOR civil arwy No. 282 (Cofield, N.C. to Elizabeth, N.C.) is revoked.

CONTROL AREA EXTENSIONS:

Correction Note: In F.R. Doc. 58-571 appearing at page 497 of the issue for Saturday January 25, 1958, "601.1448" under Item 5 should read "601.1452" wherever it appears.

(1) (Reno, Nev.) is amended to read: "The airspace within lines 5 mi W of and 13 mi E of and parallel to the N crs of the Reno rdo rng extending to 36 mi N of the rdo rng stn."

(2) (Grand Junction, Colo.) is amended to read: "Within 5 mi either side of a line bearing 305°T extending from Walker Arpt, Grand Junction, Colo. to its intsxn with VOR civil arwy No. 81."

(3) (Key West, Fla.) is amended to read: "From the Key West, Fla. rdo rng stn to the northern bndry of the Havana, Cuba, Control Area (24th parallel), extending 5 mi either side of a rhumb line between the Key West rdo rng stn and the Santa Fe, Havana, Cuba, nondirectional rdo bcn, excluding the portion below 2000'MSL which lies outside the continental limits of the United States." (Note: Warning Area (W-174) and Caution Area (C-175) being amended concurrently to coincide with Control Area extension.)

(4) (Sault Ste. Marie, Mich.) is amended to read: "The airspace over United States territory within a 34 mi radius of Kinross Air Force Base, Sault Ste. Marie, Mich. excluding the portion which lies within the geographic limits of, and between the designated altitudes of, the Hammond Bay restricted area (R-424) during its time of designation."

(5) (Rosewell, N. Mex.,) is amended to read: "The airspace within a 45-mile radius centered on the Walker AFB, Rosewell, N. Mex."

(6) (Miami, Fla.) is amended by changing the portion which reads: "That airspace S of Miami bounded on the E by Miami control area extension (601.1232)" to read: "That airspace S of Miami bounded on the N by Blue civil arwy No. 3 and Amber civil arwy No. 7 on the E by Miami control area extension (601.1232)", (Note: Reworded to correct N bndry between Miami and Blue 19)

(7) (Clovis, N. Mex.) is amended to read: "The airspace within a 30 mi radius of Clovis AFB. The portions of this control which lie within the geographic limits of, and between the designated altitudes of, the Melrose restricted areas (R-185) and (R-529) are excluded during their times of designation." (Note: R-529 being designated concurrently.)

CONTROL ZONES:

(1) (Fargo, N. Dak.) is amended to read: "Within a 5 mi radius of the Fargo-Hector Arpt, within 2 mi either side of the E crs of the Fargo rdo rng extending from the rdo rng stn to the

Glyndon fan mrkr, within 2 mi either side of the W crs of the Fargo rdo rng extending from the rdo rng stn to a point 10 mi W of the West Fargo fan mrkr, and within 2 mi either side of the Fargo ILS lclzr front crs extending from the lclzr to a point 12 mi S of the outer mrkr."

(2) (Tucson, Ariz.) is amended to read: "Within a 5 mi radius of Tucson Municipal Arpt, within a 5 mi radius of Davis-Monthan AFB and within 2 mi either side of the 130°T radial of the AFB TACAN extending from the TACAN facility to a point 10 mi SE."

(3) (Craig AFB, Selma, Ala) is revoked.

(4) (Three mile radius zone) is amended by changing the arpt name "Ellensburg, Wash.: Bowers Field." to read: "Ellensburg, Wash.,: Ellensburg Municipal Arpt."

(5) (Five mile radius zone) is amended by adding the following airport: "Selma, Ala.: Craig AFB."

REPORTING POINTS:

(1) Red civil arwy No. 12 (Joliet, Ill. to Erie, Pa.) is amended by adding the following reporting point: "Erie, Pa., rdo rng stn." (Note: This reporting point deleted with revocation of Blue 2, but added to Red 12 until rescission of portion Red 12 between Windsor and Erie has been finalized with Canadian DOT, i.e., date of recission, etc.)

(2) Blue civil arwy No. 2 (Montgomery, Ala. to Erie, Pa.) is revoked.

VOR REPORTING POINTS:

(1) VOR domestic reporting points is amended by adding the following reporting points:

(a) Sayre, Okla. omni stn (For acft operg at all alts)

(b) Allendale, S. C. omni stn (For acft operg at all alts)

(c) La Grange Int: The intsxn of the New Bern, N.C., omnirange 297°T (302°M) and the Wilmington, N.C., omnirange 005°T (009°M). (For acft operg at all alts)

(d) Neola, Iowa omni stn (For acft operg at all alts)

(e) Navarro Int: The intsxn of the Leona, Tex. omnirange 338°T (329°M) and the Waco, Tex. omnirange 067°T (058°M) radials. (For acft operg at all alts)

(2) VOR domestic reporting points is amended by changing the following reporting points to read: (a) Millbury Int: The intsxn of the Hartford, Conn., omnirange 044°T (057°M) with the Gardner, Mass. omnirange direct radial to the Providence, R.I., omni stn.

HOLDING PATTERNS: The following holding patterns have been designated, redesignated or cancelled and shall become effective April 10, 1958:

DESIGNATED:

(1) LIDO, N.Y. (LF & VHF) INTSXN - direction of holding - SW on SW crs of the Hempstead, N.Y. LFR; direction of turns - left; time - 1 min; min alt - 1500'.

(2) COLUMBUS, GA. (LFR) - direction of holding - SW on SW crs; direction of turns - left; time - 2 mins; min alt - 1600'.

(3) COLUMBUS, GA. (ILS/LOM) - direction of holding - SW on 232°M brng from LOM; direction of turns - left; time - 1 min; min alt - 2000'.

(4) HASLET, TEX. (Rbn) - direction of holding - NW on 327°M brng from Rbn; direction of turns - left; time - 1 min; min alt - 2000'.

(5) GREENWOOD, TEX. (VHF) INTSXN - direction of holding - SE on 329°M radial of the Britton, Tex. VOR; direction of turns - right; time - 1 min; min alt - 2600'.

(6) KELLER, TEX. (VHF) INTSXN - direction of holding - NW on 329°M radial of the Britton, Tex. VOR; direction of turns - left; time - 1 min; min alt - 2000'.

(7) WEST PALM BEACH, FLA. (LFR) - direction of holding - W on W crs; direction of turns - right; time - 2 mins; min alt - 1200'.

(8) CARDWELL, FLA. (LF) INTSXN - direction of holding N on N crs Perrine, Fla. LFR direction of turns - right; time - 2 mins.

(9) NEW RIVER, FLA. (LF) INTSXN - direction of holding - N on N crs Perrine, Fla. LFR; direction of turns - right; time - 2 mins.

(10) FT LAUDERDALE, FLA. (LF) INTSXN - direction of holding - S on S crs W. Palm Beach, Fla. LFR; direction of turns - right; time - 2 mins.

(11) HOLLYWOOD, FLA. (LF) INTSXN - direction of holding - N on S crs W. Palm Beach, Fla. LFR; direction of turns - right; time - 2 mins.

(12) FOWEY, FLA. (LF) INTSXN - direction of holding - SE on 115°M outbnd (295°M inbnd) brng; direction of turns - right; time - 2 mins; min alt - 1500'.

(13) ELLIOTT, FLA. (LF) INTSXN - direction of holding - SE on SE crs Miami, Fla. LFR; direction of turns - right; time - 2 mins.

(14) HOMESTEAD, FLA. (Rbn) - direction of holding - S on 173°M outbnd (353°M inbnd) brng; direction of turns - right; time - 2 mins; min alt - 1200'.

(15) PERRINE, FLA. (LFR) - direction of holding - SW on SW crs; direction of turns - right; time - 2 mins.

(16) TAMIAMI, FLA. (Rbn) - direction of holding - W on W crs Miami, Fla. LFR; direction of turns - right; time - 2 mins; min alt - 1200'.

(17) KATY, FLA. (VHF) INTSXN - direction of holding - NE on 059°M radial of the Tampa, Fla. VOR; direction of turns - right; time - 2 mins; min alt - 1700'.

(18) LAKELAND, FLA. (VOR) - direction of holding - SE on 150°M radial; direction of turns - left; time - 2 mins; min alt - 20,000'. (jet holding).

(19) PARRISH, FLA. (VHF) INTSXN - direction of holding - SE on 131°M radial of the Tampa, Fla. VOR; direction of turns - right; time - 2 mins; min alt - 1500'.

(20) MacDILL, FLA. (ILS/LOM) - direction of holding - NE on SE crs of the ILS; direction of turns - right; time - 2 mins; min alt - 1500'.

(21) EGMONT, FLA. (Rbn) - direction of holding - SW on 210°M outbound (030°M inbnd) brng; direction of turns - right; time - 2 mins; min alt - 1200'.

(22) CATFISH, FLA. (VHF) INTSXN - direction of holding - W on 275°M radial Tampa, Fla. VOR; direction of turns - right; time - 2 mins; min alt - 1500'.

(23) HUDSON, FLA. (VHF) INTSXN - direction of holding - N on 348°M radial of the Tampa, Fla. VOR; direction of turns - right; time - 2 mins; min alt - 2000'.

(24) COLLINS, TEX. (VHF) INTSXN - direction of holding - SW on SW crs of the San Antonio, Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt - 2100'.

(25) CREOLE, LA. (VHF) INTSXN - direction of holding - E on 080°M radial of the Baton Rouge, La. VOR; direction of turns - right; time - 1 min; min alt - 1400'.

(26) BLAIR, NEBR. (VHF) INTSXN - direction of holding - N on 166°M radial of the Sioux City, Iowa VOR; direction of turns - right; time - 1 min; min alt - 2500'.

(27) GRETNA, NEBR. (VHF) INTSXN - direction of holding - W on 256°M radial of the Omaha, Nebr. VOR; direction of turns - right; time - 1 min; min alt - 2600'.

(28) EMERSON, IOWA (VHF) INTSXN - direction of holding - SE on 148°M radial of the Neola, Iowa VOR; direction of turns - left; time - 1 min; min alt - 2500'.

(29) TIGERVILLE, S. C. (VHF) INTSXN - direction of holding - N on 190°M radial of the Asheville, N.C. VOR; direction of turns - right; time - 1 min; min alt - 5000'.

(30) TIGERVILLE, S. C. (VHF) INTSXN - direction of holding - S on 199°M radial of the Asheville, N.C. VOR; direction of turns - left; time - 1 min; min alt - 5000'.

(31) LOGANSPORT, LA. (VHF) INTSXN - direction of holding - N on 183°M radial of the Shreveport, La. VOR; direction of turns - right; time - 1 min; min alt -3400'.

(32) BARRETT LAKE, CALIF. (VHF) INTSXN - direction of holding - E on 083°M radial of the San Diego, Calif. VOR; direction of turns - left; time - 1 min; min alt - 6000'.

(33) NAUTILUS, CALIF. (VHF) INTSXN - direction of holding - W on 237°M radial of the San Diego, Calif. VOR; direction of turns - right; time - 1 min; min alt - 1500'.

(34) NAUTILUS, CALIF. (LF) INTSXN - direction of holding - W on W crs of the San Diego, Calif. LFR; direction of turns - right; time - 1 min; min alt - 1500'.

(35) PROMONTORY PT., UTAH (VHF) INTSXN - direction of holding - W on 259°M radial of the Odgen, Utah VOR; direction of turns - left; time - 2 mins; min alt - 9000'.

(36) CORINNE, UTAH (Rbn) - direction of holding - N on 148°M inbnd (328°M outbnd) brng; direction of turns - right; time - 2 mins; min alt - 11,000'.

(37) NEWARK, N.J. (LFR) - direction of holding - SW on SW crs; direction of turns - right; time - 1 min.

REDESIGNATED:

(1) LUCAS, TEX. (VHF) INTSXN - direction of holding - NE on 233°M radial of the Dallas Tex. VOR; direction of turns - left; time - 1 min; min alt - 2000'.

(2) NEW CASTLE CO. DEL. (ILS/LOM) - direction of holding - S on S crs ILS; direction of turns - right; time - 1 min; min alt - 1600'.

(3) MARSHALL, PA. (VHF) INTSXN, - direction of holding - SW on SW crs Philadelphia, Pa. LFR; direction of turns - right; time - 1 min; min alt - 1800'.

(4) LA VERNIA, TEX. (Rbn) - direction of holding - SE on 323°M inbnd brng; direction of turns - left; time - 2 mins; min alt - 2000'.

(5) RIVERTON, UTAH(FM) - direction of holding - S on S crs Salt Lake City, Utah LFR; direction of turns - left; time - 2 mins; min alt - 11,000'.

CANCELLED:

(1) LIDO, N.Y. (Rbn) - direction of holding - SW on SW crs of the Hempstead, N.Y. LFR direction of turns - left; time - 1 min; min alt - 1500'.

(2) BAY SHORE, FLA. (LF) INTSXN - direction of holding - N on S crs W. Palm Beach, Fla. LFR; direction of turns - right; time - 2 mins; min alt - 1500'.

(3) KROME, FLA. (LF) INTSXN - direction of holding - W on W crs Miami, Fla LFR; direction of turns left; time - 2 mins; min alt - 1100'.

(4) DUNCAN, TEX. (LF & VHF) INTSXN - direction of holding - SW on SW crs of the San Antonio, Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt - 2100'.

(5) BIG SPRING, TEX. (VOR) - direction of holding - N on 360°M radial; direction of turns - left; time - 2 mins; min alt - 3700'.

(6) RANDOLPH, TEX. (LFR) - direction of holding - SE on SE crs; direction of turns - right; time - 2 mins; min alt - 2000'.

(7) CORINNE, UTAH (Rbn) - direction of holding - S on 328°M radial of the Odgen, Utah, VOR; direction of turns - left; time - 2 mins; min alt - 11,000'.

(8) NEWARK, N.J. (LMM) - direction of holding - S on S crs ILS; direction of turns - left; time - 1 min.

ON REQUEST REPORTING POINTS: The following on request reporting points are designated, redesignated, renamed, renamed and redesignated and cancelled and shall become effective April 10, 1958:

DESIGNATED:

(1) ANDREWS, TEX. (VHF) INTSXN - intsxn of the 120°M radial of the Hobbs, N. Mex. VOR and the 018°M radial of the Wink, Tex. VOR.

(2) BARRETT LAKE, CALIF. (VHF) INTSXN - intsxn of the 083°M radial of the San Diego, Calif. VOR and the 114°M radial of the Oceanside, Calif. VOR.

(3) BLAIR, NEBR. (VHF) INTSXN - intsxn of the 166°M radial of the Sioux City, Iowa VOR and the 282°M radial of the Neola, Iowa VOR.

(4) BLUFF, IOWA (VHF) INTSXN - intsxn of the SE crs of the Omaha, Nebr. ILS lclzr and the 200°M radial of the Neola, Iowa VOR.

(5) CARSON, IOWA (VHF) INTSXN - intsxn of the 133°M radial of the Neola, Iowa VOR and the 071°M radial of the Omaha, Nebr. VOR.

(6) CLERMONT, GA. (VHF) INTSXN - intsxn of the 236°M radial of the Asheville, N.C. VOR and the 285°M radial of the Royston, Ga. VOR.

(7) COIN, IOWA (VHF) INTSXN - intsxn of the 148°M radial of the Neola, Iowa VOR and the 262°M radial of the Lamoni, Iowa VOR and the 335°M radial of the St Joseph, Mo. VOR.

(8) COLLINS, TEX. (VHF) INTSXN - intsxn of the SW crs of the San Antonio, Tex. ILS lclzr and the 150°M radial of the Kelly AFB, Tex. VOR.

(9) ELLIOTT, IOWA (VHF) INTSXN - intsxn of the 133°M radial of the Neola, Iowa VOR and the 086°M radial of the Omaha, Nebr. VOR.

(10) EMERSON, IOWA (VHF) INTSXN - intsxn of the 148°M radial of the Neola, Iowa VOR and the 115°M radial of the Omaha, Nebr. VOR.

(11) FT. LAUDERDALE, FLA. (LF) INTSXN - intsxn of the S crs of the West Palm Beach Fla. LFR and the 238°M brng to Gator, Fla. Rbn.

(12) FOWEY, FLA. (LF) INTSXN - intsxn of the E crs of the Perrine, Fla. LFR and the 245°M brng to Homestead, Fla. Rbn.

(13) GREENWOOD, TEX. (VHF) INTSXN - intsxn of the 329°M radial of the Britton, Tex. VOR and the 055°M radial of the Ft. Worth, Tex. VOR.

(14) GRETNA, NEBR. (VHF) INTSXN - intsxn of the 227°M radial of the Neola, Iowa VOR and the 256°M radial of the Omaha, Nebr. VOR.

(15) HAMLIN, TEX. (VHF) INTSXN - intsxn of the 047°M radial of the Big Spring, Tex. VOR and the 316°M radial of the Abilene, Tex. VOR.

(16) IVA, S.C. (VHF) INTSXN - intsxn of the 061°M radial of the Athens, Ga. VOR and the 099°M radial of the Royston, Ga. VOR.

(17) JAL, TEX. (VHF) INTSXN - intsxn of the 135°M radial of the Hobbs, N. Mex. VOR and the 015°M radial of the Wink, Tex. VOR.

(18) KELLER, TEX. (VHF) INTSXN - intsxn of the 329°M radial of the Britton, Tex. VOR and the 056°M radial of the Mineral Wells, Tex. VOR.

(19) LIDO, N.Y. (LF & VHF) INTSXN - intsxn of the 117°M radial of the Idlewild, N.Y. VOR and the SW crs of the Hempstead, N.Y. VOR.

(20) LOGANSPORT, LA. (VHF) INTSXN - intsxn of the 183°M radial of the Shreveport, La. VOR and the 115°M radial of the Gregg Co. Tex. VOR.

(21) LOONEY, TEX. (VHF) INTSXN - intsxn of the 257°M radial of the Culberson, Tex. VOR and the 115°M radial of the Salt Flat, Tex. VOR.

(22) MULLEN, TEX. (VHF) INTSXN - intsxn of the 256°M radial of the Waco, Tex. VOR and the 350°M radial of the San Antonio, Tex. VOR. (for acft operg at 27,000'MSL and above)

(23) NAUTILUS, CALIF. (LF) INTSXN - intsxn of the W crs of the San Diego, Calif. LFR and the 354°M brng to Oceanside, Calif. Rbn.

(24) NAUTILUS, CALIF. (VHF) INTSXN - intsxn of the 237°M radial of the San Diego, Calif. VOR and the 173°M radial of the Oceanside, Calif. VOR.

(25) PALOMAR, CALIF. (VHF) INTSXN - intsxn of the 065°M radial of the Oceanside, Calif. VOR and the 125°M radial of the Ontario, Calif. VOR.

(26) PARK CITY, UTAH (VHF) INTSXN - intsxn of the 089°M radial of the Salt Lake City, Utah VOR and the 028°M radial of the Utah Lake, Utah VOR.

(27) ROSS AVE, TEX. (LF) INTSXN - intsxn of the SE crs of the Dallas, Tex. ILS lclzr and the 097°M brng from the Dallas, Tex. Rbn.

(28) SALEM, MO. (VHF) INTSXN - intsxn of the 160°M radial of the Vichy, Mo. VOR and the 258°M radial of the Farmington, Mo. VOR.

(29) SILVER CROWN, WYO. (VHF) INTSXN - intsxn of the 266°M radial of the Cheyenne, Wyo. VOR and the 337°M radial of the Denver, Colo. VOR.

(30) SKIDMORE, MO. (VHF) INTSXN - intsxn of the 335°M radial of the St Joseph, Mo. VOR and the 241°M radial of the Lamoni, Iowa VOR.

(31) SPRAGUE, WASH. (VHF) INTSXN - intsxn of the 210°M radial of the Spokane, Wash. VOR and the 074°M radial of the Ephrata, Wash. VOR.

(32) SQUID, FLA. (VHF) INTSXN - intsxn of the 022°M radial of the Vero Beach, Fla. VOR and the 070°M radial of the Orlando, Fla. VOR. (MRA 7000' - depict flag)

(33) STARDUST, CALIF. (VHF) INTSXN - intsxn of the 242°M radial of the Thermal, Calif. VOR and the 134°M radial of the March, Calif. VOR and the 044°M radial of the Oceanside, Calif. VOR.

(34) TEKOA, WASH. (VHF) INTSXN - intsxn of the 104°M radial of the Spokane, Wash. VOR and the 239°M radial of the Mullan Pass, Mont. VOR.

(35) VALDESE, N.C. (VHF) INTSXN - intsxn of the 328°M radial of the Charlotte, N.C. VOR and the 243°M radial of the Hickory, N.C. VOR.

(36) VANCE, S.C. (VHF) INTSXN - intsxn of the 138°M radial of the Columbia, S.C.VOR and the 060°M radial of the Allendale, S.C. VOR.

(37) WALTERBORO, S.C. (VHF) INTSXN - intsxn of the 092°M radial of the Allendale, S.C. VOR and the 032°M radial of the Savannah, Ga. VOR.

(38) YADKIN, N.C. (VHF) INTSXN - intsxn of the 067°M radial of the Hickory, N.C. VOR and the 283°M radial of the Greensboro, N.C. VOR.

REDESIGNATED:

(1) AMITE, LA. (VHF) INTSXN - intsxn of the SE crs of the Baton Rouge, La ILS lclzr and the 090°M radial of the Baton Rouge, La. VOR.

(2) CALVARY, GA. (VHF) INTSXN - intsxn of the 002°M radial of the Tallahassee, Fla. VOR and the 089°M radial of the Marianna, Fla. VOR.

(3) CHEROKEE, S.C. (VHF) INTSXN - intsxn of the 058°M radial of the Spartanburg, S.C. VOR and the 292°M radial of the Charlotte, N.C. VOR.

(4) CREOLE, LA. (VHF) INTSXN - intsxn of the SE crs of the Baton Rouge, La. ILS lclzr and the 080°M radial of the Baton Rouge, La. VOR.

(5) ELKIN, N.C. (VHF) INTSXN - intsxn of the 283°M radial of the Greensboro, N.C. VOR and the 051°M radial of the Hickory, N.C. VOR.

(6) LUCAS, TEX. (VHF) INTSXN - intsxn of the 233°M radial of the Dallas, Tex. VOR and the 329°M radial of the Britton, Tex. VOR.

(7) NATICK, MASS. (VHF) INTSXN - intsxn of the 128°M radial of the Gardner, Mass. VOR and the 271°M radial of the Boston, Mass. VOR.

(8) QUITMAN, GA. (VHF) INTSXN - intsxn of the 150°M radial of the Albany, Ga. VOR and the 277°M radial of the Valdosta, Ga. VOR.

(9) RODNA, WASH. (VHF) INTSXN - intsxn of the 185°M radial of the Spokane, Wash. VOR and the 093°M brng to Pine City, Wash. Rbn. (retain holding pattern, no change in description)

(10) SHAFTER, CALIF. (VHF) INTSXN - intsxn of the 263°M radial of the Bakersfield, Calif. VOR and the 126°M radial of the Coalinga, Calif. VOR.

(11) SUNSET, GA. (VHF) INTSXN - intsxn of the 236°M radial of the Asheville, N.C. VOR and the 270°M radial of the Spartanburg, S.C. VOR.

(12) WESTBORO, MASS. (VHF) INTSXN - intsxn of the 146°M radial of the Gardner, Mass VOR and the 271°M radial of the Boston, Mass. VOR.

(13) WESTFIELD, MASS. (VHF) INTSXN - intsxn of the 247°M radial of the Gardner, Mass. VOR and the 150°M radial of the Chester, Mass. VOR.

(14) WOONSOCKET, MASS. (VHF) INTSXN - intsxn of the 057°M radial of the Norwich, Conn. VOR and the 345°M radial of the Providence, R.I. VOR.

RENAMED:

(1) EDGEMONT, CALIF. (VHF) INTSXN - intsxn of the 076°M radial of the Ontario, Calif. VOR and the 314°M radial of the March, Calif. VOR. (formerly Box Springs Int)

(2) NEW BOSTON, MICH. (VHF) INTSXN - intsxn of the 153°M radial of the Salem, Mich. VOR and the 023°M radial of the Carlton, Mich. VOR and the 254°M radial of the Windsor, Ont. VOR. (formerly Wayne Int) For record purpose only also change name of holding pattern. No change in description.

(3) STARDUST, CALIF. (LF) INTSXN - intsxn of the SE crs of the Riverside, Calif. LFR and the 222°M brng to Oceanside, Calif. Rbn. (formerly Vail Int)

(4) STONY CREEK, MICH. (VHF) INTSXN - intsxn of the 210°M radial of the Salem, Mich. VOR and the 264°M radial of the Windsor, Ont. VOR. (formerly Saline Int) For record purpose also change name for holding pattern. No change in description.

RENAMED and REDESIGNATED:

(1) SCOTTS HILL, TENN. (VHF) INTSXN - intsxn of the 100°M radial of the Jacks Creek Tenn. VOR and the 234°M radial of the Graham, Tenn. VOR. (formerly Clifton Int)

CANCELLED:

(1) ALLENDALE, S.C. (VOR) - changed to compulsory

(2) BIXBY, MO. (VHF) INTSXN - intsxn of the 131°M radial of the Vichy, Mo. VOR and the 258°M radial of the Farmington, Mo. VOR.

(3) BORDER, UTAH (VHF) INTSXN - intsxn of the 227°T radial of the Ft Bridger, Wyo. VOR and the 112°T radial of the Odgen, Utah VOR.

(4) DEATSVILLE, ALA (LF) INTSXN - intsxn of the N crs of the Maxwell, Ala. LFR and the NE crs of the Craig, Ala. LFR.

(5) DUNCAN, TEX. (LF & VHF) INTSXN - intsxn of the SW crs of the San Antonio, Tex. ILS lclzr and the SE crs of the Kelly, AFB, Tex. LFR.

(6) GREENVILLE, ALA. (LF) INTSXN - intsxn of the SW crs of the Maxwell, Ala. LFR and the SE crs of the Craig, Ala. LFR.

(7) HASLET, TEX. (VHF) INTSXN - intsxn of the N crs of the Ft Worth (Meacham). Tex. ILS lclzr and the 056°M radial of the Mineral Wells, Tex. VOR.

(8) LA GRANGE, N.C. (VHF) INTSXN - intsxn of the 009°M radial of the Wilmington, N.C. VOR and the 102°M radial of the New Bern, N.C. VOR. (changed to compulsory)

(9) NAVARRO, TEX. (VHF) INTSXN - intsxn of the 329°M radial of the Leona, Tex. VOR and the 058°M radial of the Waco, Tex. VOR, (changed to compulsory)

(10) RANDOLPH, IOWA (VHF) INTSXN - intsxn of the 144°M radial of the Omaha, Nebr. VOR and the 275°M radial of the Lamoni, Iowa VOR.

(11) SAYRE, OKLA. (VOR) - changed to compulsory.

(12) SPRINGVILLE, UTAH (VHF) INTSXN - intsxn of the 122°T radial of the Utah Lake, Utah VOR and the 165°T radial of the Salt Lake City, Utah VOR. (MRA 15,000 - delete flag)

(13) WAVERLY, VA. (VHF) INTSXN - intsxn of the 081°M radial of the Lawrenceville, Va. VOR and the 317°M radial of the Elizabeth City, N.C. VOR. (Elizabeth City VOR is to be relocated in 1958)

✓ OPERATION OF CONDENSER DISCHARGE TYPE FLASHING LIGHTS: Effective approximately March 10, 1958, control towers will operate condenser discharge type flashing lights where associated with approach light systems as follows:

Daytime - When the visibility without regard to ceiling is 3 mi or less at the approach end of the runway where installed, or on pilot's request.

During hours of Darkness - When the ceiling is 500' or less and/or visibility is one mile or less, or on pilot's request.

✓ VIA PLANNED ROUTE PROCEDURE: The phraseology "VIA FLIGHT PLANNED ROUTE" does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be used in each clearance.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective April 10, 1958:

(Part 608 - Restricted Area - Amendment 218)

(1) In Section 608.39, the Melrose, N. Mex., Restricted Area No. 2 (R-529) is added to read: Name and location (chart): Melrose, N. Mex. Restricted Area No. 2 (R-529) (Albuquerque); Description by geographical coordinates: That airspace bounded on the N by lat 34-39-00, on the E by long 103-40-00, on the S by Melrose Restricted Area R-185, and on the W by long 103-55-00; Designated altitudes: Surface to 15,000'MSL; Time of designation: Sunrise to sunset daily; Controlling agency: Cannon AFB, Clovis, New Mexico. Note: (The area will be used only when the ceiling is more than 3000' and visibility greater than 5 miles).

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

APC	Napa, Calif., Napa Co. Arpt (change from NPC March 15)
BLG	Belridge, Calif. (assignment)
COI	Cocoa, Fla., Central Brevard Arpt (Merritt Island) (name change)
ELN	Ellensburg, Wash., Ellensburg Arpt (name change)
GIL	Gillis, La., Radiobeacon (change from Gilbert, Ariz. etc.)
HCT	Hayes Center, Nebr., VOR (assignment)
HIB	Hibbing, Minn., Chisholm-Hibbing Arpt (name change)
ZAP	Apalachicola, Fla. (change from APC March 15)

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS: The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the Center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting). Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Beaumont	Mobile	Montgomery Local	WAC 410
Birmingham	New Orleans	WAC 119	WAC 466
Kansas City	Atlanta Local	WAC 357	WAC 525
Little Rock	Miami Local	WAC 409	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AERONAUTICAL CATALOG

A new edition of the Aeronautical Chart Catalog is now available.

✓ EVANSVILLE, INDIANA VOR SHUT DOWN: During shutdown the following MEA's can be utilized:

FROM	TO	MEA
Farmington, Mo. VOR via R-073	Marion, Ill. temp Int FAM R-073 and ENL R-165	2500
Marion, Ill. temp Int	Evansville, Ind. LOM via 075/255 bearing EVV-LOM	6500
Evansville, Ind. LOM via bearing 087/267 EVV-LOM	Apalona, Ind. temp Int SCJ R-168 and LOU R-270	7000
Apalona, Ind. temp Int	Louisville, Ky. VOR	2500
Centralia, Ill. VOR via ENL R-099	Evansville, Ind. LOM via 099/279 bearing of EVV-LOM	4400
Nashville, Tenn. LFR via bearing 388/158 on BNA LFR	Evansville, Ind. LOM via 338/158 bearing on EVV-LOM	11, 200
Evansville, Ind. LOM via 004/184 bearing on EVV-LOM	Terre Haute, Ind. VOR via HUF R-184	6000
Paducah, Ky. VOR via PUK R-038	Int 053/233 bearing on EVV-LOM	6500
Int 053/233 bearing on EVV-LOM	Evansville, Ind. LOM	6500
Evansville, Ind. LOM via brng 026/206 on EVV-LOM	Scotland, Ind. VOR via SCJ R-206	2000
Bowling Green, Ky. VOR via BWG R-322	Evansville, Ind. LOM via bearing 142/322 on EVV LOM	6500

✓ WICHITA FALLS, TEXAS VOR SHUT DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 114: CDS VOR - SPS VOR	Via CDS VOR 094°M radial and 277° M track from SPS L/F	3100
SPS VOR - DAL VOR	Via the 115°M track from SPS L/F and the DAL VOR 296°M radial	3000
Victor 114S: Santa Rose Int - SPS VOR	Via 256°M track from SPS L/F rng to SPS L/F rng	2300
Victor 102: Santa Rose Int - SPS VOR	Via 256°M track from SPS L/F rng to SPS L/F rng	2300
Victor 102S: Vera Int - SPS VOR	Via 241°M track from SPS L/F rng to SPS L/F rng	3000
Victor 77: OKC VOR - SPS VOR	Via OKC 192°M radial and the 010°M track from the SPS L/F rng to SPS L/F rng	2800
SPS VOR - ABI VOR	Via 212°M track from SPS L/F rng and the ABI VOR 024°M radial to ABI VOR	3100
Victor 77E: Bray Int - SPS VOR	Via the 027°M track from SPS L/F rng to the SPS L/F rng	2800
SPS VOR - ABI VOR	Via 197°M track from SPS L/F rng and the ABI VOR 039°M track	3800
Victor 61: LAW VOR - SPS VOR	Via LAW VOR 176°M radial and the 355°M track from the SPS L/F rng to SPS L/F rng	2600
SPS VOR - FTW VOR	Via 136°M track from the SPS L/F rng and the FTW VOR 306°M radial to FTW VOR	2600

The following intersections are redescribed as follows:

1. Westover: SPS LFR 212R - FTW VOR 276R
2. Vera: SPS LFR 241R - GTH VOR 092R
3. Alvord: SPS LFR 115R - FTW VOR 018R
4. Bray: SPS LFR 027R - OKC VOR 170R

✓ DALHART, TEXAS VOR SHUT DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 81: AMA - Purgatoire Int	AMA VOR 303R-DLH "H" 123R to DLH. DLH "H" 317R-Purgatoire Int	5300 10, 000
Victor 81E: DLH - Bivins Int	DLH "H" 104R-AMA VOR 321R	5200
Victor 190: Gage - Las Vegas	GAG VOR 252R-DLH "H" 072R to DLH. DLH "H" 249R-LVS VOR 065R	5200 9000
Victor 234: DLH - Conchas Dam Int	DLH "H" 232R-ACH 055R	10, 000

✓ LUBBOCK, TEXAS VOR SHUT DOWN: During the period of shutdown, the following substitute route structure and MEA's will be in effect:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 14: CDS - LBB	CDS VOR 233R-LBB LFR 052R	4500
LBB - Whiteface Int	LBB LFR 251R	4800
Whiteface Int - Caprock Int	LBB LFR 251R-ROW VOR 068R	7000
Victor 14N: LBB - Pep Int	LBB LFR 269R	4600
Pep Int - Dola Int	LBB LFR 269R	6000
Victor 62: LBB - Spur Int	LBB LFR 087R	5300
Victor 102: LBB - GTH	LBB LFR 073-GTH VOR 254R	4500

(Continued)

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
Victor 60 & 62: LBB - Texico	LBB LFR 298-TXO VOR 131R	5500
Victor 76: BGS - LBB	BQS VOR 329R - LBB LFR 149R	5100
Victor 79: HOB - LBB	HOB VOR 033R - LBB LFR 213R	5300
Victor 81: LBB - Pat Int	LBB LFR 174-MAF VOR 353R	5100

ATC PROCEDURES - EN ROUTE PROCEDURES and INSTRUMENT LETDOWN: On pages 61 and 62 of the Flight Information Manual Vol. II (dated August 15, 1957) delete the material under "EN ROUTE PROCEDURES" and "INSTRUMENT LETDOWN" and substitute the following instead:

EN ROUTE PROCEDURES - when the aircraft is proceeding in accordance with the latest traffic clearance but the pilot has not received and acknowledged a clearance for an instrument approach, the following procedures apply:

1. If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that airport, he will continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is higher, to the radio facility serving the destination airport;

2. If the pilot has received and acknowledged a clearance to an en route point other than the destination airport or the radio facility serving that airport and

(a) Holding instructions for the en route point have not been received, he will continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude whichever is higher, to the radio facility serving the destination airport; or

(b) Holding instructions for the en route point and expected clearance time for the airport of destination have been received, the pilot will comply with such instructions and continue flight to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is higher; or

(c) Holding instructions for the en route point have been received but no expected approach time for the airport of destination has been received, the pilot will comply with such instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue flight to the radio facility serving the destination airport maintaining the last assigned altitude or the minimum instrument altitude whichever is higher.

NOTE: The minimum instrument altitude referred to is the minimum en route IFR altitude established in Part 610 of the Regulations of the Administrator for that portion of the route over which the operation is conducted, regardless of the direction of flight. If deviation from the altitude assigned by Air Traffic Control is necessary in order to comply with a higher minimum instrument altitude, any subsequent descent required by a lower minimum instrument altitude shall not be made below the altitude last assigned by Air Traffic Control.

Example: A flight is cruising at 8000' (last assigned altitude) on an IFR flight plan when radio failure occurs. After passing the next fix, the minimum en route altitude is 10,000' and climb is made to that altitude. On the last leg of the flight the minimum en route altitude is 3500'. The flight descends back to 8000' after passing the fix defining the termination of the 10,000' minimum en route altitude segment since the last assigned altitude (8000') is higher than the MEA (3500').

3. If holding is necessary at the radio facility serving the destination airport and no holding clearance has been received and acknowledged.

(a) Holding will be accomplished on the side of the final approach course on which the procedure turn is prescribed; or

(b) Where approved military jet penetration procedures have been issued for the airport of destination, holding by military jet aircraft will be accomplished at the last assigned altitude and along the left side of the initial penetration course (tear-drop), or in the case of a single penetration course on the side on which the procedure turn is prescribed.

INSTRUMENT LETDOWN - 1. If a clearance for an approach has not been received and acknowledged, descent from the altitude maintained to the radio facility serving the destination airport will start at the expected approach time last received and acknowledged, or if no expected approach time was received and acknowledged, descent will be started at the estimated time of arrival indicated by the elapsed time specified in the flight time or as soon as possible thereafter. A full approved instrument approach procedure will be executed unless VFR conditions are encountered and the pilot elects to continue descent and approach in accordance with VFR.

2. If a clearance for an approach at the airport of intended landing has been received and acknowledged, comply with the clearance or other instructions and make normal descent for landing.

3. Shuttle. (a) Descent to the appropriate altitude for the execution of the instrument approach on the radio facility serving the destination airport will be accomplished by a holding pattern on the side of the final approach course on which the procedure turn is prescribed; or

(b) Where approved military jet penetration procedures have been issued for the airport of destination, military jet aircraft will descend to the initial penetration altitude on the radio facility serving the destination airport by a holding pattern on the left side of the initial penetration course (tear-drop), or in the case of a single penetration course on the side on which the procedure turn is prescribed.

NOTE: Air Traffic Control may issue appropriate instructions by means of "blind" transmissions on radio frequencies directly available or may authorize "blind" transmissions of appropriate instructions over air carrier radio facilities (for air carrier aircraft), and/or over suitable radio range facilities. Instructions should not be broadcast unless authorized by Air Traffic Control.

ATC PROCEDURES - EN ROUTE PROCEDURES and INSTRUMENT LETDOWN: On pages 61 and 62 of the Flight Information Manual Vol. II (dated August 15, 1957) delete the material under "EN ROUTE PROCEDURES" and "INSTRUMENT LETDOWN" and substitute the following instead:

EN ROUTE PROCEDURES - when the aircraft is proceeding in accordance with the latest traffic clearance but the pilot has not received and acknowledged a clearance for an instrument approach, the following procedures apply:

1. If the pilot has received and acknowledged a clearance to the destination airport or the radio facility serving that airport, he will continue flight at the altitude(s) last assigned by Air Traffic Control, or the minimum instrument altitude, whichever is higher, to the radio facility serving the destination airport;

2. If the pilot has received and acknowledged a clearance to an en route point other than the destination airport or the radio facility serving that airport and

(a) Holding instructions for the en route point have not been received, he will continue flight at the altitude(s) last assigned by Air Traffic Control or the minimum instrument altitude whichever is higher, to the radio facility serving the destination airport; or

(b) Holding instructions for the en route point and expected clearance time for the airport of destination have been received, the pilot will comply with such instructions and continue flight to arrive at the radio facility serving the destination airport at the expected approach time last received and acknowledged, maintaining the last assigned altitude or the minimum instrument altitude, whichever is higher; or

(c) Holding instructions for the en route point have been received but no expected approach time for the airport of destination has been received, the pilot will comply with such instructions until the time Air Traffic Control has specified that further clearance may be expected. He shall then continue flight to the radio facility serving the destination airport maintaining the last assigned altitude or the minimum instrument altitude whichever is higher.

NOTE: The minimum instrument altitude referred to is the minimum en route IFR altitude established in Part 610 of the Regulations of the Administrator for that portion of the route over which the operation is conducted, regardless of the direction of flight. If deviation from the altitude assigned by Air Traffic Control is necessary in order to comply with a higher minimum instrument altitude, any subsequent descent required by a lower minimum instrument altitude shall not be made below the altitude last assigned by Air Traffic Control.

Example: A flight is cruising at 8000' (last assigned altitude) on an IFR flight plan when radio failure occurs. After passing the next fix, the minimum en route altitude is 10,000' and climb is made to that altitude. On the last leg of the flight the minimum en route altitude is 3500'. The flight descends back to 8000' after passing the fix defining the termination of the 10,000' minimum en route altitude segment since the last assigned altitude (8000') is higher than the MEA (3500').

3. If holding is necessary at the radio facility serving the destination airport and no holding clearance has been received and acknowledged:

(a) Holding will be accomplished on the side of the final approach course on which the procedure turn is prescribed; or

(b) Where approved military jet penetration procedures have been issued for the airport of destination, holding by military jet aircraft will be accomplished at the last assigned altitude and along the left side of the initial penetration course (tear-drop), or in the case of a single penetration course on the side on which the procedure turn is prescribed.

INSTRUMENT LETDOWN - 1. If a clearance for an approach has not been received and acknowledged, descent from the altitude maintained to the radio facility serving the destination airport will start at the expected approach time last received and acknowledged, or if no expected approach time was received and acknowledged, descent will be started at the estimated time of arrival indicated by the elapsed time specified in the flight time or as soon as possible thereafter. A full approved instrument approach procedure will be executed unless VFR conditions are encountered and the pilot elects to continue descent and approach in accordance with VFR.

2. If a clearance for an approach at the airport of intended landing has been received and acknowledged, comply with the clearance or other instructions and make normal descent for landing.

3. Shuttle. (a) Descent to the appropriate altitude for the execution of the instrument approach on the radio facility serving the destination airport will be accomplished by a holding pattern on the side of the final approach course on which the procedure turn is prescribed; or

(b) Where approved military jet penetration procedures have been issued for the airport of destination, military jet aircraft will descend to the initial penetration altitude on the radio facility serving the destination airport by a holding pattern on the left side of the initial penetration course (tear-drop), or in the case of a single penetration course on the side on which the procedure turn is prescribed.

NOTE: Air Traffic Control may issue appropriate instructions by means of "blind" transmissions on radio frequencies directly available or may authorize "blind" transmissions of appropriate instructions over air carrier radio facilities (for air carrier aircraft), and/or over suitable radio range facilities. Instructions should not be broadcast unless authorized by Air Traffic Control.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

✱ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-70° have bends & roughness out of tolerance. (12-1)

AUBURN-OPELIKA ARPT: Rnwy lgts inop. Flare pots avail. on req. (1-10)

BESSEMER ARPT: Caution. Auto drag strip runs parallel to sod lndg strip with separation of 50'. Racing not done on rnwy. Drag strip ends mrkd. Racing Sun only. (8-28)

BIRMINGHAM-RADIO: Caution - E course LFR has severe multiples. VOR radials 045°-356° out of tolerance acct excessive roughness. (2-20)

BIRMINGHAM ARPT-TOWER: ILS-MM and LMM shut down - relctn. (8-7) About Mar 15, radar departure will be implemented, utilizing Anniston & Tuscaloosa VORs; Lehigh, Chelsea, Helena, Flat Creek, and Nathan intsxns as clearance limits. (2-14) FLD: Inbound VFR flgts in rdo equipped acft, contact Birmingham Apch Ctl on 119.9 or 385.6 mc approx 25 mi out for lndg info. Birmingham Apch Ctl will specify the reporting point where flgt will change to Birmingham twr freq. (1-13) Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft rqrg afterburners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. ILS apch lgt lane shut down for relctn due rnwy ext. (5-1)

CLANTON-WARE ISLAND ARPT: New arpt reported. Lctd 10 mi NE on an island in Coosa River. Lat 33-57, long. 86-31; elev 360'; 1 sod strip 2500' x 150'; no serv. (12-19)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru 360° out of tolerance acct excessive roughness and bends. (9-23)

EVERGREEN-MIDDLETON ARTP, 20, MSY-ATL: Rnwy & threshold lgts inop. (1-7)

**FAIRHOPE-KLUMPP ARPT: 999' (1201' MSL) lgtd twr erected 9 n mi N (12°T) at lat 30-40-55, long. 87-49-41. (12-6)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.

MOBILE-RADIO: VOR radials 018°-028° out of tolerance due to severe scalloping.

MOBILE-BATES FLD-TOWER: ILS glide slope inop - equip. and const vcnty trans bldg.

** FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution- 200' & 1/2 mi is absolute take-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10) 459' (645' MSL) lgtd twr erected 4.9 n mi SE (115°T) at lat 30-39-12, long. 88-08-59, dismantled. (2-13)

MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of tnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

✱MONTGOMERY-MAXWELL AFB-RADAR APPROACH CONTROL: Mar 4, RAPCON commissioned. Civil freqs: 121.5, 121.1, 125.5, 125.9: rcvr only 122.7; 3023.5 kc; trans only 112.1. Mil freqs: 137.88, 134.1, 136.8, 142.02, 363.8, 243.0, 225.4, 379.4, 335.8, 279.6, 289.4 mc. Rcvd too late for RAPCON page.

ARIZONA: AJO ARPT: Beacon and lights inoperative. (10-24)

**CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All serv. temp suspended. Emerg only.(4-23) Rnwy lgts decmsnd.(2-28) Rcvd too late for Directory of Arpts.

CLIFTON-GREENLEE COUNTY ARPT: Open daylgt opern only. (1-10)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

DRAKE-RADIO: Soon, VOR will be cmsnd. Ident: DRK. Freq: 113.1 mc. Lctd lat 34-54-04, long. 112-25-00. Elev: 4630' MSL. Class: VORW. (2-14)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr rqrd before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

ARIZONA: GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

MARANA ARPT: Reported inactive. (10-2)

PHOENIX-RADIO: About April 1, VOR/DME will be shut down until approx May 2 - conversion to VORTAC. (2-25)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take off xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx March 3 - conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int. -PHX; V105E PRC-PHX. (11-18)

SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)

SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)

TUBA CITY-RADIO: About April 11, VOR will be cmsnd. Freq: 113.9 mc. Ident: TBC Lctd lat 36-08-12, long. 111-16-15. Elev: 5045.17' MSL. (2-21)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi at 11,000'; 050°-060°, 22 n mi at 11,000'; 060°-175°, 35 n mi at 11,000'; 075°-085°, 21 n mi at 11,000'; 090°-170°, 40 n mi at 12,000'; 225°-230°, 40 n mi at 7000'; 330°-345°, 35 n mi at 11,000'; 345°-360°, 25 n mi at 11,000'. (7-17) Feb 3, VOR/DME shut down until approx April 4 - conversion to VORTAC. Following V arwys unusable durg IFR conditions: V16 Toltex Int. - CIE, V66 GBN-Vail FM, usable Vail FM to DUG MEA; Vail to Mescal Int 12000'; Mescal - DUG 10,000. V16S TUS-Mescal Int. (3-3)

TUCSON ARPT - SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz to be conducted week-ends -caution. (2-15)

TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at night. Obstn lgts apchs to rnwy 21 inop. (11-15)

TUCSON-DAVIS MONTHAN AFB-RADAR APPROACH CONTROL: About April 8, radar tfc ctl departure procedures will be implemented. (2-13) About May 8, radar tfc ctl arrival procedures will be implemented. (2-13)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-VINCENT AFB-SPECIAL NOTICE: Night weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of light and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4) Until approx. April 20, intense air-gnd pat. in area from Vincent AFB to Gila Mtns and from Arwy R9 S to Mexican Border. (2-20)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: BLYTHEVILLE - SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)

FT. SMITH-RADIO: About March 15, VOR will be shut down until approx April 30 - conversion to VORTAC. (2-15) Durg shutdown, VOR flights are authorized to use FSM BMH fac in lieu of FSM VOR on all arwys. Bears. and MEAs used shall remain as charted xcpt bear. from FSM BMH to Intsxn of 295° radial Little Rock VOR on V74 shall be 97°. Paris Int. redesignated as 97° from FSM BMH and FYV 160°. On V13, use 192° from FYV VOR to FSM BMH. MEA for VOR-equipped acft on V74 from TUL to FSM 7500' and on V13 from FYV to FSM 5500'.

LITTLE ROCK-RADIO: About May 15, VOR/DME will be shut down until approx June 14 - conversion to VORTAC. (2-27)

ROGERS ARPT: 349'(1749'MSL) lgtd twr being erected 3 n mi S(200°T) at lat 36-19-54, long 94-08-10. (1-22)

SEARCY ARPT: Clsd until approx March 30. Const. (12-30)

TEXARKANA-RADIO: DME coverage 145°-235°, 30 n mi at 1700';235°-270°, 35 n mi at 1800'.

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)

ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)

BLUE CANYON ARPT, 13, SFO-SLC: Closed due to snow. (12-18)

BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

CALIFORNIA: BLYTHE-HERON FLD: Caution - 90' TV antenna adj W. (1-24)

BURBAND-LOCKHEED AIR TERMINAL-TOWER: About March 17, radar departure control will be placed in effect - freq 118.4 clearance limits El Monte Int-Newhall LFR Saugus Int Fillmore VOR Camarillo LFR Burbank OM. March 20, ASR shut down until approx April 10 - equip. modification. (2-15)

CAMARILLO-RADIO: All LF rng courses have multiples. (6-17)

CRESCENT CITY-RADIO: VOR arwy radials flight-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flight-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (8-30)

EL TORO MCAS-RADIO: VOR coverage restriction at and below 10,000' MSL beyond 25 mi from 360° clockwise to 070°. (12-13)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR coverage 250°-090°, 30 mi; 090°-120°, 15 mi; 150°-250°, 20 mi at min en route alt. (12-2)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)

FRESNO AIR TERM: Extreme caution advised in vicinity of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N & E of arpt.

GLENDALE-GRAND CENTRAL ARPT: Extensive const. Fld clsd to all acft at sunset.

GOFFS-RADIO: VOR coverage 265°-310°, 25 n mi at MEA. Below 9500' this area beyond tolerance. (11-8)

GORMAN-RADIO: Soon, VOR will be cmsnd. Freq: 109.0 mc. Ident: GMN. Lctd lat 34-48-18, long. 118-51-42. Monitoring category (3). Class: VORW. (1-20)

LONG BEACH-RADIO: DME shut down until approx March 10 - relctn. VOR auto ident inop.

LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. VHF/DF bearings unreliable below 12,000' SW quad between 200° and 230°. About March 3, ASR-3 will be shut down until approximately March 8 - modernization of equipment. (2-6) FLD: 149' oil derrick lctd 1/2 mi S & 1300' SW apch end rnwy 30. Mrkd & lgtd. (2-7) Caution-temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1700P week days only, due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd, const, 6200' avail. Rnwy 12 clsd. Straight in ILS lndg min rnwy 30 day lgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' beyond 30 n mi. (4-19) FLD: Rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd, avail. 30 min request thru twr. Equip. crossing rnwy north of E/W taxiway. Rnwy 25R clsd when 16-34 in use. Ditches across N end 16-34, overrun area eliminated. Durg VFR wea conditions: Civil acft ctc twr on 118.9 mc or listen 118.9 mc trans 122.7 at least 10 mi out. Durg IFR wea: civil acft ctc apch ctl on 118.1 or 119.3 or listen 118.1 or 119.3 & trans 122.7. USAF, NAVY, CG: VHF equipped acft ctc apch ctl on 118.1 or 119.3 mc. UHF equipped acft ctc apch ctl on 250.2 or 260.0 mc. Pilots are urged to use extreme caution when operg off shore W of arpt. All jet acft departing rnwys 25L & 25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding east bound from Malibu or Pt Dume intsxn in VFR conditions making a track which approximates extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt & E of arpt between Downey rbn & arpt below 3000' in VFR wea. If desiring

CALIFORNIA: to cross apch area below 3000', ctc Los Angeles Apch Ctl before crossing. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt or between Los Angeles rbn and arpt. Avoid shoreline W due hi-performance jet acft. Apch lgt lane sequence flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (1-27)

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MARTINEZ ARPT: Clsd until approx June. (11-27)

MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)

NEEDLES-RADIO: About Mar 15, VOR will be shut down until approx Apr 15 - conversion to VORTAC. (1-24) Durg shutdown, the following MEA's will be unusable: V12, 1518 Daggett-Drake; V12N Dawes Station Int.-Daggett; V12S Needles-Prescott; V138 Blythe-Las Vegas, Ariz.; V208 Cones Int.-Needles; V237 White Hills Int.-Needles; V1520 Daggett Prescott. In addition the Hackberry, Peacock, Dawes Station, Clark and Silver Lake reporting points will be unusable. The White Hills Int. is temporarily redesignated as the Mormon Mesa 169° mag radial and the Las Vegas 105° mag radial. The Union Pass Int. is temp. redesignated as the Goffs 064° mag radial and the 181° mag bearing to Needles LF rng. The MEA on V210 Daggett-Godds will be 8500'. (1-24)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF coverage 40 n mi at MEA xcpt 020°-050°, 8000'.(1-17)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 7000'. About Mar 5, rcvr 122.5 mc will be
** chgd 122.6 mc. ((3-3) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd.(8-22)

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at MEA. (1-16)

OJAI-HENDERSON ARPT: Caution - construction, hazardous. (1-31)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000';200°-280°, 35 n mi at 7000'; 330-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13) Caution - men & equip. with 15' boom operg intermittently until approx May 1 from apch end rnwy 25 to a point 3000' E, installing apch lgts. (2-28)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000; 150°-180°, 35 n mi at 9000'. (3-14)

CALIFORNIA: PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000';235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W-adj to Pomona Heliport. (9-20)

POMONA-BRACKETT FLD: Operative during reconstruction. Caution - men and equip.

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)

RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°.

SAN DIEGO-MONTGOMERY FLD: Caution ngt lndg. Keep rnwy lgts in sight during apch. Fld unattended sunset to sunrise. Ditch 100' short of threshold lgts rnwy 28. (10-24)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

**SAN FRANCISCO INTNL ARPT-SPECIAL NOTICE: Preferential rnwy system under VFR conditions in effect as follows: TAKE-OFFS: (a) Use rnwys 1 when operationally feasible. (b) When rnwys 28 are used - climb to 1500' MSL as rapidly as practical. Acft making rgt turn, do so as soon as possible after passing arpt bndry unless otherwise instructed by twr. No left turns should be made prior to reaching San Francisco Gap Marker and 1500' MSL. (c) When rnwys 19 are used, large acft, under normal conditions, shall make left turn as soon as practicable after passing arpt bndry unless otherwise instructed by twr. LANDINGS: Normally use rnwys 28. Inbound acft normally maintain 2000' MSL until past the shoreline and over San Francisco Bay, unless making ILS apchs. Acft lndg rnwys 1 shall make a turn on to final as close to arpt and as high as is practical within limitations of acft. (3-1)

SAN FRANCISCO INTNL ARPT: Const in progress continuously on various sections of fld. Caution advised. (11-4)

SAN FRANCISCO BAY-SPECIAL NOTICE: A Moored balloon (silver with black stripes) 8' x 25' is flown 500' MSL on an irregular schedule from U.S. Naval Net Depot lctd on Tiburon Peninsula, daylgt hrs under VFR conditions. (10-14)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN JOSE-RADIO: TVOR has scalloping, beyond tolerance, 230° thru 240°. (11-12)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23) LF rng has numerous multiples NW and E courses. (9-17)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

SHOSHONE ARPT: Strip clsd for paving. (8-9)

STOCKTON ARPT: Caution taxiing - all taxiway lgtg inop. Unmrkd holes bordering edge of all taxiways. Const on apron, area 500' x 400', N of ctl twr. Area lgtd by barricaded.

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)

THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL;355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked. (10-11)

VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat & Sun after 1300. Jet acft make initial apch at4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25) Depressions along edges of east N/S taxiway. Taxi with caution. (1-14)

WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.

WOODLAND-WATTS ARPT: 200' at N end N/S rnwy under const. (9-5) Clsd to ngt opern. Use hard surfaced rnwy only (1-2-4)

YUBA VALLEY ARPT: Now under construction 2 mi E of Linda, 3200' lgtd rnwy, 2400' lgtd, 814 feet, 2-2

COLORADO: CHEYENNE WELLS ARPT: Sand drifts over 3' high - dangerous. (7-5)
COLORADO SPRINGS-PETERSON FLD: Caution - lndg acft-due to rise in terrain at apch end rnwy 21.
CRAIG ARPT: Rnwy clsd for const. Use 2500' strip immediately S rnwy. (8-27)
*DENVER AIR ROUTE TRAFFIC CONTROL CENTER: Feb 20, freq 126.6 mc cmsnd Pueblo peripheral site. Feb 27, freqs 125.1,124.6 mcs cmsnd Casper, Wyo. peripheral site.

DAYTONA BEACH-RADIO: VOR restricted to use for navigational fixes in and along control 1150 at or above published minimum reception alt. Navigational feature in all other portions of the facility service area beyond tolerance. Commun. feature usable thru out entire service area. (2-13) DME operg test-basis only. (1-30)
**DELAND ARPT: 1000' (1034'MSL) lgtd twr erected 7.8 n mi S (193°T) at lat 28-56-25, long. 81-18-33. (10-3)
FT LAUDERDALE-WEST PROSPECT ARPT: NE/SW rnwy clsd for const. Men & equip. on fld. (3-9)
FT. MYERS-RADIO: VOR radial 131° out of tolerance - excessive scalloping and bends.
HOMESTEAD AFB-SPECIAL NOTICE: Caution - extensive practice jet penetrations and instrument approaches in progress up to 20,000'. Tfc operating in Homestead Control Zone at all times. (1-11)
JACKSONVILLE-RADIO: DME and VOR coverage 35 n mi at min en route alt. VOR out of tolerance 180°-260°, with xcptn apch course 248° usable to 9 n mi. (10-28)
KEY WEST-SPECIAL NOTICE: Effective April 10, Warning Area W-174 redesignated so as to exclude that portion of W-174 which will conflict with Control Area 1233. Redesignate Caution Area C-175 to be bounded on the W by Control Area 1233 as redefined. (2-25)
KEY WEST INTNL ARPT: All acft enroute Intnl Arpt ctc Boca Chica Twr on 126.18 mc for tfc info when 20 mi out. If unable ctc twr, ctc Key West Rdo. Taxi on taxiways only. Large or fast acft taking off from rnwy 9 proceed straight out & pass S & E of Boca Chica Nas.
LAKE CITY ARPT: Fuel and servs unavail. (9-23)
MARIANNA-RADIO: VOR radials 90° thru 150° out of tolerance - roughness and bends.
MARIANNA-GRAHAM AIR BASE: AF Contract Primary School clsd Sat, Sun holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Approval for 1730-0700 weekdays must be obtained before 1500 on arrival day. No fuel avail for civil acft. No itinerant lndgs rnwys 18R-36L and 8L-26R. (5-16) Caution - rnwys 8R-26L and 4-22 clsd. Equip on rnwys all hours. (2-6)
MARIANNA-GRAHAM AIR BASE: 241' (437'MSL) lgtd twr being erected 5 n mi SW (231°T) at lat 30-46-53, long. 85-15-56. (2-7)
MIAMI INTNL ARPT-SPECIAL NOTICE: All flgts operg within an area of 10 n mi radius at ngt, at alts of 3000' or below, shall establish, prior to entry into area and maintain thereafter air speeds not in excess of 180 knots. Acft types having characteristics requiring min air speeds in excess of 180 knots shall maintain the lowest possible air speed consistent with safety. Miami's operators and pilots request cooperative compliance by itinerant flgts. Due to extra freq congestion on 126.18 mc, acft conducting IFR oper in this area should be equip. with additional freq: apch ctl 118.1 mc, IFR dptr ctl 119.7 mc, twr 118.3 mc gnd ctl 121.9 mc; twr also gds 122.7 mc; UHF freqs apch/dptr ctl 250.2 mc, 257.8 mc, gnd ctl 348.6 mc. Acft equip. with 126.18, 122.7 mc or any single channel transmitter & rcvr may expect IFR delay or diversion as necessary for safety. (2-11)

FLORIDA: MIAMI-RADIO: About Mar 18, DME will be shutdown until approx Jun 5 - relctn.
MIAMI AIR ROUTE TRAFFIC CONTROL CENTER: Freqs 121.5, 243.0 mc inop.
MIAMI INTNL ARPT: Following restrictions applicable to all jet acft operg into & out of arpt other than multi-eng transport types: when surface wind is less than 15 knots, lndgs authorized on rnwy 9 only and take-offs authorized on rnwy 27 & 30 only. Take-offs andlndgs lndgs will be into the wind when the surface wind exceeds 15 knots. Max performance climb out to 1000' required on all take-offs. Practice IFR apch prohibited. Tfc pat. will be as directed by twr. Tactical apchs prohibited. Due to non-visibility twr unable to ctl tfc on first 1200' rnwy 27R and portion of run-up pad. Adjusted threshold of rnwy 27R mrkd by red and white checked area and 2 green threshold lgts in lieu of normal 6. Unusable portion unlgtd. Effect length of rnwy now 8200'. Lndgs & take-offs shall be conducted W of adjusted threshold xcpt as necessary to meet gross wt restrictions. Pilots will then assume full responsibility for avoiding all surface tfc in blind area. Taxiways connecting N/S taxiway with W edge 20th St new term apron will be clsd as needed. Loading pier under const at 20th St term to point 400' S of old gates. Caution - exten ditching, paving & const at 20th St term & ramp areas. (1-17)
ORLANDO-RADIO: DME and VOR coverage 35 n mi at min en route alt.
ORLANDO ARPT-SPECIAL NOTICE: Caution advised all acft operating on Arwys Red 47, V152 within 5 mi radius Sanford NAS, & V267, V159 within 5 mi radius Pinecastle AFB extensive jet & conventional traffic surface to 2500' day & night. (2-7)
**ORLANDO ARPT: Portions of N/S taxiway E of rnwy 18-36 and NE taxiway not visible from twr. Pilots will assume full responsibility for avoiding all surface tfc in blind areas. (6-21) Men & equip. working near S side rnwy 13-31, 2000' from NW end. Use rnwy at pilot's discretion. (1-6) Rnwys 10R-28L and 17-35 perm clsd. Use for taxiing only. (2-24) 651' (749'MSL) lgtd twr erected 6 n mi WSW (266°T) at lat 28-32-10 long 81-27-00 (1-31)
PANAMA CITY-FANNIN FLD: Caution - soft shoulders. (11-21)
PENSACOLA ARPT: Rnwy 3-21 clsd temp for maintenance. (11-21)
QUINCY ARPT: N half arpt unusable - flagged. (6-21)
ST AUGUSTINE-FAIRCHILD ARPT-TOWER: About Mar 14, twr will be decmsnd. (2-28)
ST PETERSBURG-ST PETERSBURG-CLEARWATER INTNL ARPT: Rnwys 13-31 and 4-22 open daylgt hrs only. (2-13)
TALLAHASSEE-RADIO: VOR radials 70°-150° out of tolerance acct excessive roughness. LF rng may be substituted on Victor arwys served by unusable radials. MEA remains as charted. (10-11)
**TALLAHASSEE-DALE MABRY ARPT: Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate. Non-air carrier acft exceeding 50,000 lbs rqr prior permission. (10-7) Rnwy 9-27 clsd for lndg & take-off xcpt to acft under 7000 lbs. 10' fence erected across E end of rnwy 590' from E bndry. Usable rnwy length 3765'. Rnwy 9-27 clsd ngts. (2-27)
TAMPA-SPECIAL NOTICE: Civil acft operg VFR in Tampa Bay area should avoid MacDill AFB control zone or remain above 2500' unless in contact with and cleared by MacDill AFB twr. Mil acft operg VFR in Tampa Bay area should avoid Tampa Intnl and St Petersburg-Clearwater Intnl control zones or remain above 2500' unless in contact with and cleared by the appropriate control twr. Additional caution should be exercised in entire area regardless of altitude due large numbers acft operg VFR therein. Extensive practice jet penetrations and practice instrument approaches in progress at all arpts. (7-11)
TAMPA-RADIO: VOR courses 95°-105° out of tolerance acct scalloping. (8-13) About Mar 15 VOR will be shut down until approx May 2 - conversion to VORTAC (2-16) During shutdown the following temporary routings and MEAs will be used: The LFR may be substituted for VOR using direct courses to FMY VOR 1500 LEL VOR 1500 CTY LFR 1500 ORL VOR 1700 LAL 1800 TLH LFR 1500 in lieu of V arwys. Additional routes authorized are FMY VOR DCT Egmont Rbn 1500 LEL VOR DCT Egmont Rbn 1500 CTY LFR DCT Egmont Rbn 1500 TPA OM to Homo Int via ILS N course 1500 ORL LFR to Tampa LOM via Zephyrhills RBN 1700 Egmont RBN to LOM 1500 LAL VOR LOM direct 1500 LEL VOR to LOM via Intsxn LEL 320° LAL 235° 4500 LEL Intsxn then 1800 to LOM. VOR coverage 30°-90°, unknown prohibited area; 90°-130°, 40 n mi at 5000';130°-195°, 8000';195°-30°, 40 n mi at 10,000'. (9-20)

WEST VIRGINIA: BECKLEY-RADIO: Dec 16, VOR placed on test basis only. Freq: 109.8 mc. Ident: BKW. Lctd lat 37-46-49, long. 81-07-25.

CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000';270°-330°, 26 n mi at 2500'. (6-14)

CHARLESTON-KANAWHA COUNTY ARPT: Taxiway B clsd for repair to slide from SE end rnwy 32 to E side of county ramp. (1-8)

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000';95°-120°, 35 n mi at 6800';120°-165°, 26 n mi at 6800';165°-195°, 35 n mi at 6800';195°-220°, 43 n mi at 6800';220°-35°, 43 n mi at 5000'. (7-1)

ELKINS ARPT: Rnwy 4-22 clsd ngt opern acct rnwy lgts inop. (1-15)

HUNTINGTON-TRI-STATE ARPT: Men & equip N & S of rnwy and 200' beyond W end, daylgt hrs only. Ditches along N side rnwy. Use rnwy only. Four antenna posts 8' high, 200' beyond E end of rnwy. Obstn lgtd.

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500';95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Taxiway from civil parking ramp S to rnwy 35 clsd acct parked jet acft. Jet & other hvy acft use rnwy 8-26 regardless of wind direction. Other civil tfc land according to tfc direction indicator located adj to NE taxiway running from civil ramp to rnwy 8-26. For rnwy info call Martinsburg Rdo. Caution lndg rnwy 17-35. Watch for conflicting jet tfc. (11-14)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses. About Mar 17, VOR/DME will be shut down until approx Apr 1-conversion to VORTAC. See page 77 for substitute route structure and MEAs, and temp non-compulsory reporting points durg shutdown period.

RAINELLE-RADIO: Feb 19, VOR placed in opern on test basis only. Freq: 108.8 mc. Ident: RNL. Lctd lat 37-58-32, long. 80-48-20. (2-19)

WISCONSIN: EAGLE RIVER ARPT: 148'(1758'MSL) unlgtd twr being erected 3 n mi S(200° T) at lat 45-52-50, long. 89-17-26. (11-22)

EAU CLAIRE ARPT: 265'(1191'MSL) lgtd twr being erected 7.1 n mi NE(46°T) at lat 44-56-54, long. 91-22-55. (10-21)

FOND DU LAC-COUNTY ARPT: New arpt reported. Lat 43-46, long. 88-29;elev 808'; 1 rnwy N/S 3600' x 100' hard surface; facs: bcn, rnwy lgts, F4 fuel, S5 serv, Unicom. E/W rnwy under const. Equip. on field. (11-27)

HAYWARD ARPT: 306'(1491'MSL) lgtd twr being erected 4.5 n mi WSW(244°T) at lat 45-59-03, long. 91-32-20. (11-22)

WISCONSIN: MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22,26,31. E taxiway N of admin bldg perm closed to all acft over 10,000 lbs. Sod unsafe.

MERRILL ARPT: Closed due construction. (10-3)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equipped with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and alt. (5-10) VHF/DF coverage 3500' at 40 n mi all azimuths. ILS glide slope unusable from MM to touchdown. No automatic apchs. (11-18) FLD: Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd; itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusing rnwy 1 with parallel taxiway to left. (8-15) Rnwy 13-31 clsd to jet acft. (8-21) 4350' rnwy 7L-25R open to daylgt opern only. 630' not usable mrkd with yellow line and yellow cone. (11-20)

OSHKOSH-RADIO: VOR coverage 205°-235°, 36 n mi at MEA. (1-20)

OSHKOSH-WINNEBAGO CO. ARPT: Caution-bldg const on fld-use rnwys only. Use only N/S and E/W rnwys during winter months. (2-21)

PHILLIPS ARPT: 100' unlgtd TV twr erected 900' W of S end of N/S rnwy. (6-26)

WATERTOWN ARPT: 103'(923'MSL) lgtd pole & pipe supporting an antenna being erected approx. 0.8 n mi N at lat 43-10-57, long. 88-43-15. (10-23)

WAUSAU ARPT: 648'(2549'MSL) lgtd twr being erected 3.1 n mi WSW(263°T) at lat 44-55-10, long. 89-41-12. (11-12)

WOODRUF-ARBOR VITAE ARPT: Attended part time until May 1. Fone Minoqua 367 for service. (11-12)

WYOMING: CASPER AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. (12-5)

CHEYENNE-RADIO: About May 1, VOR/DME will be shut down until approx June 1-conversion to VORTAC. (3-1)

GILLETTE ARPT: Rnwys open & usable as follows: S3400' of N/S, 2300' of NW/SE, 3000' E/W, 3000' NE/SW. N 2000' of N/S rnwy soft & rough. Not maintained. Emerg or overrun only. (11-5)

GREYBULL ARPT: E/W rnwy clsd. Const equip. stored E of N/S rnwy. (11-12)

JACKSON ARPT: Bcn & rnwy lgts turned off for remainder of winter. (12-19)

KEMMERER ARPT: Clsd. Unsafe for acft. Use only in extreme emerg. All lgts turned off.

LARAMIE-RADIO: DME coverage 155°-225°, 34 n mi at 15,000';225°-300°, 26 n mi at 15,000'.

NEWCASTLE-MONDELL ARPT: Caution-men and equip. working on rnwy 14-32. (8-9)

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LFR. (1-16)

SARATOGA-SHIVELY ARPT: Const in progress 1500' SW end NE/SE rnwy-area mrkd by red flags. (8-16)

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

THERMOPOLIS ARPT: Caution-1800' S end N/S rnwy clsd-const;only 3300' avail. (12-5)

TORRINGTON ARPT: Oil well storage tanks lctd on S edge E/W rnwy 300' from W end. Oil well pumping unit lctd on E side NE/SW rnwy 300' from SW end. New arpt and rnwy under const 1 mi E of town. Clsd to all tfc until completion approx. Mar. (11-11)

PUERTO RICO: SAN JUAN-PUERTO RICO INTNL ARPT: Due to non-visivility, twr unable to ctl tfc S portion of taxi strip leading to Air National Guard ramp and ANG ramp area. Pilots will assume full responsibility for avoiding all surface tfc in blind area. Caution-parking circles 2,3,4 & 5 on N departure ramp not fully visible from twr. (2-26)

VIRGIN ISLAND: ST THOMAS-HARRY S. TRUMAN ARPT: Men surveying & test boring 500' E of rnwy. (1-14)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

NORWOOD, MASS., -NORWOOD MEMORIAL ARPT, ADF Proced. No. 1, Original, Effective 15 March 58: Please destroy the above procedure, issued with Transmittal Letter No. 58-4. New procedure to be issued in the near future.

DETROIT, MICH., -WILLOW RUN ARPT, Comb. ILS/ADF Proced. No. 4R-L, Amdt. 9, Effective 29 March 58: In the location line, correct Procedure No. to read "4R-L" in lieu of "14R-L".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots
